COULD STAND PLAYFUL DOG

Young Man Considerably Relieved When He Learned the Animal Was Not in Earnest.

"Have you seen papa's new dog, Carlo?" she asked as they sat in the parlor.

"Yes," he replied, uneasily. "I have had the pleasure of meeting the dog."

"Isn't he splendid? He is so affectionate?"

"I noticed he was very demonstrative," returned he, as he moved uneasily in his chair.

"He is very playful, too. I never saw a more playful animal in all my life."

"I am so glad to hear you say that."

"Why."

"Because I was a little afraid that when he bit that piece out of me the other evening he was in earnest. But if he was only in play, of course, it's all right. I can take fun as well as anybody."

THE FLYING AGE.

"How old is De Swift's youngest child?"

"It can't be more than a year old. It's just learning to fly."

In a Literal Sense.

Juvenile remarks are not always so naughty as they seem. Small Sam, for instance, had no intention of using bad language when he got into such severe trouble in class.

His teacher was trying to press home certain facts concerning a volcano. In reviewing the lesson she drew on the blackboard her own conception of a flaming mountain, using colored crayon with extraordinary effect.

"What is it?" she asked, the picture finished.

The scholars shook puzzled heads.

"You don't know? Well, what does it look like?" the teacher persisted.

Piped Sammie, whose home boasts a colored pictorial Bible:

"I think it looks like hell."—Chicago Record-Herald.

Shopping Instinct.

A rural postmaster tells this story of one of the patrons of his office, a boy of thrifty, not to say penurious, stock. When the lad comes into the postoffice he will thrust his wizened face up close to the window and, in his slow, Yankee drawl, inquire most earnestly:

"Hev ye got any postal cards?"

"Yes," the postmaster replies.

"Haow much be they t'day?"

"A cent apiece."

Then the boy, screwing up his eyes in the intensity of his thought over the question he has to decide, always stops for a while to weigh the consequences. Finally, he will reply solemnly:

"Wal, I'll take one."—Youth's Companion.

No Indulgence.

Mrs. Alec Tweedie of the Eugenics Education society of London, said at a reception in New York:

"Eugenics will save the son from paying for the sins of his father. Eugenics shows us that there has been no escape heretofore from these penalties. In the matter of eugenics it is not as it was with Spence.

"'Let bygones be bygones,' Spence indulgently said to his old debts, as he started in to make some new ones."

Neat Differentiation.

Senator Lodge, at a dinner in the Back Bay district of Boston indicated very neatly the difference between a statesman and a politician.

"A statesman," he said, "thinks of the next generation; a politician of the next election."

TO DRIVE OUT MALARIA AND BUILD UP THE SYSTEM

Take the Old Standard GROVE'S TASTELESS CHILL TONIC. You know what you are taking. The formula is plainly printed on every bottle, showing it is simply Quinine and Iron in a tasteless form, and the most effectual form. For grown people and children, 50 cents. Adv.

Of Course.

"What did your lawyer say when you stated your purpose to him?"

"He said it was fees-ible."

We feel sorry for the man who has a nagging wife to fuss over the ashes from his pipe dreams.

A girl may toss her hand even if she can't throw a stone.

JUDICIOUS MANAGEMENT OF FALL COLTS

Excellent Types of Farm Animals.

(BY W. M. KELLY.)

There are many reasons why the practice of breeding the farm mares for fall colts should prove advantageous; however, very few farmers have made it a success.

To be sure a mare can rear her foal very nicely during the winter and if she fails to get with foal in the spring there is no good reason why she should be allowed to miss the whole year, but as a general thing the spring colts pay best.

Spring is the natural season for mares to bring forth their young. This is not the most important reason, but we all know that grass is the best food for young foals, that is, of course when properly supplemented with grain.

In the winter when fed dry roughage the effect upon its digestive system is far inferior to that of grass, and too, there is the question of plenty of exercise and sunshine.

English Champion Shire.

Colts need plenty of exercise and sunshine to build up strong muscles and sinews. In the cold weather he is kept in the stable most of the time. Kept confined in a stall during the winter his feet are sure to grow crooked unless intelligent care is taken of them.

In the summer the natural wear and tear of traveling about the pasture keeps his feet in ideal shape so that a very little attention is required to keep them of the right length.

As a general thing the milk that a mare gives during the winter is of rather an uncertain quality. The amount of milk a mare produces is not large, even on grass. In the winter when she is fed dry roughage and grain her production is very small. Of course this can be supplemented by the milk of a cow but the feeding of cow's milk to young foals is a matter which requires the most painstaking care and even then the results are not always satisfactory.

Still another advantage of rearing spring colts is the fact that weaning period comes when the mare is naturally going dry.

Horses, like other domestic animals, are highly artificial products. However, the greatest success is attained by raising them as nearly as possible in their natural state. Plenty of green grass, sunshine, exercise and the added milk production of the mare are the principal reasons why spring foals are best.

On the other hand, many farmers who advocate breeding for fall colts, claim that they can get better service out of their mares during the spring's work. On my own farm I have never been able to see much in this claim.

Grain harvesting are fully as hard work as plowing and cultivating. Any fair-minded man will agree that hauling a corn binder when the temperature is around 90 degrees is no suitable work for brood mares that are heavy with foal. No matter what season of the year, common sense must be exercised in the care and handling of work mares that are heavy with foal if one is to succeed in raising good colts.

It does not require a great deal of skill to raise a fall colt if good sense is exercised in the process. If the foal is shut up in a tight stall and compelled to stand on manure and filth it is sure to produce unsoundness at the very beginning.

If your mares foal in the fall plan to provide plenty of room for the foals to run about and pick bits of food here and there as they please. Give them a little cow's milk and encourage them to eat when they please. Allow them to run about even if the weather is quite cold and snappy.

Feed the mares plenty of milk-making foods such as carrots, mangles, ground oats and wheat bran. Good care and plenty of good food and exercise will bring the colt through to grass in fine shape.

Then, when he is turned out to pasture feed him a small ration of dry roughage until the grass becomes dry and hard. Grain may profitably be fed all summer but the hay feeding may be safely discontinued after the grass becomes hardened.

QUESTION OF DEEP PLOWING DISCUSSED

Some Very Striking Increases in Production Have Been Secured by Method.

(By E. J. KINNEY, Kentucky Experiment Station.)

During the last few years some very striking increases in production have been secured by plowing very deeply. On the strength of this a number of authorities are advocating deep plowing for the south. They advise from eight to as much as sixteen inches deep. It seems somewhat dangerous to the orthodox man to give such general advice as this until we have more experimental data to confirm its value. It is undoubtedly true that much deeper plowing than is now practiced in most sections of the south is desirable.

No cultivated crop can make its best growth in a seed bed less than seven inches deep. Where soils are so thin that plowing to this depth will bring up a large quantity of raw subsoil the depth should be attained by plowing a little deeper each time instead of taking the full depth all at once. In this way the subsoil will have a chance to become weathered and incorporated with the surface soil.

Some advocates of deep plowing propose to go to the desired depth all at once. We are not prepared to say whether they are right or wrong. However, the safest plan is to try it on a small scale at first. Deep plowing is expensive and must show decided benefits if it is to be profitable. Let several join and purchase a plow for deep tilling and give it a good trial under fair conditions. This will be safe and not expensive. It is worth trying, and the experience will be of value to other farmers.

It would be a good thing if farmers trying new methods would make a practice of reporting results, whether profitable or not. One difficulty in deciding the merits of any practice is that the successful ones report, while those who fail do not.

To Color Cement Blocks.

For red, use red oxide or mineral paint; to produce a brown shade add lamp black to the above. A good blue may be had by using ultramarine blue; for yellow, use yellow ocher. All cement is not of the same shade and quantities of the above coloring materials can only be ascertained by mixing a small amount and letting it get dry. It will always be some lighter after drying. Use as little of the coloring material as possible, as it weakens the strength of the cement.

PREVENT DISEASES OF GARDEN CROPS

Foundation of Success Next Year Will Depend Upon Pure Seed and Good Soil.

(By E. C. STAKMAN, Assistant in Pathology, Minnesota College of Agriculture.)

If the soil is made sanitary by disease control, a large annual loss in garden crops will be avoided when the seed is gathered from last year's crop is planted in the spring. It may be laid down as a principle that the foundation of success next year will depend upon the care which is given to keep the seed free from disease and to prevent the soil from becoming unsanitary.

One vegetable which is directly concerned is the potato. The tubers of the potato plant may be troubled with a number of diseases. In Minnesota, the potato scab and the internal brown rot must be contended with. Both diseases live in the soil and tubers, and it is necessary that the soil be free from the disease if next year's crop is to be a large one. If diseased seed or soil be used year after year, the yield of the sound potatoes becomes smaller and smaller.

Other common crops which are affected with disease in Minnesota are the bean, cabbage, onion and beet. Many of the diseases are so serious as to endanger the production of paying crops. Some of the seed may be diseased, and yet show no trace of disease. Bean anthracnose, bean bacteriosis and black rot of cabbage are among the diseases.

To prevent disease from obtaining a hold, spraying should be done wherever possible. If the soil is diseased, rotation of crops must be resorted to. Only by such attention can permanent success be assured.

Butter Producing States.

The ten leading butter producing states are, in order named: Wisconsin, Iowa, Minnesota, Pennsylvania, Michigan, Ohio, Illinois, New York, Texas and Indiana.

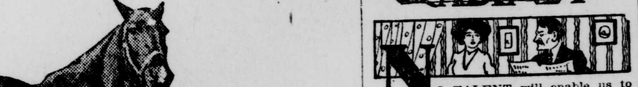

Increasing Worth of Milk.

Areate new milk as soon as possible after it is drawn, but do not do this in a stable. As good a way to do this as any is to pour the milk slowly from one pail to another for a few minutes. This drives off bad odors and saves the fine butter flavor.

Value of Orchards.

If you want to sell your farm, plant an orchard. If you take care of the orchard you will change your mind and won't want to sell your farm.

THE KITCHEN CABINET

NO TALENT will enable us to do any work without drudgery, but no childishness must tempt us to give it up because it is hard. No work can be well done by any one who is unwilling to sacrifice ease to its accomplishment.

WINTER DINNERS.

For those who prepare their own salt pork, and it is sweet and good-flavored, there is no dish that is more appetizing on a cold winter day than baked potatos with fried side pork. Make a gravy with some of the fat, adding flour and milk, and salt, if necessary.

A good fish dinner may be prepared with dry salt codfish. Shred a half pound, or more, according to the size of the family, and parboil it in water to cover. Fry three or four slices of fat salt pork cut in small cubes until brown, then add three sliced onions and twice as many sliced potatoes. Cover with water and cook until the vegetables are tender. Add a quart of milk and a dozen milk crackers that have been scalded with boiling water, the codfish and any seasoning needed. Serve as any soup.

Spanish Steak.—Take two pounds of round steak, cut in inch squares; on each square place a slice of breakfast bacon, roll and secure with a toothpick. Place meat rolls in a saucepan, cover with boiling water, add a chopped onion, three carrots sliced thin, a pint of tomatoes, one tablespoonful of salt, a half teaspoonful of pepper and cook one and a fourth hours. Serve hot.

Prune Salad.—This is a quite unusual, and very good. Soak a half pound of prunes over night, and then simmer until tender. When cool pit them and stuff with walnut meats. Shred a bunch of lettuce, make nests and on each place four or five stuffed prunes. Cover with mayonnaise, and serve.

Spanish Sauce.—This is a delicious sauce to use with cold roast beef, fried veal, lamb chops, in fact, with any kind of meat or fish: Put into a sauce pan two tablespoonfuls of butter, one of olive oil, a few dashes of salt, one onion, a clove of garlic, half a green or red pepper, all finely chopped. When this is all brown, add a pint of tomatoes, and simmer twenty minutes. Season with paprika, salt, a few drops of tabasco and a tablespoonful of Worcestershire sauce.

A GENEROUS supply of vegetables and fruits are of the greatest importance for the normal development of the body and of all its functions. —Sherman.

APPLE POSSIBILITIES.

Apples with the rich, red skin may be cooked to make a most beautiful dish. Core, but do not peel, cook gently in a little boiling water until the peel cracks and can be carefully removed, scraping out the inner red coloring and painting it back on the cheek of the apple. Pour around a thick sirup of sugar and water and simmer until the apple is cooked. Serve with sweetened whipped cream. These are called Blushing Apples.

Apple Trifle.—Place a thick layer of apple sauce in the bottom of a dish, add sugar and lemon rind to taste. Mix a pint of milk, the yolk of an egg. Cook until a smooth custard is formed; add a little sugar and nutmeg and chill and pour over the apple. Whip a cup of cream and serve.

Apples and Almonds.—Core and peel some good flavored apples which will cook tender without losing their shape. Cook in boiling water until tender enough to pierce with blanched, quartered almonds. Decorate thickly with the almonds until the apple resembles a porcupine. Place them in a baking dish and pour around them a thick sirup made with the water they were cooked in and sugar. Cook until soft but not broken, in the oven. Remove, sprinkle with powdered sugar and chill. Serve with whipped cream, sweetened.

A slice of a pretty red apple, unpeeled, to hold fruit salad, if a pretty way of adding variety to one's table.

Apples cored and fried in a little fat, sprinkled with sugar to give them a rich brown and used as a garnish around a platter of fried sausages, is another way of serving apples.

Apple sauce, a cupful used in a cake in place of egg, makes a very moist, nice spicy cake which will keep moist a long time.

Nellie Maxwell.

Asbestos.

Asbestos is a mineral of a fine fibrous character, the fibers being easily separated, elastic, flexible, and of a whitish-gray color. It is composed chiefly of silica, lime, magnesia, and oxyde of iron. The ancients converted it into a kind of cloth, in which they wrapped the bodies of their dead, while preparing them for the funeral pile; the cloth being indestructible by fire, enabled them to preserve the ashes. Asbestos is found more abundantly in Corsica than in any other locality.

His Case Exceptional.

"Who's the thin little man with the melancholy expression?" "That's Hummer, the poet, who wrote the beautiful verses with the refrain, 'Life is what you make it—you can make it glad.' He suffers from chronic dyspepsia."—Cleveland Plain Dealer.

Definition.

"What is a vegetarian?" asked little Tommy of his cynical uncle, who replied: "A vegetarian, my boy, is a man who has forgotten that all flesh is as grass."—New York Evening Post

RHEUMATIC ADVICE

Prominent Doctor's Best Prescription Easily Mixed at Home.

"From your druggist get one ounce of Toris compound (in original sealed package) and one ounce of syrup of Sarsaparilla compound. Take these two ingredients home and put them into a half pint of good whiskey. Shake the bottle and take a tablespoonful before each meal and at bedtime." This is said to be the quickest and best remedy known to the medical profession for rheumatism and backache. Good results come after the first dose. If your druggist does not have Toris compound in stock he will get it for you in a few hours from his wholesale house. Don't be influenced to take a patent medicine instead of this. Insist on having the genuine Toris compound in the original one-ounce, sealed, yellow package. Hundreds of the worst cases were cured here by this prescription last winter. Published by the Globe Pharmaceutical laboratories of Chicago.

HABIT.

"That howwid Miss Giggles really laughed at me lawst evening, doncher-know?"

"Well, never mind her—she often laughs at nothing."

ECZEMA FOR TEN YEARS

1809 Little Walsh St., Baltimore, Md.—"I was afflicted with eczema for about ten years, the most tormenting and agonizing. It was dry eczema, all itching. It was scratch, scratch, scratch and burn, burn, burn. By scratching I brought sores which scabbed. I tried all remedies which I knew or heard of; some gave me temporary relief, but none permanent cure. I couldn't sleep for scratching, after which there was burning. I saw the advertisement for free samples of Cuticura Soap and Cuticura Ointment and wrote for them. They did me good immediately and I then bought a box of Cuticura Ointment and a cake of Cuticura Soap. I was cured in two weeks." (Signed) George Wooden, Jan. 21, 1912.

Cuticura Soap and Ointment sold throughout the world. Sample of each free, with 32-p. Skin Book. Address post-card "Cuticura, Dept. L, Boston." Adv.

Her Great Love.

They had already celebrated the fact that the mistletoe hung in the hall, and now they were occupying not only one settee, but also the entire drawing room.

"Could you love me, darling," he murmured, as the thought of that "if I possessed only one coat in the wide, wide world?"

She looked up into his eyes as she framed her reply.

"I could," she said, "if I knew you had sacrificed the others to buy me a new dress!"

The Smile.

The girl who smiles too much makes as great a mistake as she who smiles too little, for though she may be only actuated by an honest desire to please, she lays herself open to the charge of insincerity. A smile can transform a plain face into loveliness, but it only does this when it is the outcome of some special emotion, and not a mere aimless parting of the lips. "Smiling to order," or on any and every occasion, is fatal to charm, and should be carefully avoided.

Whipped Child's Protest.

"Mamma whips you only when she has reason for it."

"I won't stand it any longer, papa! I'm not married to her."

It takes a genius to save money or write good poetry.

IDEA ANNOYED OLD GOLDE

He Knew From Experience That College Education by No Means Unfitted Boy for Work.

"Woodrow Wilson naturally believes in a college education for boys and girls alike," said a banker at the Princeton club in New York.

"Mr. Wilson, lunching with me here, once said in his quaint way that the old idea about a college education unfitting a lad for work had quite died out.

"We no longer hear," he declared, "stories like that of Gobsa Golde.

"When Gobsa Golde's son Scattergood," he explained, "desired to go to Princeton, he said to the old man:

"'Pater, is it true that boys who go to college are unfit for work afterward?'

"'Of course it ain't true!' snorted the old man indignantly. 'Why, I've got a Princeton graduate runnin' my freight elevator, two of my best coal heavers are Harvard A. B.'s and a Yale B. S. is my star truck driver.'"

New York Flat.

They who have ever flat-hunted in New York know well that, till a rental of $5,000 or $6,000 a year is reached, flats are incredibly cramped. Indeed, in a good neighborhood, even a five-thousand-dollar flat is apt to be a tiny one.

Discussing this phenomenon, Prof. Brander Matthews said at a luncheon:

"I remarked to a lady the other day:

"'Why, madam, your dog wags his tail up and down!'

"'Yes,' she replied, 'he has to. We are comparatively poor, you see, and Fido was raised in a five-thousand-dollar flat.'"

Fair to All.

"Recently," says a Richmond man, "I received an invitation to the marriage of a young colored couple formerly in my employ. I am quite sure that all persons similarly favored were left in little doubt as to the attitude of the couple. The invitation ran as follows:

"'You are invited to the marriage of Mr. Henry Clay Barker and Miss Josephine Mortimer Dixon at the house of the bride's mother. All who cannot come may send.'"—Lippincott's Magazine.

Demagogue.

William H. Maxwell, the superintendent of New York's schools, said the other day, apropos of certain demagogic proposals:

"But the best definition of a demagogue will always remain that of a little girl of seven, who said:

"'A demagogue is a vessel containing beer and other liquids.'"

Trouble for the Future.

First M. D. (from bedside of wealthy bachelor)—He is sleeping naturally—he will recover. Second M. D.—Yes, the worst is over. First M. D.—No, the worst is yet to come. Second M. D.—How is that? First M. D.—We have yet to break the news to his relatives.—Life.

Showing the Goods.

A novel mode of advertising for a wife has been adopted by an inhabitant of a provincial town in England. A photograph of the gentleman is placed in the window of a shop-keeper, and underneath is the following notice: "Wanted; a female companion to the above. Apply at this office."

DOES YOUR HEAD ACHE? Try Hicks' CAPUDINE. It's liquid—pleasant to take—effects immediate—good to prevent Sick Headaches and Nervous Headaches also. Your money back if not satisfied. 10c., 25c. and 50c. at medicine stores. Adv.

Since October 16.

"How's things in Boston?"

"I hear they have added a frieze of baseball bats to the public library."

ITCH Relieved in 30 Minutes. Woolford's Sanitary Lotion for all kinds of contagious itch. At Druggists. Adv.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle. Adv.

A man may worship the woman beautiful, but he usually marries the woman dutiful.

LIFE'S STRUGGLE WITH ILLNESS

Mrs. Stewart Tells How She Suffered from 16 to 45 years old—How Finally Cured.

Euphemia, Ohio.—"Because of total ignorance of how to care for myself when verging into womanhood, and from taking cold when going to school, I suffered from a displacement, and each month I had severe pains and nausea which always meant a lay-off from work for two to four days from the time I was 16 years old.

"I went to Kansas to live with my sister and while there a doctor told me of the Pinkham remedies but I did not use them then as my faith in patent medicines was limited. After my sister died I came home to Ohio to live and that has been my home for the last 18 years.

"The Change of Life came when I was 47 years old and about this time I saw my physical condition plainly described in one of your advertisements. Then I began using Lydia E. Pinkham's Vegetable Compound and I cannot tell you or any one the relief it gave me in the first three months. It put me right where I need not lay off every month and during the last 18 years I have not paid out two dollars to a doctor, and have been blest with excellent health for a woman of my age and I can thank Lydia E. Pinkham's Vegetable Compound for it.

"Since the Change of Life is over I have been a maternity nurse and being wholly self-supporting I cannot over estimate the value of good health. I have now earned a comfortable little home just by sewing and nursing since I was 52 years old. I have recommended the Compound to many with good results, as it is excellent to take before and after childbirth."—Miss EVELYN ADELIA STEWART, Euphemia, Ohio.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

Away with itching eczema torments!

RESINOL clears skin humors right away. You can't imagine the comfort the first use of it brings.

No matter how long you have been tortured and disfigured by itching, burning, raw or scaly skin diseases, just put a little of that soothing RESINOL on the sores and the suffering stops right there! Healing begins that very minute, and your skin gets well so quickly you feel ashamed of the money you threw away on useless, foolish treatments.

Prove it yourself, FREE

We send samples of Resinol with directions, free. Write today to Dept. 16K, Resinol Chemical Co., Baltimore. All druggists and general stores sell Resinol, 50c. (Large size $1.00.) Also Resinol Soap, 25 cents.

FREE TO ALL SUFFERERS

If you feel "out of sorts"—"run down" or "got the blues," suffer from kidney, bladder, nervous diseases, chronic weaknesses, ulcers, skin eruptions, piles, &c., write for my FREE book. It is the most instructive medical book ever written. It tells all about these diseases and the remarkable cures effected by the New French Remedy "THERAPION" No. 1, No. 2, No. 3 and you can decide for yourself if it is the remedy for your ailment. Don't send a cent. It's absolutely FREE. No "follow-up" circulars. Dr. LeClerc Med. Co., Haverstock Rd., Hampstead, London, Eng.

MOTHER GRAY'S SWEET POWDERS FOR CHILDREN

Have You a Disordered Stomach and Liver?

Do you start the day feeling that the whole world is against you? You cannot hope to "make good" under these circumstances. Nobody can. You must have a clear brain and every organ in perfect trim to do justice to yourself.

Dr. Pierce's Golden Medical Discovery

Will Bring Quick Relief

Dr. R. V. Pierce found years ago that a glyceric extract of Golden Seal and Oregon grape roots, queen's root and bloodroot with black cherry bark, would aid in the assimilation of the food in the stomach, correct liver ills and in nature's own way enrich the blood, tone the entire system and consequently help in the restoration of perfect health. Many who have used Dr. Pierce's Golden Medical Discovery testify that they have been restored to health when suffering from stomach and liver ills. Let this famous old medicine start today to lead you to health and strength.

Now—if you prefer—you can obtain Dr. Pierce's Favorite Prescription tablets of your druggist at $1 per box, also in 50c size or send 50 one-cent stamps to R. V. Pierce, Buffalo, for a trial box.

You can learn all about hygiene, anatomy, medicine, etc., from the People's Common Sense Medical Adviser, by Dr. R. V. Pierce, a newly revised, up-to-date edition of which is now offered, in cloth covers, post-paid, for 31 cents in one-cent stamps, to cover cost of wrapping and mailing only. Address, Dr. Pierce's Invalids Hotel, Buffalo, N. Y.

Don't be poisoned by sluggish bowels. Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar coated, tiny granules.

The Best Physicians Gave Him Up

"I was attacked with a severe nervous disease, which was caused by a disordered stomach and liver," writes MR. JAS. D. LIVELY, of Washburn, Tenn., Route 2, Box 32. "All my friends thought I would die and the best physicians gave me up. I was advised to try Dr. Pierce's Golden Medical Discovery, and derived much benefit from same. My case had run so long, it had become so chronic, that nothing would effect a permanent cure, but Dr. Pierce's medicine has done much for me, and I highly recommend it. I heartily advise its use as a spring tonic and further advise ailing people to take Dr. Pierce's medicines before their diseases have run so long that there is no chance to be cured."
