Of Interest To Women.

To such women as are not seriously out of health, but who have exacting duties to perform, either in the way of household cares or in social duties and functions which seriously tax their strength, as well as to nursing mothers, Dr. Pierce's Favorite Prescription has proved a most valuable supporting tonic and invigorating nervine. By its timely use, much serious sickness and suffering may be avoided. The operating table and the surgeons' knife, would, it is believed, seldom have to be employed if this most valuable woman's remedy were resorted to in good time. The "Favorite Prescription" has proven a great boon to expectant mothers by preparing the system for the coming of baby, thereby rendering childbirth safe, easy, and almost painless.

Bear in mind, please that Dr. Pierce's Favorite Prescription is not a secret or patent medicine, against which the most intelligent people are quite naturally averse, because of the uncertainty as to their composition and harmless character, but is a MEDICINE OF KNOWN COMPOSITION, a full list of all its ingredients being printed, in plain English, on every bottle-wrapper. An examination of this list of ingredients will disclose the fact that it is non-alcoholic in its composition, chemically pure, triple-refined glycerine taking the place of the commonly used alcohol, in its make-up. In this connection it may not be out of place to state that the "Favorite Prescription" of Dr. Pierce is the only medicine put up for the cure of woman's peculiar weaknesses and ailments, and sold through druggists, all the ingredients of which have the unanimous endorsement of all the leading medical writers and teachers of all the several schools of practice, and that too as remedies for the ailments for which "Favorite Prescription" is recommended.

A little book of these endorsements will be sent to any address, post-paid, and absolutely *free* if you request same by postal card, or letter, of Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Pleasant Pellets cure constipation. Constipation is the cause of many diseases. Cure the cause and you cure the disease. Easy to take as candy.

WOLVES FEAR IRON.

A Piece of the Metal Will Keep the Animals From Any Carcass.

In the early days wolves were comparatively unsuspicious, and it was easy to trap or poison them. Then new knowledge, a better comprehension of the modern dangers, seemed to spread among the wolves. They learned how to detect and defy the traps and poison, and in some way the knowledge was passed from one to another till all wolves were fully possessed of the information. How this is done is not easy to say. It is easier to prove that it is done. Few wolves ever get into a trap, fewer still get into a trap and out again, and thus they learn that a steel trap is a thing to be feared. And yet all wolves have the knowledge, as every trapper knows, and since they could not get it at first hand they must have got it second hand—that is, the information was communicated to them by others of their kind.

It is well known among hunters that a piece of iron is enough to protect any carcass from the wolves. If a deer or antelope has been shot and is to be left out overnight, all that is needed for its protection is an old horseshoe, a spur or even any part of the hunter's dress. No wolf will go near such suspicious looking or human tainted things. They will starve rather than approach the carcass so guarded.

With poison a similar change has come about. Strychnine was considered infallible when first it was introduced. It did vast destruction for a time; then the wolves seemed to discover the danger of that particular smell and would no longer take the poisoned bait, as I know from numberless experiences.

It is thoroughly well known among the cattlemen now that the only chance of poisoning wolves is in the late summer and early autumn, when the young are beginning to run with the mother. She cannot watch over all of them the whole time, and there is a chance of some of them finding the bait and taking it before they have been taught to let that sort of smell thing alone.

The result is that wolves are on the increase. They have been, indeed, since the late eighties. They have returned to many of their old hunting grounds in the cattle countries, and each year they seem to be more numerous and more widely spread, thanks to their mastery of the new problems forced upon them by civilization.—Ernest Thompson Seton in American Magazine.

SELF RELIANCE.

The Lesson That Was Taught to Henry Ward Beecher.

Henry Ward Beecher used to tell this story of the way in which his teacher of mathematics taught him to depend upon himself:

"I was sent to the blackboard and went, uncertain, full of whimpering.

"'That lesson must be learned,' said my teacher in a very quiet tone, but with a terrible intensity. All explanations and excuses he trod underfoot with utter scornfulness. 'I want that problem. I don't want any reasons why you haven't it,' he would say.

"'I did study two hours.'

"'That's nothing to me. I want the lesson. You need not study it at all or you may study it ten hours, just to suit yourself. I want the lesson.'

"It was tough for a green boy, but it seasoned me. In less than a month I had the most intense sense of intellectual independence and courage to defend my recitations.

"One day his cold calm voice fell upon me in the midst of a demonstration, 'No!'

"I hesitated and then went back to the beginning, and on reaching the same point again 'No!' uttered in a tone of conviction, barred my progress.

"'The next!' And I sat down in red confusion.

"He, too, was stopped with 'No!' but went right on, finished, and as he sat down was rewarded with 'Very well!'

"'Why,' whimpered I, 'I recited it just as he did and you said 'No!'

"'Why didn't you say 'Yes' and stick to it? It is not enough to know your lesson—you must know that you know it. You have learned nothing till you are sure. If all the world says 'No!' your business is to say 'Yes' and prove it.'"

Riding Backward.

To be comfortable in summer, always ride with your back toward the engine. Your eyes miss all the smoke and cinders. Insist that the porter make your berth with your pillow toward the engine. This will drive your blood to your feet and keep them warm, winter and summer, and your head cool—which is one of the familiar rules of health, handed down from our forefathers. In case of accident you go in headforemost.—New York Press.

Her Method.

Uncle Bob—Yes, my wife allus b'lieved in tyin' a string to her finger to remember things. Uncle Bill—She has one on her finger most of the time, I notice. Uncle Bob—Yes, 'ceptin' when she has somethin' very pertikler to remember; then she leaves off the string, an' when it ain't there she remembers why.

He Had Traveled.

"Speaking of the 'Mysteries of Paris,'" said the literary boarder.

"The greatest one of them," said the boarder who had been on a "personally conducted," "is the language."—Cincinnati Enquirer.

The poor must be liberally cared for, so that mendicity shall not be tempted into mendacity or want exasperated into crime.—Winthrop.
