Genasco

THE TRINIDAD-LAKE-ASPHALT
Ready Roofing

Why not lay roofing that you don't have to repair and renew every little while?

You *know* Trinidad Lake asphalt is "Nature's everlasting waterproofer", and gives life and resisting power to roofing.

Genasco is made of Trinidad Lake asphalt; and applied with the Kant-leak Kleet it gives years of faithful service. Costs no more to get Genasco and be on the safe side—it actually costs less in the long run.

We are ready to fill your order *now*.

THE THRICE-A-WEEK EDITION OF THE NEW YORK WORLD
IN 1919 and 1920

Practically a Daily at the Price of a Weekly. No other Newspaper in the world gives so much at so low a price.

The forces are already lining up for the Presidential campaign of 1920. The Thrice-a-Week World which is the greatest example of tabloid journalism in America will give you all the news of it. It will keep you as thoroughly informed as a daily at five or six times the price. Besides, the news from Europe for a long time to come will be of overwhelming interest, and we are deeply and vitally concerned in it. The Thrice-a-Week World will furnish you an accurate and comprehensive report of everything that happens.

THE THRICE-A-WEEK WORLD'S regular subscription price is only $1.00 per year, and this pays for 156 papers. We offer this unequalled newspaper and

THE AMERICAN UNION

together for one year for $1.75.

The regular subscription price of the two papers is $2.00.

"Meats in Storage"

Every working day of the year 75,000,000 pounds of meat are required to supply home and export needs—and only 10 per cent of this is exported.

These facts must be kept in mind when considering the U. S. Bureau of Markets report that on June 1, 1919, there were 1,348,000,000 pounds of meats in cold storage. If the meat in storage was placed on the market it would only be 20 days' supply.

This meat is not artificially withheld from trade channels to maintain or advance prices.

Meats in storage consist of—

65 per cent (approximate) hams, bacon, etc., in process of curing. It takes 30 to 90 days in pickle or salt to complete the process.

10 per cent is frozen pork that is to be cured later in the year.

6 per cent is lard. This is only four-fifths of a pound per capita, and much of it will have to go to supply European needs.

19 per cent is frozen beef and lamb, part of which is owned by the Government and was intended chiefly for over-seas shipment. If this were all diverted to domestic trade channels, it would be only 1½ lbs. per capita—a 3 days' supply.

100%

From this it will be seen that "meats in storage" represent merely unfinished goods in process of curing and the working supply necessary to assure the consumer a steady flow of finished product.

SELECTING GRAIN FOR THE FAIR

A sample of big, clean, plump kernels will always win more blue ribbons than an inferior one. Successful exhibitors often examine every kernel in their exhibit. The raising of good grain is being encouraged locally by offer of liberal prizes for farm grains at the New Timonium Fair, Timonium, Md., Sept. 1 to 6, inclusive.

GRATEFUL FOR ONE THING

Soldier Might Have Seen Good in Other Changes, but Not in That Last Greeting.

The man who had volunteered his life for his country came back from the western front. His experience had completely changed him. He carried within the sense of an entirely new world.

He went to Washington. He heard the speech of a senator. He saw the lobbyists consorting together. He wanted something, and he waited for it in vain.

"It is the same old crowd," he said.

He met the girl he loved—with another fellow. She told him that she still loved him and that the only reason she was with the other fellow was because she was lonesome for him.

"It's the same old girl," he said.

He traveled on a railroad. The guard was surly. The train was late. The food was poor. The rate was nearly double.

"It's the same old transportation—only worse," he said.

He reached his home town. He was met by a delegation and a band. Within two weeks four of his neighbors had gotten the best of him, another borrowed half his pay, and at the end of a month when he walked down Main street no one knew him because he was broke.

He went back home. There was a woman waiting for him on the doorstep.

"My baby hero!" she said.

And putting his arms around her, he replied:

"Same old mother—thank God!"—Thomas L. Masson in New York Evening Post.

GOT THE WRONG IMPRESSION

Grandfather Was Convinced His Pet Had Joined the Church, and Rejoiced Accordingly.

She is a newspaper woman and her grandfather formerly was a local preacher of circuit fame. He is very much interested in her religious state and worries because she does not attend church every Sunday night.

The other evening she went to a church to write a story about the new organ, the purchase of which had been made possible by her stories in the paper. So she took grandfather with her, knowing that while he could not hear much of the services, still he would enjoy being in the church.

At the close of the sermon came a surprise for the newspaper woman. The minister announced: "Miss S., who wrote the stories which brought the money for our organ, is with us tonight and I would like for her to come up in front so that all of us may see her and shake her hand."

Grandfather saw his grandchild advance to the front of the church and also saw the people begin shaking her hand. He had not heard a word the minister had said, but still he had the memory of camp meeting days to inform him of what was happening. They convinced him that his granddaughter had joined the church and with handshaking the people were welcoming her into the fold. So he did his part. He rose to his feet and began shouting at the top of his voice. —Indianapolis News.

Power From Ocean Tides.

So far such little power as has been abstracted from ocean tides has been insignificant. The rise and fall of the tides is not very great, even though it does amount to 70 feet in some places, and hence if any considerable power is to be obtained basins of large area must be used.

By damming the bay at Mont St. Michel in France, where the tide rises about 45 feet, it is estimated that enough power may be obtained to operate half of the industries of France. A French engineer with vast powers of imagination has conceived the idea of building dikes across the channel and across the Thames estuary to form two large tidal basins which may be used alternately to furnish a continuous supply of power.

Shelves Are Fireproof.

Not a stick of wood is used in two fireproof houses being built in England as an experiment, says an illustrated article in Popular Mechanics magazine. Concrete and steel are used exclusively, the floors being of jointless composition with rounded corners, while window frames, trimmings, doors, staircases, and even the cupboard shelves are of steel. The cottages are fitted with every modern improvement and are said to have excelled similar dwellings of wood or brick, both in time and cost of construction.

Blind Horses.

The manner in which blind horses get about without coming to more harm than they do is remarkable. They rarely, if ever, hit their heads against a fence or stone wall, and will sheer off when they come near one. It appears from careful observation that it is neither shade nor shelter which warns them of the danger. On an absolutely sunless and windless day their behavior is the same. Their olfactory nerves doubtless become very sensitive, for they will poke their heads downward in search of water fifty yards before they come to a stream crossing the roadway.

It cannot be an abnormally developed sense of hearing which leads them to do this, for they will act alike though the water be a stagnant pool. Men who have been blind for any great length of time develop somewhat similar instincts to blind horses.

Learn To Do Without.

"That's easy," some say today who never thought very hard.

It's hard at times, but it gets you somewhere, when coupled up with Saving.

"Doing without" and "Saving money" are a fine team when handled with a steady hand and a cheery word; they'll pull you right to the top of the hill.

Then you'll make two discoveries; one, that you've left the poor-house and the bread line at the bottom of the hill; ahead of you, opportunities that you can grasp with ready money gathered during the steady pull up.

Turn your seed dollar in your pocket into a growing dollar in bank.

Question of Opinion.

The late General Booth of the Salvation army was conducting a big meeting which lasted unusually long, and toward the close a newspaper reporter left his seat and gained the aisle. General Booth pointed a finger at him and said:

"Whoever leaves this auditorium will be damned by God."

The reporter answered: "If I don't leave this auditorium and hurry back to my office I'll be damned by the city editor."

"God is above the city editor," retorted General Booth.

"Yes, I think he is," piously responded the reporter, "but the city editor doesn't!"

Rescue Cage.

Less thrilling than being rescued and carried down on a swaying ladder, but much more practical, is a new rescue cage. When the fire ladder is thrown against a burning building it carries with it a wire cable attached to a steel cage. Like an elevator without a shaft the cage hangs from its pulley at the top of the ladder, within easy reach of the windows. It is lowered by turning the cable drum on the fire truck below, and will carry four passengers safely.—Popular Mechanics Magazine.

MICKIE SAYS

Use for Rat Skins.

Exhibiting the cured skin of a brown rat, the veterinary inspector of Newcastle, Eng., has pronounced such skins superior to the linings found in some expensive coats. The difficulty in creating a ratskin industry appears to be the uncertain source of supply; but the demand that would be aroused would be an incentive for destroying the rats that now constitute so serious a plague. The bodies of the animals need not be wasted, as they form suitable food for pigs, poultry and dogs.
