## HEART NEEDS ESPECIAL CARE

**Strain on the Vital Organ Must Be Avoided When Middle Life Has Been Passed.**

"The death by heart failure of Gen. Frederick D. Grant," says the Medical Record, "emphasizes the repeated warnings of the medical profession that we should treat a senile heart with respect. As far as we know there is not the slightest disagreement on this one point—every human heart over fifty, and perhaps over forty-five, cannot stand much internal pressure without being ruined or at least damaged. A very slight man may go through severe muscular exertion with but little damage, but a heavy man, like the general, places on the heart and arteries a hydrostatic pressure beyond the safety point, and it never recovers.

"The pitiful feature of this deplorable death is the fact that Gen. Grant in his last annual report had called attention to the opinion of life insurance examiners that army officers were becoming poor risks on account of the increasing strain on their profession. It is safe to predict more deaths like Gen. Grant's, unless we treat the heart of a man over forty-five with more gentleness.

## "WHY SHOULD I USE CUTICURA SOAP?"

"There is nothing the matter with my skin, and I thought Cuticura Soap was only for skin troubles." True, it is for skin troubles, but its great mission is to prevent skin troubles. For more than a generation its delicate emollient and prophylactic properties have rendered it the standard for this purpose, while its extreme purity and refreshing fragrance give to it all the advantages of the best of toilet soaps. It is also invaluable in keeping the hands soft and white, the hair live and glossy, and the scalp free from dandruff and irritation.

While its first cost is a few cents more than that of ordinary toilet soaps, it is prepared with such care and of such materials, that it wears to a wafer, often outlasting several cakes of other soap, and making its use, in practice, most economical. Cuticura Soap is sold by druggists and dealers everywhere, but the truth of these claims may be demonstrated without cost by sending to "Cuticura," Dept. L, Boston, for a liberal sample cake, together with thirty-two-page book on the skin and hair.

**The Difference.**

"There is such a vast difference between the ideal and the practical in stage art," sighed the intellectual young actor.

"The difference," replied the stolid stage manager, "as lies between the artistic role which leads to Arcady and the fat part which leads to the pork barrel."

**His Pose.**

"Mrs. Hewligus, what is your husband's attitude on the woman suffrage question?"

"One foot in the air, of course. He's one of the chronic kickers."

**TO DRIVE OUT MALARIA AND BUILD UP THE SYSTEM**
Take the Old Standard GROVE'S TASTELESS CHILL TONIC. You know what you are taking. The formula is plainly printed on every bottle, showing it is simply Quinine and Iron in a tasteless form, and the most effectual form. For grown people and children, 50 cents.

**Strike Breakers of Old.**

Elijah was being fed by the ravens.

"I don't care if the waiters do strike," he boasted.

**For HEADACHE—Hicks' CAPUDINE**
Whether from Colds, Heat, Stomach or Nervous Troubles, Capudine will relieve you. It's liquid—pleasant to take—acts immediately. Try it. 10c., 25c., and 50 cents at drug stores.

**His Weakness.**

Howell—I see that Rowell has gone into bankruptcy again.

Powell—Yes, failing is his failing.

Which wins? Garfield Tea always wins on its merits as the best of herb cathartics.

Always meet people with a smile—if it's your treat.

# WIFE'S HEALTH RESTORED

**Husband Declared Lydia E. Pinkham's Vegetable Compound Would Restore Her Health, And It Did.**

Ashland, Ky.—"Four years ago I seemed to have everything the matter with me. I had female and kidney trouble and was so bad off I could hardly rest day or night. I doctored with all the best doctors in town and took many kinds of medicine but nothing did any good until I tried your wonderful remedy, Lydia E. Pinkham's Vegetable Compound. My husband said it would restore my health and it has."—Mrs. MAY WYATT, Ashland, Ky.

There are probably hundreds of thousands of women in the United States who have been benefitted by this famous old remedy, which was produced from roots and herbs over thirty years ago by a woman to relieve woman's suffering.

**Read What Another Woman says:**

Camden, N. J.—"I had female trouble and a serious displacement and was tired and discouraged and unable to do my work. My doctors told me I never could be cured without an operation, but thanks to Lydia E. Pinkham's Vegetable Compound I am cured of that affliction and have recommended it to more than one of my friends with the best results."—Mrs. ELLA JOHNSTON, 324 Vine St.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

**DROPSY** TREATED. Give quick relief, usually remove swelling and short breath in a few days and entire relief in 15-45 days, trial treatment FREE. DR. GREEN'S SONS, Box A, Atlanta, Ga.

# FARM AND BEES

## COMFORT IN HOUSE-APIARIES

**Especially Adapted to Out Yards, Having All Facilities for Proper Care of Bees.**

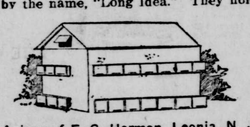

(By F. G. HERMAN.)

I regard house-apiaries as especially adapted to out yards, having all the facilities for properly caring for bees in themselves, the year around, and without increased cost over open yards.

I keep part of my bees in a house made for the purpose, and I am ready to endorse all that has been said about the superior comfort of handling bees in house-apiaries. When I open one of these hives the bees do not fly up with the same alacrity that bees do from the hives that stand in the sunshine.

The house contains twenty colonies of bees in two tiers of hives. The broad side of the house which is in view faces eastward, and the end southward; there are no hives facing the other two directions.

The hives in this house are known by the name, "Long Idea." They hold

Apiary of F. G. Herman, Leonia, N. J.

crosswise, twenty Langstreth frames each. They are expressly used for extracting honey.

One row of hives is set on a frame just high enough for me to be able to raise the covers, and look into them comfortably, and the other row rests on the floor. I might add that the hives are only one story, so there is no use for queen-excluders, and no tiering to be done.

There are no bees at large in the house, excepting a few which leave while handling the combs, and these quickly make their escape by way of the windows, which are left open all summer for ventilation. The netting on the windows is so arranged that the bees can leave the room, but cannot enter it.

The awning over the windows is to prevent the rain from coming in while the windows are left open. The hive-entrances match the corresponding slots in the sides of the house, and when the bees enter the slot, or entrance, they go directly to their respective hives.

Each alternate entrance is painted a dark color; this is for the purpose of helping the bees to mark their right hive.

## PROVIDING SHELTER FOR HAY

**Practical Method for Protecting Top of the Stack From Inclemencies of Weather.**

There are many farmers who provide shelter for their hay in the following manner: Posts from twelve to sixteen feet high are set into the ground at corners and along sides of a parallelogram, says the Iowa Homestead. Then two-by-fours are nailed around tops of posts and they are boxed down two or three feet and a roof is put on as a covering. The hay is then ricked beneath the roof,

Good Hay Shelter.

which completely protects the top of stack from the rain. The hay is sometimes carried to its place by means of a hay fork that runs on track secured to roof.

**Lime for Gardens.**

Should the vegetable garden be limed? If so, how and when? asks a Virginia reader. Yes, occasionally; always if the soil is sour. Almost all our vegetables like an alkaline soil. Potatoes will grow and be free from scab in sold that is a little acid; but they hardly ever give as big a yield as they do in alkaline soil. Strawberries, blackberries, most raspberries, blueberries, etc., can stand some soil acidity, perhaps prefer it. For the general run of vegetables lime is good. Apply about a ton of stone lime, slaked to a powder, per acre, or double that quantity of air-slaked (carbonate of) lime, or of powdered raw limestone. The best time to apply it is in the fall, and the lime should be well worked into the soil.

**Corn Silage.**

An important consideration in determining the feeding value of corn silage, compared with that of corn, stover, fodder corn or bundle-corn, is that in ensilage the whole of the plant, including the stems, is converted into succulent and nourishing food. When in any of the other forms the stems are rejected and are of value only as they gradually add to the humus of the soil.

**Kills the Bugs.**

Everyone is familiar with the little striped cucumber bug. Many remedies have been tried and failed. A good way is to take an ordinary fertilizer from the cow stable, make a liquid of it and spread it on and among the vines. It not only destroys the pest, but promotes the growth of the vines

## HOW TO PREPARE WHITEWASH

**Nothing That Can Compare With It for Outside or Inside Work. Retains Brilliancy.**

A formula for whitewash prepared by the United States department of agriculture is as follows:

Take half a bushel of unslaked lime; slake it with warm water and cover during the process to keep in the steam; strain the liquid through a fine sieve or strainer; add a peck of salt previously well dissolved in warm water, three pounds of ground rice boiled to a thin paste, and stir in boiling hot one-half pound of powdered Spanish whiting and one pound of glue which has been previously dissolved over a slow fire. Then add five gallons of hot water to the mixture, stir well and let it stand for a few days, covered up from the dirt. It should be put on hot.

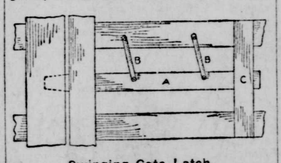

One pint of the mixture will cover a square yard, properly applied. Small brushes are best. There is nothing that can compare with it for outside or inside work, and it retains its brilliancy for years. Coloring matter may be put in and made of any shade, Spanish brown, yellow ochre, or common clay.

## LATCH FOR SWINGING GATE

**Excellent Device, Needed on All Farms, May Be Made by Following Directions Given.**

A good latch for farm gates may be made as shown in the accompanying sketch. The slide A is suspended by the hangers BB, which are placed on each side of the gate. The back end of the latch works between the guides C and the front end between the end pieces of the gate. The slide engages with a slot in the gate post when the gate is shut.

The hangers BB are made in any convenient length. The holes are ¼ inch in diameter and tire bolts are used as fasteners. The holes for the hangers should be drilled one-third of the width of the latch from its top to make the largest part of the weight fall below the fastenings of the supports, writes Willard H. Elder in the

Swinging Gate Latch.

Popular Mechanics. The slide being in a horizontal position, it works better between the guides. When the slide is in the gatepost slot, the hangers should be at the angle shown, so that the weight of the slide helps to hold it in place.

## PACKING HONEY IN CARTONS

**Inexpensive Covering Serves to Protect Comb From Dust and Prevents Marring in Handling.**

The best grades of comb honey should be put on the market in neatly printed cartons. They are a great convenience for the dealer, they serve to keep honey free from dust, and also prevent marring the delicate comb when handling from the grocery to the consumer's kitchen.

Cartons are so inexpensive, and so useful, that it is surprising that more of the best comb honey is not put on the market in them.

Of course, those using cartons should be very careful to see that only the most perfect sections of honey are put into them. A honey-purchaser will seldom buy cartoned honey the second time if she has been once deceived—by getting, for instance, a partly filled comb in a carton; or, perhaps, a dirty-looking comb.

Cartons should be used more extensively than they are now, as they also furnish an added opportunity to send printed honey-information with each comb of honey sold.

**Hay Farming.**

Hay farming is not a poor industry if one knows how to raise it and then how to market it to the best advantage. So many have gone into other kinds of farming, and so many dairies now using up all the hay raised in their neighborhood, that the competition is far less in the city markets than formerly, says the Farm and Fireside. The idea that hay raising is exhausting the soil and quickly runs down a farm is an exploded fallacy. Nothing robs the soil so quickly as continual cropping of timothy hay, but when the land is sown to clover every alternate or third season, with the second crop under, the soil is not robbed, but actually benefited. Taking a second crop of clover from the same field in one season generally runs down the soil, especially if repeated more than one season.

# BEES AND FARM NOTES

For heavy sod ground the improved disk harrow is much the best.

The cowpea is an annual, and a soil as a renovator it is probably without a peer.

Good seed corn is one of the most important factors in producing a good yield.

No man can tell whether corn will grow or not without making a germination test.

Training tomatoes on wires to run from five to ten feet high is becoming a common practice.

If wood ashes are applied to the potato crop it produces conditions favorable to potato scab.

The destruction of organic matter, by cultivation and otherwise, is largely responsible for the depletion of our soils.

For pulverizing land for planting or drilling the spring tooth, sled runner, lever harrow is the most popular instrument.

The weeder is a most effective tool in that it takes every small weed in its path as well as to pulverize many small clods.

# The KITCHEN CABINET

THE year's at the spring
And day's at the morn;
Morning's at seven

The hillside's dew-pearled
The lark's on the wing
The snail's on the thorn
God in his heaven—
All's right with the world.
—Robert Browning.

**THE VALUABLE LEMON.**

The lemon is a palatable medicine and one that is especially good for the blood. For thick, sluggish blood and an inactive liver, the juice of a lemon in a glass of water every morning on rising is a most beneficial tonic. The lemon juice should be taken without sugar and drunk at least half an hour before eating, to give it time to be absorbed into the system before anything is taken into the stomach.

As a drink, hot or cold lemonade still stands first on the list of drinks.

In combination with other foods and fruits it is also both refreshing and stimulating. A few tablespoonfuls of lemon juice in barley water is a splendid drink for the sick.

There is a zest about a dish of lemon jelly to be served with different meats (fish and poultry), which is especially pleasing.

When serving bananas and oranges, fruits that are nearly always on the market, a bit of lemon juice squeezed over the fruit brings out the flavor of each.

In preparing frozen dishes, like raspberry or grape ice or ice cream, a tablespoon of lemon juice not only enhances the flavor, but makes the color more beautiful; a desirable addition to any dish.

Lemon juice and olive oil, with salt and cayenne pepper, is a simple and easily assimilated salad dressing for many vegetables and fruits.

As a garnish for fish, cut in dainty slices or in eighths, there is no prettier decoration, if combined with a touch of parsley.

**Lemon Sauce for Puddings.**—Stir until well mixed, a tablespoonful of flour and a half cup of sugar; add a cup of boiling water and cook until smooth; add a tablespoonful of butter, two of lemon juice and a little of the rind. Pour over the well-beaten yolk of an egg.

OH FOR a booke and a shadie nooke,
Eyther in doors or out;
With the grene leaves whispering overhead
Or the streete cryers all about,
Where I maie reade all at my ease,
Both for the newe and old;
For a jollie goode booke whereon to looke,
Is better to me than golde.

**EXPERT LAUNDERING.**

There are people, and those who should know better, who labor under the impression that laundry work is merely a matter of muscle, and that any one with the physical strength and little intelligence will make a good laundress. There was never a more mistaken idea, as we have learned by sad experience.

A successful laundress must be an educated woman, something of a chemist, a good fair amount of judgment and a conscientious, painstaking worker.

There is knowledge to be used in the choice of soap and starches, in the removing of spots and stains.

To do the right kind of laundry work it is necessary to know how to wash the most delicate colors without fading them.

Most colors may be retained by a salt or vinegar bath, a tablespoonful to a quart of water. A general rule is to immerse all light colors in salt water and dark colors in vinegar.

Blue is a delicate color, yet any shade may be permanently fixed by being soaked before it is laundered for half an hour in eight or ten quarts of water in which is dissolved an ounce of sugar of lead.

Green is another frail color; a lump of alum in the rinse water will set this color.

There are three important things to consider in washing colored clothes, after the treatment which sets the color. First, they should never be washed in boiling hot water; second, soap should never be rubbed on, but always dissolved, and third, they should always be dried as quickly as possible in the shade and ironed, when possible, before they are quite dry, and on the wrong side.

If a garment is only slightly soiled, the rubbing and sousing in the soapy water will cleanse it, then the rinsing should be very thorough. The whole process should be done as quickly as possible.

The most careful washer may ruin the result of her work by careless ironing.

To be a good ironer means much practice and infinite patience.

Nellie Maxwell.

**Great Labor Bureau.**

In the Civil Service Commission the United States Government has the greatest employment bureau in the world. Over half a million people are on the Government payroll, and of these nearly half are receiving pay as the result of competitive examinations.

**The Elements of Joy.**

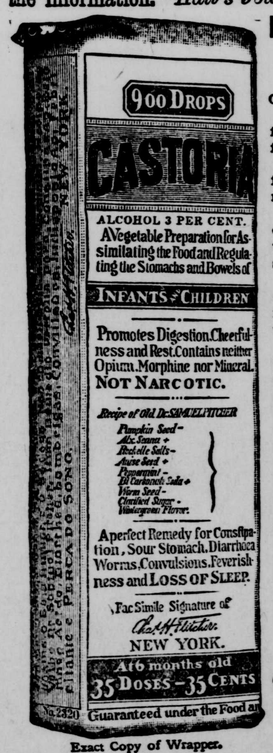

The delights of thought, of truth, of work, and of well doing will not descend upon us like the dew upon the flower, without effort of our own. Labor, watchfulness, perseverance, self-denial, fortitude, are the elements out of which this kind of joy is formed.—S. C. Jones.

**Why Question It?**

"A woman is only as old as she says she is," remarks the Washington Post And, God bless her! we take her at her word.—Atlanta Journal.

# Physicians Recommend Castoria

CASTORIA has met with pronounced favor on the part of physicians, pharmaceutical societies and medical authorities. It is used by physicians with results most gratifying. The extended use of Castoria is unquestionably the result of three facts: *First*—The indisputable evidence that it is harmless: *Second*—That it not only allays stomach pains and quiets the nerves, but assimilates the food: *Third*—It is an agreeable and perfect substitute for Castor Oil. It is absolutely safe. It does not contain any Opium, Morphine, or other narcotic and does not stupefy. It is unlike Soothing Syrups, Bateman's Drops, Godfrey's Cordial, etc. This is a good deal for a Medical Journal to say. Our duty, however, is to expose danger and record the means of advancing health. The day for poisoning innocent children through greed or ignorance ought to end. To our knowledge, Castoria is a remedy which produces composure and health, by regulating the system—not by stupefying it—and our readers are entitled to the information.—*Hall's Journal of Health.*

Exact Copy of Wrapper.

## Letters from Prominent Physicians addressed to Chas. H. Fletcher.

Dr. B. Halstead Scott, of Chicago, Ills., says: "I have prescribed your Castoria often for infants during my practice, and find it very satisfactory."

Dr. William Belmont, of Cleveland, Ohio, says: "Your Castoria stands first in its class. In my thirty years of practice I can say I never have found anything that so filled the place."

Dr. J. H. Taft, of Brooklyn, N. Y., says: "I have used your Castoria and found it an excellent remedy in my household and private practice for many years. The formula is excellent."

Dr. R. J. Hamlen, of Detroit, Mich., says: "I prescribe your Castoria extensively, as I have never found anything to equal it for children's troubles. I am aware that there are imitations in the field, but I always see that my patients get Fletcher's."

Dr. Wm. J McCrann, of Omaha, Neb., says: "As the father of thirteen children I certainly know something about your great medicine, and aside from my own family experience I have in my years of practice found Castoria a popular and efficient remedy in almost every home."

Dr. J. R. Clausen, of Philadelphia, Pa., says: "The name that your Castoria has made for itself in the tens of thousands of homes blessed by the presence of children, scarcely needs to be supplemented by the endorsement of the medical profession, but I, for one, most heartily endorse it and believe it an excellent remedy."

Dr. R. M. Ward, of Kansas City, Mo., says: "Physicians generally do not prescribe proprietary preparations, but in the case of Castoria my experience, like that of many other physicians, has taught me to make an exception. I prescribe your Castoria in my practice because I have found it to be a thoroughly reliable remedy for children's complaints. Any physician who has raised a family, as I have, will join me in heartiest recommendation of Castoria."

GENUINE CASTORIA ALWAYS
Bears the Signature of
Chas. H. Fletcher.

The Kind You Have Always Bought
In Use For Over 30 Years.
THE CENTAUR COMPANY, 77 MURRAY STREET, NEW YORK CITY.

## WHEN THE ROMANCE FADED

**Plain-Spoken Husband Came to the Point With a Few Words of Unvarnished Truth.**

Congressman Jim Mann was on his way back from Chicago, and couldn't help hearing the conversation of the couple in the section right behind his. They looked like newly married folks, says Mack's National Monthly, but were not on their honeymoon, as Mann learned by deduction. The woman laid down a newspaper she had been reading and said to her husband:

"Do you know, I wish I had one of these affinities. Oh, I think it would be just gr-a-n-d to sit on a rock with somebody and have him rave about the incomparable golden color of my hair and tell me that my eyes were the most beautiful in the whole world, and——"

"Uh, huh," said the husband, yawning.

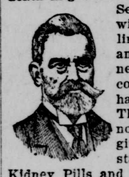

"And that the delicate pink of my cheeks had been painted there by the angels, and that he couldn't live without me. O-oh, I think an affinity like that would be——"

"'Tisn't an affinity you want," interrupted her husband. "What you seem to want is a plain, old-fashioned liar."

**ALMOST A MIRACLE.**

**Raised Up When Science Said There Was No Hope.**

C. W. L. Nesbitt, Main St., Marion, Ky., writes: "I was a chronic invalid with kidney troubles and often wished death might end my awful sufferings.

Secretions were thick with sediment, my limbs were swollen and right side so nearly paralyzed I could not raise my hand above my head. The doctor held out no hope and I had given up but at last started using Doan's Kidney Pills and made a rapid gain. After three months' use I was well and at work again."

"When Your Back Is Lame, Remember the Name—DOAN'S." 50c. all stores. Foster-Milburn Co., Buffalo, N. Y.

**To Preserve Historic Building.**

A movement has been started in Frankfort, Ky., to preserve the "little red brick" building on the old State House square on account of its historic interest. The building now standing is 98 years old, and Daniel Boone, on the occasion of visits to Frankfort after it was erected, visited the offices on business. In two years the building will be 100 years old, if left standing, and is the oldest state building in existence.

**Lots of It.**

"They say a man's wife often makes him, but Bingle's wife will never be able to put any push in that man."

"Just you wait until she gets a lawn-mower in his hands."

Discriminating persons should know that Garfield Tea is a uniquely efficient remedy for liver troubles and costiveness.

Patience is but lying to and riding out the gale.—Beecher.

There's music in the squall of a baby—to its mother.

**Repartee Off the Stage.**

In the big Weber-Fields dressing room Joe Weber and George Beban sat tense over a game of checkers. "I'm working him up to his part," murmured Mr. Weber, in a kind voice. "He must go on the stage in a tantrum in a few minutes. Every night I beat him a game of checkers in here before his entrance. It has just the right effect on him." "Every night you don't beat me!" cried his opponent. "owe you $1.90 in 12 weeks. Is that much?" "Not so much, but I'd be glad to get it," suggested the sweet-voiced Weber.

**Powerful Plea.**

A man in North Carolina, who was saved from conviction for horse stealing by the powerful plea of his lawyer, after his acquittal by the jury, was asked by the lawyer:

"Honor bright, now, Bill, you did steal that horse, didn't you?"

"Now, look a-here, judge," was the reply, "I allers did think I stole that hoss, but since I hearn your speech to that 'ere jury, I'll be doggoned if I ain't got my doubts about it."—National Monthly.

**When Your Eyes Need Care**

Try Murine Eye Remedy. No Smarting—Feels Fine—Acts Quickly. Try it for Red, Weak, Watery Eyes and Granulated Eyelids. Illustrated Book in each Package.
