Protection of Fish.

The fishermen of Kent county occupy an important place in the industries of the county and all legislation affecting them is of interest. The NEWS prints to-day the 12 propositions on the protection of fish by the Md. Game Associations. We cannot endorse all of them but will heartily endorse every effort made to get a general State law for the tidewater counties of Maryland that will stop the killing of small and unmarketable fish. Such a law, if rigidly enforced, will solve the problem. Give us a law, compelling every fisherman, little or big, to cull his fish in his boat as soon as caught, and we mean round-net, hoop-net and hook-and-line fishermen, too. If a seine fisherman, compell him to cull his fish in not less than 12 inches of water. If a party catches more than he can cull in a given time compel him to keep them in the water until they can be culled or else let them go.

We recommend a conference among the fishermen so that they can go before the Legislature as a unit and ask for proper legislation.
