Ten Years in Bed.

R. A. Gray, J. P., Oakville, Ind., writes: "For ten years I was confined to my bed with disease of the kidneys. It was so severe that I could not move part of the time. I consulted the very best medical skill available, but could get no relief until Foley's Kidney Cure was recommended to me. It has been a God-send to me."

Report reaches us that the causeway at Dover Bridge is needing attention. A year ago we witnessed about the same condition there all of which shows the need of another permanent improvement in our county.

Mrs. John Parker died at an advanced age at her home on Preston street, on Wednesday morning of last week. Mrs. George Pool and Mr. John W. Parker, of this place, were children of the deceased, a woman rich in good works that make for righteousness both here and in the hereafter. Many friends and relatives mourn her loss. Her burial was at Beulah, her former home, on Thursday afternoon last.

Perhaps no road in Maryland, since ante bellum revolutionary days, has been provocative of more epithets, that charm not ears refined, than the old Easton Preston road which, in the winter, on the Talbot side of Dover Bridge, is noted for threatening to land the traveler through a voyage of mud, unexpectedly into China; while on the Caroline side, he soon loses his head (or temper) in the sand banks of a Saharalike desert. It is therefore a matter of gratitude, that Carolinians have awakened en masse, we believe, to the necessity of bettering this and other equally bad roads in our county. Our example, no doubt, would soon be followed by our Talbot friends, who apparently need but a good practical object lesson of this sort from "poor old Caroline," as they frequently spoke of us in a former age.

Here and There.

Wm. G. Day, well known in Caroline and Talbot counties, where he and his wife have a number of relatives, died of kidney trouble, with which he had been afflicted for several months on Tuesday of last week, at his home in St. Louis, where he had been engaged in the insurance business for several years. Accompanied by his family he spent last summer at Rehoboth in the hope that life at the seashore might benefit him. When a young man he was a clerk in the drugstore of Hugh Duffey, at Hillsboro. He married Miss Mollie Cox, of Preston, daughter of Mrs. Mary Cox and the late Elias Cox. The remains were interred at St. Louis.

Prof. E. L. Cross, Principal of Wilmington Conference Academy, at Dover, has taken a decided stand against the smoking of cigarettes by boys. He contended that a boy who smoked cigarettes was absolutely worth nothing as a student, and that he should not be given the room in the school he occupies. He claimed that the habit of cigarette smoking by boys was doing more than anything else to destroy the mental, moral and spiritual life. He emphasized the fact that no scholar at the Academy should remain as a student in that institution if he were found to be a victim of cigarette smoking.

Mr. Zimmerman A. Cooper, of near Denton, and Miss Minnie May Davis, daughter of Mr. and Mrs. William Thomas Davis, were married Wednesday afternoon of last week at the home of the bride's parents, in Landing Neck, Talbot county, by Rev. Floyd E. Bloxton. Immediately after the ceremony Mr. and Mrs. Cooper left for their future home near Denton.

The stockholders of the Talbot County Fair Association have elected the following directors: Dr. I. A. Barber, M. T. G. Earle, Wilfred Bateman, John A. Barwick, Henry A. Nichols, Robert J. Smith, Wm. B. Dulin, Robert F. Walker, Edw. H. Roe, F. E. Towers, M. B. Nichols and J. Frank Turner.

Weather Forecast for February

Rev. Irl Hicks, of St. Louis, Mo., whose forecast of the weather are always interesting to follow during each month, gives the following for February: By the 1st, storm areas will begin to form over the western part of the country, marked depressions of the barometer will be moving eastward, and wide areas of rain and snow and sleet will pass eastwardly across the country during the 1st to the 4th. Ordinarily a cold wave and blizzard would appear before the 4th, but the moon does not pass the celestial equator until the 4th, hence the storms of this period may not reach blizzardous proportions until after that date. The Mercury disturbance continues up to about the 10th, hence cloudy, murky, sleety weather will continue in all probability into the reactionary period central on the 6th, 7th and 8th. If heavy snow and sleet storms do not appear during the first four days of the month, such storms will almost surely develop about the 6th to 9th. But the chances for marked winter storms on and near the first day of the month are many. Upon the whole much threatening weather, with severe winter storms are almost certainties during the first eight to ten days of February. This will prove one of the most general and destructive sleet periods of the winter, and at least one severe cold wave may be counted on. Two are quite probable, one not far from the first, and another on and about the 7th and 8th. The third storm period is central on the 12 and reaches from the 10th to the 16th. Falling barometer and general storms of rain and snow will return about the 14, 15 and 16. This period will culminate about the time of the new moon on the 16, bringing storms of a tropical nature southward, with change to blizzardous features in the east and north. If rising barometer and cold wave follow immediately after the new moon on the 16, a sudden revulsion to storm conditions will reappear about the 19 to 20. These storms will also be followed by a high barometer and cold wave about the 20 to 22. The last regular storm period for February is central on the 24th, its disturbing influence reaching from the 22 to the 27. The first stages of this period will bring change to much warmer in western ports—wind will change to southerly and easterly, the barometer will fall, the hygrometer will show increasing humidity and more storms of rain; turning to snow on the north side, will pass eastwardly over the country from the 24 to 27. As the month goes out generally fair and colder weather will prevail. In the western extremes, reaction to warmer will have set in, and the barometer will be falling preparatory for the reactionary storms due the first three days of March.

While Mr. Harry E. Poole was returning from a business trip east of town, his horse started to run. Mr. Poole tried to stop it but was unable to do so. After they came down Federal Hill the horse turned to the right, ran over the board walk, turning the carriage over, breaking the shafts and throwing Mr. Poole out but without injuring him more than a severe shaking up.
