Town and County Intelligence.

REGISTER OF SALES—The following sales are to come off, for which bills have been printed at this office, or are advertised in this paper:

Jan. 30.—The real estate of the late Cornelius Comegys, at Jas. H. Willis' hotel, in Greensborough.

Feb. 15.—D Blocksom will sell the real estate formerly belonging to Lewis and Jno Black and wife, at the Court House.

THE Orphans' Court for Caroline county will sit on Tuesday, February 9, 1869.

GEO. COLTON & SON, proprietors of the *Maryland Republican*, will accept our thanks for a neatly printed copy of the Comptroller's Report.

BRUSH THEM DOWN—The cobwebs which are seen in the corners of the new Church.—Come, Mr. Sexton, this is a part of your duty.

THE EXTRA MEETING.—The extra meeting in the M. E. Church still continues with increasing interest. Several have professed religion, and many more are seeking their Savior to know.

THE FARMERS' COLUMN may be found on our fourth page. Our agricultural editor discusses this week, in colloquial style, the advantages arising from the reading of newspapers. It will be found interesting to business men as well as farmers, and we ask them to read it also. They may possibly receive some suggestions therefrom which may prove of vast benefit to them hereafter.

THE BRIDGETOWN MAILS.—What is the matter with the up-country postmasters, that the Bridgetown mails cannot reach their destination? Every week, of late, newspapers mailed here for that place, goes up the Delaware road to some place and returns in a few days via the Queenstown mail. Why this is so is more than we can explain, but we know it is great a annoyance to us and our subscribers at that place. We hope the negligent postmaster will pay more strict attention to his duty in the future.

INCENDIARYISM.—Some vile wretch, on Saturday night, the 16th inst., set fire to the hay stacks of Mr. Jas. Pippin, residing in the 1st district. Two stacks of excellent timothy hay were consumed, and one was saved through the exertions of Mr. P., who discovered the fire before it had made much progress. Loss about $50. A reward of that amount is offered in our advertising columns to-day for the apprehension and conviction of the incendiaries. We hope they may be ferreted out, and receive a punishment suitable to their offence.

OPERATIONS AT THE NEW MILL.—Instead of allowing the new mill to remain idle till Spring, the proprietors have determined to build a "tumble dam" further up the stream, and start the mill at once. This will require only about a week, and the work was begun on Monday. During the wet season it is thought that the natural flow of the stream will suffice to turn the machinery, and when the dry season comes it is expected to have the old dam rebuilt. So our farmers will not be deprived of the convenience of this mill as long as was at first anticipated.

NEEDS REPAIRING.—The season for high tides is now near at hand, and Denton causeway is poorly prepared to keep its surface from beneath the water. It is very low—so low in fact that even an ordinary tide overflows it, especially in the middle. The sand has sunk and spread so that it is only a few inches above the level of the marsh. In view of this fact, and the still further circumstance that is the principal avenue to our town, we think the County Commissioners should see that it is promptly and properly attended to. Every day the work is postponed becomes that much more expensive. Let the Commissioners, therefore, attend to the matter at once. If the sides are well logged up and the surface well covered with shells, it will make a good, hard road.

A DANGEROUS PLACE.—We have repeatedly heretofore noticed the exposed and dangerous cellars which lie along our main thoroughfare. Since the fire they have not even been enclosed, and occasionally we hear of some accident being caused by them. No later than last Tuesday morning a blind horse, harnessed to a carriage fell down the one opposite the hotel, and narrowly escaped serious injury. It was one of the Harrington stage horses, which had been left standing unhitched in front of one of the stores, but becoming restless it started off. Being blind it could not see its way, and walked directly down the cellar drawing the carriage after it. Strange to say no accident happened to the horse, and but little damage was done to the carriage. Mr. W. W. Lowe, however, received a very severe kick from the animal on his thigh, whilst endeavoring to assist it in getting out of the cellar, causa very painful wound. We think our corporate authorities should take this matter in hand and order these cellars to be enclosed. If the owners refuse so to do, let them be declared nusisances, and let the Commissioners enclose them with a strong fence and sell the property, if needs be to pay the costs. They have full authority to act.

REPAIRS LONG NEEDED.—For several days workman have been engaged in putting long needed repairs upon the academy in this town. A new flue, with its foundation on the ground, has been run, and the walls been ceiled all around about three feet from the floor. These repairs have long been needed. Their late sad condition had an existence even before our day. Well do we remember when we used to sit within its walls and endeavor to study with the cold penetrating every part of the body and the smoke almost blinding us. The fact is, almost all of our school-houses are poorly adapted to the comfort and health of the children. Scarcely any of them have any ventilation, and but few have sufficient light. This parsimony on the part of our people ought to be frowned down. Every confort and convenience possible should be put into the school-room, and when this is done we will have more healthy children and a more general dissemination of education. It is impossible for children to study when the body is ill at ease.

Preston.

From our Special Correspondent.

—The exhibition which was noticed in last week's issue of THE UNION took place on Monday, the 18th inst. The weather, though very unfavorable, did not prevent the house being pretty well filled. The doors were opened at 6 o'clock, P. M., and until 7 o'clock people came flocking in. At 7½ o'clock the curtains were drawn, and Mr. Atkinson, the teacher, announced the first thing on the programme—music—after which Rev. James Esgate delivered a prayer very appropriate to the occasion. Singing was then in order, which being over, James F. Rowins delivered the opening address, an original oration. The exercises were then gone through with in a manner highly creditable to the pupils of the academy. All acquitted themselves with honor, and were loudly applauded by the audience. One thing we cannot pass without notice: there were quite a number of persons from a distance, among them some young men and ladies from Federalsburg. They stationed themselves in the most conspicuous part of the house, and behaved in quite a ridiculous manner. Open remarks concerning the performances were heard from them, and at the close of each piece the young men would halloo and whistle so as to disturb the audience very much. Mr. Atkinson spoke to them several times, but it was of no avail; it only seemed to excite them that much more. Such conduct does not speak very well for them, and we hope the next time they make us a visit they will deport themselves with proper decorum. We hear that the proceeds of the exhibition are to go towards painting the inside of the school-room, which needs it very badly.

—Farmers are pretty busy in this vicinity hauling lime during this mild weather. Some one remarked in our hearing, a day or two ago, that the farmers, having laid aside their farming implements till the Spring, were a little taken back at this unexpected weather and knew not what to do with themselves.

TO PHYSICIANS.

NEW YORK, August 15th 1867.

Allow me to call your attention to my PREPARATION OF COMPOUND EXTRACT BUCHU. The component parts are BUCHU, LONG LEAF, CUBEBS, JUNIPER BERRIES.

MODE OF PREPARATION.—Buchu, in vacuo.—Juniper Berries, by distillation, to form a fine gin. Cubebs extracted, by displacement by liquor obtained from Juniper Berries, contained very little sugar, a small proportion of spirit, and more platable than any now in use. The active properties are by this mode extracted.

Buchu, as prepared by Druggists generally, is of a dark color. It is a plant that emits its fragrance; the action of a flame destroys this (its active principle), leaving a dark and glutinous decoction. Mine is the color of ingredients.—The Buchu in my preparation predominates; the smallest quantity of the other ingredients are added, to prevent fermentation; upon inspection, it will be found not to be a Tincture, as made in Pharmacopœa, nor is it a Syrup—and therefore can be used in cases where fever or inflammation exists. In this, you have the knowledge of the ingredients and the mode of preparation.

Hoping that you will favor it with a trial, and that upon inspection it will meet with your approbation

With a feeling of confidence,
I am, very respectfully,
T. H. HELMBOLD,
Chemist and Druggist of 16 Years' Experience in Philadelphia, and now located at his Drug and Chemical Warehouse, 564 Broadway New York.

[From the largest Manufacturing Chemists in the World.]

"I am acquainted with Mr. H. T. Helmbold; he occupied the Drug Store opposite my residence, and was successful in conducting the business where others had not been equally so before him. I have been favorably impressed with his character and enterprise.

WILLIAM WEIGHTMAN,
Firm of Powers & Weightman, Manufacturing Chemists, Ninth and Brown Streets, Philadelphia.

HELMBOLD'S FLUID EXTRACT BUCHU, for weakness arising from indiscretion. The exhausted powers of Nature which are accompanied by so many alarming symptoms, among which will be found, Indisposition to Exertion, Loss of Memory, Wakefulness, Horror of Disease, or Forebodings of Evil; in fact, Universal Lassitude, Prostration, and inability to enter into the enjoyments of society.

The Constitution, once affected with Organic Weakness, requires the aid of Medicine to strengthen and invigorate the system, which HELMBOLD'S EXTRACT BUCHU invariably does. If no treatment is submitted to, Consumption or Insanity ensues.

HELMBOLD'S FLUID EXTRACT BUCHU, in affections peculiar to Females, is unequaled by any other preparation, as in Chlorosis, or Retention, Painfulness, or Suppression of Customary Evacuations, Ulcerated or Schirrus State of the Uterus, and all complaint incident to the sex, whether arising from habits of dissipation, imprudence in, or the decline or change of life.

Helmbold's Fluid Extract Buchu and improved Rose Wash will radicaly exterminate from the system diseases arising from habits of dissipation, at little expense, little or no change in diet, no inconvenience or exposure; completely surperseding those unpleasant and dangerous remedies, Copaiva and Mercury, in all these diseases.

Use Helmbold's Fuid Extract Buchu in all diseases of these organs, whether existing in male or female, from whatever case originating, and no matter of how long standing. It is pleasant in taste and odor, immediate" in action, and more strengthening than any of the preparations of Bark or Iron.

Those suffering from broken-down or delicate consttiution, procure the remedy at once.

The reader must be aware that, however slight may be the attack of the above diseases, it is certain to affect the bodily health and mental powers.

All the above diseases require the aid of a Diuretic. HELMBOLD'S EXTRACT BUCHU is the great Diuretic.

Sold by Druggists everywhere. Price—$1.25 per bottle, or 6 bottles for $6.50. Delivered to any address. Described symptoms in all communications.

Address H. T. HELMBOLD, Drug and Chemical Warehouse, 564 Broadway, N. Y.
