## Nature's Way Is Best.

The function strengthening and tissue building plan of treating chronic, lingering and obstinate cases of disease as pursued by Dr. Pierce, is following after Nature's plan of restoring health.

He uses natural remedies, that is extracts from native medicinal roots, prepared by processes wrought out by the expenditure of much time and money, without the use of alcohol, and by skillful combination in just the right proportions.

Used as ingredients of Dr. Pierce's Golden Medical Discovery, Black Cherry-bark, Queen's root, Golden Seal root, Bloodroot and Stone root, specially exert their influence in cases of lung, bronchial and throat troubles, and this "Discovery" is, therefore, a sovereign remedy for bronchitis, laryngitis, chronic coughs, catarrh and kindred ailments.

The above native roots also have the strongest possible endorsement from the leading medical writers, of all the several schools of practice, for the cure not only of the diseases named above but also for indigestion, torpor of liver, or biliousness, obstinate constipation, kidney and bladder troubles and catarrh, no matter where located.

You don't have to take Dr. Pierce's say-so alone as to this; what he claims for his "Discovery" is backed up by the writings of the most eminent men in the medical profession. A request by postal card or letter, addressed to Dr. R. V. Pierce, Buffalo, N. Y., for a little book of extracts from eminent medical authorities endorsing the ingredients of his medicines, will bring a little book *free* that is worthy of your attention if needing a good, safe, reliable remedy *of known composition* for the cure of almost any old chronic, or lingering malady.

Dr. Pierce's Pleasant Pellets cure constipation. One little "Pellet" is a gentle laxative, and two a mild cathartic.

The most valuable book for both men and women is Dr. Pierce's Common Sense Medical Adviser. A splendid 1008-page volume, with engravings and colored plates. A copy, paper-covered, will be sent to anyone sending 21 cents in one-cent stamps, to pay the cost of mailing *only*, to Dr. R. V. Pierce, Buffalo, N. Y. Cloth-bound, 31 stamps.

## The Most Interesting of Expositions

BY STANLEY DESMOND.

And while they dart to and fro far under the surface of the water, reproductions of the Monitor and Merrimac, of the days when submarine transportation was unheard of, will fight again that memorial battle before Sumpter's fall. The towering sides of the great Confederate ship, the "cheese-box on a raft," the tattered battleflags themselves will be seen exactly as they were nearly half a century ago. In fidelity to detail, this reproduction of the famous sea duel will surpass anything of its kind ever projected.

Water sports also will demand attention, for plans thus far perfected call for the greatest motor boat regatta this country has known, surpassing it is claimed, the world-famous races at Monte Carlo. Submarine races will also be held, with almost daily yacht races between craft representatives of the pleasure boats of all countries.

In the realm of athletics there are to be held contests approaching in magnitude the Olympian games at Athens. Athletics will be assembled from all over the world, and their feats will be watched by the world of sports as the largest athletic meeting America has witnessed.

The historical exhibit will be a notable one from every standpoint. The country itself is rich in its historical associations for not only was it one of the early battlefields that dotted the coast in the contest between the Red Men and the white invaders, but in close proximity to the Exposition are the breastworks thrown up by the Cofederate army in the beginning of the Civil War. Relics have been assembled from the entire South, and they form a recollection that is at once comprehensive and valuable.

Unique in many respects will be the Arts and Crafts Village, a community within itself, which the busy hum of industry will make a centre of activity for the entire celebration. Complete processes, showing the transformation from the raw material to the finished product, will be daily gone through in this village, and the copper, silver and wood working shops promise to form a feature of surpassing interest from an industrial standpoint.

THE SETTLEMENT RECONSTRUCTED.

Aside from the Arts and Crafts Village, there will be an Indian Village, a reproduction of the Jamestown settlement as nearly as authentic records may be followed, a Tyrolean village, a Japanese village and a score of other communities through which a close study may be had of racial and economic characteristics. Forestry, mining and metallurgy and virtually every phase of American industrial life will have representation in the various grounds of buildings that go to make up the Exposition.

So thoroughly have the landscape artists done their work that the Jamestown Exposition gives the impression of being situated in a natural grove of trees. The glare of the sun loses itself through the luxurious foliage that transforms the exposition into a sylvan park, and romantic lanes and pathways wind through the trees until it would seem as though one might easily be lost in the maize.

Beautiful gardens have been laid out with a geometric symmetry that is remarkable in itself, and the color blendings of the flowers that comprise the plots are those of a mosaic designed by a master hand.

Through it all winds the "Canoe Trail," where birchbarks propelled by Indians themselves will convey the visitor along a waterway beside which the canals of Venice would seem less beautiful. The steady dip, dip of the paddle, the bronzed figure at the stern, the overhanging, almost primeval forest—surely such a scene would breathe the very atmosphere of those days before the European visited the shores of the New World.

**Drawing The Jury.**—The NEWS last week published the jury for the coming term of court. Many persons have inquired as to the mode of drawing juries, which has been explained by Judge Crothers:—A list of 150 names is prepared from the tax books and registration lists of the county, composed of 25 names from the first, second, fourth, and fifth districts, 20 from the third and 15 from each of the sixth and seventh districts. In the presence of the members of the Bar the Judge causes each name to be written upon a ticket, or slip of paper, and the 150 slips are then deposited in the jury ballot box. A deputy clerk who has not been present is then called in and inserting his hand in the box draws forth a slip, and the name thereon is that of one of the jurors. This is repeated until 48 names have been drawn, which constitutes the panel. When Court convenes, the Judge selects a member of the panel as Foreman of the Grand Jury, and the remaining 47 names are written on slips and placed in a ballot box, from which they are drawn one at a time by the Clerk, the first 22 completing the Grand Jury and the remaining 25 constitute the petit jury. A man under twenty-five years of age is ineligible for jury duty, and a man over seventy years of age, while not disqualified, is entitled to be excused at his own request.

## Seen In New York

### Spring Gowns and Hats in the Latest Modes, Materials, Trimmings, Belts, Slides and Earrings and Spring Dressmaking.

Spring dressmaking ought to be a comparatively easy task this season, when the most expensive imported gown's are loaded down with trimmings made of their own materials.

TUCKS, FOLDS AND BRAIDS.

Tucking of all sorts, bias folds, and narrow milliners folds put on in fancy patterns like braids, as well as fancy braids in an endless variety of colors and combinations are some of the many modish decorations that are within the province of the home dressmaker.

VERY TRIM LINES.

Fashion demands that the lines of a gown, especially the waist lines, must be kept trim and unwrinkled and the collar shapely. If these details are neglected the prettiest dress of waist will lose its style. Everyone by this time knows and uses the dainty Triune collar supporters, with their pretty silk coverings, and long looped form that makes them keep in shape and prevents their poking into the neck.

BELT AND GIRDLE STIFFENERS.

This year one can get for belts and girdles these same stiffeners in 3 or 5 inch lengths, and nothing nicer or more easily attached could be imagined. The wise woman takes advantage of every small convenience that will help her in her work, for she realizes that she can accomplish enough more to overbalance the difference in cost.

1308

The above design is by the McCall Co. of New York.

SILK TRIMMINGS.

Bands and folds of taffeta make some of the most effective trimmings and match either the color of the gown material or one of its lines, if a striped or cross-barred pattern, as so many of the new materials are. Three piece suits are the fashionable fad and are not necessarily very expensive.

A PRETTY SUIT.

A very pretty new suit at one of the best shops here, was of cotton voile, a white ground with a dark blue hair line. The very full pleated skirt was trimmed with inch wide bands of blue taffeta, spaced at about four inches. The waist of white lace, was trimmed with bands of the blue taffeta, and the third piece was a little fichu wrap of blue silk.

LIGHT LININGS

Linings are more often selected to contrast then to match the dress material and white and figured silks make some of the smartest linings in costumes of dark thin materials.

NEW HATS.

Mushroom shapes are very much to the fore. Smooth straws chips and leghorns are most fashionable. Floral trimmings and bows of ribbon and velvet constitute the garniture of some of the smartest headwear. Large made wings are used on tailored hats as well as other forms of fancy feathers.

VERONA CLARKE.

---

**Money in Watermelons.**—There is money in growing watermelons. The truckers in Kent and Queen Anne's can grow fine melons with a fair season and the demand is likely to be good for this luscious fruit. It is said there is to be a revival of the watermelon industry this year. Members of the Ridgely Fruit growers' Association held an important meeting last week and began a systematic effort to secure enough watermelon acreage to enable the association to ship a carload, daily, from Ridgely, during the season. Freight rates and shipping irregularities had heretofore discouraged this profitable culture. From 60 to 75 acres were guaranteed. J. H. Carroll, a melon culture specialist, stated that 800 hills can be managed in one acre. Each hill will average, on suitable soil, two good melons, and at ten cents each this would bring in to the grower $160 an acre. It is, however, the heaviest fruit or product grown and unless the special freighting arrangements can be made the profits go up in tariffs and demurrhage.
