The work of sinking the deep well at the water plant still goes on. The drilling thus far has mostly been through blue marl and black mud. A depth of about 175 feet has been reached and the drill seems to have struck a strata of hard shells or shell rock, in which the work progresses very slowly. The well has not been tried for water as the mud made it almost certain that it would not be good.

Mr. Emerson learned the printer's trade in the office of this paper, then owned and edited by his father the late John H. Emerson, and worked for a time in Philadelphia and various other places. In 1884 Mr. Emerson succeeded his father as Editor of the UNION and continued in that connection until the paper was leased to Jas N. Todd. After retiring from the newspaper business he opened a store and has since been engaged in merchandizing. He is survived by a widow and one son, also two brothers, J. M. Eat More Fruit.

Hygienists all agree in telling us that we do not eat sufficient fruit, which is infinitely more productive of health and beauty than candy and pastry.

Ripe apples are especially healthy, and children may eat them without danger. It is claimed that an apple eaten at bedtime produces sleep.

Pears are more tasty than apples, but not so healthy unless cooked. Prunes have medicinal qualities which cannot be denied, says the Chicago News. Apricots are also more healthy cooked than raw. Peaches are very healthy. The most healthy of all fruit, however, is grapes. Gooseberries and currants are best cooked.

Figs are also excellent; they were in great favor with ancient Roman ladies, who always ate them for breakfast. Pineapples are said to be the best relief for dyspepsia known. Oranges are also excellent for some people. Lemons produce cheerfulness and prolong life.

"Most praised where best known." The best advertisement of Rheumacide is the hundreds of wonderful cures it has made.

The trial of Mrs. Mary A. Powell befan in Dover onMonday and the following confession will be used by the State, it having been made to detective Ratlidge:

On Tuesday Feb. 9 1904 at 9 30 a. m I put my dinner pot on, and put the meat in it and then I picked up some empty catsup bottles and glass fruit cans and took them up in the garret and Essie Albin came up there. I asked her what she wanted and she grumbled out something I could not understand and she looked so ill as if she would do something to me if she had a chance and I hit her three times with a catsup bottle. The first time I hit her on the right side just above the ear and she turned around and I hit her on the left side and then she went down on her knees and then I hit her on the back of the head. She then fell over on her face and I caught her by the shoulders Then I taken that knife out of my pocket. I had it to rip some of my sewing, was how I come to have it in my pocket. I then cut her throat. I did not cut her any other place intentionally. The cuts she had on her hands and face was done by her trying to keep me from cutting her throat. I don't know how she was cut above the forehead in the edge of her hair. I might have struck her there but I don't remember, I was so mad and excited. I can,t remember just how many times I did hit her.

Mr Ratledge, I was driven to this by my husband misleading me over Essie I had seen him hugging and kissing her several times I caught them in the closet together

Weather Forecast For May.

About 1 to 3 look for change to very warm, starting in the West and spreading eastward. The barometer will fall to very low readings and from about 3 to 6 violent storms will pass eastwardly over most parts of the country. Behind these storms look for high barometer, west winds and gales and sudden change to very cool. Frosts need not surprise any in all central to northern sections of the country. Reactionary storm conditions will return on the 8, 9 and 10, bringing a return of high temperature, low barometer, great humidityand more storms of greater or less violence and danger. About 14 look for change to warmer, the barometer will again fall to low readings, and another series of rain, wind and thunder storms will take up their eastward march across the country, culminating on and touching the 14, 15 and 16. The next return of storm conditions will be from the 20 to 23. See if marked change to warmer, falling barometer and more active storms of thunder and rain do not spread progressively over the country from west to east during the days named. The crisis of these storms will fall on and touch the 22 and 23. The last storm period for the month is central on the 26, covering 24 to 29th. This period will come in with rising temperature, the barometer will fall decidedly in all western parts by the 26th, and during the 27, 28 and 29 most parts of the country will be touched by active storms in their eastward sweep across the country. As to the general outlook for May, we believe that it will be up to, or above the average in warmth. There will be much bright and pleasant weather between the periods of severe storms. Excessive Venus rainfalls, with destructive hail storms in many sections, may reasonably be expected, though these rainfalls will be largely confined to central, western and south sections. All sections will have sufficient moisture for present needs, but large areas will approach the summer period, verging on the drought conditions.—Word and Works.

DEAFNESS CONNOT BE CURED

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure Deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. when this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflamation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free.
