THURSDAY MORNING MUSICALE AT COLLEGE

The Washington College Assembly period of November 15th will be featured by a musical program by two members of the facutly of the Delaware School of Music, Wilmington, Del. The guest artists will be Edna B. Woods, piano soloist and Mr. Daniel Healy, baritone.

The program presented by these two artists in an assembly program of last college year will be remembered with pleasure by many music lovers of Chestertown who were privileged to hear Mrs. Woods and Mr. Healy.

The public is cordially invited to this program.

TELEPHONE INSTALLATIONS ANNUAL AFFAIR IN JAPAN

If telephone subscribers in this country on applying for service were told that installations were only allowed in June of each year as is the case in Japan, serious complaints would no doubt be made. This would be especially true in Maryland, Virginia, West Virginia and the District of Columbia, territory served by the Chesapeake and Potomac Telephone Companies where the average telephone is installed within a few days after the application is made.

Applications for telephone service in Japan must be made during the month of June, or the prospective subscriber must wait for another year before the instrument will be installed. The alternative is that he pay a premium to secure a telephone already serving another subscriber. The average premium for a telephone paid last year, according to Telephony, was 700 yen, which is approximatcly $210.

Of those who apply for telephones in the Flowery Kingdom, only about 10 per cent in the country as a whole are actually allowed to have instruments installed. In the city of Tokio last year, of the approximately 40,000 people applying to have telephone installations made, only 4,000 were accepted.

Japan is now served by less than 1,000,000 telephones. This means that there are about one and one-half telephones for each 100 of the country's population. In the United States the ratio is 14 telephones for each 100 people. Telephone and Telegraph Statistics of the World shows that there are about 52 telephone conversations held annually for each person as compared with 205 in the United States. Tokio, the largest city, with a population of 5,300,000 is served by 184,000 telephones. This is about the same number of telephones serving Washington, D. C., which has a population of about 500,000.
