Letter from Rock Hall.

Rock Hall, October 8, 1885.

Eds. Kent News:—Notwithstanding the disagreeable rain today Mr. T. M. Broderick, the Baltimore agent of the Judson Dynamite Co., gave an exhibition of the terrific force of this explosive in the presence of a few farmers. The rain admitted of but two blasts, but in a few moments an apple tree, measuring eight feet and a-half in circumference, was blown out of the ground and the spot where it stood could have been plowed over immediately afterwards, so effectually were the roots cleared out. A cherry tree seven feet and a-half in circumference was blown out, but having a hollow in it the force was broken by the escape of gas, which is suddenly formed by the rupture of the molecules of the powder. The explosion is not like powder, due to the rapid combustion of charcoal, but by a sudden resolution of the powder into gas caused by the concussion produced by a small cap being exploded in the powder. The rain prevented other experiments in blowing up stumps, but he has promised to give another exhibition next Tuesday, the 13th, on the farm of Mr. Wm. Crosby at Tolchester.

Owing to the low price of oysters our tongmen are not having a very profitable fall catch, but probably the cooler weather will bring higher prices. A few are specially interested in the matter as they have made a little private arrangement to give some of the Rock Hall pretty girls an oldtime gift between this and the new year; some have gone so far as to engage quarters and others have built comfortable homes, taking time by the forelock. Old maids are very scarce around here and one of our young men, after building a nice home on the main avenue, slipped over to Anne Arundel and brought back a rib with him as joint occupant, and our doctor has to look out for another office. Alexander, having built a number of houses in South Rock Hall, has discarded the name and dates his correspondence Alexsville.

George Berryman, colored, has recently sold three lots off his property near Gray's Inn and the purchasers, having secured a deed, are making arrangements to build, and not satisfied with the old name now call the location Graytown. Next comes Leary's mill, Mr. G. E. Leary having put up some neat dwellings near the lumber yard and has just completed a blacksmith shop for a new comer. The lots sold by the heirs of Quaker Maslin are being rapidly built upon and two are about having the finishing touch put on them. This part of Kent can be said with truth to be rapidly improving.

It is thought by many that if the coal-oil tar from the fertilizer-works of Baltimore finds another channel the oyster grounds on Swan Point will come in play again, as abundance of young oysters are making their appearance.

Occasional.

An exchange from Pennsylvania says: "An important decision of interest to all who reside in cities, towns and villages was made sometime since in the Huntingdon county court. A man was indicted for assault and battery on a neighbor because he claimed the fruit on the limbs of a tree overspreading the prosecutor's lot. Judge Henderson said that the owner of the land is the owner of it from his line upward as far as he desires to make claim to it. This being the law, the prosecutor had the right to the fruit on the branches extending over his lot. He might even have sawed them off. This decision is important at this particular time and is generally misunderstood by the people."

Oyster Planting.—Gen. Jos. B. Seth, of Talbot county, has adopted a means of raising oysters which is a departure from the old method and rather novel. Two years ago last May Gen. Seth placed some oyster shells in the water of Island Creek, where there were no oysters growing. They caught the spat that season and became covered with young oysters which now measure from two to four inches in length. This shows that the cheaper way is to spread oyster shells in the creek early in the spring and although they are a year longer coming to maturity, the cost of the shells amounts to little or nothing.

Singular Gunning Accident.—Michael Keyser, living in Baltimore county, about a mile from Ellicott City, while hunting Saturday, was shot in the side and leg and dangerously wounded by a boy who was also hunting. Keyser had a wounded bird in his pocket, which he had secured with a string, and was standing behind a tree. The bird managed to crawl out of his pocket, and attracted the attention of the boy, who, not seeing Keyser, fired at the bird. Keyser is in a precarious condition.

Michael J. Ronan, the chief barkeeper at Barnum's Hotel, Baltimore, committed suicide Wednesday afternoon by throwing himself before an express train at the North Point road crossing of the Philadelphia, Wilmington & Baltimore Railroad. He had been acting strangely for some time past, and it is supposed he was acting under temporary aberration of mind.

A Pennsylvania farmer last year sold over $6,000 worth of potatoes from twelve acres. He fertilized with a compost of hard-wood ashes and oyster-shell lime, plowed deep, planted medium-sized, well-formed, uncut potatoes, three feet apart, gave level cultivation and cultivated often. From one hill be took forty-nine large tubers.

Another unsuccessful attempt to escape from the Centreville jail was made by the prisoners last Sunday afternoon. They had broken the lock-casing on the corridor door, when a prisoner who is serving out a short sentence for fighting and acting as a servant about the premises made the discovery and informed the sheriff.

James Davidson, only son of James P. Davidson, died at the residence of his father, near Queenstown, on Saturday night last, aged about 20 years. He was a young man of fine promise, popular and a great favorite with his many friends. He was sick about eight weeks with malarial fever.

At a meeting of friends of Hon. Chas. Stewart Parnell in New York on Monday it was decided to send fifty representative Irish-Americans to Ireland to assist Mr. Parnell in the canvass now going on for Parliament.

Mr. Bennett Parrot of Talbot county has on his farm in Bambury a seeding peach tree 16 years old, 30 feet high and 4 feet around the stump, which bore at least 25 boxes of peaches this year.

Representatives of the proposed Short Line Railroad between Baltimore and Annapolis say that ground will be broken shortly.

The Dorchester *Era* suggests the Rev. Theodore P. Barber, D. D., bishop of the diocese of Easton.

Baltimore Market.—The Baltimore papers of yesterday quote as follows:
Wheat—Longberry $101@$103. Fultz, 96c. @98c. for fair to good. Corn—White, prime, 55@56; yellow, 50@50. Oats—33.

HIGH GRADE BONE FERTILIZERS.

We take pleasure in again calling the attention of farmers to our High Grade Fertilizers. It being eight years ago this spring since they were first offered to consumers under their present form; and from that time until now there has been an increasing demand for them, which is a far better testimonial to us than any letters of praise could be, although we do not want for these latter, as we are in receipt of many. It has been our aim to put up the best fertilizers we know how, and the results in the field clearly show that we have hit the mark right in the bull's eye, and we believe if consumers will take our target (American Brand, bull's head) they will trike a good result every time—the bull's eye, if their aim is good.

THEIR CHARACTER.

The main characteristic of our fertilizers is that they are prepared with particular reference to the *crop*, and not to a chemical analysis; the latter does very well in its place, and we believe in chemistry thoroughly, but consumers are too often deceived with the idea that a chemical analysis is the main thing, and if they get a good analysis and high commericial valuation as figured out with arbitrary prices by the chemist, they must have a fine fertilizer. Now it may happen that a fertilizer, with a commercial valuation of $25 00 per ton, will give a better result on the crop than one with a valuation of $40 00 as based on a chemical analysis. And why should this be? Only because the material used in the one valued at $25 00 was better adapted to the crop than the other.

THEY ARE UNIFORM.

The goods we manufacture are uniform in composition, and are only varied in proportions, year after year, as we believe it to be an advantage to the crop. We have such large supplies of Bone, Blood, etc., from the slaughter establishments of New York, that our fertilizers are largely composed of these, and there is not that inducement for us to use cheaper material, that there might be, if we did not have this material.

BONE FERTILIZERS.

Our products are of a *bone base*, because we believe that is the most satisfactory source of phosphoric acid, and the large amount of animal matter our fertilizers contain makes them especially valuable in what may be considered the off or poor seasons. Some years it is noticed that almost any fertilizer will give fairly good results, but we find themost favorable comparisons for our products are in the poor years.

A Word to the Wise About Taxes!

THE MAN—or woman either—who pays his taxes most promptly, is the most happy. He has relieved himself of a burden that increases in weight the longer it is borne; costs and interest are added and the tax-payer feels justified in blaming everybody and everything for the results of *his own negligence*. Therefore, be wise and happy—PAY YOUR TAXES at once—out of your Wheat or Peach money and don't wait for corn or uncertain collections.

To accommodate payers I will be in Chestertown every Tuesday and Worton Station every Saturday afternoon.

I have my books now in hand and your bill are ready. Resp'y,
