COOKING FUN

By BETTY COOK For ANP

With the increasing interest in and facilities for do-it-yourself jobs and with Christmas only a few months away, it's welcome news that a leading food company will offer in one of its cereal packages patterns for building furniture accessories.

A useful and practical premium, we'd say, for the pieces are the kind that every woman would be proud to have in her home or to give as gifts.

These packages which come in boxes of Post's Grape-Nut Flakes are for charming reproductions of antiques to be made from fir plywood which is now available in handy, small-size panels to suit the needs of home craftsmen.

There are six patterns altogether, one to each box of cereal. They include a Pennsylvania wall box, an early American courting mirror, a Williamsburg wall shelf, a Pilgrim cradle, a Pilgrim footstool.

And—which may well be the most popular of all, there's also a Pennsylvania Dutch knife box like the one the boy inn the picture elsewhere on this page so proudly holds.

All of these "collector's items" are authentic reproductions designed by Lurelle Guild, noted author-designer and one of the world's foremost authorities on Early American antiques. The patterns are full-size, meaning no blueprints or scaling to copy with, and they contain complete instructions clear enough for a teenager to tackle.

Although you can buy almost any kind of mix these days at the corner grocery, have you ever thought of making your own mix and storing it for future use? If you make your own it will impart a little more of that "home-made" flavor to your baked product.

Here is a recipe for a biscuit mix that will save you many hours in the kitchen.

Biscuit Mix

8 cups flour
4 teaspoons salt
1 to 2 cups dry milk solids may be included
3 tablespoons double-acting baking powder
1 cup shortening (which does not require refrigeration)

METHOD: Sift together thoroughly the flour, salt, baking powder, and dry milk solids if used. Work in the shortening with fingers, two knives, a pastry-blender until the mixture looks like coarse meal. Place in a tightly covered container until ready to use.

The cup of biscuit mix will make six to eight biscuits, depending upon the size of the cutter. Measure the amount of biscuit mix needed into a bowl. Add ¼ to 1/3 cup milk or water for each one cup of mix used.

Stir until all the flour is moist and a soft dough is formed. Place dough on a slightly floured board and knead about 15 strokes. Pat or roll dough to ½ inch thickness. Cut with a floured biscuit cutter. Place on an ungreased pan and bake in a hot oven (450 degrees F.) for about 12 minutes.

For an interesting variation, try making cheese biscuits by using one cup of grated cheese for each two cups of biscuit mix. Mix cheese with dry ingredients before liquid is added.

IT'S APPLE SEASON

Apples go with autumn as do turning leaves, haystacks in brown fields, and the smell of wood fires. Apples go in chubby hands to the teacher, they go in the lunch-box and in mouth-watering crimped-edged pies. They go delightfully, too, in many baked desserts as for example the Apple Ring Tapioca pictured elsewhere on this page. This thrifty and nutritious dessert, served warm with cream, will be a favorite with every member of the family.

What to serve with it? Here's a typical menu:

Meat Loaf with Catchup
Browned Potatoes
Buttered Cabbage
Bread and Butter
Baked Apple Ring Tapioca

It is good planning and fuel-saving of course to bake more than one food in the oven when it is heated. The meat loaf will bake almost an hour at 400 degrees Fahrenheit. The dessert bakes at the same temperature for half an hour. The potatoes, after being boiled in their jackets, may be peeled and placed around the meat loaf to brown. Potatoes will brown better if basted with fat that collects in the pan as the meat loaf cooks.

Busy mothers will be agreeably surprised at how easily such a good meal as this can be cooked and served and they will beam with pleasure over the compliments they will get on the delicious Apple Ring Tapioca.

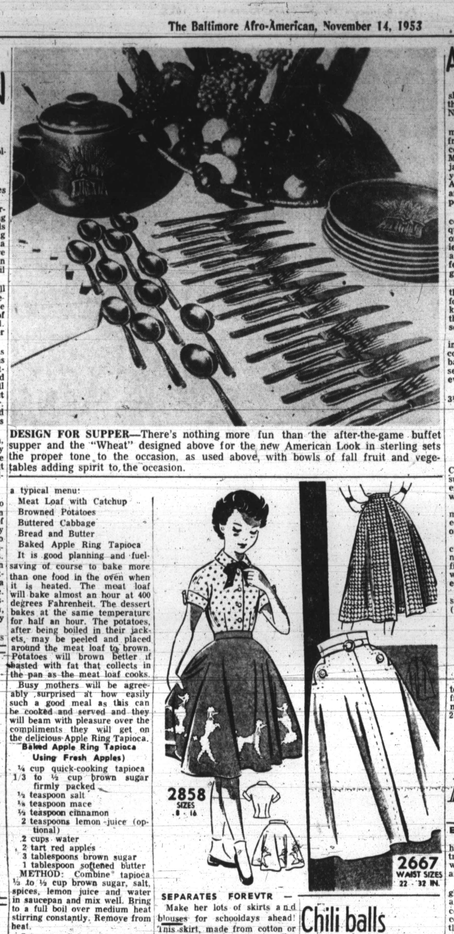
Baked Apple Ring Tapioca
Using Fresh Apples)

¼ cup quick-cooking tapioca
1/3 to ½ cup brown sugar firmly packed
½ teaspoon salt
¼ teaspoon mace
½ teaspoon cinnamon
2 teaspoons lemon juice (optional)
2 cups water
2 tart red apples
3 tablespoons brown sugar
1 tablespoon softened butter

METHOD: Combine tapioca ½ to ½ cup brown sugar, salt, spices, lemon juice and water in saucepan and mix well. Bring to a full boil over medium heat stirring constantly. Remove from heat.

Core unpeeled apples and cut in ¼-inch rings (makes about 10). Arrange half of rings in greased baking dish. Cover with tapioca mixture.

Add 3 tablespoons brown sugar to butter and mix well. Spread over tops of remaining apple rings. Arrange rings sugar-side up on tapioca mixture. Bake in hot oven (400 degrees F.) 30 minutes or until apples are browned. (If necessary, place under broiler to finish browning.) Serve warm, plain or with cream. Makes 4 to 6 servings.



DESIGN FOR SUPPER—There's nothing more fun than the after-the-game buffet supper and the "Wheat" designed above for the new American Look in sterling sets for proper tone to the occasion, as used above, with bowls of fall fruit and vegetables adding spirit to the occasion.

Easy Does It...

EASY DOES IT HEDUP

Rid your home of common household pests by simple control measures and your living will be more sanitary and pleasant.

Tight - lidded containers or glass jars with screw type tops are best for preserving flour and cereal foods which often become infested with weevils, beetles and flour moths. Destroy any food which has become infested and start with fresh materials, properly stored.

Flour bins which have become infested with moths will have to be cleaned out and sun-dried. Spray if the infestation has been serious.

If sprays are used against insects, use a spray which will give off a fine mist and leave the room sprayed completely closed for 15 minutes afterwards.

Borax scattered over areas which have been infested with silverfish, is safe and effective. Other insect powders work more quickly than borax but are not as safe. Let the borax remain for some time to be completely effective, and use it when storing any of the items mentioned.

If you've had infestation with carpet beetles, plan to take up and turn the rug at least twice a year. Use thorough cleaning methods and spraying at this time.
