Pennock's
Patent Seed and Grain Planter.

For Planting Wheat, Rye, Barley, Indian corn, Oats, &c.

THIS machine operates equally on all kinds of land, and is not injured by coming contect with rocks, roots, &c. It will plant point rows, and all irregular shaped fields, without oowing any part twice over. With a saving of from 10 to 15 per cent in labour, is will withease for two horses plant from 10 to 12 acres per day of Wheat Oats, Barley and other small grains, and with one man and horse it will readily plant from 15 to 20 acres of Indian corn.

It will save from 2 to 3 pecks of seed per acre and yield from 15 to 20 per cent more than the broad cast seeding, by distributing the grain uniformly at any desired depth, and leaving the ridge of earth between the rows. The roots of the young plant are protected during the winterby the action of the frost and rain mouldering of the earth upon them, instead of being thrown out and exposed as in broadcast. On this account the stalk is stronger and less subject to mildew and is not so liable to injury by the fly.

The farmer is frequently prevented fby rain from harrowing in his grain after it is sown; which harrowing is needleso in seeding wfth this machine, as it completes the work at once.

Reedtville, Mifflin county, Pa., July 21st 1848.

Messrs. S. & M. Pennock—Gentlemen—I have this day threshed and measured the Wheat grown on one acre of land, one half of which was drilled in with one of your machines, the other half was sown broad cast and harrowed in in the usual manner. The result is as follows—The half acre drilled 1 quarter bushels of seed ber acre broadcast 1 3-4 bushels seed per acre, 8 shocks, measured 7 bushels 18qts. The quality of the ground was exactly the same, and treated alike in every particular previous to seeding. Differance on the half acre in favor of the drill 4 1-2 bushels, adding half bushel saved in seed makes 5 bushels on the half acre drilled, more than on the broadcast.

Yours respectfully,
ABNER THOMPSON.

We the undersigned were present and saw the land measured, cut the grain, and assisted in threshing the same, and do hereby to the correctness of Mr. Thompson's statement.

James Reed, Alaxander Reed,
