SELECT YOUR MORTICIAN As You Choose a DOCTOR

Too many people are inclined to think of the mortician just as a business man. Too little consideration is given to his necessary qualications in embalming physiology, chemistry, physic, pathology, bacteriology, sanitary science and post mortem plastic surgery.

Few people know of the part played by the mortician in safeguarding the health of the public. Often at great personal risk, he takes the necessary steps to prevent the spread of disease. This vital service is recognized and appreciated by the medical profession and public health authorities. For your own protection you should select your mortician as you choose your doctor, according to his professional skill.
