IMPORTANT TO

TOBACCO PLANTERS.

THE undersigned most respectfully call the attention of Tobacco Planters to their Chemical preparation for the improvement of the growth and quality of this plant. Their preparation will be known as "Kettlewell & Davidson's Tobacco Generator," and is manufactured expressly for the object indicated—the utmost care and investigation having been made to secure all the inorganic elements necessary to its growth and quality. Its effect upon poor and impoverished lands will require the test of experience to make it justly appreciated. The undersigned honestly believe that this compound will prove of vast importance to the Tobacco Interests of the State; but prefer reserving any further expression of their opinion of its qualities, sincerely hoping, that sufficient enterprise will not be wanting to give it a fair trial, no difference how small the experiment.

The material of which the "Generator" is composed is alike scarce and expensive, therefore those who desire to make the experiment will do well to apply early. It is put up in barrels of 300 lbs. each and should be applied upon the surface of the ground, in quantities from two to four spoonsfuls upon each hill, according to the quality and condition of the soil.—Price $30 per ton, or $5 per bbl.

KETTLEWELL & DAVIDSON.

Factory, Hamburg st., Federal Hill. Office at Ober & McConkey's, Wholesale Drug Store, N. E. cor. of Lombard and Hanover sts.

The subscribers also avail themselves of this opportunity to inform the Farmers and Planters of this State, and elsewhere, that they have established, under the firm of Kettlewell and Davidson, an "Agricultural Depot," in Baltimore, for the manufacture of CHEMICAL MANURES adapted to all descriptions of grain, grass and tobacco. They will, in due season for the fall crops, present to the public (sustained by certificates of the ablest chemists and the most practical and accomplished farmers) their 'Agricultural Renevator," a chemical manure for the rapid and permanent improvement of land, which experience will show to be inferior to none now attracting the attention of agriculturists. Orders for the Agricultural Renovator, for the corn or oats crop, will receive prompt attention.

Price $20 per ton, in bbls. of 300 lbs. each.

JOHN KETTLEWELL,

WILLIAM DAVIDSON, Chemist.

When the undersigned wrote their advertisement of Chemical Manure, they had not intended to present any testimony of its quality, at this time; but, upon reflection, and feeling the importance of getting their Agricultural Renovator into notice at an early day, they have determined to place before the public the following communication and analysis, made by the late lamented and distinguished Professor Ducatel, in whose sudden death the science, as well as the agricultural interests of Maryland, have met with no ordinary loss.—A name so well known as the late State Geologist, for high capacity and unblemished purity of character, will, it is believed, satisfy the public that, in the purchase of their article, all cautions of impositions, if directed against them, would be alike urgent and important. The original communication of Professor Ducatel is left at the Maryland State Agricultural Society's Hall. KETTLEWELL & DAVISON.

BALTIMORE April 7, 1849.

Mr. John Kettlewell—Dear Sir: After witnessing the process through which you carry on the operations in the manufacture of your *Fertilising Salts*, and being perfectly satisfied that you were proceeding artistically in the matter, I have at your further request, submitted to analysis the result of the various mixtures growing out therefrom, and I have to report as follow:

COMPOSITION—Bi-phospha of Lime,	60
Potassa,	10
Nitrate of Soda,	10
Sulphate of Ammonia,	5
Animal Matter,	15
	100

It is evident, from the consideration of the constituents of the mixtures, as represented above, that it cannot fail to be of infinite benefit to almost all kinds of soil. I would have no hesitation in recommending it to our farmers, without any other restriction, at first, than moderate application, by way of experiment. Of course, not having any *experience* myself of its actual efficacy, I feel bound to express the latter restriction without, however, entertaining much doubt as to the final result.

I may add, that in consideration of the proportion of *animal matter* which the mixture contains, there is reason to believe that a large proportion of *Ammonia* will be evolved, which, besides enhancing the value, will render it more permanent. Further, I have no hesitation in saying that your compound of "*Chemical Salts*" is at least equal if not superior, always with the proviso of being judiciously applied, to any other that I have had occasion to examine so far, without excepting the now well known article called *Peruvian Guano*.

Very truly, yours, &c.

J. J. DUCATEL, Chemist.
