This is a Semi-Bound Map

The semi-bound map is designed to bridge the gap between the loose sheet map and the bound map.

Its purpose is to preserve and perpetuate sheet maps of considerable territories which are expected to expand to bound map proportions. Also some new maps of future bound potential will be issued in semi-bound form.

The semi-bound map is expected to preclude the necessity of republication and subsequent transfer of company liability.

Copies of semi-bound maps purchased by companies and general agents will be supplied in hinged transparent envelopes. Binders with capacity for two or more semi-bound maps will be available upon order.

Correction service to all maps will be charged to local agents holding copies of the maps at the same rate paid by their principals.
