BALTIMORE ADVERTISEMENTS.

THE NIAGARA SHOWER-BATH
*AN ENTIRELY NEW ARTICLE FOR SHOWER BATHING,*
*With Cold or Warm Water.*

A great and important improvement is made in this Shower Bath over all others, by throwing the water immediately on the body without wetting the head unless at the will of pleasure of the bather; but greater point is gained by being enabled to bathe with warm water, which no other Shower Bath is adapted to—and most important of all, the Pathcan be medicated without injury to the hair.

Many persons cannot take a cold bath—their case is met in this, as they can regulate the temperature of the water to suit their wish and commence bathing at any season of the year without any unpleasant result. Ladies can have the advantage of bathing without wetting the head or covering the same.

The arrangements are simple and complete, and not liable to get out of order.—The Bath can be adjusted to suit any heighth, from a small child to the tallest person. When the door is closed, the fixtures are hid and the outside appearance is that of a neat piece of furniture.

They have received the approbation of several midical gentlemen—others are requested to call and examine them.

BATHING Read What Armstrong says:
Donot omit ye who would health secure,
That daily fresh ablution, that shall clear
The sluices of the skinn, enough to keep
The body sacred from indecent soil.
Still to be pure, even if it did not conduce
(As much as it does) to health, very greatly worth,
You daily pairs: 'tis this adorns the rich;
The want of this is poverty's worst foe
With this external virtue, age maintains.
A decent grace; without it, youth and charms
Are loathsome." Aug. 26

**Piano Forte Manufactory.**

VERY IMPORTANT INVENTION.

IT has long been a question among teachers and amateurs of music, as to the most suitable touch for a Piano Forte. Some at this time contend for a light touch, while others, with equal ability advocate the heavy. This question is now permanently settled. WISE & BROTHER have invented a contrivance by which the same Instrument may be instantly set to any required touch, by the turning of a single screw, varying, if necessary, three hundred and sixty-five differences. The advantages of this are evident, both to teachers and amateurs, as lessons may be practiced on the heavy, and exhibited on the lighter touch, to suit exactly any physical capacity which is agreeable to fact and progressive lessons. The contrivance is simple, and may be applied to any common Piano. A patent is about to be taken for the improvement.
