THE HUB'S BIG DOUBLE STORES
MILLINGTON, - MARYLAND

Thousands Have Kidney Trouble and Never Suspect it.

How To Find Out.

Fill a bottle or common glass with your water and let it stand twenty-four hours; a brick dust sediment, or settling, stringy or milky appearance often indicates an unhealthy condition of the kidneys; too frequent desire to pass it or pain in the back are also symptoms that tell you the kidneys and bladder are out of order and need attention.

What To Do.

There is comfort in the knowledge so often expressed, that Dr. Kilmer's Swamp-Root, the great kidney remedy, fulfills almost every wish in correcting rheumatism, pain in the back, kidneys, liver, bladder and every part of the urinary passage. Corrects inability to hold water and scalding pain in passing it, or bad effects following use of liquor, wine or beer, and overcomes that unpleasant necessity of being compelled to go often through the day, and to get up many times during the night. The mild and immediate effect of **Swamp-Root** is soon realized. It stands the highest because of its remarkable health restoring properties. If you need a medicine you should have the best. Sold by druggists in fifty-cent and one-dollar sizes.

Home of Swamp-Root.

You may have a sample bottle sent free by mail. Address Dr. Kilmer & Co., Binghamton, N. Y. Mention this paper and remember the name, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.

THE MARYLAND
Agricultural College
COLLEGE PARK, MD.

MARYLAND'S SCHOOL OF TECHNOLOGY

25th year begins September 14. Entrance examination Sept. 12 and 13.

Degree of B. S. is given in following courses:

Agriculture	Mechanical Engineering
Horticulture	Civic Engineering
Biology	Electrical Engineering
Chemistry	General Course (Cultural)

Students taking Agriculture and the allied branches have the benefit of the U. S. Department of Agriculture, in Washington, and of the Government Experiment Farms at Arlington and Beltsville.

Students pursuing the Engineering courses supplement their practical knowledge by visits to the Mt. Clare shops, Sparrows Point and other similar places where great mechanical and engineering work is in operation.

The Agricultural College is Maryland's School of Technology, and is meeting the demand of the age for trained men in the Great fields of Agriculture, Science and Engineering. Positions are assured to all graduates.

Particular attention is called to the Two Years Course in Agriculture and Horticulture.

Each department of the College is supplied with the most modern and improved apparatus. The dormitories are equipped with steam heat, electric light and hot and cold shower baths. The location of the college is unsurpassed for health. There is a sanatorium, with a trained nurse, under the charge of a resident physician. Any possible contagious disease can be completely isolated.

Tuition, books, heat, light, laundry, board, medical attention, etc., are all included in the charge of $240 per year, payable $60 quarterly in advance.

Send for Catalogue and Book of Views.

It will be of advantage to those who expect to enter the College to send in their application as soon as possible.

R. W. SILVESTER, President,
College Park, Md.

PLEASURES OF A CAMPAIGN

A good deal of fun is poked at politicians and their methods, but there can be no denying that the open season for voters is anticipated rather eagerly by many citizens, especially residents of the rural districts, who do not enjoy so many opportunities for excitement as do their urban brethen. To have a couple dozen men going about the county endeavoring to outdo each other in politeness and affability is pleasant in itself, and who can deny that their example is more or less contagious and has an elevating effect on the Chesterfieldian qualities of the whole community. A "little leaven leaveneth the whole." Although we may be very suspicious that he is not entirely sincere, the man who greets us with a smile and a warm handshake is more pleasant to meet than the one who has nothing better for us than a snarl, a cold stare, or, at best, an indifferent nod. Plain, unassuming William Smith who has never risen high in either the business or social scale and seldom receives from his daily associates any more dignified appellation than "Bill," is naturally gratified when a man of renown, an aspirant for the chief official position in the State, professes warmly that he is delighted to meet *Mister* Smith, inquires solicitously about the health of the Smith family and assures *Mister* Smith that the contest on hand is a most important one, in which *Mister* Smith is amost important factor, and that it is virtually necessary, in order that the contest be settled rightly, that *Mister* Smith attend the election. Of course, after such an uplift to his self-respect it is not conceivable that *Mister* Smith could vote for any other candidate than the one who had interviewed him. But it sometimes happens that rival candidates get hold of Mr. Smith at different times, and the result sometimes is that *Mister* Smith becomes so convinced of his importance that one side has to throw a cash consideration into the scale to decide the matter. While advocates of good government may deplore this, the result is apt to be good for Mrs. Smith and the little Smiths unless Mr. Smith, in the excess of the responsibilities thrust upon him, so far forgets himself as to become plain "Bill" again and fills his skin with whiskey with the proceeds of his vote.

The political campaign is a big thing that comes annually, although in some years with more eclat than in others. It is not necessary to say "long may it live," for it will live whether we say so or not.

HICKS FOR SEPTEMBER

Long-Range Forecaster Hicks and those who believe in the old adage that we will have frost about six weeks after the first notes of the katydid are heard seem to agree as the time of "Jack's" advent. Katydids were heard rasping their evening dirges in Towson about the third week in July, and according to the old theory "Jack" must be pretty close to our borders. Rev. Irl Hicks thinks so, too, for his summing up for September he says we will have cool nights with frosts in many Northern States on and near the 9th and 10th.

He promises us an autumnal equinox as we start in September, which will cover the period from the 1st to the 6th. Active storm conditions will prevail, when the seer says it is natural for us to expect a decided fall of the barometer. You know it wouldn't do for the first few days to get all the glory unto themselves, so Prophet Hicks says a reactionary storm period will push its personality along somewhere between the 8th and the 10th, when the magnetic and electric crisis will fall, and extend forward to about the 15th. There's lot more that Prophet Hicks says will occur about this time, but we think we've given enough to hold the reader's kind attention, for awhile, anyway.

"A regular storm period," combined with the mercury period and the autumnal equnex, will hold the boards from the 12th to the 16th, and will bring a return of falling barometer and change to warmer, cloudiness, rain and thunder, but no general or abundant rains will fall. The gulf coast regions will be the scene of some pretty high old times, when dangerous gales and tornadoes will prevail. It may be out of place to advise those who may have accident polices to look after them, as the seer has brewed a peck of trouble for those regions. Storms, and then more storms, the prophet says, will extend to the 22d, which will be followed by rains. The last week in September is the crisis period, when cool nights and frost may be expected as we pass into October.

The seer winds up his prognostication with a homily on equinoctial storms, and takes up his parable right where he left off when he predicted such direful doings as we pass into the month of the sere and yellow. Selah!

EXPERIMENTS WITH LIME.

Delaware Farmer's Have Tried it in Raising Wheat.

Several Delaware farmers have made a test this year, of the use of lime in growing wheat. There are numerous advocates of the use of lime and others, particularly in the granges who contend that it is no use except where the land has become "sour," and therefore needs a disinfectant.

One test was applied on the farm of George V. Peverly in lower New Castle county, where one acre of ground was well covered and worked with lime and an adjoining acre was not. In the presence of five judges, the land was properly measured and on Monday evening, the judges counted the shocks in the staked-off acre where no lime was used and there were thirty-two. On the adjoining acre were the lime was used there were thirty-eight, and on still another where lime was used thirty-nine. On the division line the difference in the richness of the stubble was apparent, although the same culture and fertilizer treatment had been given both.

The difference in six and seven shocks means a gain of five or six bushels of wheat, or $5.30 per acre, while the lime costs per acre, $3.58. To the farmer with twenty-five, forty or fifty acres, it is contended, this means much as the improvement from lime is lasting.

WITHIN the brief period of half an hour, in the President's study in the White House at Washington, was taken the greatest stride in the direction of the world's peace that the world has ever witnessed. It was the joining of three great nations — Great Britain, France and the United States of America —in a league of peace. By the signing of these three treaties, these nations bind themselves to hereafter submit all differences which may arise among them or between any two of them to the peaceful methods of arbitration for settlement.

DELAWARE PEACHES SHIPPED.

Dover, Del., Aug. 18.—A development in fruit growing that has been watched with great interest during the past week is the rippening and harvesting of the peach crop from the Chandler orchards near Milton, and close to the Kent-Sussex county line. A carload of peaches was shipped from this orchard on Wednesday and about 5,000 baskets in all will be shipped during the next fortnight. This is the orchard that was heated during the severe spring weather the stoves being supplied with fuel from an oil tank built on the place. The peaches now show the survival of frosty nights and also the eradication of blights.

SIX THINGS A BOY SHOULD KNOW

First, that a quiet voice, courtesy and kind acts are essential to a gentleman; second that roughness, blustering and foolhardiness are not manliness; third, that muscular strength is not health; fourth, that a brain crammed only with facts is not necessarily a wise one; fifth that the impossible to the boy of fourteen will be easy to the man of twenty; sixth, that the best capital for a boy is not money, but love of work, simple tastes, and a heart loyal to his friends. —Selected.

THE campaign for reciprocity with the United States is now under way in Canada and will continue until September 21st, when the election for a new parliament will be held.

JUDGE ADKINS suggested to the Talbot Grand Jury that the county needed a law to prevent liquor agents soliciting trade from door to door, and that it ought to petition the Legislature for such a statute.

A SCHOOL of horticulture for women, which was established by the State of Pennsylvania a few months ago, is already filled to overflowing and has a large waiting list. The course in horticulture provides practical training in the care of gardens and orchards and includes bee-keeping, poultry raising, the preserving of fruit and vegetables and various other branches of farm and household work. Throughout the United States there are many women engaged in farming, and it appears that there are many more not only willing, but anxious to take up some branch of agriculture.

KENT farmers will be interested in a bulletin issued by the State Board of Health relating to lard. The bulletin says that pure lard made from sweet, clean hog fat, to which not to exceed 5 per cent. of pure, sweet lard stearin has been added, may be labeled "Pure Lard". If lard contains more than 5 per cent. of added lard stearin, or any per cent. of other stearin, the addition must be so stated on the label, with the name of the kind of stearin used. In order that the purchaser may be properly informed as to the nature of the article bought, dealers must, in every instance, affix a label to the package giving the necessary information as to the true character of the article sold.

Notice To The TAX-PAYERS OF KENT COUNTY.

Treasurer's September Sitting

IN PURSUANCE of an Act of Assembly, passed at the session in 1891, Chapter 292, the undersigned, Treasurer of Kent county, hereby gives notice that for the purpose of receiving the

State and County Taxes

in said county for the year 1911, he will sit for the September Sitting in the several Election Districts, between the hours of 10 o'clock a. m. and 3 o'clock p. m., on

WEDNESDAY, September 6th.

THAT AWFUL BACKACHE

Cured by Lydia E. Pinkham's Vegetable Compound

Morton's Gap, Kentucky.—"I suffered two years with female disorders, my health was very bad and I had a continual backache which was simply awful. I could not stand on my feet long enough to cook a meal's victuals without my back nearly killing me, and I would have such dragging sensations I could hardly bear it. I had soreness in each side, could not stand tight clothing, and was irregular. I was completely run down. On advice I took Lydia E. Pinkham's Vegetable Compound and Liver Pills and am enjoying good health. It is now more than two years and I have not had an ache or pain since. I do all my own work, washing and everything, and never have the backache any more. I think your medicine is grand and I praise it to all my neighbors. If you think my testimony will help others you may publish it."—Mrs. OLLIE WOODALL, Morton's Gap, Kentucky.

Backache is a symptom of organic weakness or derangement. If you have backache don't neglect it. To get permanent relief you must reach the root of the trouble. Nothing we know of will do this so surely as Lydia E. Pinkham's Compound.

Write to Mrs. Pinkham, at Lynn, Mass., for special advice. Your letter will be absolutely confidential, and the advice free.
