The tenderness and flavor of Libby's Dried Beef are frequently commented upon.

Libby, McNeill & Libby
Chicago

Especially Sense of Harmony.

"My wife doesn't sing any more."

"Did she lose her voice?"

"No; she found her senses."

There's much to be said on both sides when a woman attempts to write a letter on a single sheet of paper.

You can purchase a man's labor, but you've got to cultivate his goodwill.

Nature's efforts to purify the system need help in Spring. Wright's Indian Vegetable Pills are Nature's first aid in eliminating impurities.—adv.

Do you wait for pay day, without a time check?

Grow Wheat in Western Canada

One Crop Often Pays for the Land

Western Canada offers the greatest advantages to home seekers. Large profits are assured. You can buy on easy payment terms,

Fertile Land at $15 to $30 per Acre—

land similar to that which through many years has averaged from 20 to 45 bushels of wheat to the acre. Hundreds of cases are on record where in Western Canada a single crop has paid the cost of land and production. The Governments of the Dominion and Provinces of Manitoba, Saskatchewan and Alberta want the farmer to prosper, and extend every possible encouragement and help to

Grain Growing and Stock Raising.

Though Western Canada offers land at such low figures, the high prices of grain, cattle, sheep and hogs will remain.

Loans for the purchase of stock may be had at low interest; there are good shipping facilities; best of markets; free schools; churches; splendid climate; low taxation (none on improvements).

For particulars as to location of lands for sale, maps, illustrated literature, reduced railway rates, etc., apply to Supt. of Immigration, Ottawa, Can., or

Hammer and Tongs.

Bishop Elliston Caruthers of Savannah, Ga., was talking about Russia.

"Poor Russia is in a bad way," he said. "Bolsheviks and cadets, maximalists and Cossacks are going for one another hammer and tongs. Instead of uniting to defeat the common enemy, they squabble like—like the parson and the choir.

"The parson, you know, thought to get the better of the hostile choir one Sunday morning by announcing at the end of the first anthem:

"'Our text, brethren, will be 'And after the uproar was ceased.'

"But the choir got back at the parson by singing for the closing anthem at the sermon's end:

"'Now it is high time to awake out of sleep.'"—Cincinnati Enquirer.

So Sudden, Dear.

After a brief two weeks' acquaintance he invited her to go with him to a football match. As the players appeared on the field he began to enlarge on their several merits.

"There's Smith," he said; "he's a really fine forward; absolutely first rate! Then there's Jackson, over there; he's really fine—going to be our best man in a few weeks!"

"Oh, Walter, will he—he do all right?" she lisped shyly. "This is so sudden, dear."

Laying for the Neighbors.

"Chickens come home to roost."

"Mine don't," said tht amateur poultryman.—Louisville Courier-Journal.

MAKING STUDY OF VOLCANOES

Department of Agriculture Has Taken Up New Line, Which Is Bound to Be of Interest.

The department of agriculture has begun the extensive observation of the volcanoes within its borders and insular possessions, and has recently taken formal charge of the observatory on Kilauea, Hawaiian islands. Prof. T. A. Jaggar, Jr., formerly of the Massachusetts Institute of Technology, who has been director of the observatory since its foundation, will remain in charge. The investigations at Kilauea were begun in 1912, under the auspices of the Massachusetts Institute of Technology, and since 1913 have been maintained at the expense of the Hawaiian Volcano Research association, consisting chiefly of residents of Honolulu. It is expected that the weather bureau's work in volcanology will be developed in many details and eventually be extended to Alaska and other regions under the control of the United States in which active volcanoes exist.

True.

"I've noticed this 'bout apologies."

"What?"

"They're usually worse than the original insults."

The golden eagle, like other good tenors, is a rare bird.

How would you negotiate with the dog after he had eaten your sheep?

When You're Tired

and need the invigoration of a well-flavored, full-bodied hot cup, there's nothing superior to

Postum Cereal

Delicious and healthful, it supports and cheers with its refreshing goodness, and it is an economical table drink as well.

HALFWAY MEASURES FUTILE IN FIGHTING TUBERCULOSIS IN POULTRY—GET AN AX

Fowl Infected With "T. B." May Appear Healthy Until Disease Has Advanced.

(Prepared by the United States Department of Agriculture.)

"T. B." in the flock does not stand for "talented breadwinners." It signifies that the fowl are afflicted with tuberculosis, which means that the flock as a unit must "go west." Halfway measures are futile in fighting tuberculosis, as there is no treatment of any avail against the disease in poultry. The one practical course is to kill off the whole flock with maximum expedition and immediately thereafter to disinfect thoroughly all the houses and runs.

Tuberculosis of fowls is a chronic contagious disease, characterized by the development of nodules called tubercles in various organs of the body, but most frequently in the liver, spleen and intestines. T. B. of fowls is readily communicated to most species of birds and to several species of mammals, but it is almost impossible to communicate the tuberculosis of man and cattle to fowls. Parrots and the smaller caged birds are very susceptible to human tuberculosis, however, and are often affected by it.

T. B. Introduced by Purchase.

Tuberculosis is generally introduced into the poultry yard by fowls purchased from infected flocks, or by eggs of diseased birds that are obtained for hatching. If the disease exists in neighboring flocks the contagion may be carried by small birds or animals passing from one yard to another. A peculiarity of tuberculosis of birds is that the liver and intestines are nearly always very severely affected, and that as a consequence the bacilli are very numerous in the intestinal contents and are scattered with the droppings everywhere that the fowl go. The introduction of a single diseased bird, therefore, may cause the infection of the greater part of the flock in a few weeks. In the same way when wild birds contract the disease the bacilli are carried and deposited in all the yards which they visit.

The eggs of diseased birds frequently contain the bacilli, as has been proved by the inoculation of material from such eggs into susceptible experimental animals. The young chicks hatched from such infected eggs are diseased when they leave the shell, and of course soon infect the poultry with which they run. Moreover, since the infertile incubated eggs are often fed to chickens, it is evident that even the eggs which do not hatch may introduce the contagion unless they are cooked before feeding. Pigs, cats, rats and mice are especially liable to be infested with fowl tuberculosis from eating the carcasses of birds which have died, to the extent that these animals transmit the contagion to other fowls. Even calves and colts are sometimes found suffering from this form of tuberculosis.

No Early External Evidences.

For the most part there are no external symptoms of T. B. in the flock until the disease has reached an advanced stage of development. Then the birds begin to show a gradual loss of weight, wasting of muscles, paleness of the comb, and toward the end dullness and sleepiness. Very often there is at the same time a tuberculous inflammation of the joints and of the sheaths of tendons, which is revealed by lameness, swelling of the joints and legs, and sometimes by the formation of hard external tumors of considerable size. Occasionally the skin over the swollen joints breaks, the interior of the joint is ulcerated, and a small quantity of pus containing large numbers of tubercle bacilli is discharged. Swellings and bony enlargements of the joints of fowl are invariably suspicious and their nature should always be investigated by killing the bird and examining the liver, spleen and intestines to determine whether these have on their surfaces any whitish or yellowish spots which when cut into prove to be tuberculous masses.

As was previously mentioned prevention by the rapid extermination of the diseased flock is the only effective control when T. B. goes on a rampage among the fowl. If any birds slightly affected are retained the chances are they will be subsequent carriers and distributors of the disease. Hence it is not advisable to keep any fowls that have been exposed to the contagion, no matter how valuable they may be. The birds that have died or are killed, as well as all the accumulated manure, sweepings and scrapings of the poultry houses, should be completely destroyed by fire.

So far as known there is no danger of communicating the disease to man by eating the cooked flesh of tuberculous fowls. In most cases, however, the diseased birds are so emaciated and their general health so affected that their flesh is not fit for human consumption. It is better, in all cases, to burn the carcasses of the birds in which tuberculosis nodules are found, and thus avoid all danger of the disease being communicated to either man or animals.

PREVENT SPREAD OF VIRULENT DISEASES

Dead Animals Should Be Buried Deep or Burned.

Left on Surface of Ground Their Odor Soon Invites Scavengers to Congregate and to Bring Infectious Material.

(Prepared by the United States Department of Agriculture.)

The carcasses of animals which have succumbed to infectious diseases like anthrax, hog cholera, blackleg, tuberculosis, etc., are charged with myriads of virulent disease germs, and just as long as they remain where scavengers can reach them and portions of them can be carried away promiscuously, they are a dangerous menace over a large territory to all animals which are liable to be attacked by disease germs. Even carcasses of animals which have died from other causes than infectious diseases, unless they are disposed of in a proper way, are a source of danger. Left on the surface of the ground, their odor soon invites scavengers to congregate and to bring with them the infectious material with which they may have become contaminated by eating carrion elsewhere.

Dead animals on the farm should be buried deep enough to prevent them from being dug up again, or they should be burned. To burn large carcasses like those of dead horses and cattle is difficult and laborious and requires a large quantity of fuel. In most instances it is more economical to bury them. All animals which have died from infectious diseases and are buried should be covered with a heavy layer of lime before the graves are closed.

In the winter, when the ground is frozen, it is more difficult to dig graves than at other seasons of the year, but it is just in cold weather that disease germs remain alive and virulent longest in dead organic matter and that scavengers travel the longest distances, have the best appetites, and are most likely to carry disease germs on and in their bodies. The extra trouble of digging graves in the winter is easily offset by the greater danger it counteracts. Low temperature prevents the multiplication of disease germs, but many kinds of disease germs are not killed or deprived of their pernicious possibilities by exposure to a lower temperature than the lowest reached during an icy arctic winter.

Everywhere farmers not only should attend to the proper and safe disposal of the bodies of their own animals which unfortunately die, but they should insist on the proper disposal of the bodies of all animals which die anywhere in the regions in which their farms are located.

POULTRY NOTES

Alfalfa, clover, cabbage and turnips make good green feed.

* * *

Do not overlook the fact that the chicks must have shade.

* * *

Bran and shorts with milk or beef scrap furnish the protein.

* * *

If given different feeds, the hen will balance her own ration.

* * *

Do not keep little chicks in a very dusty place, and if it is so dry as to be dusty, a little sprinkling will make it more healthful.

* * *

Equal parts of corn, wheat and oats make a good grain ration. Mix and scatter in a deep litter.

* * *

The general-purpose breeds of poultry are best for the back-yard flock. They will supply both eggs and meat. They are usually good sitters and good mothers.

* * *

The poultry building should not be so wide that the rays of the sun cannot reach the back of the interior of the house. Otherwise it will be damp. Fourteen feet is a convenient width.

Grass Deserves Better Fate.

Grass deserves a better fate than most of it gets. Many farmers fight grass all the year to keep it out of their crops and then buy hay at expensive prices to feed their animals in winter.

Moisture Is Factor.

Moisture usually is the determining factor for a fall garden. Not only is moisture important for germination of the seed, but it is also necessary for preparing the land.

HOME TOWN HELPS

BUILD WITH IDEA OF BEAUTY

House Should Never Be Planned Solely Along Lines of Economy and Practical Utility.

An earnest plea for more beauty in building is submitted by a writer in the magazine Touchstone, who says in part:

"Building a home should be approached with reverence as well as joyous enthusiasm. There is no adventure in life more fraught with romance than the creating of a home. We are apt to turn to the past for precedent in architectural styles, whereas we should concern ourselves chiefly with the honest expression of our needs and surroundings.

"Love of beauty was almost a religion with the Greeks. To build an ugly thing was a misdemeanor punishable with ostracism. Our country would be a much more delightful and much more agreeable place to live in if our home builders were guided by wise architects who took as much thought for beauty as they do for economy and profit. Every home is an investment, and a beautiful home returns far more interest on the money expended than does an ugly one.

"Would it not be well for us, now that we are facing an era of home building such as the world has seldom known, to pause a little and approach our task with greater carefulness? We should remember that we are building for the future as well as for present delight and that our descendants may turn to our work with respect, as we look into the past and bow before the genius of the ancient master builders."

TRELLIS EASY TO CONSTRUCT

Twisted Wires Support Sweet-Pea Plants in a Most Satisfactory Manner.

A very satisfactory sweet-pea trellis can be made by stretching wires on a frame of two-inch hard wood or one-inch pipe, the length of the frame being the same as the length of the

rows. The wires should be placed loosely about the frame, as shown, then tightened by twisting them with a spike. A trellis of this kind can be used for several years, and if desired can be removed at the end of each season.—Popular Mechanics Magazine.

Red Raspberries on Town Lot.

Just a small patch of a good variety of red raspberry will afford fresh fruit for the table for many weeks. Some of the new varieties are ever-bearing. Perhaps one of the best is the Erskine Park.

In setting out the plants first manure and spade the bed as for a garden. If the plants are trained to a wire trellis they can be set two feet apart. Six or eight plants will be sufficient for an average family and ought to produce at least a pint a day from each plant.

By having so few plants, they can be watered and well cared for. Hand weeding about the plant is always the best way to cultivate raspberries.—Thrift Magizine.

Do You Think It Paid?

St. Joseph, Mo., employed a full-time expert garden instructor last year who organized the pupils of the elementary school into garden clubs. About 3,000 pupils reported that they were doing garden work before the schools closed in June, says their superintendent. Of this number 2,394 entered their names for membership in the United States school garden army. The school children gardened 32 acres without help and helped their parents work an area of 394 acres. Although the season was very unfavorable, a conservative estimate of the food produced by the pupils would be $15,000 at market prices.

Keep the City Clean.

With springtime usually comes a "clean up" campaign, and a movement in that direction is general in cities and towns throughout the United States. Appeal is made to civic pride, and people are urged to make their localities better places in which to live. This is good and desirable. But why not keep cleaning up all the year round? If things are not thrown into the streets, particularly bits of waste paper, they will not have to be picked up. Receptacles for refuse, if placed in back yards, and used, will help much in maintaining a condition of neatness. The cleanly habit can easily be acquired.

Aptitude for Details.

"You know Johnson—great fellow for detail." "He is that! He's the sort of chap who would go and get married and be able afterward to tell you whether it was Mendelssohn, Lohengrin, or Tannhauser they played during the ceremony!"

Every Part Must Be Sanitary.

No city can be considered sanitary if any part of it is in an unhealthful condition. Health, your health, and your family's health, and your neighbors' and their families' health is at stake.

CASTORIA

THE CENTAUR COMPANY, NEW YORK CITY.

NEVER KNEW HE WAS BEATEN

That Quality, Among Many Others, Accounts for Andrew Jackson's Rise to Greatness.

The boyhood friends of Andrew Jackson, so the story goes, could never quite understand how Jackson became so great a general—not to say president—while the rest of them remained simple pioneer citizens at home.

"Why, Jim Brown, right down the pike here," they said, "could throw Andy three times out of four; and look where he is now!"

"How did there happen to be a fourth time?" asked some one. "Usually it's three times and out, isn't it?"

"Sure it is. But Andy, you see, never had the sense to know when he was beat. He would never stay throwed. So, by and by Jim would get tired out throwing him and stay throwed himself. And then Andy would think he'd beat him."

There is a whole sermon in a nutshell in that simple little anecdote. The thing that counts is not how many times you are "throwed," but whether you are willing to "stay throwed."

Your adversary, whether he be a person or a misfortune or a difficulty, or just a hard job, can be tired out in the end by throwing you just as surely, if not as swiftly, as by your throwing him. It is merely a question of which of you gives in—in his mind—first, and "stays throwed." Remember that!—Youth's Companion.

Resuscitation Record.

What is said to be the record for resuscitation from drowning was accomplished by United States life-savers after the victim had been submerged for six minutes. Among a great many persons the erroneous belief exists that persons can be resuscitated after having been in the water a great length of time. Cases have been known where resuscitation methods were used for hours after the drowned persons had been under water for a half-hour, or even longer. Thus it will be seen that drowning is a quick death and the hazard of the water correspondingly great.

As Wifey Views It.

"Why is your husband not at his office?"

"Says he's going to lay off for a couple of weeks. Doesn't feel lively. He's inclined to worry about himself."

"Is he sick?"

"Oh, no."

"Then why lay off?"

"I suppose he needs more time to worry about himself."—Louisville Courier-Journal.

Buy a Farm Now.

Because land is cheaper than it will ever be again. The U. S. Railroad Administration is prepared to furnish free information to homeseekers regarding farming opportunities. We have nothing to sell; no money to lend; only information to give. Write me fully with reference to your needs. Name the state you want to learn about. J. L. Edwards, Manager, Agricultural Section, U. S. Railroad Administration, Room 70, Washington, D. C.—adv.

The Debt Affirmed.

Wife—Everything you have you owe to me.

Hub—That's what Doctor Brown says.

Wife—Who's Doctor Brown?

Hub—The stomach and nerve specialist.

SHAKE INTO YOUR SHOES.

Allen's Foot-Ease, the antiseptic powder to be shaken into the shoes and sprinkled in the foot-bath. It relieves painful, swollen, smarting feet and takes the sting out of corns and bunions. Allen's Foot-Ease is a certain relief for sweating, callous, tired, aching feet, and makes walking a delight. Sold everywhere.—Adv.

The Style Nowadays.

Knicker—"Has Smith made up with his wife?" Bocker—"Yes, but of course he doesn't know on what terms."

The leaf of the pineapple plant can be wrought into a serviceable cloth.

A dream of conquest is the devil's benediction.

MURINE FOR YOUR EYES

Beats, Refreshes, Soothes, Heals—Keep your Eyes Strong and Healthy. If they Tire, Smart, Itch, or Burn, if Sore, Irritated, Inflamed or Granulated, use Murine often. Safe for Infant or Adult. At all Druggists. Write for Free Eye Book. Murine Eye Remedy Company, Chicago, U. S. A.

Opportune Moment.

At a recent Sunday school entertainment one of the primary pupils posed in a tableau as the "Infant Samuel." In a surplice, at his teacher's knee, hands clasped as if in prayer, the effect would have been most reverent if Billy, the "Infant Samuel's" partner in marbles, had not been holding forth on the front seat. In the hush that followed the raising of the curtain Billy said:

"Prayin' 'bout that swell agate of mine you went and copped, are you?"

WORSE THAN DEADLY POISON GAS

Kidney disease is no respector of persons. It attacks young and old alike.

In most cases the victim is warned of the approaching danger. Nature fights back. Headache, indigestion, insomnia, lame back, lumbago, sciatica, rheumatism, pain in the loins and lower abdomen, difficulty in urinating, all are indication of trouble brewing in your kidneys.

When such symptoms appear you will almost certainly find quick relief in GOLD MEDAL Haarlem Oil Capsules.

This famous old remedy has stood the test for two hundred years in helping mankind to fight off disease.

It is imported direct from the home laboratories in Holland, where it has helped to develop the Dutch into one of the sturdiest and healthiest races in the world, and it may be had at almost every drug store. Your money promptly refunded if it does not relieve you. Be sure to get the genuine GOLD MEDAL Brand. In sealed packages, three sizes.—Adv.

Military Tactics.

Mother—Do you want any macaroni for dinner?

Returned Soldier—No, thanks; it's too hard to mobilize.

Nothing But Climate.

"What sort of a place is it?"

"One of those places where the climate is all they've got to brag about."

HEADACHE

Often Caused by

Acid-Stomach

Yes, indeed, more often than you think. Because ACID-STOMACH, starting with indigestion, heartburn, belching, food-repeating, bloat and gas, if not checked, will eventually affect every vital organ of the body. Severe, blinding, splitting headaches are, therefore, of frequent occurrence as a result of this upset condition.

Take EATONIC. It quickly banishes acid-stomach with its sour bloat, pain and gas.

It aids digestion—helps the stomach get full strength from every mouthful of food you eat. Millions of people are miserable, weak, sick and ailing because of ACID-STOMACH. Poisons, created by partly digested food charged with acid, are absorbed into the blood and distributed throughout the entire system. This often causes rheumatism, biliousness, cirrhosis of the liver, heart trouble, ulcers and even cancer of the stomach. It robs its victims of their health, undermines the strength of the most vigorous.

If you want to get back your physical and mental strength—be full of vim and vigor—enjoy life and be happy, you must get rid of your acid-stomach.

In EATONIC you will find the very help you need and it's guaranteed. So get a big 50c box from your druggist today. If it fails to please you, return it and he will refund your money.

EATONIC

FOR YOUR ACID-STOMACH
