Draw new plans for TB X-rays

At a special meeting held this week in the office of Dr. Huntington Williams, commissioner of health of Baltimore City, plans were discussed relative to the excess of tuberculosis cases in Baltimore City and particularly in those areas of the city in which there are organized community councils.

In addition to the Commissioner of Health, the meeting was attended by Frank Jones, executive director of the Maryland Tuberculosis Association, Dr. Charlotte Silverman, director of the City Health Department's Bureau of Tuberculosis;

Also Michael F. Kelley, supervisor of Area Projects of the City Welfare Department and the Area Project Coordinators on his staff; and other staff members of the City Health Department and the Maryland Tuberculosis Association.

It was indicated that future scheduling of chest X-rays survey would be determined jointly by the City Health Department and the Maryland Tuberculosis Association and based upon statistical studies of the needs of various areas in the city, and other groups for such surveys.

In this planning the Area Community Councils play an important part because of the large groups of the population with which they work. Their advice and counsel will aid in the formulation of this new approach to tuberculosis case-finding.
