Militia at Queenstown.

Persons who enjoyed several pleasant days at the military encampment at Queenstown, will have a chance to see the soldier boys again. Adj. Gen. John S. Saunders has determined to send the First Regiment into camp at Queenstown, says the Baltimore Herald. The site has been selected on the orders instructing the command to encamp are expected out within the next few days. Early in the summer it was rumored that the First would go into camp, but as time went on and nothing was done it become generally accepted that no encampment would be held. On Wednesday Sergt. John T. Marshal, General Saunders' aide-de camp, went to Queenstown and chose the camp ground. The site of the First's proposed camp is further from the water than the scene of last year's brigade camp ground and much better suited. The land is higher and more easily drained. The plot selected contains about 45 acres and will be remembered by those who were at the camp last year as the parade ground. The encampment will be one of the most economical in the history of the National Guard, for its estimated cost is only $6,000. All the tent floors, piping and other similar supplies used last year are now at Queenstown. Water for the camp will be piped from the same well that supplied the camp the year before. The well is 300 feet deep and the water was analyzed last year by the brigade surgeons and found satisfactory. The First Regiment consists of nine companies, averaging about 50 men each. These companies are scattered in towns throughout the state and they never get together at the biennial brigade encampment. For this reason it was decided to send the First into camp. Company L, of Centreville, belongs to the First Regiment and will be present when the roll is called.

Poisoning the System.

It is through the bowels that the body is cleansed of impurities. Constipation keeps these poisons in the system, causing headache, dullness and melancholia at first, then unsightly eruptions and finally serious illness unless a remedy is applied. DeWitt's Little Early Risers prevent this trouble by stimulating the liver and promote easy, healthy action of the bowels. These little pills do not act violently but by strengthening the bowels enable them to perform their own work. Never gripe or distress. Hugh Duffy, Hillsboro.
