Agricultural.

TO FARMERS, TEACHERS, AND EDITORS.

We invite the special attention of farmers, teachers, and editors to the following article on "AGRICULTURAL GEOLOGY."—They are so simple, direct, practical and elementary, as to afford both interest and instruction to farmers, now so generally seeking the science of their art—SCIENTIFIC AGRICRLTURE. If generally inserted in papers and read in schools, newspapers would become school books, and much of the surplus *boy-power*, now exhibited in lawlessness, violence and rowdyism, would be converted into practical science—the worst boys, in many cases, changed into the best:

AGRICULTURAL GEOLOGY—No. 1.

BY JOSIAH HOLBROOK.

No class of the community have an equal interest in geology with farmers.—No science is so interesting to farmers as geology, in connexion with chemistry.—The two sciencies cannot be separated and justice done to either. While the elements of our globe, esp cially of soils, require chemical tests to determine their character, these very elements are absolutely essential for experiments to determine the fundamental principles of chemistry. Oxygen, the most powerful chemical agent in creation, is also the most abundant material in rocks and soils. The one as an element, the other as an agent, are alike essential to each other, and both indispensable, as at the foundation of all agricultural science.

A knowledge of each is as feasible as it is important—entirely within the comprehension of a child six years old. Each is a science of facts more than of abstract reasoning—of facts, too, equally instructive and delightful to every young mind.

Take an example: The child has placed before him two glass tumblers—the one containing quartz, the other lime or sand, and chalk. The name of each is of course as readily learnt as the name of iron, lead, gold tree, horse, or any other object in Nature or Art. Into each tumbler is poured some sulphuric or muriatic acid. In the tumbler of lime the pupil observes an action—in that of quartz no action. He is told this action is called effervescence. He hence learns to recognise lime and quartz, and the more certainly from the recollection that the one effervesces with acids and the other does not.

Here is an example of geology and chemistry, alike useful to the farmer and interesting to the farmer's child, or any child The same simplicity and direct fundamental instruction run through the whole of both of these exceedingly practical sciencies.

I may hereafter point out a few of the leading principles of these two sciences; their connexion with each other; their essential importance to all classes, and, most of all, farmers; their exceeding fitness for the early instruction of children, and the entire feasibility of having them among the "first lessons" taught in each of the eighty thousand American schools.

AGRICU LTURAL GEO LOGY—No. 2

BY JOSIAH HOLBROOK.

Oxus is the Greek word for *acid;* ginomai, in Greek, means *make;* hence the lit eral meaning of oxygen is *acid maker.*—Combined with sulphur it forms sulphuric acid; with pitrogen nitric acid; with car bon, carbonic acid, &c. Respiration, combustion and fermentation are the three principal operations producing the combinations of oxygen and carbon; the results, carbonic acid.

Combine readily with metals, earths and alkalies—as, iron, lime and potash. By chemists thee combinations are called salts, designated by the termination *ate.*—Sulphuric acid combining with various basis, produces sulphates; nitric, nitrates; carbonic, carbonates. Sulphate of lime is gypsum or plaster of Paris; sulphate of iron, copperas; of soda, glaube salts; of magnesia, epsom salts. The carbonate of lime is common limestone, marbles, chalk, and many beautiful crystals. Carbonates of iron, copper, and lead are ores of those metals.

About a century ago water was found to be composed of oxygen and bydrogen, and common air of oxygen and nitrogen.—About a half century since oxygen was found by Sir Humphry Davy to be an element of rocks, of course of soils, as it was of the alkalies, combined with oxygen, were found by the same great chemist, to be metals very peculiar in character.

It hence appears that oxygen is an element in air, earth and water, existing abundantly in solid, liquid and aerial forms.—In the whole it constitutes nearly half our globe. It is of course, the most abundant element in the material world. It is also the most important agent in producing changes in matter essential to human existence. It is very appropriately called *vital air,* as neither animal life nor any life can exist without it. It is no less essential to combustion than to life. It also acts with great energy upon metals and other solid substances. In this action it produces three large and very important classes of bodies—oxydes, acids and salts. Iron rust is the oxyde of iron; the dross of lead, oxyde of lead; burnt lime, the oxyde of calcium, pure potash, the oxyde of potasium; pure soda, the oxyde of sodium; silex or flint, the oxyde of solicum. The combination of one part oxygen and four of nitrogen constitutes the atmosphere; three parts oxygen and one nitrogen from nitric acid, acquafortis. Combined with other substances, it forms numerous acids. Saltpetre is the nitrete of potash. The large quantity of oxygen it receives from the nitric acid fits it for a material in gunpowder—giving to that powerful agent its principal powers.

A plate, tumbler and scrap of paper, with a little water, will enable any teacher or parent to perform an experiment on oxygen equally simple, instructive and interesting. In a deep plate pour some water. On the water place a scrap of thick paper, piece of cork, or other light substance; on that another piece of paper or cotton moistened with oil. On lighting the cotton, place over it a large empty tumbler. The combustion continues for a few seconds, and when it is extinguished the water occupies about one fifth of the space in the tumbler, showing the necessity of oxygen for combustion, and that it constitutes about one fifth the air we breathe. What man, woman, or child would not like to be familiarly acquainted with an element so abundant and agent so active as oxygen, especially when such an acquaintance is equally simple, useful and delightful?

AGRICULTURAL GEOLOGY—No. 3.

BY JOSIAH HOLDROOK.

Rock are the oxydes of melals. Siley the most abundant ingredient in rocks, mountains, and soils, is the oxyde of silicum. This oxyde constitutes nearly one half of the solid matter of our globe. It is the principal element of quartz, in all its varieties, which are exceedingly numerous and some of them very beautiful. Quartz is the only mineral found every where.—

Sand is pulverised quartz. Pebbles are fragments of quartz, rounded by attretion Gunflint is quartz, breaking with a conchodial (shell like) fracture. Jasper is red quartz, with a fine compact texture. Amethyst is purple quartz; frequently found in six-sided crystals, in its different varieties. Agate is clouded quartz, in numerous varieties, some of which are much used for watch seals, finger rings, breast-pins, and other ornaments. Carnelian is quartz of a fine texture and of a yellowish red color. Chancedony, bloodstone, catseye, and many other gems, are varieties of quartz.

Most, perhaps all, the gems used in the breast-plate of Aaron, the high priest, were quartz of different textures, colors, and hues. The precious stones presented by the Queen of Sheba to the King of Israel, were probably quartz. The stones mentioned in the Book of Revelation as forming the streets of the New Jerusalem, with all the gems referred to, were but varieties of the stones used for paving our streets, and of the earth moved to the plough and the hoe of the farmer, and of the dirt carted for filling our docks.

The coloring matter giving most of the beautiful hues to gems, and an endless variety of colors to quartz, is the oyde of iron. The oxyde of silicium ond the oxyde of iron are hence united in this same most abundant mineral in the world.

Next to quartz, feldspar, or clay formed by the decomposition of feldspar, is the most aeundant element of soils. This, too, is composed of several oxydes of metals in chemical combination. Feldspar is also very extentsively united with quartz in the formation of rocks, not by chemical combination, but mechanical mixture. The feldspar and the quartz can be separated by the hammer. Not so with the oxygen and silicium, forming silex. Chemical egency alone can separate chemical combinations.—Such combinations in rocks, soils, and other mineral bodies, are exceedingly numerous, complicated, and delicate. The most common stone that meets the eye in any part of the world is composed of two oxydes. The oxygen and the medals are each united by chemical affinity, and then the two oxydes are again combined by the same agency to form a "*common stone,*" evidently worthy of more respect than it *commonly* receives.

An experiment: Pour upon a little pearlash in a tumbler; some strong vinegar. An effervesce will follow, producing carbonic acid. A burning candle immersed will be extinguished, showing that carbonic acid is fatal to combustion. It is equally so to life.

Henry Masten, agt.
Stansbury Moffett, and others. } In Chancery, 15th Nov., 1850.

ORDERED, That the sale made and reported by James Alfred Pearce, Trustee for the sale of the real estate mentioned in the cause be ratified and confirmed unless sause to the contrary be shewn, on or before the 15th day of January next; Provided a copy of this order be inserted in rome newspaper printed in Kent county, once in each of three successive weeks before the 25th day of December next.

The report states the amount of sales to be $1000.

Aug. 3, '50.—tf

DR. MARTIN'S
Syrup of Wild Cherry.

The Wild Cherry and Sarsaparilla, which are the basis of this preparation, have been long known and celebrated in Consumption and Scrofula, Coughs, Colds, Spitting of Blood, Asthma, &c. This remedy increases rather than impairs the appetite, and promotes in a remarkable degree "*functions of nutrition.*" This is not surprising, when we consider that its peculiar properties are to rouse the morbid action of the absorbent vessel, and the nervous and muscular system, while at the same time it diminishes the action of the blood vessels. It is surprising what a wonderful effect this remedy will frequently produce even in the most aggravated and advanced stages of Scrofulous and Chronic Pulmonary Diseases. It seems to pervade the whole structure of the Chest, and to soften those concrete tubercular masses formed in the Lungs, and bringing them down to the same state of action with the rest of the system, by which health is promoted and sustained. It also differs from most other remedies in being remarkably pleasant, and in not having any of those heating, stupefying or disgusting properties, which are found in most other preparations of the Wild Cherry and Sarsaparilla.

Read the following from a highly respectable gentleman in Shenandoah county, Va

"NEW MARKET, May 9th, 1849.

"Dr. Martin—Dear Sir: For fifteen or twenty years I have been much troubled with a violent cough and difficulty of breathing. I have tried many things, but all with no benefit, till I met with your Compound Syrup of Wild Cherry, at Messrs. A. Henkle & Son's store. At the instance of your friend, Mr. Noah J. Henkel, I was induced to take a bottle of the Syrup, and finding so much relief I continued to use it, and now think I am entirely relieved.

"PHILIP KNUPP, Sen'r.

MARTIN and WHITELEY'S National Tonic

There are no diseases so generally prevalent in this county as *Ague, Fever and Dyspepsia,* in the summer and fall months. The effect of the *Ague* and Fever on the system is such as to leave the Stomach, Liver and Spleen much deranged from which Dyspepsia generally arises, though Dyspepsia is more generally the result of overloading the stomach, or indulging in high sea seasoned food To find out a cure for those distressing diseases has been our special study for many years, and now think, by the aid of Chemical science, we have effected that object. Read the following:—

MILLINGTON, Kent co., Md.

Dr. Martin—Dear Sir: I have tried your National Tonic for the cure of Ague and Fever, and so far have heard of its failing in any one instance Three doses actually cured my own Child, and the like quantity and cured the Child of Mr. James H. Pennington, and Mr Woodford, whom you know as carrying Clocks through the Peninsula, was cured by the use of a small Bottle that only cost 50 cents.

Yours respectfully,
R. S. ROLPH, Merch't

DR. MARTIN'S UNIVERSAL PURGATIVE PILLS.

A remedy for all seasons, and safe at all times.—The most superficial observer is aware that one great cause of disease is Costiveness, and that by the timely taking of a Purgative, the system is often restored to its accustomed energy. By such a course the lives of hundreds are saved who otherwise have fallen victims to disease. These Pills speedily remove all matters contained in the bowels, and excite the Biliary functions to a healthy action. We think we are doing a public good in offering these pills to the Public, especially as the press is teeming with the recommendation of Purgative pills, which have been gotten up by men who know nothing of the effects of medicines on the human system, thereby endangering the live thousands who are daily using them—See the Pamehlets and the certificates, among them those from medical men of standing.

ALSO, DR. SWAYNE'S VERMIFUGE.

This is a most valuable medicine in all cases of Worms of children, or grown persons. All we ask is give it a trial. It is the prescription of a regular Physician who has had a large experience.

☞The above medicines are prepared and sold by MARTON & WHITELEY, No. 48, South Calvert street Baltimore; and are for sale by John L. Stam, Chestertown—R. S. Rolph, Millington—E. Miller, Georgetown Cross Roads—Peter Brees, Harmony—Joseph A Wright, Head of Sassafras—John Perkins, Worton Heights

May 4, 1850——tf.

AFFLICTED READ!!

"I am a man, and deem nothing which re ates man for foeign to my feelings."

Youth & Manhood.

A VIGOROUS LIFE
OF A
Premature Death.

KINKELIN ON SELF PRESERVATION.

ONLY 25 CENTS.

This Book, just published, is filled with useful information, on the infirmities of diseases of the Generative Organs. It addresses itself alike to Youth, Manhood and Old Age. To all who apprehend or suffer under the dire consequences of early or prolonged indiscretions—to all who feel the exhaustive effects of sedentary and baneful habits—to all who in addition to declining physical energy, are the victims of nervous and mental debility, and of moping and melancholy despondency. Dr. K. would say—

Read this Book.

The valuable advice and impressive warning it gives, will prevent years of misery and suffering, and save annually Thousands of lives.

Parents by reading it, will learn how to prevent the distruction of their children,

☞A remittance of 25 cents, enclosed in a letter, addressed to Dr. Kinkelin, N. W. corner of Third & Union Streets, between Spruce & Pine, Philadelphia, will ensure a book, under envelope, per return of mail.

FIFTEEN YEARS

of extensive and uninterrupted practice spent in this city have rendered Dr. K. the most expert and successful practioner far and near in the treatment of all diseases of a private nature. Persons afflicted with ulcers upon the body, throat, or legs; pains in the head or bones, mercurial rheumatism, strictures, gravel, disease arising from youthful excesses or impurities of the blood, whereby the constitution has become enfeebled; are all treated with success.

He who places himself under the care of Dr. K., may religiously confide in his honor as a gentleman, and confidently rely upon his skill as a physician.

☞Persons at a distance may address Dr K. by letter, (post-paid,) and be cured at home.

☞Packages of Medicines, Directions, &c., forwarded, by sending a remittance, and put up secure from damage or curiosity.

☞Booksellers, Newspaper Agents, Pedars, Canvassers, and all others supplied with the above work at very low rates.

A GOOD SUPPLY OF ***CARRIAGE WHIPS and RIDING WHIPS*** for sale by
WILMER & FRANCIS.

DR. SWAYNE'S
Celebrated Family Medicine.

DR. SWAYNE'S
COMPOUND SYRUP OF WILD CHERRY

The Original and Genuine Preparation!

THE MOST COMMON SAYING

Is that I would not give one bottle of Dr. Swayne's Compound Syrup of Wild Cherry, for half a dozen of any other preparations. I have tried all the popular ones, but this stands unrivalled for the cure of the following diseases: Influenza, Coughs, Colds, Consumption, Spitting of Blood, Palpitation of the Heart, Whooping Cough, Tickling or Rising Sensation in the Throat, Asthma, or a Weakness of the Nervous System, or impaired constitution from any cause, and to prevent persons from falling into a decline, this medicine has not its equal. And when too much calomel or quinine has been used, this medicine will prevent its evil effects on the system, and repair the billiary functions.

TESTIMONIALS WILL NEVER CEASE

REMARKABLE CURE OF CONSUMPTION.

Abraham Hunsicker, 2 miles from Skippervilie, Pa., contracted a severe cold, which settled upon his Lungs, attended with violent coughing, great difficulty of breathing, an abscess formed in his lungs, and made its way through the side, and disoharge large quantities of pus externally. This mournful state of things continued for a long time, until making use of Dr. Swayne's Compound Syrup of Wild Cherry, which performed a perfect cure.

Have you the Asthma, Liver Complaint or Bronchitis? If so give this medicine a trial. It seldom fails to cure.

VERY IMPORTANT CAUTION.

Be very particular to inquire for Dr. Swayne's Compound Syrup of Wild Cherry, as some unprincipaled individuals have stolen the name of Wild Cherry, thinking to borrow a reputation from the already established. Remember, the genuine is put in square bottles, covered with a beautiful wrapper, (steel engraving,) with the portrait of DR. SWAPNE thereon, also his signature; a others are positively *ficticious and counterfeit*

SWAYNE'S CELEBRATED VERMIFUGE.

A safe and effectual remedy for Worms, Dyspepsia, Cholera Morbus, sickly or Adults, and the most useful Family Medicine ever offered to the public."

EXTRACT OF A LETTER TO DR SWAYNE,

Dated, Andersontown, Indiana.

A man purchased a bottle of your Vermifuge the other day for his child, and by its use discharged sixty-three of the largest worms he had ever seen. It is somewhat difficult to get the people to try it, as they have been so often gulled by nauseous and worthless worm medicines. Yours being so very pleasant to the taste, at the same time effectual, I shall be able to dispose of a large quantity. Respectfully, yours.

TOWNSEND SHARP, P. M.

BEWARE OF MISTAKES! Remember. Dr. Swayne's Vermifuge is now put up in square bottles, (having recently been changed) covered with a beautiful steel engraving wrapper, with the portrait of Dr. Swayne thereon. Bear this in mind, and be not deceived.

See that the name is spelt correctly.—SWAYNE

CLEANSE AND PURIFY.

DR. SWAYNE'S SUGAR COATED SARSAPARILLA AND EXTRACT OF TAR PILLS.

A mild and effective purgative great purifyer of the blood, they correct all the functions of the Liver, and as an alterative in Dropsical effections, they are very valuable. Giddiness of the head, dimness of sight, depression of spirits, headache, &c, are cured by these purifying Pills. No medicine can have a better effect for monthly irregularities, which occasionally happen to women, they are perfectly safe, and will in conjunction with Dr. Swayne's Compound Syrup of Wild Cherry, take all pain and disease from every part of the system.
