Anty Drudge on Politics.

Mrs. Clubwoman—"Anty, what do you think is the greatest political issue of the day?"

Anty Drudge—"Don't know and don't care! The most important issue in my mind is how to tell the greatest number of women about the better and easier way of washing clothes with Fels-Naptha. That'll do the women more good than all the political questions men ever gabbled about."

Some people think Fels-Naptha is a Summer soap because it cleanses clothes in cold as well as lukewarm water.

Know this: Fels-Naptha is sold and used in every State and Territory in the United States, including Alaska—and in every Province of Canada. It is sold and used in Winter as well as in Summer.

And here's why: It gets mighty cold sometimes in Alaska and Northern Canada. The colder it gets the more reason women have for washing clothes with Fels-Naptha in lukewarm water.

The more reason for not risking a cold by filling the house with vapor or bending over steaming suds.

The more reason for protecting hands from becoming red and chapped.

The more reason for getting the washing done in half the time with one-fourth the work.

Use Fels-Naptha in your washing this Winter and see how much easier and better it is. Just as effective for flannels, woolens and colored goods as for white clothes.

Use only lukewarm water and follow directions printed on the red and green wrapper.

DE LAVAL CREAM SEPARATOR

A Money Maker and Saver

Soon Pays for Itself

Occasionally the intending buyer of a cream separator who has but a small amount of ready cash to invest is tempted to put his money into one of the so-called "cheap" machines.

Why pay your hard-earned money for a "cheap," trashy machine, which is always most expensive in the end, when you can buy a reliable De Laval upon such liberal terms that

it will more than earn its cost
while you are paying for it.

When you buy a De Laval you have positive assurance that your machine will be good for at least twenty years of service, during which time it will save every possible dollar for you, and earn its original cost over and over again.

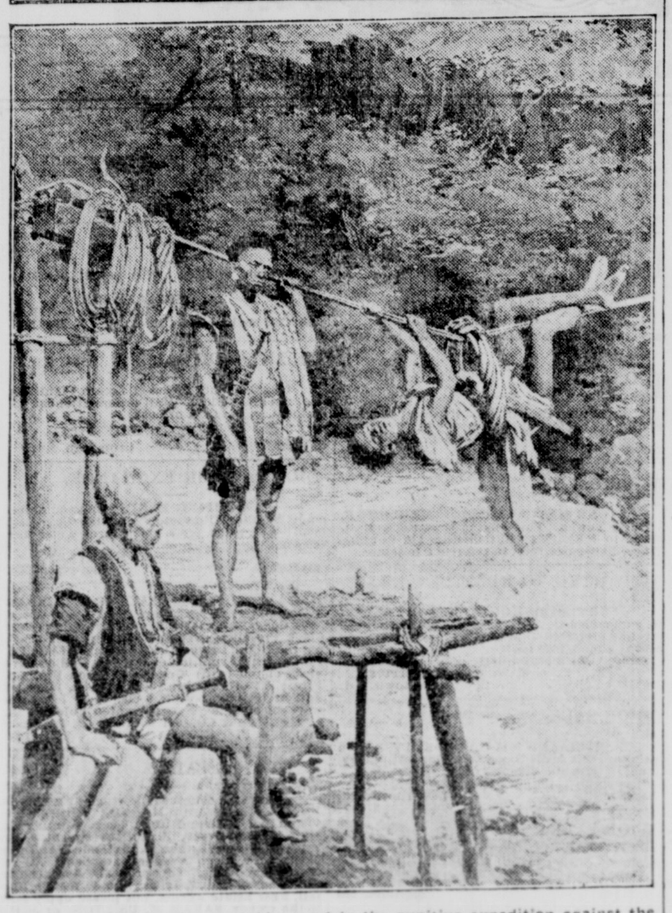

If it is not convenient for you to make full payment at time of purchase, we can arrange for you to make a partial payment, and pay the balance on such liberal terms that your machine will more than save its cost while you are paying for it.

Easiest to turn, easiest to wash, skims the cleanest lasts the longest

SOONER OR LATER YOU WILL BUY A DE LAVAL

CHESTERTOWN

How Abors Cross a Stream

British officers who are taking part in the punitive expedition against the Abors, a people living in the borderland between Hindustan and Tibet, have run across many curious things. The Mishmi Abors, for instance, have a most peculiar method of crossing rapid streams. They stretch across the torrent a cane rope which is attached to a tree or a wooden scaffolding with a landing place, as shown in the illustration. The passenger puts his body through a cane loop and then proceeds to work his way across the river with hands and legs.

ODD "MONARCH OF THE GLEN"

In a grove of pine trees near Atlanta, Ga., stands the curious oak tree here pictured. The odd form into which it has grown resembles very closely the head of a deer and it has attracted much attention. A prominent stock broker of Atlanta thought that it was on his own land, and transplanted it to his lawn. The real owner of the tree, after discovering his loss, advertised for its return, and when it was discovered on the lawn of the man who takes possession of it, there was quite a row.

CHINESE TYPE FROM JAPAN

The leading type foundry of the far east is located at Tokyo and produces two series of Chinese type. The first series, consisting of 5,000 characters, has in combination a total of 150,000 separate pieces of type. The second series has 3,000 characters and 100,000 combinations.

MAN WITH AMAZING MEMORY

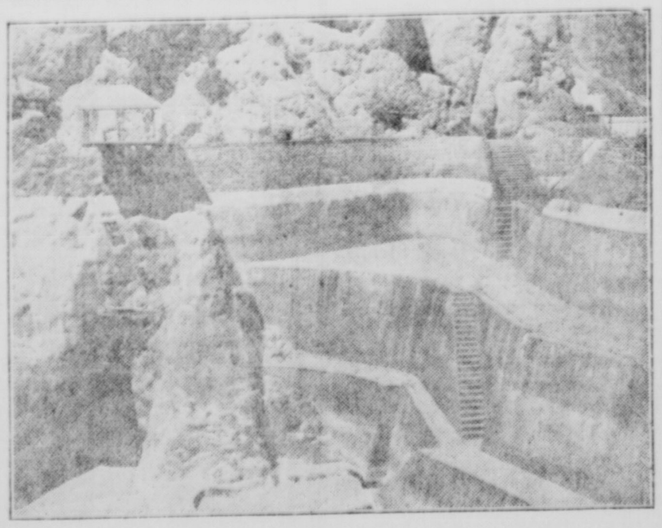

William E. Putnam, connected with the postoffice at Niles, Mich., is a walking encyclopedia. Niles is a town of more than 5,000 people, but Putnam is able to name every householder or occupant in the place and to give his correct street number. He is able to recite the entire constitution of the United States, off hand, and he will give you the capital of every state, country or island in the world. As to dates, he is able to give you the exact time when any event of any consequence happened years and decades back in history. Putnam, along with his other accomplishments, is a Bible student and a Sunday school worker. He has a record of having furnished a publisher a large list of Biblical verses, locating each verse at its proper place, book, chapter and verse, the entire list being made up from memory.

FLOWER-PICKING MACHINE.

An apparatus for plucking flowers and collecting seed consists of a tube connected with a pair of shears. At the forward end of the tube is a fork which is slipped under the flowers. The blossoms imprisoned between the prongs are severed by a blade traveling upon the fork, and are dropped through the tube into a receptacle at the rear of the apparatus.

The device not only collects flowers very quickly but also without injury. When the flowers are plucked by hand it is almost impossible to break a twig without leaving behind a long sliver of bark. Sometimes even a whole plant must be torn up by the roots. The apparatus can also be employed for collecting seed capsules which are often crushed when picked by hand, so that the seed is lost. The entire capsule drops uninjured into the receptacle at the rear, so that the seed is preserved.

One of Aden's Famous Tanks

The climate of Aden, the Red Sea port, is dry and intensely hot, and water there is a valuable commodity. The famous tanks of Aden are natural rock cisterns situated in a deep gorge behind the city and were used in the days of medieval prosperity. They have since been greatly improved by masonry additions and are connected by aqueducts to prevent overflow. When an appreciable quantity of rain water is collected in the tanks, it is sold by auction by the authorities and the purchaser retails it to the public.
