Kent News.

SATURDAY MORNING.....APRIL 3, 1886.

RUM AND OIL.

HOW TO GO TO BED SOBER AND WAKE UP TIGHT.

"Let me have a little butter, please," said a stout, elderly gentleman, who stood in front of the Morton House bar the other evening with a glass of steaming hot rum before him.

The white-aproned bartender bent down and from a shelf underneath the polished mahogany brought up a dish of butter, in which was stuck a silver knife. With this the man broke off a lump of butter and dropped it into his glass and stirred it about until it was melted. Then he drank the concoction slowly, with an oily smile overspreading his features.

"Yes, it is rather a curious drink," said the bartender to the reporter standing by; "it's a very pleasant one, and a great favorite with some gentlemen. Those who don't know of its effects, however, had better leave it alone, for the effects are apt to be queer. The man who drinks a number of these hot rums would be quite sober when he went home, but in the morning when he woke up he would be as drunk as a lord. That's odd, isn't it? But it's easy enough to explain. It's because there is so much oil in the butter.

"Let me explain, and you can try it yourself. Take a bottle of sweet oil with you when you go out with the boys the next time. Order any kind of liquor you like, though I wouldn't bother much with beer if I were you. Pour into your glass a few drops of the sweet oil every time you take a drink. No matter how much you drink you will keep sober, while your friends, if they have to up with you, will be in a very 'how-came-you-so' condition. You go home and go to bed feeling all right, and in the morning, when you wake up, you will be dead drunk. The reason is simple. Oil, as you must know, rises to the surface. Consequently when you drink the oil-covered concoctions, the oil will remain on the surface in your stomach, keeping the fumes of the liquor down. That prevents you from getting drunk.

"When you have stopped drinking and gone to sleep, thus giving your interior arrangements a chance to go about their ordinary duties, the oil will gradually evaporate itself through the system, allowing the fumes of the liquor to rise to your head. The consequence is that you awake in the morning 'full.' It's the funniest thing in the world when a man has this experience for the first time. He can't understand it at all, neither can his wife, who has seen him go to bed sober the night before, and can't be persuaded that he has not got up during the early hours to take on the load he apparently has with him. Butter has the same effect as sweet oil, because it contains a large percentage of that fluid in its composition, so I'd advise you to leave hot rum and butter severely alone if you're a married man."

ADVICE TO YOUNG GIRLS.

A lady of intelligence and observation has remarked: "I wish I could impress the minds of the girls that the chief end of woman is not to marry young." If girls could only be brought to believe that their chances for a happy marriage were better after 25 than before there would be much less misery in the world than there now is. To be sure, they might have as many opportunities to marry as before, but as they do not need to marry but one at a time it is necessary that one should be satisfactory. As a girl grows older, if she thinks at all, she certainly becomes more capable of judging what would make her happier than when younger. How many girls of 20 would think of marrying the man they would gladly have married at 16? At 30 a woman who is somewhat independent, and not over anxious to marry, is much harder to please and more careful in her choice than one at 20. There is good reason for this. Her mind has improved with her years, and she now looks beyond mere appearance in judging men. She is apt to ask if this man, who is so very polite in company, is really tender-hearted. Do his polite actions spring from a happy, genial nature, or is his attractive demeanor put on for the occasion and laid off at home as he lays off his coat? A very young girl takes it for granted that men are always as she sees them in society—polite, friendly, and on their good behavior. If she marries early she may then unconsciously please her fancy she learns to her sorrow that in nine cases out of ten a man in society and a man at home are so widely different beings. Five years at that period of life produce a great change in opinions and feelings. We frequently come to detest at 25 what we admired at 16. We advance from the taffy candy and peanut age to the era of gumdrops and marrons glaces, and even in later years lose our yearnings."

A Little Boy's Letter.

Below we give a characteristic letter from a little boy to his papa. The little fellow is only six years old, and this is his second letter. The *first* he wrote to his uncle, and his papa intimated to him that he might have given his first to him. The other morning the father found the following bid under his breakfast plate:

....., (near Chestertown,)
March 26, 1886.

DEAR PAPA:—I am going to write you a letter and I hope you will like it. I did not write to you the first time, because I wanted to write to Uncle Wille and ask him to take me to the park when I go to Baltimore, so I can see the monkeys and all the animals. I am getting along very well in school; sometimes I get all tens and sometimes I don't—I always get ten for reading, because I like that better than anything else.

Papa, I want you to give me a little piece of ground and get me a little hoe and spade so I can work it myself and raise some corn and potatoes. I think that would be very nice; don't you? I am tired now, so I guess I will stop; so good-by. Your little son, ——.

RECENTLY a man applied to Congress for a pension because he was "cicked by a muel," and now a Georgia farmer wants it to pay him $250 because his hogs have eaten up his wallet. What's the use of having a Congress if you don't make it useful?

FRANK JAMES, the famous Missouri bandit, is reported to have declined an offer of $25,000 a year to travel with a circus. Frank prefers to pick his company, as well as banks and express cars.

AN exchange very sensibly says it is a strange thing that the man who knows exactly how to run a newspaper is always engaged in some other kind of business.

HAVE YOU
RHEUMATISM?
A remedy has been discovered. In this country it is new. It has, however, been in successful use for many years in Europe, and it is a fact that the
RUSSIAN RHEUMATISM CURE
has the endorsement of Continental Physicians and Government Sanitary Commissions, as well as the thousands of sufferers to whom it has brought relief. It has saved others—all who have tried it. It
WILL SAVE YOU
from further agony, if you'll only give it a chance.
Descriptive pamphlet, with testimonials, free.
Price $2.50. If mailed, 50c. additional. If registered, 10c. more.
One box does the business. RUSSIAN RHEUMATISM CURE. None Genuine without this Trade-Mark.
As yet it is not to be found at the stores, but can only be had by enclosing the amount as above, and addressing the American proprietors.

March 6, 1886. J. W. HINES.

TO THE FRUIT GROWERS OF KENT!
PEACH TREE FERTILIZER
—MANUFACTURED BY—
WILLIAMS, CLARK & Co.
This FERTILIZER cannot be excelled for PEACH TREES. A Special Formula is used containing the essential ingredients of POTASH and KIERSITE (crude Magnesium Sulphate) and BONE needed to feed the growing tree and render it prolific in Fruit Bearing.
THIS IS JUST THE FERTILIZER YOUR ORCHARDS REQUIRE.
IT WILL PAY YOU TO USE IT FREELY THIS SPRING.
We claim it to be the BEST and the CHEAPEST Peach Tree Fertilizer ever put on the market. A trial only is needed to prove this.
It is not an experiment but a well-tried mixture, fully endorsed by intelligent and experienced Peach Growers of the Maryland and Delaware Peninsula.
Separate ingredients furnished for those desiring to mix for themselves, or any formula mixed to order.

PEACH YELLOWS—A Cure and Preventive.
We are favored by the Experiment Department of Houghton Farm, Montainville, N. Y., with the result of an elaborate investigation into the cause of Peach Yellows, by Prof. D. P. Penhallow. In the course of this investigation, the bark and wood of 22 species of fruit and forest trees were examined, in order to determine their chemical and physical condition, both in health and disease at different seasons of the year. As the result of these investigations Prof. Penhallow concludes that the disease known as Peach Yellows is not due, as has been supposed, to insects, or to fungoid growths, but rather to deficient or improper nutrition, involving an excess of lime and a want of potash in the wood and fruit, together with an abnormal proportion of certain other constituents.
He states "The external indications as have been long known, are stated to be premature ripening of the fruit with purple discoloration of the flesh, and deficiency of flavor the first year; and small yellow and red leaves and clusters of wiry twigs from the larger limbs the second year, followed by the death of the tree. Examinations indicate the roots are always healthy." As a remedy, thorough cultivation is urged, and the use, instead of stable manure, of a commercial manure containing kiersite (crude magnesium sulphate), dissolved bone, sulphate and muriate of potash. Diseased trees treated with these chemicals by Dr. Goessman of the Massachusetts Agricultural College have been restored to perfect health, even where the disease does not exist, the use of these chemicals while not only acting as a preventive will much improve the quality of the crop, making it market at a higher price. The following extracts taken from letters received from our customers may be of interest:
"Where I used none, the trees did not do well and the fruit was nothing to brag of, but alongside of this, where I used your Peach Tree Fertilizer, the trees came out vigorous and healthy, and the fruit was No. 1, bringing twice as much per basket as where I used none."
From Flanders, N. J.: "The Williams, Clark & Co.'s Peach Tree Fertilizer which I used, did remarkably well. The trees sent out dark-green leaves and extended their limbs and seemed to have new life. I can heartily recommend it as a Peach Tree Fertilizer."
From Flemington, N. J.: "I used one ton of the Peach Tree Fertilizer, and am satisfied it is a good thing."
We could add many more opinions of the same kind. We think an application of the Peach Tree Fertilizer will be found very beneficial to all orchards.
Our PEACH TREE FERTILIZER is made of the materials recommended by Prof. Penhallow, containing:

SOLUBLE AND REVERTED PHOSPHORIC ACID	6 to 8 per cent.
POTASH	5 to 8 "
OR SULPHATE OF POTASH	10 to 14 "
SULPHATE OF MAGNESIA	7 to 10 "

HAVE ALWAYS ON HAND IN CHESTERTOWN A FULL STOCK OF
