Steamboat Lines Agree.

The controversy which has been going on between the Baltimore, Chesapeake and Atlantic Railway and the Eastern Shore Development Company regarding the connections between the boats of the latter company and the trains of the former, has been about settled on an equitable basis. The plan settled on, according to reports from Washington where the case was being heard before the Interstate Commerce Commission, is about as follows:

"Train can at any time wait five minutes. If the agent of the Eastern Shore Development Company requests the agent of the Baltimore, Chesapeake and Atlantic at Claiborne to wait an additional 10 minutes and the Baltimore Chesapeake and Atlantic agent can see our boat and believes it can dock in ten minutes, he has authority to hold the train, under condition that this does pot occur over once a month."

Hicks' Forecast For August.

With a regular storm period covering the 2nd to the 7th, having its centre on the 4th, we may expect all the phenomena usually attending such periods at this season of the year. On and touching the 3rd 4th and 5th dangerous storms are probable.

A reactionary storm period is central on the 10th, 11th and 12th being at the center of the Mercury period.

A storm period is central with the full Moon on the 16th, covering the 14th to 20th. Heat, with rain, hail and thunder will reach a maximum over central to northwestern states on and touching the 19th.

A reactionary storm period will center on and touching the 22nd and 23rd, leaving but little intermission between this and the preceding period. The regular change to rising barometer and cooler will succeed these storms.

A regular storm period extends from the 25th to the 30th, has its center on the 27th. We will name the 27th, 28th and 29th as dates on which disturbances will culminate. There are 3 eclipses from August 31st to September 29th—a partial eclipse of the Sun on August 31st, a total eclipse of the Moon on September 15th, and a partial eclipse of the Sun again on September 29.

Many Denton People Have Kidney Trouble And Do Not Know It?

"For twenty-five years I suffered from pains in my back, dizzy spells and other symptoms of kidney complaint. An Agriculture Car.

The Pennsylvania Railroad Co., has fitted out an agriculture car and a dairy car to promote scientific farm management among the farms. The agriculture car will be a moving college and farming exhibit. The exhibit contains some 580 perfect samples of vegetables, grains, hay, tobacco, cotton and etc., grown it the territory traversed by Railroad. Modern dairy methods, building and machinery are shown in the dairy exhibit car, in charge of the milk traffic department. The car contains, models of a modern dairy barn soil and water tower, together with a full section of a cow stable with feed car and litter carrier. Both cars will carry an assortment of literature on farming and dairy problems, which will be distributed to visitors. In the end of each car is an office, where farmers will have the privilege of private consultation with representatives of the company's agricultural and dairy departments. The cars will visit the agricultural region along the Pennsylvania Railroad and stimulate an interest in advanced methods. This plan has been tried with great success by the progressive western railroads.

He Wants To Know.

Of course we're only jay hawkers
And must struggle and toil for our toll,
While Bryan can follow Chautauquas
In order to fatten his roll,
But still we must labor and suffer,
And there's something deucedly queer,
If Bryan can't live on a thousand a month,
Can we on nine hundred a year?

And thus in the days that are pleasant,
And thus in the time of our ills,
To the rich and the poor, the physician
Shows up with the same kind of bills.
While the cost of "grape juice" may be soaring
We all pay the same price for beer!
If Bryan can't live on a thousand a month,
Can we on nine hundred a year?
