

Agricultural.

WORK FOR THE MONTH.
FEBRUARY.

CONCLUDED.

Sowing Clover Seed.—Sow clover seed on your wheat fields, at the rate of 12 lbs. per acre. It is a good plan to sow it in the snow. If not sown this month, we would wait until the first of March, when we would sow the seed, lightly harrow, and roll it in. The harrowing will effectually bury the seed, while the rolling and harrowing, will jointly benefit the wheat; the first, by acting as cultivation to the wheat plants, will destroy the weeds, while the latter will restore any plants thrown out, consolidate the earth, and otherwise benefit the crop of wheat.

And we are free to affirm, that we would never sow clover upon a wheat-field, without sowing orchard grass seed also,—that upon every acre of such field, we would sow 12 lbs. of clover seed, and 1 bushel of orchard grass seed—sowing the clover seed first, by itself, and the orchard grass seed, in the opposite direction, by itself; that when we combined these seeds together, we would delay sowing them until such time in the spring as the soil was sufficiently sound to prevent the proaching of the horses' feet, and that, in putting in the seed, we would harrow the ground with a light harrow, and finish the operation by rolling. Clover and orchard grass mixed together, make a much better hay, than clover does alone,—produces more, and is the autumn pasture much more luxuriant and enduring. It is objected to orchard grass, that it is a coarse grass; but it is not so, unless it is suffered to go to seed, which no grass ought. If cut when it and the clover first comes into bloom,—and they should be—it is not coarse,—the hay is more safely cured, than when clover alone is grown,—and the pasture is exempt from all danger of hovering the cattle, to which clover is liable. Besides, the orchard grass will protect the clover after the wheat shall have been cut.

Winter ploughing.—Stiff clays should be winter ploughed. Sandy lands with clayey sub-soils.—It frequently happens, that poor hungry light lands, rest upon what is termed, in provincial parlance, "poison" clays,—or in other words, the sub soil is of hard tenacious clays, while the surface soil is almost a blowing sand. Now, it is an easy matter to convert such lands into good loams, by simply going a couple of inches deeper, and turning up so much of the substratum. This should always be done in winter, when done, should be followed by a dressing of lime, or marl, 25 bushels of the former, or 50 bushels of the latter, per acre, will be enough for a first dressing. In spring, such lands should be harrowed, cross-ploughed, harrowed again, and then ploughed the way they were first ploughed, and harrowed,—previous to the last ploughing, they should be manured. By such treatment, their powers of attraction and absorption, are vastly increased, and those of retention are largely enhanced.—The physical change becomes so manifest, and their productive capacity so increased, that their intrinsic value may be said to be doubled. This is not mere theory,—we have known it to be done with the happiest results.

Liming and Marling.—The occasion preparing the land for corn will present a fine opportunity of applying lime or marl to any that require it. **Orchards.**—We can but renew our remarks in our former numbers, upon the management of the orchard. **Poultry.** of all kinds should be well fed, their food alternated, occasionally, receive fresh water, and have gravel, sand, and lime, always accessible. **Gates.**—Let every field on your farm be provided with a good gate. **Wagons, Carts, Implements, Tools.**—Examine, and have such as need it repaired. **Cearing.**—These, if oiled once a month will last much longer than without this care. **Store Hogs.**—Let these receive their food regularly three times a day, be regularly watered, have charcoal, rotten wood, and ashes, always accessible to them, be provided with warm, dry, well littered lodgings, and plenty of raw materials to work up into manure.

Breeding Sows.—Each breeding sow should have a separate pen to herself, and be treated as the store-hogs, otherwise. **Working Animals.**—Treat these as we advised last month. **Selling of Stock generally.**—All the animals should, three or four times a week, receive allowances of a mixture composed of equal parts of salt, ashes, and lime. When to be had, oyster shell lime will be found best for this purpose, owing to its containing phosphate of lime. **Milk Cows.**—This month and next are particularly severe upon stock, and as your milk cows have to rely upon what you may give them to eat, let your allowance at this season be liberal; humanity requires that it should be; so does your interest. Unless you furnish them with the substance to form it out of, their contributions to the pail must be limited; for although straw alone will preserve them from positive starvation, it has not that in it to encourage the secretion of milk.—Therefore, if you desire to have a full supply of this delicious beverage, of cream, and of butter, you must give your cows good hay and plentiful messes of succu-

lent food. Warm stabling, well littered stalls, and daily cleanings of their hides, are great promoters of milk secretions.

Young Stock. of all kinds should be so fed as to keep up their condition to that point of healthfulness and vigor, in which the secretions for flesh, bone, and fat, are ensured in a state alike undisturbed and continuous. Without this be the case, their size will be curtailed. Good hay, and moderate allowances of grain, should be daily fed out to them, with occasional messes of roots; to all animals from man, downwards, delight in a change of food.—What they receive should be regularly given them at stated hours of the day, which should always be accompanied by a drink of good pure water, to aid their digestive powers. The better you feed them, the larger will they grow, the more and better dung will they make; so that your profit depends upon the liberality of your treatment.

In calf heifers and cows. should receive good hay three or four times a day, and messes with meal in it, at least once a day; they should have warm, clean bedding, at night and comfortable quarters through the day; a good warm yard to exercise in at pleasure, and a stable or shed to protect them from the weather at all times. If you desire to raise a good breed of cattle, and to preserve those which are so in their good qualities, you must feed them well; bone, muscle, fat, and the secreting organs, demand to be kept always in healthful action, and these things cannot be done upon any system which merely keeps the skin and bones together. Four cows well kept, and well cared for, will contribute more to the comforts of a family than a dozen which may be so fed as merely to preserve life. Cold and hunger, destroy the physical powers of man or beast.

Stiff Corn lands.—Should the weather permit, it would be a good policy, a saving of time, to have such lands manured and ploughed up, to be acted upon by the frost. When the time comes for planting sow a bushel or two of salt per acre, and thoroughly pulverize, by harrowing and rolling. The salt will exert a double influence, it will fix the ammonia, and kill the grubs and cut worms.

Oats.—It is early as yet to get this crop in; but as our paper circulates through such a wide range of latitude, it will be in the South to do so before our next issue; we therefore, desire to impress this truth upon our agricultural friends:—A good crop of oats cannot be grown upon poor land without manure. We thus early apprise them, because the oats crop may be made a profitable one, if it be given a chance. Crops ranging from 40 to 100 bushels per acre, have been frequently grown, we have known a field of 40 acres, to average 60 bushels to the acre, and yet, from what we have seen, the average of the whole country does not, we fear, reach 10 bushels. Why is this? It is simply, because oats must generally grow on soils wherein they can find little or nothing to eat. Those who wish to grow a paying crop of oats, must either grow them on land naturally good, or made so by manuring.

With plenty of Guano, say from 200 to 400 lbs. to the acre, the poorest land might be made to produce a good crop of oats; but then as the supply of this manure is very limited, and not procurable by farmers remote from the coast, we will give the following formulas:

1. Ten bushels of bone-dust, 10 bushels of ashes, and 1 bushel of plaster, per acre, would grow a good crop.
2. Five bushels of bone-dust, 5 bushels of ashes, and 2 gallons of oil, would grow a good crop.
3. Twenty loads of marsh mud, and 10 bushels of ashes, per acre, would grow a good crop.
4. Fifty bushels of lime, or 100 bushels of marl, mixed with 10 loads of marsh mud, woods-mould, or other good loam, would grow an acre of good oats.
5. Ten loads of barn-yard manure, and 2 bushels of salt will do so.
6. But if you can do nothing better, 4 bushels of salt, and 1 bushel of plaster, will make poor land produce much better than it would without it.
7. Twenty loads of pine shatters, mixed with 10 bushels of ashes, or the same quantity of lime, would grow a good crop.
8. Five loads of mould, 10 lbs. of Nitrate of Potash, and 2 gallons of oil, mixed together, will grow a good crop of oats.
9. Ten bushels of wotten rags, 10 loads of marsh or river mud, and 2 bushels of salt, would grow an excellent crop. All the above proportions are intended for an acre of land, and we hazard nothing in saying, that either application would so improve the soil as to carry it through a 4 or 5 years rotation healthfully and profitably, with the exception of No. 7, while that would greatly increase the product.

OYSTERS!
The subscriber respectfully informs the gentlemen of Chester Town and vicinity that he has the NEW BUILDING which he has erected for an OYSTER HOUSE is finished. It is at his old stand (just below the residence of James E. Barroll, Esq.) and having a plenty of room he accommodates all who will patronize him. His cooks, are first rate, and oysters will be served up to order. Also Terra pine in season.

The upper room of his establishment is intended for the Ladies, during the summer. Suppers will be prepared for private parties at moderate cost. Oysters for sale by the gallon.
Gentlemen can also get hot coffee, ham and eggs, &c., any time during the day or evening.
Having been at considerable expense in fitting up the building for the accommodation of the public, he hopes to receive a share of their patronage.
The public's humble serv't
LEVI RODGERS.

AFFLICTED READERS.

"I am a man, and deem nothing which re-ates man for foreign to my feelings."

Youth & Manhood.

A VIGOROUS LIFE OF A

Premature Death.

KINKELIN ON SELF PRESERVATION.

ONLY 25 CENTS.

This book, just published, is filled with useful information, on the intricacies of diseases of the Generative Organs. It addresses itself alike to Youth, Manhood and Old Age. To all who apprehend or suffer under the dire consequences of early or prolonged indiscretions—to all who feel the exhaustive effects of sedentary and baneful habits—to all who in addition, to declining physical energy, are the victims of nervous and mental debility, and of moping and melancholy despondency. Dr. K. would say—

Read this Book.

The valuable advice and impressive warnings it gives, will prevent years of misery and suffering, and save annually Thousands of lives.

Parents by reading it, will learn how to prevent the destruction of their children.

A remittance of 25 cents, enclosed in a letter, addressed to Dr. Kinkelin, N. W. corner of Third & Union Streets, between Spruce & Pine, Philadelphia, will ensure a book, and an envelope, per return of mail.

FIFTEEN YEARS

of extensive and uninterrupted practice spent in this city have rendered Dr. K. the most expert and successful practitioner far and near in the treatment of all diseases of a private nature. Persons afflicted with ulcers upon the body, throat, or legs; pains in the head or bones, mercurial rheumatism, strictures, gravel, disease arising from youthful excesses or impurities of the blood, whereby the constitution has become enfeebled; are all treated with success.

He will place himself under the care of Dr. K., may religiously confide in his honor as a gentleman, and confidently rely upon his skill as a physician.

Persons at a distance may address, Dr. K. by letter, (post-paid.) and be cured at home.

Packages of Medicines, Directions, &c., forwarded, by sending a remittance, and put up secure from damage or curiosity.

Booksellers, Newspaper Agents, Pedlars, Canvasers, and all others supply with the above work at very low rates.

In Kent County Court in Equity

ORDERED that the report of the sale of the real estate of Samuel G. Kennard, late of Kent county, deceased, be confirmed, unless cause to the contrary be shown on or before the seventeenth day of March next, provided a copy of this order be published once a week for three successive weeks, in some newspaper printed and published in Kent county, before the tenth day of February next. The report states the amount of sales to be \$4000 90.

JOSEPH REDUE, C'k.

Jan. 11, 1851.

ESTATE OF COM. JACOB JONES.

Maryland, Kent county, Orphans' Court. Nov. 20, 1850.

On the application of James A. Pearce Administrator of Com. Jacob Jones, formerly of Kent co. deceased.

Ordered, that he give notice required by law for creditors to exhibit their claims against the said decedent's estate, and that the same be published once a week for the space of four successive weeks in the Kent News, printed in Chester Town, in testimony that the foregoing is truly copied from the minutes of the proceeding of the Orphans' Court of the county aforesaid, I have hereunto set my hand and seal of my office, this 20th day of Nov. 1850.

E. WELCH, Register of Wills for Kent county.

In compliance with the above order this is to give notice, that the subscriber, of Kent county, hath obtained from the Orphans' Court of Kent county, Maryland, letters of Administration on the personal estate of Com. Jacob Jones, formerly of Kent co., deceased. All persons having claims against the said decedent's estate are hereby warned to exhibit the same with the vouchers thereof to the subscriber on or before the 30th of June 1851, they may otherwise be excluded from all benefit of the said estate.

Given under my hand this 20th day of November, 1850.

JAS. A. FEARCE, Adm'r Com. Jacob Jones, dec'd.

Dec. 11, 1850.—4w.

LUMBER.

SHINGLES AND BOARDS.

T. W. ELIASON, has commenced the LUMBER BUSINESS, and has received from Port Deposit a supply of good PINE BOARDS, HEMLOCK RAILS and RAFTERS—Also Cypress and Juniper Shingles. He will sell at moderate prices for cash or on credit, and will charge interest from day of sale on all bills not settled in 60 days.

July 20, 1850.

Negroes Wanted.

I will pay the highest prices, in cash, for any number of NEGROES, with titles, slaves for life or for a term of years in large or small families, or single negroes. I will also purchase NEGROES restricted to remain in the State, that sustain good characters. Families never separated.—Persons having slaves for sale will please call and see me, as I am always in the market with the cash. Communications promptly attended to, and liberal commissions paid by JOHN N. DENNING, No. 18 South Frederick st. between Market & Second sts
Baltimore, Oct. 27, 1849.

DR. SWAYNE'S

Celebrated Family Medicines.

DR. SWAYNE'S COMPOUND SYRUP OF WILD CHERRY

The Original and Genuine Preparation! THE MOST COMMON SAYING

Is that I would not give one bottle of Dr. Swayne's Compound Syrup of Wild Cherry, for half a dozen of any other preparations, but this stands unrivalled for the cure of the following diseases:—

Influenza, Coughs, Colds, Consumption, Spitting of Blood, Palpitation of the Heart, Whooping Cough, Tickling or Rising Sensation in the Throat, Asthma, or a Weakness of the Nervous System, or impaired constitution from any cause, and to prevent persons from falling into a decline, this medicine has not its equal. And when too much calomel or emetine has been used, this medicine will prevent its evil effects on the system, and repair the billious functions.

REMARKABLE CURE OF GONORRHOEA. Abraham Hunsicker, 2 miles from Skip perville, contracted a severe cold, which settled upon his lungs, attended with violent coughing, great difficulty of breathing, an abscess formed in his lungs, and acute inflammation of the side, and discharge large quantities of pus externally. This mournful state of things continued for a long time, until making use of Dr. Swayne's Compound Syrup of Wild Cherry, which performed a perfect cure.

Have you the Asthma, Liver Complaint or Bronchitis? If so give this medicine a trial. It seldom fails to cure.

VERY IMPORTANT CAUTION.

Be very particular to inquire for Dr. Swayne's Compound Syrup of Wild Cherry, as some unprincipled individuals have stolen the name of Wild Cherry, thinking to borrow a reputation from the already established. Remember, the genuine is put in square bottles, covered with a beautiful wrapper, (steel engraving), with the portrait of DR. SWAYNE thereon, also his signature; others are in positively fictitious and counterfeit SWAYNE'S CELEBRATED VERMIFUGE.

A safe and effectual remedy for Worms, Dyspepsia, Cholera Morbus, sickly or Adults, and the most useful Family Medicine ever offered to the public."

EXTRACT OF A LETTER TO DR SWAYNE.

Dated, Andersontown, Indiana.

A man purchased a bottle of your Vermifuge the other day for his child, and by its use discharged sixty-three of the largest worms he had ever seen. It is somewhat difficult to get the people to try it, as they have been so often misled by nameless and worthless worm medicines. Yours being so very pleasant to the taste, at the same time effectual, I respectfully, yours,

TOWNSEND SHARP, P. M.

Beware of MISTAKES! Remember Dr. Swayne's Extract of TAR PILLS, (having recently been changed) covered with a beautiful steel engraving wrapper, with the portrait of Dr. Swayne thereon. Bear this in mind, and be not deceived.

See that the name is spelled correctly.—SWAYNE'S CLEANSE AND PURIFY.

DR. SWAYNE'S SUCCESSIONAL SARRAPILLA AND EXTRACT OF TAR PILLS.

A mild and effective purgative great purifier of the blood, they correct all the functions of the Liver, and as an alternative in Dropsical affections, they are very valuable. Giddiness of the head, dizziness of sight, depression of spirits, headache, &c. are cured by these purifying Pills. No medicine can have a better effect for monthly irregularities, which occasionally happen to women, they are perfectly safe, and will in conjunction with Dr. Swayne's Compound Syrup of Wild Cherry, take all pain and disease from every part of the system.

AGENTS FOR KENT COUNTY. WILEY & PERKINS—Chester town. M. V. BOYER—Millington. JAMES S. PRYOR—Head of Sassafras. DANIEL HAINES—Still Pond X Roads. WM. R. FORMAN—New Market. J. E. WEBER—Millerville. ELIJAH E. MILLER—George Town X Roads.

And by all the principal storekeepers throughout the adjacent Counties. Dr. Swayne's Principal Office, N. W. corner of 5th and Race sts., Philadelphia. Sept. 14, 1850.

IMPORTANT TO THE INHABITANTS OF CHESTER TOWN AND VICINITY.

THE well known and justly celebrated Dr. LYONS, of Baltimore, better known as the HERB DOCTOR will, visit Chester town every other Wednesday and Thursday, commencing the 6th and 7th of November, 1850; all who desire to see him and procure his never-failing Medicines can do so by calling at the residence of Mr. J. W. FAICHARD, Market space, where he has procured a room for consultation. All who are suffering with diseases of the LUNGS, LIVER HEART and THROAT, or any other, complicated chronic, diseases of years standing, which has baffled the skill of other Physicians, will find it to their utmost advantage not to despair of a cure, but to call without delay and give the HERB DOCTOR'S MEDICINES a fair and faithful trial; by so doing they will have reason to rejoice with Thousands of others, who are now living Monuments to his skill and successful vegetable practice.

Office in Baltimore, No. 75, North Howard street, corner of Clay street, between Lexington and Saratoga.

Consultation and advice free of charge Oct. 26, 1850.—ly

Personal Discharge.

NOTICE is hereby given to the creditors of Joseph A. Wright, that a personal discharge hath been granted to said insolvent debtor, and that the 19th day of March next, being the first Wednesday of our county Court next succeeding this date, hath been set apart for the final hearing in his case where his creditors may attend and show cause if any they have why a final discharge shall not be granted said debtor.

Test. JOS. REDUE, Clerk of Kent co. Court, Md. September 21, 1850.—3m

DR. MARTIN'S

Syrup of Wild Cherry.

The Wild Cherry and Sarsaparilla, which are the basis of this preparation, have been long known and celebrated in Consumption and Scurf, Asthma, &c. This remedy increases rather than impairs the appetite, and promotes in a remarkable degree, the functions of nutrition. This is not surprising, when we consider that its peculiar properties are to rouse the morbid action of the absorbent vessel, and the nervous and muscular system, while at the same time it diminishes the action of the blood vessels. It is surprising what a wonderful effect this remedy will frequently produce even in the most aggravated and advanced stages of Scurf, Chronic Pulmonary Diseases. It seems to pervade the whole structure of the Chest, and to soften those concrete tubercular masses formed in the Lungs, and bringing them down to the same state of action with the rest of the system, by which health is promoted and sustained. It also differs from most other remedies in being remarkably pleasant, and in not having any of those heating, stupefying or disgusting properties, which are found in most other preparations of the Wild Cherry and Sarsaparilla.

Read the following from a highly respectable gentleman in Shenandoah county, Va. (New Market, May 20, 1848)

"Dear Sir: For fifteen or twenty years I have been much troubled with a violent cough and difficulty of breathing. I have tried many things, but all with so little benefit, till I met with your Compound Syrup of Wild Cherry, at Messrs. A. Henkle & Son's store. At the instance of your friend, Mr. Noah J. Henkle, I was induced to take a bottle of the Syrup, and finding so much relief I continued to use it, and now think I am entirely cured."

PHILIP KNIFF, Sen'r.

MARTIN AND WHITELEY'S National Tonic.

There are no diseases so generally prevalent in this county as Ague, Fever and Dyspepsia, in the summer and fall months.

The effect of the Ague and Fever on the system is such as to leave the Stomach, Liver and Spleen much deranged from which Dyspepsia generally arises, though Dyspepsia is more generally the result of overloading the stomach, or indulging in high sea seasoned food. To find out a cure for those distressing diseases has been our special study for many years, and now think, by the aid of Chemical science, we have effected that object. Read the following:—

MILLINGTON, Kent co., Md.

Dr. Martin—Dear Sir: I have tried your National Tonic for the cure of Ague and Fever, and so far have it effected in any one instance. Three years ago I cured my own Child, and the like quantity cured the Child of Mr. James H. Pennington, a Woodford, whom you know as carrying Clocks, and the Postoffice, was cured by the use of a small Bottle only cost 50 cents.

Your respectful Yr. Serv't R. S. ROLPH, Mer. Ch. DR. MARTIN'S UNIVERSAL PURGATIVE PILLS.

A remedy for all seasons, and safe at all times.—The most superior value is aware that one great cause of disease is Costiveness, and that by the timely taking of a Purgative, the system is often restored to its accustomed energy. By such a course the lives of hundreds are saved who otherwise have fallen victims to disease. These Pills speedily remove all matters contained in the bowels, and excite the Biliary functions to a healthy action. We think we are doing a public good in offering these pills to the Public, especially as the press is teeming with the recommendation of Purgative pills, which have been given up by men who know nothing of the effects of medicines on the human system, thereby endangering the lives thousands who are daily using them.—See the Pamphlet and the certificate of those who have been cured from medical error.—

ALSO, DR. SWAYNE'S VERMIFUGE. This is the most valuable medicine in all cases of Worms of children, or grown persons. All we ask is give it a trial. It is the prescription of a regular Physician who has had a large experience.

DR. SWAYNE'S VERMIFUGE. The above medicines are prepared and sold by MARTIN & WHITELEY, No. 48, South Calvert street Baltimore, and are for sale by John L. Stann, Chester town—R. S. Rolph, Millington—E. Miller, Georgetown—R. Roads—Peter Ross, Harmony—Joseph A. Wright, Head of Sassafras—John Perkins, Worton Heights Md. 4, 1850.—4f.

Teacher Wanted.

THE Trustees of the male primary School, District No. 7, Chestertown, wish to employ a competent teacher to take charge of said School—immediate application is desired.

T. W. ELIASON, W. S. LASSELL, C. STANLEY, J. W. RICHARD, J. W. CARROLL, Trustees.

"KENT NEWS,"

AGENTS: V. B. Palmer, N. W. corner of Third and Chesnut st.; E. W. Carr, No. 440 N. Fourth st., Philadelphia, and Wm. Thompson, S. E. corner of Baltimore and South streets, Baltimore, are our authorized agents, to receive Advertisements and Subscriptions for the Kent News, and collect and receipt for the same.

A FARM FOR SALE.

SITUATE in Swan Creek Valley, Kent county, Md., containing 310 ACRES of Land. It bounds on the Bay Road, and Finley; adjoining the lands of Mr. Jas. B. Ricard, and Mr. Jno. E. Gale. This property lays well to be divided into two farms of equal size and both containing the above road, with a comfortable dwelling on each, with the necessary out buildings, and good water in the yard. There is about 35 ACRES in Wood and 60 ACRES of bottom land, as good as any in the state for growing Timothy, 20 acres of which is now set in Grass, producing two tons of hay per acre, annually. It is about 1 1/2 miles from the Chesapeake Bay, at the nearest point on the Eastern Shore, to the city of Baltimore, supposed to be 30 miles; Stone Lime can be landed, or Shell Lime obtained, within two miles of the premises, a mill and churches convenient.

I deem it unnecessary to say more, as those wishing to purchase will examine for themselves.

The terms will be made easy; those wishing to purchase will call on the subscriber living on the premises.

J. H. DULANY, Jan'y 11, 1851.

The Delaware Journal will copy the above to the amount of three dollars, and send bill to this office for collection.

CASSIMERES, SATTINETTS, AND VESTINGS.—A large assortment, just received and for sale low by T. W. ELIASON.

Nov. 9, '50.

A fine lot of Eastern Shore Bacon—HAMS, SHOULDERS, and MIDDLINGS, for sale for cash by W. N. E. WICKES

Ap. 27, '50.

Ratcliffe Mill.

THE subscriber respectfully informs the public that his SMUT MACHINE, PLASTER MILL, CORN and COB CRUSHER are in successful operation, and far exceeds his expectations.

The FLOURING MILL has been thoroughly repaired, and we must be able to do the work in the best possible manner.

Oct. 26, 1850. T. B. WHALAND.

Wanted to Purchase.

By a former living near Chester Town, for his own use, a NEGRO GIRL, from 8 to 12 years of age. The highest cash price will be given.

Apply at this office. Nov. 16, 1850.

Negroes for Sale.

A woman about 18 years old, to serve 20 years from April 1, 1850, (now pregnant) an excellent cook, washer and ironer. Also a girl 12 years to serve 25 yrs. from March last. These negroes sustain good characters, have been raised in first rate families, on farms, and will be sold low, on a credit of six months, or will be exchanged on fair terms for slaves for life, by JOHN N. DENNING, 15 S. Frederick st. Baltimore. Nov'y 23, 1850.—4w

C. O. CONE, M. D.

Professor of Operative and Mechanical Dentistry in the Baltimore College of Dental Surgery.

Will devote himself to the practice of Dentistry and to the Medical and Surgical treatment of all diseases of the mouth. Office, No. 35, North Charles st., Baltimore, Md. Jan. 26, 1850.—1y.

Sugar, Sugar.

T. W. ELIASON has good Brown Sugar at 6 1/2 cents; Clarified Loaf and Crushed Sugar, 10 to 12 1/2 cts. Jan 25, '50.
