A. BARKER'S
DOUBLE ACTING
FORCE AND LIFT PUMP

IS acknowledged to be the most simple in construction, efficient in operation, less liable to get out of order, and more durable than any pump yet invented.

The World's Fair, London, gave Mr. Barker the complimentary medal, and the Pennsylvania State fair, on two occasions, awarded the pump the first premium.

In cases of fire, the Barker Fire Engine Pump has proved itself invaluable. On several occasions persons, by having this pump on their premises, have saved their property from the devouring flames.

The Scientific American, of August 14th 1852, says: "In our humble judgment Barker's Double acting pump is one of the best improvements which has been made in a great many years, and, in saying this, we express the opinion of many who have used the pump and are now using it. The pump was patented last February, and the claims were broad strong and reliable."

References to the following gentlemen: Samuel Baker, Richard S. Thomas, John McDaniel.

You can see these pumps work at any of the places we have a number engaged to put in.

The undersigned have bought the patent right for Kent county; any gentleman wishing a pump put in can drop a note to

Drills ! Drills !!
KUHNS & HAINES' IMPROVED
GRAIN DRILL.

THE subscribers would respectfully call the attention of the Farmers of Kent county, to the above justly celebrated Machine. It has been thoroughly tested, and wherever introduced has met with the most flattering success, and fast superceding all others. The following qualities *combined* establish its superiority, and renders it the most desirable Machine for the farmer.

The application of the cupped wheel feeders in combination with the slides, secures more *certainty* and *equality* in sowing the grain. It will sow equally well, wheat, oats and all kinds of small grain with the same hopper and fixtures, requiring but a moment to change it to sowing any kind of grain and any desired quantity per acre, which is done by a single screw at one end of the hopper.

It is of light draft—exceedingly simple in its construction, and not liable to get out of repair.

All that want Drills of the subscriber the present season will please send in their orders without delay. Every Drill warranted to work well.

KRAUSERS PORTABLE CIDER MILL.

THESE superior Cider Mills can still be furnished, of improved construction and finish. Their grinding apparatus is peculiar and gives them an advantage over all other mills. By the action of two reciprocating platons the apples are forced up against the teeth of a rapidly revolving cylander and retained till ground to a fine pulp, which of course yields more juice when subjected to pressure than if the pomace was coarse. The screw press has been greatly improved and strengthened since last year and the whole frame is tightened by strong joint bolts. It is adapted to either hand or horse power and can be worked by hand to the extent of six to eight barrels in a day.

OYSTERS! OYSTERS!!
THE 'RISING SUN" SALOON
JUST OPENED!

THE undersigned has opened an *OYSTER HOUSE* in Chestertown, on Fish street, (running up from the Bridge,) in the rear of the Court House, where he has fitted up a Saloon in City Style, and will serve up Oyster in the best manner. As for my cooking, it is useless to mention, as all who have eaten any oysters served up by my father or myself, know that they "can't be beat." All I ask is to give me a trial. As I have been at considerable expense in fitting up my Saloon I hope to receive a liberal patronage. Don't forget it is in the rear of the Court House. The public's ob't serv't,
WILLIAM PERKINS.
