Kent News.

SATURDAY MORNING.....SEPT. 11 1886.

Amount of Seed Wheat to Sow.

John M. Stahl thus speaks in the *Planter and Stockman* on the above subject:

The average amount of wheat used for seed wheat in this county is six pecks per acre. The amount used is almost as large as that used thirty or forty years ago. I am of the opinion that we should not use more than half the amount now that was proper along in the forties or fifties. Then the land was stronger and could support more plants. Second, it was not possible then to put the ground in a condition near so favorable to germination as now. We lacked the necessary improvements. We had no steel plows. The plows we had were, compared with those in general use now, exceedingly rude and primitive, and capable, at the best, of the work that would not be tolerated by a decent farmer of the present day. The harrows were even more incompetent. Harrows made of revolving disks or of cutting knives were unknown. Pulverizers were undreamed of. Even rollers and drags were scarcely ever used. As a result the seed was put in a bed that would be the despair of a wheat grower of today who cared anything for his reputation as a farmer. The conditions that favor germination are fineness of ground, compactness, and that equable distribution of heat and moisture which results from the fineness of the ground. These conditions exist in a higher degree now than they did in the rudely prepared seed bed of forty years ago. As a result a greater per cent. of the seed germinates now than germinated then; therefore less seed is now required to produce the same number of plants.

Another thing which makes a less amount of seed required now is the better method of seeding. Though sown broadcast, on account of the seed bed being better prepared, the seed is more evenly distributed, since there will not be so many lumps to bound off of, nor so many depressions to fall into; and it will be more evenly covered, since there will not be depressions in which the grain will be covered several inches deep. But if the grain drill is used the grain will be more evenly distributed and covered yet. A good force-feed drill will deposit the grain more evenly than it is possible to do by casting them from the hand, though there be no breeze to interfere. And in a well-prepared bed a drill rightly managed will cover every grain with practically the same depth of soil; whereas, if the grain is covered with the harrow, or a brush, some will not be covered at all and the balance will be covered at depths down to the lowest point to which the harrow tooth penetrates. Some are covered so deep and some so shallow that they will fail to germinate, or at least the plants will be short-lived, those springing from the grains near the surface dying of too little moisture and too much heat, and those springing from the grains planted deepest being unable to reach the surface. When the grains are evenly distributed and covered a uniform depth a greater proportion of them will grow, hence again, less seed is needed now than forty years ago, to produce the same number of plants.

Where a bushel and a half of seed is used on the acre, if the seed is distributed with perfect accuracy, each seed will have a space of ground two and one-half inches square. A wheat plant should tiller until it produces fifteen culms, each bearing a head of grain. Who will contend that a space of ground of six and one-fourth square inches can support such a plant? The roots of wheat fed to a depth not greater than four inches. Cut out a mass of earth two and one-half inches square and four inches deep; how small it looks as you hold it in your hand. Surely this is not a fourth enough soil for a stool of fifteen stalks. Yet such stools may be found in any wheat field. It is a significant fact that they are always isolated; the plants about this one have died and given it room to develop. When we sow six pecks of seed per acre the plants are so close together that many must be smothered out. Those that get the start by greater inherent vigor or more favorable circumstances surrounding them, crowd out the weaker. It is the "struggle for existence," and the "survival of the strongest." No more will survive than the ground will support, and why sow more grain than will produce this number of plants? There is a net loss—the seed thrown away—and even those plants that survive the struggle are weakened by it. I have raised just as much wheat when I sowed four pecks to the acre as when I sowed six; and I am not certain but that three pecks to the acre are enough.

How to Endorse a Check.

Very few otherwise intelligent and educated people understand how to properly endorse a bank check payable to their order and few realize the inconvenience they cause by placing their endorsement in an awkward position. An observance of the following rules will enable anybody to place their signature in the proper place:

1. Write across the back—not lengthwise.
2. The top of the back is the left end of the face.
3. To deposit a check, write "For Deposit" and below this your name. A clerk not having the power of attorney to sign or endorse checks, can deposit his firm's checks by writing on top of the back "For deposit only to credit of ——" and below this write his own name.
4. Simply writing your name on the back of check signifies that it has passed through your hands, and is payable to bearer.
5. Always endorse a check just as it appears on the face. For instance, if the check is payable to "G. Read," endorse "G. Read;" if to "Geo. Read," endorse "Geo. Read;" if "George F. Read," endorse "George F. Read." If the spelling of the name on the face of the check is wrong, endorse first just as the face appears, and below, the proper way. For instance the check is payable on face to "George Reade," endorse "George Reade," and below this first endorsement write what it should have been "George Read."
6. If you wish to make the check payable to some particular person, write "Pay to—— or order——."

In England all checks are payable to bearer, but in this country all strangers presenting checks for payment must be identified by some one known to the bank.

All Fresh, Nice and Well-Selected Goods.

COLIN F. STAM,

aug28. DRUGGIST.

FACTS vs. PREJUDICE

Prejudice is hard to combat. It cannot be overcome in a day. More than likely it wasn't formed hastily. Indeed it may have been gradually strengthening its hold for years. For instance, some folks believe Rheumatism cannot be cured. Their fathers believed so before them. So did their grandfathers.

Now, RHEUMATISM CAN BE CURED, notwithstanding this prejudice, but the trouble is to make people think so. The only way we know to meet popular unbelief is to state the PLAIN FACTS, and then present the POSITIVE PROOFS that they are facts. It is a fact that the RUSSIAN RHEUMATISM CURE not only relieves but banishes Rheumatic Pain. There is positive proof of it too. It comes from those who have suffered untold agony with Rheumatism and have been completely cured by this remedy. All who have tried it have had this experience. Some of them permit us to print their testimony. It makes quite a little book, which we send free to any who are interested enough to ask for it.

A complete Russian Rheumatism Cure, costs $2.50. If mailed, 10c. additional. If registered, 10c. more. You'll never need but one, so the price isn't high. Who wouldn't give $2.50 to get rid of Rheumatism?

As yet it cannot be found at the stores, but can be had only by enclosing the amount as above, and addressing the American Proprietors,

PFAELZER BROS. & CO.,

819 & 821 Market St., Philadelphia.

A $32 STANDARD FERTILIZER

For Only $26.00!

READ IT IS HOW DONE.

The great popularity of our Fertilizers and the exceedingly low prices of Grain have determined us to greatly lower the price of our goods. From the beginning of our manufacturing we have always LED in LOW PRICES, and quality, and now that our farmer friends require goods as low as they could possibly be bought, we offer you these goods at

Only $26, a Reduction from $32.

Careful sales to reliable parties, and a great reduction in expenses, with only a small profit to ourselves, enables us to do this, and as this is the BEST and lowest priced goods upon the market, suited to the profit on eighty-cent wheat, we call it the NEW ERA. To place these goods so LOW and only by the quantity sold thus make a living profit. We sincerely ask your help, promising in return to give you a $32 Phosphate for $26.

We will print testimonials after more farmers have threshed, actual results are what we want and so do you. Chemicals for home mixing at lowest market figures. We have bought our goods as low as anyone and cannot be undersold. Call before purchasing or wait until we call upon you. Remember a $32 Fertilizer for $26. At these prices every farmer who buys is an agent of ours.

Very respectfully,

C. W. KENNARD & CO.,

July 24, 1886. Chestertown, Md.

RELIABLE FERTILIZERS

FOR WHEAT AND GRASS.

—TO—

Farmers, if you wish to obtain large yields of the above crops and get the worth of your money, use the best Fertilizer in the market—

"WHITELOCK'S VEGETATOR."

If you desire a lower price manure, an Ammoniated Phosphate, which is the cheapest and best for the money, purchase our

"Sunnyside Pure Bone and Dissolved Phosphate."

To those desiring a Dissolved Bone Phosphate, without Ammonia, the action of which is superior to most articles sold as Acid Phosphate or South Carolina Bone, we offer our

"SOLUBLE PHOSPHATE AND POTASH FERTILIZER."

The above brands are sold and delivered, 12 bags to the ton, and in fine and dry condition for drilling. Extra moisture in a Fertilizer adds to the cost.

Our Fertilizers have been thoroughly tested by Farmers in all sections, and have proven themselves very reliable as well as a paying investment. Try them by the side of any Fertilizer, and be convinced of their value. We refer you to your neighbors who have used them.

J. J. TURNER & CO.

"Excelsior," "Ammoniated Bone Superphosphate,"

"PURE DISSOLVED BONE."

ESTABLISHED 1828.

TO WHEAT GROWERS

1858. 1886.

Forming the most concentrated, universal and durable FERTILIZERS ever offered to the Farmer—combining all the stimulating qualities of Peruvian Guano and the ever-durable fertilizing properties of Bones in fine dry powder, prepared expressly for drilling, and can be applied in any quantity, however small, per acre. It is the opinion of many close-calculating Farmers, after TWENTY-EIGHT YEARS experience in testing it side by side with other popular fertilizers, that an application of 100 pounds of "EXCELSIOR" is equal to 200 pounds of any other fertilizer or guano, and therefore fully 100 per cent. cheaper.

Uniformity of Quality Guaranteed by the Manufacturers.

☞ Farmers can only be secure from inferior imitations by seeing that every bag is Branded with our Name and Analysis in Red Letters.

Ammoniated  SUPER PHOSPHATE

Composed of the most concentrated materials, it is Richer in Ammonia and Soluable Phosphates than any other fertilizer sold except Our Excelsior, and is made with the same care and have also a very superior quality of Dissolved Bones, and keep constantly on hand a large supply of high grade Peruvian Guano.

—PURE—

Slaughter-House Bone Fertilizers!

The well-known High Grade Fertilizer, Manufactured by Williams, Clark & Co., are offered to the farmers of Kent for Fall Seeding. Considerable quantities of the different brands were sold in Kent county last year and in every instance gave perfect satisfaction, indeed in many cases the results have been remarkable, and it is only necessary that the farmers should become thoroughly acquainted with their intrinsic value to insure almost their universal use.

Some instances may be mentioned: One farmer applied our Americus alongside of four other brands. The result was that the Americus gave him five bushels more per acre than either of the other goods. Another test with two other goods gave us 72 bushels, while the other brands yielded 54 and 65 respectively on the same quantity of ground, time of seeding &c., being exactly alike.

This house being one of the largest in the United States, considers their reputation involved in every ton of goods they send out and consequently will not allow anything but a first-class article to be sold under their brand, and may be confidently relied upon by the farmers as strictly according to representation.

THEY ARE UNIFORM.

The goods we manufacture are uniform in composition, and are only varied in proportions, year after year, as we believe it to be an advantage to the crop. We have such large supplies of Bone, Blood, &c., from the slaughtering establishments of New York, that our fertilizers are largely composed of these, and there is not that inducement for us to use cheaper material, that there might be if we did not have this material.

BONE FERTILIZERS.

Our products are of a BONE BASE, because we believe that it is the most satisfactory source of phosphoric acid, and the large amount of animal matter our fertilizers contain makes them especially valuable in what may be called the poor or off seasons. Some years it is noticed that almost any fertilizer will give fairly good results, but we find the most favorable comparisons for our products are in poor years.

ACORN BRAND PREPARED CHEMICALS.

We always carry in stock a large supply of all Kinds of Materials which we WILL SELL AT BOTTOM PRICES.

Dissolved Bone Black, Muriate of Potash, Pure Raw Bone Meal, Dissolved South Carolina Bone, Kainit, Dried Blood, High Grade Sulphate Potash.

Sold separately for farmers to mix. Guaranteed analysis on each bag sold.

DISSOLVED ANIMAL BONE,

Being Pure Slaughter-House Bone and Acid.

Early orders solicited. We guarantee the goods to be AS CHEAP AS ANY on the market and our terms as accommodating.

WM. H. McFEELY, Chestertown,

General Agent for Kent County.

OUR FORE-FATHERS SOAP

Ask Your Grocer For It.

NO MORE A MYSTERY. FAC-SIMILE OF THE LABEL ON THE WRAPPER. THE REASONS GIVEN.

WHY DOES THE CLOTHING TEAR SO EASILY?

ANSWER.—From the use of strong and impure Soap, made up in salable forms and shapes, with which the market is flooded. If you want to be right sure use ECKERS' OUR FOREFATHERS' SOAP—three connecting 4-inch cakes, making each bar one foot long; weight 22½ ounces—recommended by the Best Families, Hotels and Institutions throughout the country. It is prepared by the Grecian Purifying, Boiling and Settling Process, from fresh, clean and selected butchers' tallow. By its use you run no risk of contracting any skin disease; no stiffness of the arms or wrist. A great saving of time and labor. WASHING CLOTHES WITH OR WITHOUT BOILING OR SCALDING. You can use it as you wish, but to wash without boiling or scalding observe these directions: Take lukewarm water, rub with soap particularly on dirty spots, soak half an hour or more, gently rub on board and your clothes will be clean. Try it for one month and you will be convinced of its great advantages. VERY IMPORTANT TO KNOW.—That the best remedy for washing flannels to keep them from shrinking—wash in lukewarm water with FOREFATHERS' OR ECKERS' BOARD OF HEALTH SOAP (the greatest disinfectant known), and dry in a warm room; cold water hardens flannels and drying in cold air shrinks them. Ask your grocer for it. ECKERS' SOAPS WILL WASH WITH OR WITHOUT BOILING OR SCALDING.
