We Desire to Call the Thoughtful Attention of Farmers
TO THE SUPERIOR MERITS OF
ORCHILLA GUANO
AS A FERTILIZER FOR
WHEAT AND GRASS.

The advantages resulting from its use are not only an increased yield, but the permanent improvement of the soil from the abundant growth of grass which is sure to follow.

"ORCHILLA" is no new thing. For twenty-one years it has been undergoing trial,—and well has it stood the test. At first, its progress to favor was naturally slow; but merit will, sooner or later, have its reward, and now its sales every year are largely increased over those of the preceding year, **and the friends of its early days are its best friends now.**

It has been used extensively in Maryland and the adjoining States, and from its abundant success everywhere we are justified in recommending it to you as being well adapted to your soils. No fertilizer for your use has had such unvarying success and continued popularity. Some of the largest and best farmers in these States use it almost exclusively.

It is Successful, because it is Nature's own provision for he exhausted fields.

It is Low Priced, because we have none of the expense of manufacturers, and, without regard to its high commercial value, we base its price solely upon its actual cost to import.

We refer you below to some of the farmers who have used it and ask you to enquire of them its merits.

R. A. WOOLDRIDGE & CO., Importers,
64 BUCHANAN'S WHARF, Baltimore.

DAVID R. DERRICKSON, Edesville, Kent Co., Md., July 1st, 1886, says:—I used Orchilla Guano on my young peach orchard in the spring of 1884, and planted the land in corn. The guano gave me a good crop of corn, and its effect was very prominently marked on the trees.

HON. THOMAS A. HULME, Fairlee, Kent Co., Md., July 1st, 1886, says:—I used Orchilla Guano in 1883 on corn. The guano was put on in April, 400 lbs. per acre. I could not see any marked effect of it on the corn, but the next year I put the land in peach trees, and the effect was very decidedly shown in the healthy and vigorous appearance of the orchard—which has continued ever since. I afterwards used Orchilla in the drill for potatoes with the most satisfactory results.

WM. I. BURGESS, Chesterville, Kent Co., Md., June 30th, 1886, says:—I used Orchilla Guano in 1883 on wheat, and it did me good service on that crop, as well as on the grass crop that followed, which was as good as ever grew on the farm.

J. EDWARD HURLOCK, Chesterville, Kent Co., Md., June 30th, 1886, says:—I used Orchilla Guano in 1884 on wheat alongside of Hubbard's Phosphate. In the early spring the latter was ahead, but at harvest I could see no difference at all. The stand of grass from Orchilla was an excellent one. The land on which Orchilla was put was very thin. I applied about 400 lbs. per acre, broadcast.

DANIEL R. NEALL, Chesterville, Kent Co., Md., June 30th, 1886, says:—I used Orchilla Guano on corn in 1884. It was put on in February and plowed down. The season was a very dry one, but I had as good a crop as any of my neighbors had from other fertilizers. The land was put in wheat and made a good yield, and the grass that followed was a first-class stand. I would say that the land where Orchilla went was exceedingly poor. I believe it to be a good fertilizer, especially to improve the land

WM. P. CROSBY, Fairlee, Kent Co., Md., July 2d, 1886, says:—I applied Orchilla Guano in the spring of 1884—on land for corn, 400 lbs. per acre—broadcast. I got no marked result in the corn, but the effect of the guano was very distinctly shown in the wheat crop that followed.

WM. S. GOSLIN, Federalsburg, Caroline Co., Md., wrote January 15, 1886:—Two years ago I seeded one of my fields, containing 18 acres, in wheat, followed with clover. On 12 acres as an experiment, I used Lime and Orchilla Guano both; on the other 6, the poorest part of the field, I applied Orchilla alone. I had a good crop of wheat. On the 20th of June I commenced mowing my clover. The superiority of the clover on the 6 acres attracted the attention of all who saw it. I shelled 16 bushels of clover seed from the 6 acres, and only had 25 bushels from the 12 acres! I shall use Orchilla by itself hereafter. I have had 17 years' experience in the use of Orchilla Guano, and I unhesitatingly say, that for good results and the permanent improvement of the soil, it has no equal.

J. M. ANDERSON, Providence Mill, Cecil Co., Md., writes, July 30, 1885:—I have used Orchilla Guano on wheat, side by side with Bone; and find it produces equally as well as the Bone. The cost being in favor of Orchilla.

JOHN E. WILSON, attorney-at-law, Elkton, Cecil Co., Md., wrote Oct. 7, 1885:—I used Orchilla, 200 lbs. per acre, on 7 acres of land this fall and put it on buckwheat. It was on land that never would raise anything before. I have never seen a finer crop of buckwheat grown from any land. Manure or any phosphate formerly used on the land was of no avail. I estimate a yield of no less than 200 bushels from 7 acres. I left out a strip in seeding, on which I put a mixture of different kinds of phosphate, but got no buckwheat except where Orchilla went. I have used Orchilla all over my wheat this fall, and shall also use it on land for corn next spring.

MR. WILSON writes now, July 22, 1886:—The wheat on which I used Orchilla, 500 lbs. to the acre, was as good as that produced by a high grade phosphate; and a better stand of grass I never saw. Where I used the Orchilla on corn this spring, I can see to a foot where I applied it; and the corn there is better than where I applied barn-yard manure heavily beside it. I consider Orchilla Guano better than barn-yard manure for corn and grass, and equal to it or any other phosphate for wheat.

JOHN T. GAMBLE, Bayview, Cecil Co., Md., July 22, 1886, says:—I have used Orchilla Guano to advantage on wheat, on which I consider its action quite as good as bone. For grass Orchilla is unexcelled by any fertilizer I know of.

THOS. N. WARBURTON, Bayview, Cecil Co., Md., writes July 12, 1886:—Orchilla Guano has been used upwards of ten years on the farm of my father, (now deceased,) where I have always lived, and now live—and always with the best results on the various crops to which it was applied, and with large and continued increase of the grass crop following, and this may now be seen on the place.

WM. T. MILLER, Elkton, Cecil Co., Md., writes July 20, 1886:—I do unhesitatingly endorse and recommend Orchilla Guano as a fertilizer. It has always improved my wheat crop greatly, and the grass following is always remarkably excellent. I shall want my supply this fall.

CHARLES H. OWENS, Elkton, Cecil Co., Md., writes July 4, 1885:—I have used Orchilla Guano for several years, and meantime have used other fertilizer phosphates, and find the Orchilla equally as good for grain crops, and far more productive for grass; and for permanent improvement of land, the best.

JOHN WHITE, Mechanics' Valley, Cecil Co., Md., July 10, 1886, writes:—I confidently recommend Orchilla Guano as a good and permanent fertilizer, it having produced for me excellent crops of grain and grass. I think it fully equal to bone.

JOHN T. GALLAHER, Elkton, Cecil Co., Md., writes, July 12, 1885:—I have used Orchilla Guano, year after year, for several years, and have always found it beneficial to the crops, both of corn and wheat, and therefore recommend it as a reliable fertilizer for grain and for grass as well, and at less cost than most fertilizers.

IN FOUR STYLES,
Senior, Junior, Elevator and Cabinet.

The Cooley system possesses a two-fold advantage; it is submerged and water-sealed, which is of the very greatest benefit, increasing the cooling surface and keeping the cream from oxodizing, thus allowing all gases or odors to penetrate it, and be absorbed by the water.
