25 YEARS' PRACTICE.

The Conductor's Revenge.

A well-dressed man entered an Orange Street car the other day, according to a story that is going the rounds of the street car men, and handed the conductor a ten-dollar bill. The conductor was unable to change it and he let the man ride free. The next day the man presented the same bill, and again the conductor was unable to change it, for the man had evidently found a time when he would be sure to catch the conductor without much change.

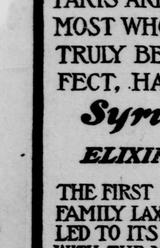
"I'll fix you," thought the conductor, and he obtained $10 worth of nickels and was ready for the man when next day he flashed the bill. The man took the matter good naturedly and soon left the car, his pockets fairly bulging with the nickels.

The conductor was more than pleased with his "coup" until next day, when he learned that the bill was worthless.—Newark Star.

A PROFESSIONAL NURSE

Tells of Five Years' Sufferings With Kidney and Bladder Troubles.

Mrs. Mary Campbell, 1312 Jackson St., Phila., Pa., says: "For five years I doctored for kidney disease and got no better. The urinary passages were too frequent and copious. I could not attend to my professional duties. Since using Doan's Kidney Pills, however, I have found such welcome relief that I now recommend Doan's Kidney Pills to every sufferer I see."



Remember the name—Doan's. For sale by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

The Stake.

"John D. Rockefeller and his pastor," said a New York broker, "were playing golf one afternoon as I drove up from the station in the Rockefeller carriage," says the New York Press.

"'They're very much excited,' I said to the coachman, for the two players were arguing hotly on the green. 'I guess they must be playing for money.'

"The coachman shook his head and frowned at me sternly.

"'Oh, no,' he said. 'You ought to know they wouldn't play for money. If it's anything it's a hymn book or Bible.'"

Forgetfulness.

Two lawyers before a probate judge recently got into a wrangle. At last one of the disputants, losing control over his emotions, exclaimed to his opponent:

"Sir, you are, I think, the biggest ass that I ever had the misfortune to set eyes upon."

"Order! Order!" said the judge gravely. "You seem to forget that I am in the room."—Cosmopolitan Magazine.

This Star Winks.

There is in the constellation Pegasus a little variable star that may reasonably be said to wink. Two or three times in the course of a single night that curious star can be seen to fade and then to brighten like a signal light. For about two and three-quarter hours more it is as bright as at the beginning. Unfortunately it can be seen only with a telescope. Yet it ranks as a sun.—Harper's Weekly.

His Last Effort.

"Say," queried the party with the conundrum habit, "what is the difference between an overcoat and a baby?"

"I pass," responded the old gentleman. "What's the answer?"

"The one you wear, the other you were," replied the conundrum fiend.

And the coroner's jury voted to give the old gentleman his freedom on the ground of "justifiable homicide."—Chicago News.

No Snob.

During the French Revolution a thief and a marquis jolted in a tumbril side by side through the wild streets of Paris on the way to the guillotine, while a venerable priest tried to console their terrible last ride with moral reflections.

"A bas la noblesse!' Down with the aristocrats!'" shouted the red-capped mob.

Thereupon the thief rose in the cart and cried:

"My friends, you deceive yourselves. I am not an aristocrat. I am a thief."

The priest plucked him by the sleeve, saying, reproachfully:

"Sit down. This is no time for vanity."

Try It in Your Eyes and in Baby's Eyes, for Scaly Eyelids and Granulation.

Going Up?

Justice has a streak of yellow, for she grips the little fellow, but her temper seems to mellow toward the man who's higher up.

Though she runs to fix her clutches on the one who steals as much as 50 cents, she limps on crutches toward the man who's higher up.

If the duties are evaded, quick is righteous wrath paraded, for the few who simply aided—not the man who's higher up.

'Tis a most obnoxious feature; Justice surely needs a teacher; worst of sinners not the creature, but the man who's higher up.

Little chap must go to prison for a crime not really his'n, while champagne is ever fizzin' for the man who's higher up.

When a trust is caught at scheming, Justice takes its menials, seeming not to e'en be faintly dreaming of the man who's higher up.

Ever calm her way pursuing, Justice notes what some are doing, but this duty is eschewing when the man is higher up.

Justice should take off her blinder, to the smaller fry be kinder, and, before her or behind her, grab that man who's higher up.—Philadelphia Public Ledger.

Instinctive.

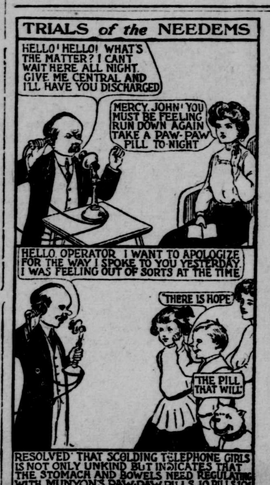
A darky minister in a Southern town was much moved by the grief of a woman whose husband had just been interred.

"My sister," came in solemn tones from the clergyman, "I know dat dis is a great grief dat's overtaken yo'. All de same, though, you is compelled to mourn de loss of dis one who was yo' companion an' partner in life. I consoles yo' wif de assurance dat dere is anudder who sympathizes wif yo' in de arms o' unfailin' love."

The widow looked up at him through her tears. "Who is he?" she finally asked.—Harper's Weekly.

The gyroscope monorail car which recently carried 40 passengers in a successful test in England, was propelled by electricity produced from a gasoline engine-driven generator.

TRIALS of the NEEDEMS



Munyon's Paw Paw Pills coax the liver into activity by gentle methods. They do not scour, gripe or weaken. They are a tonic to the stomach, liver and nerves; invigorate instead of weaken. They enrich the blood and enable the stomach to get all the nourishment from food that is put into it. These pills contain no calomel; they are soothing, healing and stimulating. For sale by all druggists in 10c and 25c sizes. If you need medical advice, write Munyon's Doctors. They will advise to the best of their ability absolutely free of Charge. MUNYON'S 53d and Jefferson Sts., Philadelphia, Pa.

Munyon's Cold Remedy cures a cold in one day. Price 25c. Munyon's Rheumatism Remedy relieves in a few hours and cures in a few days. Price 25c.

GARDEN, FARM and CROPS

SUGGESTIONS FOR THE UP-TO-DATE AGRICULTURIST

The Best Economy.

In starting your flock do not think it always economy to pay small prices. Better pay for good foundation stock than low for animals that will ever after plague your sense of the fitness of things when you come to know more about them.—Farmers' Home Journal.

Shrinking of Grain.

The shrinking of corn varies according to the condition of the grain when put into the crib. Cases have been known in which corn lost 20 percent from shrinkage, the corn being damp. From 8 to 12 percent is the average, the shrinkage depending upon so many circumstances as to make an exact estimate very difficult, but the rule is to allow 10 percent.—Epitomist.

Care of Hogs.

Grade the hogs and pigs most carefully as to size, etc. Watch them, and if there is a rank boss in the bunch, put it by itself. The small ones must not be robbed or they will make no gains, and that will mean loss. This sort of care marks the difference between a successful swine breeder and feeder and one who is a failure,—"getting poorer every day."—Farmers' Home Journal.

That Water Supply.

A farmer will make the common mistake of neglecting to give the farm water system proper attention.

Before the ground freezes, all pipe connections should be made; while any underground trouble should be ascertained, and immediately overcome.

Windmills, pumps, tanks and hydrants should be carefully inspected, and fully repaired. Some of these will need banking up, to protect them from the severe freezing weather. Every water-pipe and cut-off must be well covered to prevent freezing. It's unhandy and disagreeable working at these jobs during raw, wintry days, and you simply cannot afford to neglect a single item of preparation, at a season when it can be quickly and efficiently attended to.—M. A. Coverdell, in the Indiana Farmer.

Bone Cutter Needed.

There is really only one reason why every farmer poultryman should not have a bone cutter. That is, inability to secure a regular supply of fresh bones. But there are mighty few cases where this cannot be satisfactorily arranged, and at little or no expense. Often the farmer does his own butchering and has access in this way to large quantities of good fresh bones. Otherwise, the bones can be secured of almost any butcher and often he will make no charge for same, providing one will come and take them away from his shop. There is nothing "killing" about running a bone grinder—time was when it required enormous strength and muscle, but modern machines run quite easily and smothly. The cost of a cutter, and a few minutes of time every day or two expended in running it, will be found to be one of the best investments anyone who keeps chickens can possibly make.—Epitomist.

Horses Digesting Food.

A horseman of large observation in feeding horses says that if the horse had no other place to digest its food than the stomach it would be useless, as far as a day's work is concerned, as it would be all the time eating to maintain life. The digestion is carried on in the small intestine, which holds sixty-seven quarts, or 141 pounds and in case the horse is fed rough feed, such as hay, corn fodder or straw, without much grain, the food is not all digested until it reaches the large intestines, which hold 137 quarts or 238 pounds, six times as much the the stomach. The horse is well supplied by nature to maintain life on any old thing. But it is our business from a strict standpoint to feed our horses for the work required of them. Take, for instance, the race horse; feed him on roughness—what would you have to race with? Nothing but a hay mow. No, the race horse must get his feet rich in nutrient and small bulk, easily digested and quickly out of the the way. But, on the other hand a heavy draft horse can be kept on more roughness with good results, at less cost. With the understanding of the small stomach of a horse, his meals should be small and at short intervals. A horse working hard and long days should be fed four times a day.—Weekly Witness.

Vitality in Milk.

Considerable discussion is going the rounds of the New England agricultural papers concerning the question of vitality in milk. The substance of the controversy is whether a cow puts vitality into her milk according to the vitality which she herself possesses. The Connecticut experiment station seems to be the first to use the term vitality in regard to milk. The Holstein breeders take this to be an argument to prove that the black and whites are the cows to furnish milk for the babies and invalids. Some of the theories advanced to prove this conclusion are that a diseased cow will put disease germs in her milk. A healthy cow will produce perfect, normal milk. A weak cow will hardly produce normal milk. Her milk will lack one or another element because her system is not in a condition to extract from her food and drink all the complex and delicate elements that go to make up normal or perfect milk. Some cows are able to bear and to rear vigorous calves, and some are so weak or so defective that most of their calves are born dead, die soon after birth, or live a life of weakness or worthlessness. The Holstein Register says: "Which of these two classes of cows may be counted the better source of milk for food for humans? Would any parent be willing to feed his infant on the milk of cows whose calves were born too weak to live on the milk of their mothers? Will the cow whose milk fails to keep alive her calf be a good foster mother for the human infants?"

Gape Worms—Millet as Feed.

Mrs. A. E. G., gives her description of removing gape worms from a chick's throat. Of course it is not gape worm, but gape worms, though there be but one full body in the throat. Just one pair will seldom hurt a chick. It will not suck enough blood to kill the chick, or fill enough space to choke it. But there lies the the trouble, more than one hunts the throat. I like three doubled and well tristed horsehairs best. I keep these all through one season in a turpentine bottle. One must be careful, as even so little as a drop of turpentine in the windpipe will often kill the chick. Horse hairs are not so harsh as blue grass, and yet blue grass is quite effective.

Where does the gape worm come from, and how does it get in the chick's windpipe? It either crawls there or is hatched there. The gape worm comes from the ground as other worms. Of course like all other specialized life it has come from simpler forms. It has evolved from a lower form, in which the reproductive organs of both sexes are in one body. But now, if you examine one taken from the chick's throat, you will find the worm has two heads, and the smaller head has a short body which is the male growing from the side of the female. Both sucker mouths fasten in the shape of the letter y on the windpipe; the bodies adhere, and so do the eggs. The chick picks up worms or eggs, and the crop retains them at least in part. If large enough, when picked from dirty water or the ground, or let loose from the bodies of fishing worms, they crawl straight into the windpipe. This has been proved, and also that they can hatch in the crop—and I think, from microscopic examination, in the folds of the windpipe also. Look at one through a small microscope or reading glass. They mature in eight days, when the combined bodies break apart and let out the eggs, when, of course, the parents die. Old fowls have them in plenty, so do crows, hawks, pigeons and wild birds. I saw two robins dying of the gapes last year. This is how they get to the chicks. There is no other worm now known exactly like the gape worm.

It seems so strange to me to hear J. C. Clipp advising millet seed as a fine chick food. Millet seed in small quantities stimulates but I will not buy chick feed in which it is found in any quantity, and neither will some poultry keepers, prominent as great shippers of fine stock. I cannot think that I am wrong in this, because I am quite sure that I have known it to nearly decimate a flock of small chicks, and I have known older flocks, when fed it exclusively, to get miserably poor and stupid, and always go lame, and this is not because of its fattening quality but its power for causing kidney trouble, just as it dies if fed in the grass or hay too largely to horses. If I am wrong, then for a number of years I have been advising some people badly.—Ida M. Shepler, in the Indiana Farmer.

Notes.

Bell every seventh sheep against dogs.

Poor dogs are a curse to the sheep grower.

No other kind of feed is better for ewes than clover.

Do your best to have the dog laws made more stringent.

For an all-round grain feed oats takes the blue ribon.

Oust the old wethers. They are a nuisance to the rest of the sheep family.

Every day count the sheep and know that they are all in the flock. If any are missing, hunt them up.

During cold weather it will be well to give the cow tempered water to drink. It will have its effect upon the milk supply.

Selling a good brood sow because she brought big money on the market is about the poorest variety of hog sense that could be jumped up.

Now and then a ration of wheat bran is good to keep the bowels regular. Sheep are apt to get constipated in cold weather. Give as much laxative food as you can.

The care you give your sheep tells the story of the lambs you will get later. Neglect and poor feeding bring their harvest in scrawny, poor lambs. You don't want any such.

Doctoring sheep that are sick is risky business. Keep them dry and warm and give them their own way about eating. This will usually bring them out all right unless they have some disease.

The Legs Scared Him.

"There,' said a commuter in the Grand Central station, pointing to a robust colored man, "is a good railroad porter spoiled.

"You see, he was on a Pullman car and was doing well until a man with two wooden legs became a passenger in his coach. That night the traveler put his artificial underpinning beneath the berth he occupied. When Sam came along to collect the shoes he pulled out not only footwear, but also three feet of leather tops and steel springs, together with metal joints and ball bearings. The sight so worked upon the superstitious fellow that he fled in terror. He resigned his place. Now he is handling baggage."—New York Press.

Many Children Are Sickly.

Mother Gray's Sweet Powders for Children, used by Mother Gray, a nurse in Children's Home, New York, cure Feverishness, Headache, Stomach Troubles, Teething Disorders and Destroy Worms. At all Druggists', 25c. Sample mailed FREE. Address Allen S. Olmsted, Le Roy, N. Y.

Iowa has 1,629 banks, or one for every 1,380 inhabitants. Kansas is next, with one bank for every 1,500 people.

For COLDS and GRIP.

Hick's CAPUDINE is the best remedy—relieves the aching and feverishness—cures the Cold and restores normal conditions. It's liquid—effects immediately. 10c., 25c. and 50c., at drug stores.

A discarded automobile tire makes a good life preserver. Its bouyancy is sufficient to keep several persons afloat.

Only One "Bromo Quinine,"

That is Laxative Bromo Quinine. Look for the signature of E. W. Grove. Used the World over to Cure a Cold in One Day. 25c

William Jackson, of Thirsk, England, who recently died, was the oldest English Odd Fellow.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar-coated, tiny granules, easy to take as candy.

The compass was first used in navigation about 1250 A. D.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle

The lighthouse service in 1909 was $5,357,996.

In Agony With Eczema.

"No tongue can tell how I suffered for five years with itching and bleeding eczema, until I was cured by the Cuticura Remedies, and I am so grateful I want the world to know, for what helped me will help others. My body and face were covered with sores. One day it would seem to be better, and then break out again with the most terrible pain and itching. I have been sick several times, but never in my life did I experience such awful suffering as with this eczema. I had made up my mind that death was near at hand, and I longed for that time when I would be at rest. I had tried many different doctors and medicines without success, and my mother brought me the Cuticura Remedies, insisting that I try them. I began to feel better after the first bath with Cuticura Soap, and one application of Cuticura Ointment.

"I continued with the Cuticura Soap and Cuticura Ointment, and have taken four bottles of Cuticura Resolvent, and consider myself well. This was nine years ago and I have had no return of the trouble since. Any person having any doubt about this wonderful cure by the Cuticura Remedies can write to my address. Mrs. Altie Etson, 93 Inn Road, Battle Creek, Mich., Oct. 16, 1909."

A Defeated Conscience.

George W. Martin, secretary of the Kansas State Historical Society, tells a story about an early day Kansas justice of the peace, who will be nameless here:

"This J. P.," said Mr. Martin, "would marry a couple one day as justice of the peace and divorce them next day as notary public."

One time, as the story ran, a man surrendered himself to this J. P.

"An' phwat's the matter?" asked the judge.

"I killed a man out here on the prairie in a fight," was the reply. "I want to give myself up."

"You did kill him, sor?" asked the J. P.

"Yes, sir," was the reply.

"Who saw you?" asked the J. P.

"Nobody."

"An' nobody saw you kill him?"

"No, sir; just we two were there."

"An' you're shure nobody saw you?" reiterated the J. P.

"Of course I'm sure," was the reply.

"Thin you're discharged," said the J. P., bringing his fist down on the table. "You're discharged. You can't 'criminate yourself. Fifty dollars, please!"—Kansas City Journal.

A Human Candle.

Waggs—I have found something beside a candle that will answer that old riddle, "The longer it stands the shorter it grows."

Wiggs—What is it?

Waggs—A candidate. The longer he stands for office the shorter he grows financially.

A GOOD CHANGE

A Change of Food Works Wonders.

The wrong food and drink causes a lot of trouble in this world. To change the food is the first duty of every person that is ill, particularly from stomach and nervous trouble. As an illustration: A lady in Mo. has, with her husband, been brought around to health again by leaving off coffee and some articles of food that did not agree with them. They began using Postum and Grape-Nuts food. She says:

"For a number of years I suffered with stomach and bowel trouble, which kept getting worse, until I was very ill most of the time. About four years ago I left off coffee and began taking Postum. My stomach and bowels improved right along, but I was so reduced in flesh and so nervous that the least thing would overcome me.

"Then I changed my food and began using Grape-Nuts in addition to Postum. I lived on these two principally for about four months. Day by day I gained in flesh and strength until now the nervous trouble has entirely disappeared and I feel that I owe my life and health to Postum and Grape-Nuts.

"Husband is 73 years old and he was troubled, for a long time, with occasional cramps, and slept badly. Finally I prevailed upon him to leave off coffee and take Postum. He had stood out for a long time, but after he tried Postum for a few days he found that he could sleep and that his cramps disappeared. He was satisfied and has never gone back to coffee.

"I have a brother in California who has been using Postum for several years; his whole family use it also because they have had such good results from it."

Look in pkgs. for the little book, "The Road to Wellville." "There's a Reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

CONVINCING PROOF

OF THE VIRTUE OF

Lydia E. Pinkham's Vegetable Compound

What is the use of procrastinating in the face of such evidence as the following letters represent? If you are a sick woman or know one who is, what sensible reason have you for not giving Lydia E. Pinkham's Vegetable Compound a trial? For 30 years we have been publishing such testimonial letters as these—thousands of them—they are genuine and honest, too, every one of them.

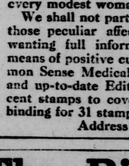
Mrs. S. J. Barber says:

"I think Lydia E. Pinkham's Vegetable Compound is the best medicine in the world for women—and I feel it my duty to let others know the good it has done for me. Three years ago I had a tumor which the doctor said would have to be removed by an operation or I could not live more than a year, or two, at most. I wrote Mrs. Pinkham, at Lynn, Mass., for advice, and took 14 bottles of Lydia E. Pinkham's Vegetable Compound, and today the tumor is gone and I am a perfectly well woman. I hope my testimonial will be of benefit to others." — Mrs. S. J. BARBER, Scott, N. Y.

Mrs. George May says:

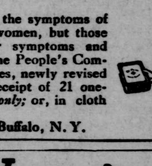
"No one knows what I have suffered from female troubles, neuralgia pains, and backache. My doctor said he could not give me anything to cure it. Through the advice of a friend I began to use Lydia E. Pinkham's Vegetable Compound, and the pain soon disappeared. I continued its use and am now in perfect health. Lydia E. Pinkham's Vegetable Compound has been a God-send to me as I believe I should have been in my grave if it had not been for Mrs. Pinkham's advice and Lydia E. Pinkham's Vegetable Compound." —Mrs. GEORGE MAY, 86 4th Ave., Paterson, N. J.

Mrs. E. F. Hayes says:



"I was under the doctor's treatment for a fibroid tumor. I suffered with pain, soreness, bloating, and could not walk or stand on my feet any length of time. I wrote to Mrs. Pinkham for advice, followed her directions and took Lydia E. Pinkham's Vegetable Compound. To-day I am a well woman, the tumor was expelled and my whole system strengthened. I advise all women who are afflicted with tumors or female troubles to try Lydia E. Pinkham's Vegetable Compound." — Mrs. E. F. HAYES, 1890 Washington St., Boston, Mass.

Mrs. W. K. Housh says:



"I have been completely cured of a severe female trouble by Lydia E. Pinkham's Vegetable Compound, and want to recommend it to all suffering women." —Mrs. W. K. HOUSH, 7 Eastview Ave., Cincinnati, Ohio.

Because your case is a difficult one, doctors having done you no good, do not continue to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial. It surely has cured many cases of female ills, such as inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pains, backache, etc.

For 30 years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills. No sick woman does justice to herself who will not try this famous medicine. Made exclusively from roots and herbs, and has thousands of cures to its credit.

Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health free of charge. Address Mrs. Pinkham, Lynn, Mass.

Morgan's Tale of a Minister.

J. Pierpont Morgan, at the recent diocesan convention in New York, amused a group of clergymen with a story of a minister.

"He was as ignorant, this good man, of financial matters," said Mr. Morgan, "as the average financier is ignorant of matters ecclesiastical.

"He once received a check—the first he had ever got in his life—and took it to a bank for payment.

"'But you must indorse the check,' said the paying teller, returning it through his little window.

"'Indorse it?' said the old minister, in a puzzled tone.

"'Yes, of course. It must be indorsed on the back.'

"'I see,' said the minister. And, turning the check over, he wrote across the back of it:

"'I heartily endorse this check.'"
—Cincinnati Enquirer.

Impossible to find anything better for sideache, backache or stitches than *Perry Davis' Painkiller*. 25c., 35c. and 50c.

Despite the great demand for it at home, the United States annually exports more than 16,000,000 gallons of turpentine, more than all the rest of the world combined produces.

London business men will build an aerodrome to cost $50,000, at Hendon, one of the suburbs of the British metropolis.

For HEADACHE—Hicks' CAPUDINE

Whether from Colds, Heat, Stomach or Nervous Troubles. Capudine will relieve you. It's liquid—pleasant to take—acts immediately. Try it, 10c., 25c. and 50c. at drug stores.
