EXPERIMENTS ON THE FARM.

A Paper Read Before the Kent Co. Agricultural Association.

In general farm and garden culture, the opportunities for investigations are endless, and the methods are simple. The trial of new seeds; the variation of time of planting and harvesting to determine the best results; experiments with new or unusual crops, as seed raising, new fodder crops, such as millet, sorghum and others; the effects of drainage; the value of special fertilizers, as lime, bone dust, potash; the trial of the various remedies suggested for insect pests, the methods for preserving posts and other timber; the feeding and management of stock; ensilage; the production of new varieties of vegetables, fruits, grains and fodder plants, by selection, and it may be, by crossing the existing varieties; the invention or improvement of agricultural implements, etc.—these are a few of the very interesting branches of agricultural investigation.

Consider next the methods of experiment. There are two great essentials at the foundation; exact measurement, and exact record.

Measure everything, either by weight, by dimensions, or by duration of time, and keep a systematic record of everything. Add to this thoughtfulness, and you have the whole secret of experimental science.

Think what you desire to ascertain and direct the experiments accordingly.

Think over the results of your experiments carefully, and draw your conclusions. In dealing with crops the customary method is, to divide a sufficient area of land into carefully measured small plots, and use each plot, or a number, for any particular plant under trial.

Where it is a question of soil or manures, always have the crop under test on at least one plot, the soil of which is left in the natural condition. This last serves as a basis of comparison with other plots that have been variously fertilized.

Burlington's Big Hogs.

Joseph Carter, of Crosswicks, Burlington co., N. J., killed his prize hogs on Saturday, and for three days he enjoyed the title of champion hog-raiser of New Jersey, if not of the world. On Tuesday Taylor Devinney, of Wrightstown, Mr. Carter's rival, killed his prize lot, and now claims the championship. There were about five hundred people present on both days, and great interest was manifested. "Guessing-boxes" were provided for those who cared to invest money on their ability to guess near the weight of any particular animal, or of the lot. A brass band and a public dinner were also among the attractions. Following are the weights of Mr. Carter's twenty: 1,064, 1,015, 895, 893, 880, 879, 875, 840, 830, 827, 821, 814, 795, 765, 793, 785, 780, 779, 755, 751. Mr. Devinney's four largest weighed 1,079, 1,055, 1,035 and 1,025, and with the other sixteen the lot of twenty averaged 872 pounds. The lightest hog in his lot weighed 739 pounds. These weights are net, after the animals have been hung on the shambles dressed, and deducting the gambrel and stretcher. Mr. Devinney's heaviest was 6o inches long from the ear to the ham, and the girth was 89 inches. Mr. Carter's heaviest was 71 inches long and 76 inches girth. His twenty heaviest averaged 843 pounds. Both lots were less than two years old, and some of them not over a year. They are of the common Jersey Red breed. Mr. Devinney also killed eight "pigs," less than a year old, that weighed from 395 to 520 pounds.

MAJOR STOUT (a republican, to Col. Slim, a democrat)—"I say, kurnel, has President Cleveland replied to your application for the Collectorship of the port of Galveston?"

Col. Slim—"I haven't had any reply from Grover yet. I can't understand the delay."

Major Stout—"It's hardly time for you to hear from Cleveland. I applied to President Arthur for a postoffice three years ago, and he hasn't answered my letter yet."

THE golden days when the New England legislator used to "make expenses" and save his salary by sawing wood and carrying a dinner pale have passed away. But in Connecticut he still manifests a thirsty disposition by leasing his railroad pass at $2 per day.—*Detroit Free Press.*

WILLIAM TRAVERS, wit and comical stutterer, was met the other day by a friend, who said: "It seems to me you stutter more since you have lived in New York than you did when you lived in Baltimore." To which Mr. Travers replied: "Of c-c-course I do; b-b-bigger town."

A BANK OFFICER.—"What're ye doin' now, Bill?"

"Teller in a bank."

"The deuce! What d'ye have to do?"

"Have to tell when the stove needs more coal in it?"

CONGRESSMAN-ELECT RICHARDSON, of Tennessee, stands seven feet in his stockings. Whenever he raises to address the chair it will be a game of seven-up.—*Lowell Courier.*

PRIDE is consciousness of what one is without contempt for others.

DISCONTENT with one's gifts destroys the power of those that one has and brings no others.

ALL the whetting in the world can never set a razor's edge on that which has no steel in it.

POVERTY destroys pride. It is difficult for an empty bag to stand upright.

ANIMALS feed, men eat; but only men of intelligence know how to eat.

IT is more honorable to acknowledge our faults than to boast of our merits.

THE sweetest spot of any man is where he thinks himself the strongest.

BAD HABITS are thistles of the heart, and every indulgence of them is a seed from which will spring a new crop of weeds.

WANT of piety is ever the first, the capital crime, and our other faults are all derived from it.

HARD WORK is the price asked for success, and it cannot be purchased with any other kind of currency.

ONE gains courage by drowning himself poor; in that manner one rots poverty of its sharpest sting.

and not a word of complaint from any one. As there are several kinds of Electric lamps on the market we would call attention to some facts in regard to our Lamp. We know it is the best for the following reasons:

1st.—It is Better Made. 2d.—It has a Patent Gas Escape, Rendering it Absolutely Safe. 3d.—It has a Drip Cup which Conveys all the Oil that Rises to the Top Back into the Lamp and not on the Outside as Others Do. 4th.—It Does not Smoke or Break Chimneys. 5th.—Its Light is Perfectly Steady and will not Injure the Eyes.

If you are in want of the

WARREN LELAND,

whom everybody knows as the successful manager of the

Largest Hotel Enterprises

of America, says that while a passenger from New York on board a ship going around Cape Horn, in the early days of emigration to California, he learned that one of the officers of the vessel had cured himself, during the voyage, of an obstinate disease by the use of

Ayer's Sarsaparilla.

Since then MR. LELAND has recommended AYER'S SARSAPARILLA in many similar cases, and he has never yet heard of its failure to effect a radical cure.

Some years ago one of MR. LELAND'S farm laborers bruised his leg. Owing to the bad state of his blood, an ugly scrofulous swelling or lump appeared on the injured limb. Horrible itching of the skin, with burning and darting pains through the lump, made life almost intolerable. The leg became enormously enlarged, and running ulcers formed, discharging great quantities of extremely offensive matter. No treatment was of any avail until the man, by Mr. LELAND'S direction, was supplied with AYER'S SARSAPARILLA, which allayed the pain and irritation, healed the sores, removed the swelling, and completely restored the limb to use.

MR. LELAND has personally used

Ayer's Sarsaparilla

for Rheumatism, with entire success; and, after careful observation, declares that, in his belief, there is no medicine in the world equal to it for the cure of Liver Disorders, Gout, the effects of high living, Salt Rheum, Sores, Eruptions, and all the various forms of blood diseases.

We have MR. LELAND'S permission to invite all who may desire further evidence in regard to the extraordinary curative powers of AYER'S SARSAPARILLA to see him personally either at his mammoth Ocean Hotel, Long Branch, or at the popular Leland Hotel, Broadway, 27th and 28th Streets, New York.

MR. LELAND'S extensive knowledge of the good done by this unequalled eradicator of blood poisons enables him to give inquirers much valuable information.
