American Union

J. M. EMERSON, EDITOR AND PROPRIETOR.

DENTON, MARYLAND:

Thursday Morning, March 23rd, 1871.

For Sale Cheap.

We offer for sale *very low* the Press upon which THE UNION has been printed for the last three years. It is a Smith Hand Press, 22 by 32, in good order. The universally neat appearance of THE UNION will attest this fact.—Our only reason for selling is because we have no use for the Press, having been compelled to purchase a new one in order that we might enlarge our paper. Address all inquiries to

THE UNION, Denton, Md.

Our Enlargement.

THE UNION greets its patrons and friends this morning in an enlarged form, and, we trust, in an improved typographical appearance. Ever since our connection with the paper we have felt the need of greater room; but it was not until the present hour that we have been able to gratify our ambition in this respect—to realize hope long deferred, and to show to our readers somewhat of the nature of the paper we would like to furnish them. Even now our limits are circumscribed, and we find absolute necessity for curtailment in every department; but this enlargement will relieve us of a part of the mental shame we have often experienced over the appearance of our paper, and enable us to bring THE UNION still further up to the standard of what we conceive the country paper ought to be. We perceive wherein our paper is deficient—its shortcomings and its defects—but justice to ourselves requires that we shall not attempt to give more than an equivalent for value received.—Our disposition is to excel, but we find ourselves so situated that all exertions towards excellence are restrained for lack of that degree of interest which all public enterprises, and especially the newspaper, encounters in this locality. Of one thing, however, our patrons may rest assured: that beyond our office expenditures and cost of living, they will receive, in an improved paper, the full value of the amounts which they invest in our enterprise.

Although our paper is enlarged by the addition of near seven columns, thus making it a twenty-eight column paper, seventeen of which, at least, will be devoted to reading purposes—a greater amount than is furnished by any newspaper in Eastern Maryland—our subscription price will remain unchanged, $1.50 per annum.

In making this enlargement we have been at considerable expense, and we hope our friends will come forward and settle their accounts so that we may be relieved of the unpleasantness which a lack of money begets. We have endeavored to increase the pleasure and instruction which the newspaper affords for the benefit of our readers; we now trust they will reciprocate by remitting the amounts due us.

Was it a "Democratic" Victory?

The Democracy of Maryland is exceedingly jubilant over the result of the election in New Hampshire, and Democratic journals are full to overflowing with rooster cuts and prominent headlines. They rejoice and congratulate each other upon what they say is a glorious Democratic triumph, but which we conceive to be little less than a Republican victory. It is true that the victory belongs to the Democracy; but Maryland Democrats and New England Democrats are almost as diverse and antagonistic in their creeds and principles as a Maryland Republican and a Maryland Democrat. Convey to New England the battle-cry of Maryland Democrats—Free Trade, State's Rights, glorification over the lost cause and an unceasing warfare against the colored race, and a Republican triumph is assured. It is only by a parallel platform of principles—a distinction without a difference—that the Democrats of New England are ever able to carry a single State, and, then, they dare not depart from it. Only a war Democrat of unlimited means and great popularity could be elected Governor of even Connecticut, the closest State: and a man of Southern Democratic proclivities would stand a poor chance of election in that State.

Regarding the result in New Hampshire thus, Maryland Democrats have but little cause for rejoicing. It is no endorsement of *their* principles; on the contrary, the nomination and election of men who were in hearty accord with war for the salvation of the Union, if not with the Administration prosecuting the war, is a fitting rebuke to the character of the men mainly comprising the State officers of "My Maryland." It is no endorsement of the doctrine of States Rights, or of that unnatural and unpatriotic theory that Free Trade is more conducive to the prosperity of the country than Protection. It is a positive condemnation of all sympathy for the lost cause, and a direct rebuke to the manner in which Maryland Democrats prosecute their campaigns. We trust they will comprehend the true purport of their victory, and endeavor to conform themselves to the principles of New England Democracy, which, by the way, partakes more of the spirit of Jefferson and his compeers, and is more in accord with our Republican form.

MR. RITCHIE, Representative in Congress from the Fourth Maryland district, has abandoned the Free Trade doctrine he so urgently recommended to the people he addressed during his canvass last fall. At any rate, he made a speech in the House, at Washington, a few days ago in which he advocated the Republican doctrine of Protection so far as the coal interests are concerned. And we presume there are several other Democrats in Maryland like Mr. Ritchie. They will advocate Free Trade until it arrays them in opposition to their own interests, when they abandon it as an ill advised and not to be desired principle, and to be advocated only when expediency demands it.

THE LATEST RETURNS from the New Hampshire election give the Democrats a majority in the Legislature, which secures the selection of a Democratic Governor, the people having failed to elect either candidate by ballot.

The Outlook.

Whatever may be the hopes of Democrats, or the fears of callous and weak-kneed Republicans, regarding the quarrel between the President and Mr. Sumner, or the displacement of the latter from the chairmanship of the Senate Committee on Foreign Relations, the fact is yet patent that neither event is likely to break up and destroy the Republican party. The war, at least on Mr. Sumner's part, is bitter, unrelenting, rancorous, but the violence with which it is carried on is assurance of a speedy termination.

Since its organization, the Republican party has had many just such ordeals to pass through—trials which it seemed would overcome and sink the party, and render it powerless for further aggression. The dark and troublesome days when Andy Johnson turned his back upon those who welcomed him from the persecutions of his foes in Tennessee—who gave him food and raiment, and elevated him to the second office in the Republic, from which he was lifted to the highest by the foul deeds of his former enemies and would-be assassins, only to wield the power thus placed at his disposal against the very men and party who had pitied him in his hour of persecution and rewarded him for his seeming fidelity—is yet fresh in the minds of the members of the party. And though a greater than Johnson should rise up and interpose his influence between the operations of the party and his idea of party propriety and party demands, even though he should have been among that little band which agitated the extinction of slavery in times when men's lives paid the penalty of such transgression, and was one of the pioneers in the movement which culminated in the redemption of our Republic from the hands of a class aristocracy and from class legislation, still the party will withstand this spasmodic shock and go on from conquering to conquest until the last Ku Klux shall have ceased his occupation of midnight murder, and impartial justice be administered in every part of the land. Charles Sumner is but an individual member of the party, popular and influential, we admit, but the Republican party is not pliable like clay, to be moulded and shaped in conformity with the whims or caprices of any leader, let him be ever so popular.—The sympathy of the party is with the President and against Mr. Sumner, and this fact is being daily recorded.

But while this quarrel is going on at the East, the Republicans in the West are fraternizing, and healing the wound which threatened even greater disaster to the party than the feud between the President and Mr. Sumner. The party dissensions in Missouri, which resulted in the turning over of the State to the Democrats, are being amicably adjusted, and the party is beginning to work harmoniously together. The Revenue Reformers are abandoning their intentions of reform through the agency of a third party, and are falling into line to again battle against the common adversary. New England Republicans, gathering wisdom from the example of their friends in the West, will close ranks to retrieve the loss of New Hampshire and wipe out the foul blot which tarnishes the State escutcheon.

And, wherever we look, the Republican party is harmonizing, fraternizing, and beginning to work in unison preparatory to the canvass of next year, which will be one of the most active ever witnessed in this country. The follies of the past will be buried in the success of the future, and the crowning glory of the whole will be a renewal of the faith which the American people have in the imperishable doctrines of Republicanism.

THE ENLARGEMENT OF OUR PAPER having given us more room, we introduce a new feature this week which we trust will be acceptable to our readers—a summary of the news from the Western part of our State, as well as the Eastern. We desire, since the unnatural separation of Eastern Maryland from Delaware has been decreed, to make our people familiar with their friends in other counties of their State—to acquaint them with the doings and prospects of Western Marylanders, and to bring them into intimate relationship with each other, at least by sympathy; and we know of no more sure or speedy way, since every day intercouse is denied them, than through the medium of the press. THE UNION will, therefore, hereafter contain gleanings from our Western Maryland exchanges weekly, and we trust our newspaper friends in that section will favor us with a prompt and punctual exchange.

REALLY, WE HAD NO INTENTION of wounding the feelings of Brother Johnson, of the Cambridge *Democrat and News*, when we said last week that we thought his paper but little improvement over the two others which it superseded. But, it seems we have done it, and Brother Johnson straightway vents his pique by calling us a "Radical" and insinuates that we are ungenerous. He says he might have added that "he (we) must be rather slow in obtaining news, but we won't do it." And its well you didn't, for *that* might have riled us, and there is no telling what we might have said. Don't you call us that; anything but that, Brother Johnson.

THE CITY OF PARIS is in a state of insurrection, and the public peace is more endangered than by the presence of a foreign foe. The mob occupies the forts around the city, and the National Guard, which was sent to suppress the insurrection, fraternizes with the mob. Several Generals have been captured and put to death by drum-head court martials, and the signs of the times are pregnant with dark forbodings for unhappy Paris. The seat of government is at Versailes and is endeavoring to quell the rioters. The alleged cause of the insurrection is the betrayal of the Republic by the present Government.

GEN. CHARLES PREVOST, it is said, will be appointed Collector of Customs at Philadelphia vice Hon. H. D. Moore, resigned.

IT IS HIGHLY PROBABLE that the present session of Congress will be terminated very soon.

J. B. Lawes' Eperiment with Wheat.

At the last meeting of the Farmer's Club reference was made to an experiment with wheat by Mr. J. B. Lawes, a European farmer, the particulars of which we were requested to publish in THE UNION. We avail ourselves of the first opportunity since the meeting of the Club, and present such facts as we are able to glean from a letter to the *Country Gentleman*, written by Geo. H. Cook, of the N. J. Agricultural College, and who visited Mr. Lawes at his farm at Rothamsted:

As it was wheat harvest when I was there, the wheat field was the scene of business; Dr. Gilbert, the chemist and associate of Mr. Lawes in all these experiments, with two assistants, was in the field among the laborers, watching to see that the grain grown on each of the eighteen or twenty plots was cut accurately to the line, and then kept to itself through all the processes of harvesting, weighing, measuring and finally analyzing. One who has not tried it can scarcely realize the difficulty of making the laborers carry out instructions in regard to such experiments; they seem to have no conception of the care that is needed, but would rather spoil one than not, and it is only by constant watching that accurate results can be obtained. Any one who has worked long and patiently to get some wished-for experiment carried through, and then has failed from the ignorance of his laborers, will appreciate the importance attached to this part of Mr. Lawes' investigations. I was thoroughly impressed with the pains he had taken to ensure accuracy in this respect. The plots are carefully and permanently staked, lines are drawn from one to another to ensure precision in gathering the crops, and cloth screens are hung up between the plots when manures are being applied, that they may come quite up to the line without going beyond it. And to complete the whole, a sufficient and intelligent supervision is constantly kept up.

The extreme drouth of the season, (it was Aug. 6, and only two inches of rain had fallen since March,) had nearly ruined the grass crop,—he had only about 6 cwt. an acre from the unmanured ground. The best crop was on the part manured with nitrate of soda, and that was two tons, sixteen cwt. per acre. The portions manured with farmyard dung, salts of potash, &c., were intermediate, some heavier and some lighter, but all much less than in ordinary seasons. It was a comfort to look over these experiments and see that in addition to the fine crops which good manuring produced, there was a dying out of the weeds; that just as the crops increased the weeds diminished till in the best scarcely any weeds were to be found, while there were plenty of them in the unmanured plot.—Nothing had been done to kill them on any of the plots except enriching the ground.

The wheat crop, on the ground where it is raised year after year, was fully up to the average, which on the part unmanured for 26 years, is about 15 bushels an acre; on that manured with superphosphate of lime and mineral manures only for 18 years, is 17 bushels; with farmyard dung for 26 years, is 34 bushels,—with mixed mineral manures and amonia salts for 13 years, is 39½ bushels. The straw stood up well and was strong and bright, the heads were large and heavy, and altogether, the appearance of the crop was better than with us.

[For THE UNION.]

Letter from Illinois.

CHARLESTON, 2nd Mo. 27th, 1871.

Editor American Union:

I think I stated in my last letter that my next would be from Illinois. Well, there is so much to be said of this State, and its advantages that I scarcely know where to begin. It is one of the Western States, and is separated from Missouri by the Mississippi river. It contains 55,400 square miles. Its extreme length is 380 miles, and is in a high state of cultivation, the soil being rich and black from two to three feet deep. Illinois is termed table land, being elevated from three to four hundred feet above the level of the Gulf of Mexico. It is mostly level, yet there are many high and beautiful bluffs on the Mississippi and Illinois rivers. This State also abounds in prairies, most of which are under cultivation, and in summer, when thickly set with green corn and golden grain, stretching far in the distance, looks like a vast sea.—The fruit is very fine. Some of these prairies are attired in nature's richest garb—a variety of wild flowers, interspersed with groups of trees; but timber is mostly scarce, which is attributed to the annual burning of the prairies by the Indians.—This prevented the forests of growing trees from springing up.

Illinois is said to raise more wheat and corn than any other State; and many fine horses, cattle and swine are annually shipped from this State to our eastern cities. I was informed that one man contracted to furnish Buffalo market with one thousand dollars' worth of beef every week.

Illinois has much mineral wealth. The soft coal so much used in the West for fuel, is found in almost every county, and without much excavation. Ironand zinc are also found in some parts. Sulpher Springs, in Jefferson county, are in high reputation on account of their medicinal properties. The principal rivers are the Kaskaska, Sengamon and Wabash. The Illinois river has a sluggish current, and sometimes the waters of the Mississippi back up into it for 70 miles. The water of these rivers is muddy. Starved Rock and Lover's Leap are noted places in this State. They form a perpendicular mass of lime stone and sand stone. This place receives its name from a band of Indians who took shelter here and died of starvation and thirst.—Lover's Leap is a ledge of rock above starvation point. Just above this is a noted spot in the history of Illinois as being the place where the Indians drove the buffaloes, and frightening them by shouts, caused them to crowd each other over the precipice.

There is also a noted cave in Hardon county, on the Ohio river, which differs in external appearance from any I have ever seen. It resembles castillated ruins and irregular forms. The entrance of the cave is near the river, and forms a semicircle 80 ft. high and 60 wide. This cave gradually descends to the distance of 180 ft. from its mouth. Near this cave is a small entrance which leads into another cave, which has not been much explored yet, on account of the quality of the water found there. In 1798 this cave was said to have been the abode of a band of robbers.

There are no deer or buffaloes now to be found in Illinois.

The enterprise of the West is great.—Everybody seems to be alive to business. We visited one mill where they took in three thousand bushels of corn and two thousand bushels of wheat a day during the busy season, and shipped to New York and other cities 14 hundred barrels of corn and wheat flour every week. The corn was taken to the mill on the cob and weighed, allowing so many lbs. to the bus. The process of preparing the grain for market is interesting, but too tedious for description here.

H.

WHAT'S THE USE.—Why pay more than is necessary? The goods are just as fine, the work just as carefully done, the fit just as perfect, and the prices many per cent. lower. Then, why not buy of Wanamaker & Brown.

NEW ADVERTISEMENTS.

LOST. A $50 United States Government note. The finder will be suitably rewarded by returning the same to
mr16-2w JNO. H. EMERSON.

PUBLIC SCHOOLS. The Board of County School Commissioners will meet at their office on the first Tuesday in May for the purpose of distributing among the colored schools the amount of county tax due them. The teachers of said schools will then hand in their reports.
Also, on the same day, they will appoint for the schools District Commissioners.
By order,
mr16-2w GEO. F. BEAVEN, Sec.

LUMBER YARD
—AT—
DENTON BRIDGE.
The subscriber has just received from the city a superior stock of lumber, which he offers
At City Prices
at his yard. Lumber of all kinds constantly on hand. Also, sells FERTILIZER, PHOSPHATES, &c., and General Purchasing Agent for every article of farm or household use.
Public patronage respectfully solicited.
mr23-y T. WIRT FOUNTAIN.

Examiner's Notice.
We, the undersigned, having been appointed by the County Commissioners of Caroline county to examine, and, if found necessary, to locate a new County Road to begin at the new road at or near Samuel D. McGonigal's gate, and running through the lands of Samuel D. McGonigal, Wm. Brice, Richard Baggs and Samuel & Benjamin Sylvester, until it intersects the county road leading from Moore's Mill to Sandtown, give notice that we will meet at the proposed point of commencement of said road on MONDAY, 18th day of April, next, at 10 o'clock, A. M., for the purpose of executing said commission.
The County Surveyor is hereby notified to meet at the proposed point of commencement of said road on said day and at said hour.

MISCELLANEOUS.

BEAUTY!
A HOME!!
AND FORTUNE!!!

PREMIUM SALE
OF THREE HANDSOME
NEW STEEL ENGRAVINGS!
A GIFT WORTH FROM
$1.00 TO $25,000
Given with Each Engraving!
We have obtained the entire control of the following engravings, which we offer at the low figures of
$2.00 EACH!
Although they are really worth $5.00 each.—They are 19x24 inches, and each is a gem of art.

LURLEY:
A legend of the Rhine. A female of rare beauty sits on the shore of the river, where the rocks are the most dangerous, and with her song and music charms the unwary sailors to near her, when they meet a watery grave.—The subject is full of life, full of emotion, and is altogether a success.

THE DISINHERITED!
A young man, through the wiley influence of some one of the household, is deprived of a share in his father's house. Having but sorrow as his lot, he departs, and from a neighboring hill he takes his last look and farewell to the scenes of his younger and better days. The heart fills with deep sorrow in examining this subject so well drawn.

THE CHILD CHRIST!
A child with human body and dress, angelic face and divine eyes, is represented so well that words cannot tell half its worth.—We do not think that any engraving has yet reached the excellence of this, in touching the heart and lifting it away to a higher world. The eye never tires to look. The more it is seen, the greater the desire to look again and again.
Also a correct lithograph likeness of
Gen. STONEWALL JACKSON,
The best, largest and handsomest ever published, 19x24 inches, worth $5.00, which we will sell on the same terms, for $2.00. It is truly a gem of art.

A FORTUNE FOR YOU!
With each engraving, till we have sold 50,000 copies, we will give FREE one share or ticket, entitling each shareholder to one of the following gifts. Read on and remember that every ticket holder will positively get one of the following, which will be distributed by a drawing
AT DENTON, Md.

The LaPierre Hotel,
DENTON, MARYLAND,
Containing twenty-six rooms, and furnished throughout, with all modern conveniences, plenty of outbuildings, stabling for thirty horses, including all outfit, stock, &c., worth cash $25,000.

The Picture Hill Farm,
CAROLINE COUNTY, MD.,
Of 103 acres, on the Choptank river, having a steamboat wharf on it, with a good scope of country to sustain it, with a lime kiln, good buildings, a large variety of fruit, convenient to churches and schools, only 6 miles from Easton, the largest business town on the Delaware peninsula. $10,000

The Cold Spring Farm,
Of 50 acres, one mile from Denton, one mile from steamboat landing, five miles from the Maryland and Delaware Railroad; one thousand peach trees, fifty apple trees, choice varieties of strawberries, cherries, plums, apricots, crab apples, dwarf pears, &c. Splendid new buildings. Worth $8,000

The Carter Farm,
With 80 acres; fine orchard; good buildings; choice wheat land. $5,000

A House in Denton,
With one and a-half acre orchard, with the finest varieties of fruits. $3,000

Then let everybody call early, while a choice can be had, for my goods are daily vanishing. We will do all we can to please you, and if we fail will deem it no offense if you purchase elsewhere. Call and examine for yourselves.
Goods Sold only for Cash or Trade.
RIDGELY, October 4th, 1870. **JAS. K. SAULSBURY.**

Ayer's Cathartic Pills,
For all the purposes of a Laxative Medicine.

Perhaps no one medicine is so universally required by everybody as a cathartic, nor was ever any before so universally adopted into use, in every country and among all classes, as this mild but efficient purgative *Pill*. The obvious reason is, that it is a more reliable and far more effectual remedy than any other. Those who have tried it, know that it cured them; those who have not, know that it cures their neighbors and friends; and all know that what it does once it does always—that it never fails through any fault or neglect of its composition. We have thousands upon thousands of certificates of their remarkable cures of the following complaints, but such cures are known in every neighborhood, and we need not publish them. Adapted to all ages and conditions in all climates; containing neither calomel nor any deleterious drug, they may be taken with safety by anybody. Their sugar-coating preserves them ever fresh, and makes them pleasant to take, while being purely vegetable, no harm can arise from their use in any quantity.
They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.
Minute directions are given in the wrapper on the box, for the following complaints, which these *Pills* rapidly cure:—
For **Dyspepsia** or **Indigestion, Listlessness, Languor** and **Loss of Appetite**, they should be taken moderately to stimulate the stomach, and restore its healthy tone and action.
For **Liver Complaint** and its various symptoms, **Bilious Headache, Sick Headache, Jaundice** or **Green Sickness, Bilious Colic** and **Bilious Fevers**, they should be judiciously taken for each case, to correct the diseased action or remove the obstructions which cause it.
For **Dysentery** or **Diarrhœa**, but one mild dose is generally required.
For **Rheumatism, Gout, Gravel, Palpitation of the Heart, Pain in the Side, Back** and **Loins**, they should be continuously taken, as required, to change the diseased action of the system. With such change those complaints disappear.
For **Dropsy** and **Dropsical Swellings** they should be taken in large and frequent doses to produce the effect of a drastic purge.
For **Suppression** a large dose should be taken as it produces the desired effect by sympathy.
As a *Dinner Pill*, take one or two *Pills* to promote digestion and relieve the stomach.
An occasional dose stimulates the stomach and bowels into healthy action, restores the appetite, and invigorates the system. Hence it is often advantageous where no serious derangement exists. One who feels tolerably well, often finds that a dose of these *Pills* makes him feel decidedly better, from their cleansing and renovating effect on the digestive apparatus.

CLEAR AND HARMLESS AS WATER.
NATTAN'S
CRYSTAL DISCOVERY for the HAIR.
A perfectly clear preparation, in one bottle; as easily applied as water, for restoring gray hair to its natural color and youthful appearance; to eradicate and prevent dandruff; to promote the growth of the hair and stop its falling off.
It is entirely harmless and perfectly free from any poisonous substance, and will, therefore, take the place of all the dirty and unpleasant preparations now in use. Numerous testimonials have been sent up from many of our most prominent citizens, some of which are subjoined; in everything in which the articles now in use are objectionable, "Crystal Discovery" is perfect; it is warranted to contain neither Sugar of Lead, Sulphur or Nitrate of Silver. Clear and clean as water, it does not soil the clothes or scalp; it is agreeably perfumed, and makes one of the best dressings for the hair in use; it restores the color of the hair more perfectly and uniformly than any other preparation, and always does so in from three to ten days. Virtually feeding the roots of the hair with all the nourishing qualities necessary to its growth and healthy condition, it restores the decay and induces a new growth of the hair more positively than anything else. The application of this wonderful discovery also produces a pleasant and cooling effect on the scalp, and gives the hair a pleasant and elegant appearance.
Washington, D. C., July 25, 1870.
Mr. Arthur Nattans: Dear Sir—It affords me pleasure to say that I have used your Crystal Discovery with perfect success. Having tried many others, I find yours superior to any I have heretofore used, and I cannot too highly recommend it as a rapid promoter of the growth of the hair, and by a few applications restoring it to its original color. It is perfectly clean and free from any objectionable matter.
Very respectfully yours, R. W. SILVOY,
K st., bet. 4th and 5th. N. W.
We call especial attention to the fact that a limited number of trial bottles will be given away gratuitously to those wishing to try.—You will notice that in pursuing this course, our aim will be to convince by the actual merits of the article.
ARTHUR NATTANS,
Inventor and Proprietor, Washington, D. C.

BOATING BUSINESS.
The subscribers respectfully announce to the farmers, merchants, and others of Caroline county that they are now running the schooner F. J. Henry between Greensboro' and Baltimore, stopping each way at Denton to receive and land freights. We have a large granary and wharf at Greensborough for the reception of grain and all other freights.
All orders must be accompanied with cash or delivery of grain to meet with prompt attention.
We respectfully solicit a share of public patronage, and promise our best efforts to give satisfaction. The business will be conducted under the firm of Case & West.
THOS. D. CASE,
je9-tf. SIMEON N. WEST.
All orders and freights will be attended to for us, at Denton bridge, by Mr. W. T. Willis. CA[illegible]
