"IS YOUR BABY CONSTIPATED?"
Baby's bowels must be regulated properly and by a medicine that is safe.
Dr. Fahrney's Teething Syrup
Has proved itself—mothers know it and babies like it. Used in 100,000 American homes. Prevents Cholera Infantum. Best for bowel complaints. Cures Colic in ten minutes. 25 cents at druggists. Trial bottle free if you mention this paper.
Made only by DRS. D. FAHRNEY & SON, HAGERSTOWN, MD.

INTERNATIONAL JOINT BOUNDARY COMMISSION

Photograph of the International Joint Boundary Commission, which was organized last January and consists of three Americans and three Canadians. Standing, left to right: H. A. Powell, C. A. Magrath and George Turner. Sitting, left to right: F. S. Streeter, James A. Tawney and T. C. Casgrain.

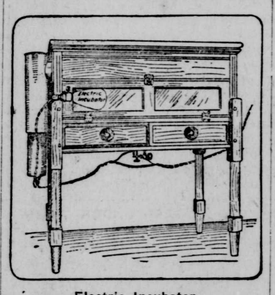

USE OF ELECTRICITY AND VOWED TO TELL TRUTH

Veteran Inventor of California Has New Device.

"Artificial Hen" Promises to Be Success When Power Is Abundant and Cheap—Can Be Attached to Any Incubator.

An electrical incubator has been developed by C. L. Byce of Petaluma, Cal., a veteran maker of incubators, says the Popular Electricity. The electric "artificial hen" is perhaps the most advanced product of his inventive genius and promises to be a commercial success when electrical power is abundant and cheap in the districts devoted to poultry raising.

The inventor describes his device as follows: "For several years in our

Electric Incubator.

experimental rooms and at poultry shows and fairs we have used the electric current for hatching and brooding and many dealers have made use of a single globe in their show windows to keep the chicks warm when exhibited there. Our company was the first to use electricity for artificial brooding and hatching, and as far back as 1906 we hatched chicks in this way at the California state fair.

"The regulator controls the flow of the current so nicely that the temperature is almost perfectly even. Of course the device is practical only in places where a twenty-four hour service is maintained by the power companies and where the price of the current is not excessive. To use electricity for our incubators it is not necessary to purchase special complete outfits. The device is simple and can be attached to any of our incubators at a trifling expense. It is connected by simply screwing an ordinary electric plug into the lamp socket of any standard electric light fixture and turning on the key."

POSSIBLE REMEDY FOR ROUP

Disease Is Difficult to Cure and Affected Birds Should Be Removed to Roomy Coop.

Roup may be known from an offensive discharge from the nostrils and swelling below the eyes. The swelling in some cases entirely closes the eyes. This disease is known as roup, and is difficult to cure. Remove all the healthy fowls. Put the affected ones in a warm, dry shed or roomy coop.

Wash out the nostrils and mouth with warm water, using a small syringe to do so; then put a piece of camphor the size of a hickory nut into one quart of boiling water and hold the fowl's head over it for ten minutes; repeat three times a day. Also give one teaspoonful of cod liver oil at a dose twice a day. If the swelling closes the eyes, open them and syringe out the yellow matter and wash with warm water into which a drop of carbolic acid has been thoroughly stirred.

Fowls that are badly diseased should be killed and buried. Clean out the house, dust with fresh air-slaked lime, fork up the yard and spread over it a thick coat of fresh air-slacked lime. Add a few drops of bromide of potassium to the drinking water. Give no other water. This is the best method to use.

We played and we played till almost daylight.
I won all Jones' money—left him in a plight.
We thought of our wives and were filled with dismay,
So Jones and I homeward then wended our way.

COULDN'T BLAME HER.

A woman, visiting a butcher shop, called for a piece of beef. The butcher, in weighing it, had his hand on the scales. The lady, picking up a sharp knife and handing it to the butcher, remarked: "I haven't any use for it, but you may cut it off and I'll take it along, anyhow."

"Cut it off? Cut what off?" asked the butcher.

"Your hand; you weighed it."—National Monthly.

Best Poultry Tonics.

Fresh air, sunshine and exercise are the best poultry tonics. But fresh air does not mean drafts in the houses, nor does sunshine call for exposure to hot suns during the summer. The houses should be so constructed that fresh air can constantly be present to drive out bad odors and purify the atmosphere.

The sunshine should be able to reach every corner to destroy any germs that might be lurking in dampness. The fowls should exercise by scratching that a good circulation of the blood may be stimulated. The above are the three best medicines in the poultry doctor's are.

Fighting Perennial Pest.

The dandelion is a perennial pest, and worse some seasons than others. There are two methods of getting rid of it. One is to take a sharp knife and cut the plants off just below the crown. The other—and this method is recommended for larger areas—is to spray the young and tender plants with a strong solution of iron sulphate or green vitriol. This puts the plants out of commission, but does not seriously injure the grass.

Fertilize Properly.

Farmers are paying out millions of dollars each year for fertilizers. Probably the greater part of this money is well spent, but it is possible that it might be better spent by a more careful selection of the goods used, by adapting the fertilizer to the crops and soil, and by buying on the basis of the plant food they contain, rather than by seeking goods that sell at a low price.

Renew Rhubarb Bed.

If the rhubarb bed is several years old this month will be a good time to renew it. Dig up part of the roots, split them and reset. Next spring there will be a healthy growth of large shoots.

NOT THE SAME.

"Does that baby strike you as uncanny?"

"Well, I've noticed he's inclined to be creepy."

A WOMAN'S WORK
sometimes reduces her strength to the depths of weakness—her devotion to household cares prevents sufficient rest and recreation. Thousands of women in this condition find Scott's Emulsion exactly what they need; it is predigested body-food so medically perfected that every drop yields direct returns in strengthening the organs and tissues and in making healthy, life-sustaining blood. Scott's Emulsion is devoid of alcohol or any harmful drugs, and overcomes tiredness and nervousness in a marvelous way.

HALF-MAST HIGH.

One of the most universal of customs when a prominent man dies is the hoisting of flags on public buildings only part of the way up the flag-poles. This is known at "half-mast;" but how many know what the custom means or how it originated?

To begin with this practice was a military one. Ever since flags were used in war it has been the custom to have the flag of the superior or conquering nation above that of the inferior or vanquished. When an army found itself hopelessly beaten it hauled its flag down far enough for the flag of the victors to be placed above it on the same pole. This was a token, not only of submission, but of respect. In like manner when a famous soldier died, flags were lowered not only to indicate respect to his memory, but to show that he had succumbed to the great conqueror of all, death—for whose flag space was metaphorically left at the top of the flag-staff.

GOING TOO FAR.

"That militant suffragette insists on going without food."

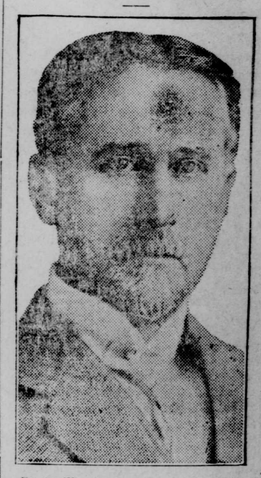

"Yes," replied the bystander. "Her example is very unfortunate. Some of the monopolies are doing a great deal to persuade us to eat less. But I don't see what's to be gained by teaching the public to go without food altogether."

CUTTING.

"Young man, we need brains in our business."

"I know you do. That is why I'm looking for a job here."

DR. C. P. NEILL

Dr. Neill, who has been commissioner of labor, was appointed commissioner of labor statistics by President Wilson.

MEAN.

"I understand she sings?"

"Yes, but in spite of that she retains her popularity."—Detroit Free Press.

Lease Swellings Alone.

The large swellings that occasionally appear in front of the knees of cattle, particularly old cows, is properly known as hygroma. It is usually filled with a watery or straw-colored fluid. Opening or other surgical operation is not advisable, except by a competent veterinarian. These swellings usually do no harm, and most of the cases are most wisely left alone.

Piano Protection For YOU

You can't tell the durable qualities of a piano by its looks or tone unless you are an expert.
Your protection when you buy a piano is the NAME and GUARANTEE.
Beware of the cheap piano with the unfamiliar name. Any piano may look and sound all right at first, but, how long will it last? A cheap piano is dear at any price. It is made to SELL, while a piano of a reputable manufacturer is made to LAST for a life-time, and is guaranteed with a REAL guarantee.
For music-lovers of this community who do not find it convenient to come to Baltimore, the Sanders and Stayman Company, of Baltimore, is holding a

Special

Demonstration and Sale of

World-Famous PIANOS

"PIANOLA" Player-Pianos

VICTOR-VICTROLAS and Columbia Grafanolas

—AT—

A. W. SHORT & SONS

MAIN STREET. DENTON

Whether you are interested in buying or not—you are most cordially invited.
Representatives from our store will introduce to you the standard instruments of the world.
The STEINWAY Piano which has been awarded eight medals by the crowned heads of Europe.
