BUILD takes insurance fight to Hughes

Members of the BUILD organization that has attacked several insurance companies for what they call "unfair policy practices" took their charges to the governor this week.

While the representatives of the group called Wednesday's meeting "productive," the organization's president Phyllis Douglass stated, "The governor seemed interested and receptive but the proof is in the pudding."

BUILD, a bi-racial organization comprised of members of the the city's various churches, conducted a study of automobile insurance rates for people who live within the metropolitan area and learned that policy holders pay anywhere from $118 to $205 more a year than residents in the county for the same policy.

Armed with their study and with similar studies conducted in New Jersey and Massachusettes, several members of the group met with Hughes and asked his support in changing the prescribed rating area.

The group sought the meeting with Hughes after a November meeting with State Insurance Commissioner Edward Birrane did not provide the answers they were seeking.

"The governor lived in Baltimore and he had to pay the high premiums, so he knows what we are talking about," said Mrs. Douglass. "People are hurting now. They're in an economic crunch and they can't afford to pay higher premiums."

She added, "In examining this insurance issue, we've discovered an underlying racial issue."

The group anticipates another meeting with the governor in January after he's had time to review their findings and conduct his own research.

Banker encourages minority lending

Ronald Grzywinski, chairman of the board of the South Shore Bank of Chicago, addressed a luncheon held last week by the Greater Baltimore Committee.

In 1973, Grzywinski led a group of investors in the formation of the Illinois Neighborhood Development Corporation, a regulated holding company, and acquired the South Shore National Bank of Chicago.

Under his management, the bank restored all of the $40 million deposit loss that had accompanied racial change during the preceding four years.

The bank has made more than $33 million in development loans in the predominantly black community of Chicago's South side.

Grzywinski, speaking before more than 200 business representatives at the minority business development luncheon Dec. 8, urged the support of minority businesses and increased lending practices.

"If banks are really going to get involved in minority business development, it must be done on a serious level. It cannot be done with some mediocre performance and in a half-hearted way," he said.

The bank operates a development loan program to neighborhood residents for housing, business and community services, and in 1977, created three additional non-bank subsidiaries for neighborhood development.

The purpose of the luncheon, held at the Hyatt Regency, was to foster a better understanding of the problems of minority-owned enterprises and the current issues involved in the development of minority business enterprise programs.

Also, to foster dialogue and business contacts between the black and white business communities in Baltimore.

Residential unit sales down

The Greater Baltimore Board of Realtors reports that the number of residential units sold in November 1981 was 621 as compared to 803 in November 1980, representing a 22 percent decrease.

The dollar volume for November 1981 was $40,091,367, a 19 percent decrease from the $49,627,261 figure for November 1980; and the average sale price of a house was $64,559 in November 1981 as compared to $61,802 during the same month one year earlier.

The Board of Realtors also reports that the year to date totals, January through November, show the average price of a house to be $62,961 in 1981 as compared to $59,804 in 1980.

The total number of units sold in 1981 is 10,436 as compared to 12,550 in 1980, representing a 16 percent decrease, and dollar volume decreased 12 percent from $750,545,746 in 1980 and $657,060,829 in 1981, for the same time periods of January through November.

These figures are compiled by the Central Maryland Multiple Listing Service, a wholly-owned subsidiary corporation of the Greater Baltimore Board of Realtors and include net totals from Baltimore City and Baltimore, Howard, Harford and Carroll Counties.

Loyola offers course for businesses

Loyola College in Maryland is offering to area business and industrial firms a new program of management training and organizational needs assessment.

The program, the Institute for Management Improvement (IMI), is designed to develop manager's skills and increase productivity.

The Institute's curriculum and services were developed and coordinated by the Higher Education Management Institute (HEMI) and fully funded by Exxon Corporation.

Loyola is one of 25 colleges and universities selected by HEMI to provide the IMI program in the United States and Canada. Through its Professional Development Program, Loyola is offering the IMI as an in-house management development program to interested businesses and firms with 100 or more employes and annual sales volume of $20,000 or more.

The program provides companies two essential development services: a survey - based organizational needs assessment, and 26 management training courses.

IMI professionals will administer the needs assessment and work with a company's management group to develop an "action plan" based on the findings.

The action plan will usually incorporate a schedule of training courses into the firm's overall management development strategy.

The program's instructional approach emphasizes the application of management concepts to the manager-participants' workplace.

Accordingly, 70 percent of course time is allocated to participant feedback, practical application and action planning.

Benefits of the IMI program are adaptability of training modules tailored to a firm's specific needs, a needs assessment process which helps identify specific needs, and experienced and qualified professionals who teach the modules.

For more information on the Institute for Management Improvement, call the college's Professional Development Programs office at 323-1010, ext. 374.

Feeding 11 people

Can you send a basket of food for 9 children who are staying with me because their mothers were dropped from the welfare rolls?

They couldn't afford to pay rent, buy food clothes and so on with the little money they make on their jobs.

Being a grandmother and caring like I do, I asked them to bring the kids into my home until they are able to care for them.

The children need shoes, coats, underwear and food. Feeding 11 people with a little bit of food is no easy job. Anything you send will be helpful.

The Park Circle Club presented AFRO's Mrs. Santa with $50. Above, Mrs. Mamie Peterson, treasurer; (Photo by Vanessa Johnson) Mrs. Buena Vista Prettyman, president; and Mrs. Lillian Young.
