WHAT ARE YOU MAKING, COUSIN? — Planning their schedules for the spring semester at North Carolina College are three freshman cousins enrolled at the institution. Left to right, they are Larry Nunn, Jackie Edwards, and Lacy Nunn. Lifetime residents of Chapel Hill, N.C., the three plan academic professional careers in the social sciences.

N.C. College's 3 freshmen cousins plan related careers

DURHAM, N.C. — Together almost since birth, North Carolina College's freshmen Larry Nunn, Lacy Nunn and Miss Jackie Edwards have more in common than most cousins.

Larry Nunn and Miss Edwards have been in school together since the beginning of their education; Lacy Nunn was with his two cousins through elementary and junior high school in Chapel Hill and is reunited with them in college.

Lacy, the son of Mr. and Mrs. Irving Eugene Nunn of Route 2, Chapel Hill, attended Chapel Hill's Lincoln High School, where he was president of the student council and salutatorian of his senior class.

The other two cousins attended Chapel Hill High School, where Larry was president of the business club of which his cousin was an active member.

• • •

DESPITE THE early interest in business, all three now plan careers in the social sciences. Larry hopes to do social work after majoring in sociology; Lacy will major in sociology but wants more time to plan his career; Miss Edwards, a psychology major, plans to work with mentally retarded children.

All three were born in Durham and have lived all their lives in Chapel Hill. Larry lives with his parents, Mr. and Mrs. William C. Nunn, about a quarter of a mile from his cousin Lacy's home. Jackie, whose mother died some years ago, is the daughter of James Edwards of 509 Gomains Avenue, Chapel Hill.

New prexy sparks progress at Allen

COLUMBIA, S.C. — A breath of collegiate fresh air in a metropolitan, educational center; a co-educational, liberal arts college which provides basic cultural exposure and concentration in many areas of learning.

A growing, developing institution making significant improvements in physical facilities and instructional materials; a college which constantly strives to secure a competent instructional staff.

An institution whose heritage is rich and deeply rooted in the history of our nation, and whose graduates more consistently than not reflect honor upon her.

This is Allen University.

• • •

SUFFERING MANY problems typical of small, church-related institutions of higher learning, Allen recently embarked upon a serious growth and development program under its relatively new president Dr. Benjamin J. Glover.

Under his administration several liberal arts curricula have been reinstated, new ones introduced to meet the space-age needs of ambitious students, internal organization improved, and a new building program launched.

President Glover has secured a Federal grant and loan for a new science building which will be ready for occupancy in September. This structure will house the biology, chemistry and mathematics departments and the new physics department.

Plans are also underway to include courses in earth science.

• • •

MORE RECENTLY funds have materialized to expand on-campus housing. The present and projected building program are being made possible by alumni and friends garnering matching funds for government grants and loans.

Academic pursuits are meshed with co-curricular activities. Hence, Allen participates in inter-collegiate sports, permits numerous clubs, sororities and fraternities, provides many activities in which students may engage and develop; and sponsors programs and activities which culturally expose the student.

At Allen every effort is made through several financial-aid programs to help the mentally alert student secure an education.

DR. B. J. GLOVER
President, Allen University

At ITT the career choices are varied ...the opportunities, singular.

One of the factors working in your favor at a company like ITT is that your degree provides you with a lot more than just a chance to get started.

Here at International Telephone and Telegraph Corporation, we're diversified enough (telecommunication systems; satellites; space communications; data processing; air conditioning, heating, ventilating; industrial pumps, crop sprayers; flow controls, meters; electronic and automatic control systems; semiconductors; and what have you—finance, investment, insurance, car rental services, even the Job Corps) to start you off on a career in your area of specialization.

We're widespread enough (labs, plants and sales/service units staffed by 40,000 ITT people in 250 cities and towns in the U.S. alone; plus a vast and far-flung international network) to offer you some choice in location.

And we're big enough (our 1965 sales were $1.8 billion) and growing fast enough (235% bigger in the past six years) to give your career a quick boost, and give you room and opportunity to grow at your own pace from there on.

What's your field? Engineering, science, business administration, liberal arts? Your opportunity is here, right now, at ITT—in research, design, development, manufacturing, production control, finance, purchasing, sales, marketing. And that opportunity is every bit as big as you want to make it. If you have the ambition and the ability to get ahead, you'll receive help and encouragement every step of the way. All the way to the top. How about taking that first step now?

For detailed information, please forward your resume to Manager, College Relations, International Telephone and Telegraph Corporation, 320 Park Avenue, New York, New York 10022. An Equal Opportunity Employer. (M/F)

Opportunities in science, engineering, administration and/or sales may be found at one or more of these ITT facilities:
