—Between 11 and 12 o'clock Tuesday morning, of last week, almost the whole city of Wilmington was without water for drinking or for any kind of manufacturing purpose. The accident which placed over 60,000 people in such a plight, and that without a minute's notice, was caused by a lumber laden schooner, the S. F. Munson from Boston, Mas., which was unloading its cargo for the P. W. & B. railroad at Third street bridge. It was low tide at 11 o'clock and the big schooner came plump down with her iron covered keel on the 20-inch water main that crosses the river bed at that point. The main was broken right half, and the result was that almost the whole of the city was immediately without water.
