TO THE PUBLIC.

WE, the undersigned, having signed a notice forwarning all persons from placing lime, lumber or other manure in front of, or on our premises, did not design or intend by said notice, to prevent farmers and others from puting lime on the side of the road above our buildings, but only intended to prevent them puting lime and other manures opposite to or very near our dwelling and on our side-walks and annoying our families with the dust from the lime, which has been the case heretofore.

Any quantity of lime might be deposited on the road side above our dwellings where the road is much wider and better for that purpose. As the former notice was signed hastily and not drawn up by ourselves, we deem it proper to explain our intentions in that notice by this article.

SEALED PROPOSALS

WILL be received until the first day of September next by the Commissioners of Kent county, Maryland to contract for building a Tressel Bridge (with draw or pivot 25 feet in width) over Morgan's Creek, near Chestertown. Said creek is 150 feet wide, 12 feet deep, part sandy and part muddy bottom, with a solid eight or ten feet, bank on the west side and marsh on the east. The abutment on the west side might be of stone, on the east it will be necessary to pile; the distance between the tresses to be 20 feet, length of trestles 16 feet, floor 12 feet, railing 4 feet high; the whole of the timber used to be the best white oak, except the floor, which must be of two inch white pine, and the floor of said bridge when completed, to be 5 feet above the high water of spring tides. The proposals will be expected to embrace a drawing or discription of the proposed bridge and draw or pivot, also of the opinion of contractors of the relative merits of the pivot over the draw or vice versa, and their costs, (our object being to get that which is least liable to be out of order, most durable and easiest worked,) also, the size and length of the piles, size of the tressels, joists, braces, &c &c.; also the proposed manner of forming the abutments, their height and thickness, and the difference in cost between stone and wood. The bridge to be completed and ready for travel by the first day of December next. All of the white oak timber can be furnished ready sawed ½ mile from the bridge site.

The said Commissioners will also receive proposals as above to open and grade the new road from the intersections of Armstrong and Ringgold's line with the public road, to Morgan's creek, and from the Bridge site on the east side of said creek across the marsh (which is to be brushed and raised 2 feet high and 20 feet wide by hauling dirt thereon) till it intersects the public road at Wallis woods.
