1500 To Attend The Milk Meeting In Philly.

John Carvel Sutton Is Kent's Delegate

Issues May Effect Our Farmers In Kent

Fifteen hundred milk producers are planning to attend the eighteenth annual meeting of the Inter-State Milk Producers' Association in Philadelvhia, next Tuesday and Wednesday, Nov. 20-21. Delegates and other members are expected from more than fifty counties in Southeastern Pennsylvania,Southern New Jersey, Maryland and Delaware. Meetings have been held by more than 200 locals of the association at which official delegates were selected to attend the meeeting in Philadelphia.

Executive sessions are scheduled for Tuesday, the 20th, with the election of nine directors the outstanding event at the morning meeting. Nominations for directors were made through petition by members residing in each district where a vacancy will occur.

In addition to hearing reports of officers, many of the members will have their first opportunity to hear B. H. Welty, newly elected president of the association. He delivers his report of the association's work at the Tuesday afternoon meeting and in addition will preside at all sessions.

Unusual interest is expected in the resolutions which will be discussed and voted upon at the same session. These resolutions will determine the sentiment of the meeting on many important issues which may effect all farmers producing market milk in any part of the Philadelphia Milk Shed.

Nominees for directors with the districts they represent are Howard Brown and John S. Reisler in District 9, Cecil County, Maryland: J W. Keith in District 10, Queen Anne's and Caroline counties, Md.: Wm. G. Mendenhall and H. D. Dotwilor in District 12, Northern Chester county, Pa.; H. B. Stewart, P. H. Cox and H. F. Clark in District 17, Huntingdon county, Pa.; M. L. Stitt, T. J. Auker, and H. H. Bradford in District 18, Juniata and Mifflin counties, Pa.; John Carvel Sutton in District 19, Kent county, Md.: C. H. Joyce in District 20, Burlington, county, N. J.; S. U. Troutman in District 21, Bedford county, Pa.; and H. L. Davis and Sam G. Waddington in District 24, Salem and Cumberland counties, N. J.

Members and Delegates attending the annual meeting will vote on one candidate from each district.

William Thomas Jones died Friday afternoon at the home of his daughter, Mrs. Robert Kennedy, of Kennedyville, aged 79. He had been an invalid for many years. He leaves two sisters, Mrs. Emma Willis, Chesapeake City, and Mrs. Laura Dunlap. Also five children, viz., Dr. George R. Jones, Galena; Urie Jones, Cecilton; Mrs. R. Kennedy; Mrs. Samuel Deshane, Galena; Mrs. Ollie Atwell, Kennedyville. Services were held at the Kennedy home Monday 2 p. m. Rev. Mr. Ferguson officiating, interment at Union Cemetery, Worton. The bearers were Dr. George Jones, Urie Jones, Robert Kennedy, Sam Deshane, Ollie Atwell and Lloyd Kennedy; Marvin Williams, undertaker.

Mrs. Sarah Hanson, wife of Hans C. Hanson, died at her home near Chestertown, Friday morning, Nov. 2, after a lingering illness, age 65. During all her long illness she had the constant care and devotion of her husband and two children Selma and Oscar.

The funeral was held from her home Sunday at 2 p. m., with Rev. A. T. Hudson officiating, pastor of Union Church. The interment was made at Chester Cemetery. W. H. Good, undertaker. The bearers were Walter Elburn, Harry Nicholson, C. C. Meredith, John W. Starkey, A. Gustafson and Walter W. Needles.

P. T. A. Presents Another Argument For School

That Larger Opportunities In Extra Curricular Activities Will Develop Childern More effectively Than The Present High School Set-up, Plus The Fact Of Holding Pupils In School For A Long Period Of Time:

One of the most glaring needs of the present high school plant is that of a gymnasium for those interested in athletics. Our program of extra-curricular activities calls for regular periods of training in physical education. Competent instructors for this work are provided and there is a great deal of interest displayed by the pupils for athletics. Yet because of the lack of a proper place in which to take care of the physical education classes, these classes must confine most of their activity to good weather in spring and fall, when they may play out of doors. During rainy weather and in the winter when it is too cold to practice on the athletic field. these physical education classes must remain in their study halls to study instead of getting their alloted periods of physical training which the State Department of Education recommends that they should have. In this respect Chestertown High School is not meeting the recommendation of the State Department of Education.

It is also worthy of note in this connection that the boys and girls interested in basketball (of whom there are a considerable number) would have no place in which to play were it not for the generosity of the college in permitting us to use their gymnasium for a short time during the noon hour and after school for practice. Considering the popularity of this sport on the Eastern Shore and the number of boys and girls who go out for it, it would be a real loss to the high school if these teams had to be dispensed with.

There is another point to consider in relation to equipment for physical education. Good health and the acquisition of good health habits are of prime importance in physical education. In fact, it may be said that the improvement of the health of the pupils and training for better health habits are the sole reasons and excuse for physical education classes being in high school. Yet, in spite of that, we have no dressing rooms for these classes. Pupils must use inadequate cloakrooms or lavatories which are impossible to be kept as clean as they should be kept. No lockers are provided for their uniforms and athletic equipment. Consequently their suits and sweaters are kept on nails or benches in the tiny dressing rooms with no pretense made of keeping them separate. It can readily be seen that this is unsanitary and positively dangerous to the health of those students using the dressing rooms. Moreover, no showers are provided and pupils coming in from the field, dusty and perspiring from playing, must change from uniforms to street clothes without a shower. This is inducive to lack of care of personal cleanliness, a habit which is certainly not to be encouraged. To this deplorable extent Chestertown High School is failing in the first cardinal principle of education —Health.

Another field of extra curricular activity in which the pupils of Chestertown High School manifest a great deal of interest in that of dramatics. There is a Dramatic Club which functions admirably considering the lack of facilities for this activity. We have no stage and no proper auditorium which are necessary if the high school is to give plays and entertainments of a dramatic character. Here again the college must be called upon for the use of their auditorium every time the high school decides to give a play. This is an inconvenience both to the high school and the college. If Chestertown High School could be provided with an auditorium (which might also be used for a gymnasium as is done in many cases), modern productions could be given and those people interested in dramatics would be encouraged to stay in school longer. Present conditions for developing dramtic talent. so far as equipment goes, could hardly be termed as encouragement to any pupil. Those who stay in high school because of this interest stay in spite of their disadvantage rather than because of their advantages.

As is to be expected, one of the greatest interests among the high school pupils is in reading good books. As a result of this interest the Reading Clubs organized for this year are very popular with the students. A club is organized for each class and they meet periodically to discuss the books they are reading, to get more boods to read and to read the books they like. Yet those people who are interested in reading find the lack of a library a great handcap in their activity. They must meet in a classroom and sit at their desks when their reading clubs feet. They are scattered thru out the building in the various class rooms, and those pupils who do not attend classes in any particular room are not familiar with the books in that room. Nor is there any room available in which to get all these books together. Would it not be much better if the pupils of Chestertown High School had a real library to which they could go when they want to find a particular book instead of searching blindly all over the building, not knowing where to look. Nor is it likely that the pupils of Chestertown High School will know how to intelligently use a library if they do not use a library of their own in high school.

In concluding this article it does not seem unreasonable to expect that the health of the pupils of Chestertown High School should be safeguarded by every possible means, that habits of cleanliness should be inculcated at all times, that proper facilities for dramatics should be provided, and that the love of good books and good reading habits be encouraged by the addition of real library to the plant of Chestertown High School.

IN MEMORIAM

In loving memory of my dear friend, Mr. John D. Urie, who passed away one year ago November 20th. His passing left a vacant place in the thoughts and hearts of many who will long remember his kindly deeds and sympathetic ways. He always had a cheerful smile and a gracious welcome for every one who visited him. He was a man of sincerity, integrity and faithfulness.

In all my dealings with him he never failed me. But was every ready to lend a helping hand and his going has left a vacant place in my heart and life that can never be filled. A life long friend, John W. Atwell. 1t

2 Men Are Over-Come By Fumes

REMAIN ALL NIGHT IN CAR WITH MOTOR RUNNING

Overcome by monoxide gas fumes when they gave up trying to get their stalled automobile out of the mud and sought shelter against a driving rain, with the motor running, William Christopher, an employe of the Summit Poultry Farm of Ridgely and his brother-in-law, John Lockwood, of Millington, remained unconscious in the closed car all night Sunday and were not revived for 24 hours after they were discovered the following morning on an unfrequented Millington-Crumpton dirt road. Their conditions are now favorable for recovery.

The two men, while on their way to a neighboring farm on this rainy evening, became mired in a dirt lane. They tried several ways to get their car started. Their last recollection is of getting into the closed car for shelter from the rain and cold.

After they had been observed by several persons next morning, who thought they were dead, they were later rescued by Bert Godwin, of Millington, who opened the car and turned off the motor. They were carried to the home of Mrs. Lockwood, where three physicians, Dr. Merritt Brice and Dr. G. L. Copeland, of Millington, and Dr. J.Stack, of Crumpton, worked over them all day. They were finally revived.

LOYAL TEMPERANCE LEGION MEETS

The first regular meeting of the Loyal Temperance Legion, an organization of boys and girls, was held in the Assembly Hall of the Chestertown Elementary School on Friday afternoon, Nov. 9th, under the direction of Mrs. Robert Moore. Harry Poole, of the High School faculty gave the first of the series of talks to be presented at these meeting. Mr. Poole in his talk outlined the effects of alcohol on the human body.
