TO WOMEN

THOSE HEADACHES

If accompanied with backache, dragging-down pain, do not have to be. Nature never intended that women should suffer in this manner.

Dr. Pierce's
FAVORITE PRESCRIPTION

For forty years has proved wonderfully efficient as a remedy for woman's peculiar weaknesses and derangements.

Your Druggist has it in Stock

RESINOL HEALS ITCHING SKINS

And Clears Unsightly Complexions.

Resinol Ointment, with Resinol Soap, stops itching instantly, quickly and easily heals the most distressing cases of eczema, rash, ringworm, tetter or other tormenting skin or scalp eruptions, and clears away pimples, blackheads, redness, roughness, and dandruff, when other treatments have proven only a waste of time and money.

But we do not ask you to accept our unsupported word for it. You can send today for a generous trial of Resinol Soap and Resinol Ointment, and test them to your own complete satisfaction, at no cost whatever, while thousands who have been cured say, "What Resinol did for us it will do for you." Physicians have prescribed Resinol for eighteen years and every druggist in the country sells Resinol Soap (25 cts.) and Resinol Ointment (in opal jars, 50 cts. and $1). For free samples of each, with full directions for use, write to Dept. 9-K, Resinol, Baltimore, Md.

HAS A PETRIFIED WATERFALL

One of the Natural Wonders of the World That Is Located in Country of Algeria.

With all the beauty of a cataract of living water, there is in Algeria a remarkable petrified waterfall which recently has been engaging the attention of scietnists. This is the Hammam-Meskhutin, which means "The bath of the damned," and is located 62 miles from Constantine. This solidified cascade is the production of calcareous deposits from sulphurous and ferruginous mineral springs, issuing from the depths of the earth at a temperature of 95 degrees centigrade.

"The bath of the damned," even from a near viewpoint, looks for all the world like a great wall of water dashing into a swirling pool at its foot, yet its gleaming, graceful curves and the apparently swirling eddies at its base are as fixed and immovable as if carved from the face of a granite cliff.

Many centuries have, of course, gone to the making of the deposits, and the springs were well known to the ancient Romans. The name Hammam-Meskhutin was given to the stone cataract in an allusion to a legend that the waterfall was petrified by Allah, punishing the impiety of unbelievers by turning all the members of the tribe into stone. At night, so the story runs, its stone dwellers of the remote ages are freed from their strange fetters, come to life and resume their normal shapes.

Cook and the Cuckoo.

Mistress—Bridget, what ails the cuckoo clock? I haven't heard it today.

Bridget—Well, mum, there do be a strange cat around the kitchen an' likely the poor bur-rd's afeared to come out.

Most Intensive.

"Do you believe in intensive gardening, Mrs. Hoerake?" asked the visitor.

"Well, rather," said Mrs. Hoerake. "I spent all last winter raising one geranium in a soap box."—Harper's Weekly.

Admiring Solicitude.

"What do you think of our new battleship?" asked the naval expert.

"Wonderful," replied the plain business man; "only it does seem a shame to risk anything so handsome and expensive in a fight."

Exceptions.

He—Must stolen goods always be restored?

She—Certainly.

He—All right. Will you now take back the kiss I stole last night?

Post
Toasties

Thin, crisp bits of white Indian Corn, cooked to perfection and toasted to a delicate brown without the touch of human hand.

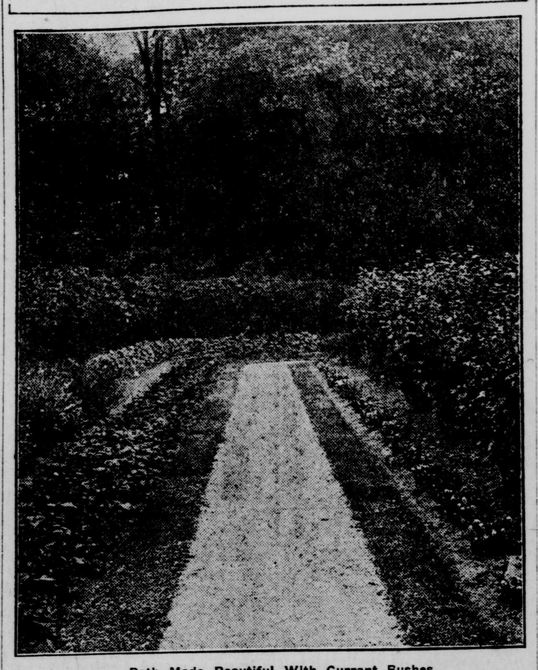

You get them in the sealed package

Ready to Eat

A dish of Post Toasties for breakfast and lunch, with thick cream or rich fruit juice, is a dish that epicures might chortle over.

Nourishing, economical, delicious, "more-ish."

MAKING THE HOME GROUNDS BEAUTIFUL

Path Made Beautiful With Currant Bushes.

(By BESSIE L. PUTNAM.)

Peony clumps should not be allowed to grow too large or remain too long undisturbed, else they will produce fewer flowers which will be small and poorly colored. Therefore if not attended to before this choose some warm, bright day towards the end of this month and divide the clumps. Of course this means when the frost is out of the soil and it is in good working order. This condition obtains in many sections of the country at this time.

What has been written above in regard to the peony applies to most of our herbaceous and perennial plants—that is, they do not like to be disturbed after they have made much growth, but as they are about to start growing in the spring is the time to divide them.

Get your beds and borders in shape so that when you receive dormant plants from the seedsman or nurseryman you can put them in their permanent home, and not have to heel them in to wait until you get their beds ready for them.

Guard against roses, shrubs and the like that have been placed in cold storage to retard growth. They are not in strong growing condition when you receive them late in spring, and will not withstand the usual heat of May and June. They must make their early growth under natural conditions and not a month after their usual time.

Above all, don't crowd. This applies to the window garden where the amateur wishes to grow a great number of plants, forgetting that a few well-grown specimens would give more pleasure than a lot of shaggy failures. It also refers to the lawn that is often cut up into flower beds of divers shapes and sizes that spoil all the beauty of the home place, and this holds true also where flowers are crowded in bed and border.

At this season of the year, when the days lengthen and the sun grows warmer, plants in the window begin to grow and blossom. Now is the time to make cuttings of plants wanted for summer decoration. Procure a wooden flat or an old iron pan, or dish that will hold water and fill it with sand. Insert cuttings, or rather "strike" them fairly and squarely into the sand. Do not move the cuttings sideways, or in any way have air spaces about them. Do not place in direct sunlight; a thinly curtained south window is the best. Keep them moist.

Include in your list of new plants a climbing rose or two. They are lovely while they bloom just after the June rose has faded. Prepare the soil well, digging it deeply and enriching it generously. Of course the soil must be well drained.

Much of the success of seedlings depends upon the soil they are started in. We should endeavor to grow seeds in light, rich soil so that the tiny seedling may acquire a stock of vitality which will give it a fair start and fighting chance in life to enable it to withstand the trials of its later existence.

ESSENTIALS IN ROSE PLANTING

First Point of Importance Is Soil Preparation—Manure Should Be Added.

(By W. R. GILBERT.)

The planting of roses can hardly be undertaken at a better period of the year than now.

The first question is the soil, and here the rose is really very accommodating. There are few soils in which Roses will not grow. The ideal rose soil is a yellow clayey loam of a silky texture. Heavy clay soils are improved by the addition of road grit, leaf mold, old potting soil, burnt earth, and horse manure. Light soils should have pig or cow manure added, also clay or heavy loam. The latter should not be added in large lumps, but in a broken-down state

In preparing the soil dig or trench two spits (or spades) deep, incorporating manure with the lower spit. None should be mixed with the upper soil, as the roots do not want to be in contact with the manure when planted. A mulch can be added on top when planting is finished. When single trees are being planted, as, say, standards in round beds on the lawn edge, a site four feet across should be prepared as above. Where quite unsuitable soil exists, excavate it and replace with heavy loamy material.

The actual operation of planting consists of making a hole in the prepared ground 18 inches square, and about 6 inches deep. Carefully spread out the rose roots, covering them quickly with a little fine soil, and spread the upper ones thereon. Do not crowd the roots together for want of space. Make the hole of ample size to take the roots laid out flat. Give the stem a gentle shake to settle the soil between the roots, then cover with more soil, and gently tread, adding more soil to make all level and treading down again. Stakes for standards should be inserted before planting the rose; this avoids possible damage to roots by inserting after planting. With dwarf roses it is best to plant deep enough to bury the part where budding or grafting was done—the union, as it is called—for roots will then be produced later, and the plant becomes "own rooted." Where the stock stem is very long plant it on the slope; this is better than too deep planting. Dwarf roses should be planted about 18 inches apart, standards three feet, and climbers four feet of more.

If a rose tree is dry when received from the nursery give it two or three hours' soaking in a pail of tepid water. If planting cannot be done immediately, then open a trench, lay the roots therein, with the stems lying on the ground, and cover with soil; leave thus till a convenient time arrives. Do not plant in frosty weather. Avoid exposure to drying winds while planting.

Hay Should Not Sunburn.

The feeding value, as well as the market value, and palatability of hay, is lowered by being sunburned. The feeding value is probably hurt most by the loss of leaves. Sunburned clover and alfalfa lose a large part of the leaves in handling, and this is the best part of the crop.

When the sun is shining very brightly the alfalfa or grass should not be left in the swath long. A large part of the curing should be done in the windrow and the cock. Most of the hay is then shaded and so the damaging effect of intense sunshine is reduced to the exposed portion. And a stock cover will still further lessen the injury from the sun as well as from rain.

Mixed Stock Farming.

As a rule, on the average farm at least, it will be better to have a few cattle, some horses, a score of swine and small flock of sheep, than to have the same amount of money invested in either cattle or hogs alone. There is greater safety in such distribution of capital, inasmuch as the different kinds of stock subsist somewhat on different kinds of food, and if on account of drouth or for some other reason one kind of food fails, others may be made available to carry through in good condition at least one or more of the classes of animals kept.

Roller Is Great Aid.

The use of the roller is of very great aid in securing a catch of clover by increasing the rate at which moisture is brought to the seed from the subsoil.

Keep Strict Account.

Every poultryman should know how much it cost to produce each dozen eggs at various seasons of the year, not what it costs the other fellow, but what it actually cost him. No one should take the figures published in poultry journals or books; conditions, locations, seasons, and methods change such figures materially, hence they are not to be used in figuring out the actual cost. He should know the cost of raising a chick from the day it was hatched until maturity, the pullets to laying age, and the cockerels to marketable age. Not alone must the feed be strictly accounted for, but the cost of labor and equipment must be added to the feed bills.

Friendly With Sheep.

Time spent in company of the sheep will pay and success will crown your labors.

Appearances Tell.

When you see how people live, you know how they farm.

COMMERCIAL

Weekly Review of Trade and Market Reports.

Bradstreet's says:

"Better weather, excellent Winter Wheat crop reports, renewed activity by farmers, resumption of operations in the flooded districts of the Central West and a more reassuring outlook in the lower Mississippi Valley are the leading favorable features of the week. Over against this must be set the increased prominence of tariff discussion, particularly as regards the textile industries in the Eastern States of the country, and the continuance of a degree of stringency in money, despite more evidences of easing, both at home and abroad.

"On balance, the situation presents a fairly favorable position, because the displacement of cold, wet weather by sunshine and warmth has made for more active retail trade at most points.

"Business failures for the week were 290, which compares with 260 in the like week of 1912. There were 21 failures in Canada.

"Wheat, including flour, exports from the United States and Canada for the week aggregate 3,568,592 bushels, against 2,843,789 bushels this week last year."

REALLY A SOUND INVESTMENT

Sanatorium Where the Tuberculosis May Be Cured Is Worth Much to Any State or City.

Dr. H. L. Barnes, superintendent of the Rhode Island State sanatorium, has recently demonstrated by some interesting studies of patients discharged as "apparently cured" from that institution, that a sanatorium is a sound investment for any state or city. The gross earnings of 170 ex-patients obtained in 1911 amounted to $102,752, and those of 211 cases in 1912 to $112,021. By applying the same average earning to all ex-patients of the sanatorium living in 1911 and 1912, Dr. Barnes concludes that their income in these two years was $551,000. This sum is more than three times the cost of maintenance of the sanatorium including interest at 4 per cent. on the original investment and depreciation charges. Dr. Barnes concludes, however, "While institutions for the cure of tuberclosis are good investments, there is good reason for thinking that institutions for the isolation of far advanced cases would be still better investments."

ITCHING, BURNING ECZEMA

317 S. Wolfe St., Baltimore, Md.—"My trouble was caused by a severe sprained ankle; the bruised blood not having been drawn off caused a skin affection which the doctors pronounced eczema. It first started with an itching and burning, with very dry skin. Constant scratching, especially during the night finally broke the skin, and during the day the watery fluid that came from it would dry and peel off like fish scales. My stocking would stick to my ankle as if it were glued. I also had it on my fingers.

"I was treated without getting any benefit. I began using Cuticura Soap and Ointment as directed and then applied the Cuticura Ointment and bound the ankle with a soft bandage, after bathing it with Cuticura Soap. They cured me in about two months." (Signed) T. W. Henderson, Dec. 2, '11.

Cuticura Soap and Ointment sold throughout the world. Sample of each free, with 32-p. Skin Book. Address post-card "Cuticura, Dept. L, Boston." Adv.

Nothing to Fear.

"George, dear," said the girl, "did you ever drink anything?"

"Yes, occasionally," George reluctantly admitted.

"But, dear," she went on anxiously, "what do you suppose papa would say if he should discover that the future husband of his only daughter drank?"

"He discovered it this morning."

"Oh, George, and what did he say?"

"He said: 'Well, George, my boy, I don't care if I do.'"

Bisulphide for Ants.

Where ants infest lawns or other equally available areas, punch holes about a foot deep with a stick at three or four points near the center of the nest; pour into each about an ounce of the bisulphide of carbon and close the openings with the foot. The vapor will get into and follow the galleries and kill the ants. A second treatment will rarely be necessary.

FAR BETTER THAN QUININE.
Elixir Babek cures malaria where quinine fails, and it can be taken with impunity by old and young.
"Having suffered from Malarious Fever for several months, getting no relief from quinine and being completely broken down in health, 'Elixir Babek' effected a permanent cure."—William F. Marr. **Elixir Babek** 50 cents, all druggists or by Parcels Post prepaid from Kloczewski & Co., Washington, D. C.

Her Weapon Gone.

Hewitt—I hear that your wife has lost her voice.

Jewett—Yes; she is a non-combatant now.

For SUMMER HEADACHES
Hicks' CAPUDINE is the best remedy—no matter what causes them—whether from the heat, sitting in draughts, feverish condition, etc. 10c., 25c and 50c per bottle at medicine stores. Adv.

The only people who have no regret for anything they ever said are those who have never said anything of importance.

Temptation may come to the woman who sits down and waits, but a man usually meets it half way.

It's better to deliver the goods than to be caught with them on you.

Women of Middle Age

From 40 to 50 Woman's Critical Period.

Such warning symptoms as sense of suffocation, hot flashes, severe headaches, melancholia, dread of impending evil, palpitation of the heart, irregularity, constipation and dizziness are promptly treated by intelligent women who are approaching the period of life.

This is the most critical period of woman's life and she who neglects the care of her health at this time invites incurable disease and pain. Why not be guided by the experience of others and take Lydia E. Pinkham's Vegetable Compound? It is an indisputable fact that this grand old remedy has helped thousands of women to pass through this trying period with comfort and safety. Thousands of genuine and honest testimonials support this fact.

From Mrs. HENRY HEAVILIN, Cadiz, Ohio.

Fort Worth, Texas.—"I have taken Lydia E. Pinkham's Vegetable Compound and derived great benefit from its use. It carried me safely through the Change of Life when I was in bad health. I had that all gone feeling most of the time, and headache constantly, I was very nervous and the hot flashes were very bad. I had tried other remedies and doctors, but did not improve until I began taking Lydia E. Pinkham's Vegetable Compound. It has now been sometime since I took the Compound and I have had no return of my old complaints. I always praise your remedies to weak women."—Mrs. Henry Heavilin, R. F. D. No. 5, Cadiz, Ohio.

From Mrs. EDWARD B. HILBERT, Fleetwood, Pa.

Fleetwood, Pa.—"During the Change of Life I was hardly able to be around at all. I always had a headache and I was so dizzy and nervous that I had no rest at night. The flashes of heat were so bad sometimes that I did not know what to do.

"One day a friend advised me to take Lydia E. Pinkham's Vegetable Compound and it made me a strong, well woman. I am very thankful that I followed my friend's advice, and I shall recommend it as long as I live. Before I took the Compound I was always sickly and now I have not had medicine from a doctor for years. You may publish my letter."—Mrs. Edward B. Hilbert, Fleetwood, Pa.

From Mrs. F. P. MULLENDORE, Munford, Ala.

Munford, Ala.—"I was so weak and nervous while passing through the Change of Life that I could hardly live. My husband had to nail rubber on all the gates for I could not stand to have a gate slam.

"I also had backache and a fullness in my stomach. I noticed that Lydia E. Pinkham's Vegetable Compound was advertised for such cases and I sent and got a bottle. It did me so much good that I kept on taking it and found it to be all you claim. I recommend it to all women afflicted as I was."—Mrs. F. P. Mullendore, Munford, Ala.
