SLEPT AMONG THE DEPARTED

Travelers in Auto Unknowingly Selected Peculiar Place in Which to Pass the Night.

They lived in Milwaukee and "flivvered" through to Indianapolis with their two children. They left home early in the morning, arriving at Gary just before dark. Anxious to reach their destination as soon as possible, they left Gary after getting a supply of gasoline.

A few miles out of Gary a heavy rainstorm checked their progress and shrouded the countryside in pitch darkness. Losing their way they decided to turn in at the first gate and spend the rest of the night in the automobile, rather than take chances of traveling by night in the darkness on unknown roads.

A few miles further on the outline of a tree just beyond an open gate was seen, and the auto was guided beneath. The couple and children slept in cramped quarters in the auto and awakened at daybreak next morning.

Imagine their horror when they discovered they had slept all night in their auto in a cemetery.—Indianapolis News.

Too Beautiful.

A man and his wife went to one of the most beautiful islands in the Caribbean sea seven years ago to spend the twilight of their lives in the serene beauty of the tropics. It was a place which the husband, a seafaring man, had chosen as the nearest approach to terrestrial paradise for those who have enough money to live without working hard.

The couple landed in New York the other day with their lares and penates and a parrot. The ideal season is just about to begin in the Caribbean, but it will start and continue without this particular pair of humans. "We want an old-fashioned New England winter," said the wife. The husband was more specific. "It was great for a while, but finally it got too dodblasted beautiful. We are going back to Connecticut to see some rocks and barren fields."—New York Sun.

Siberian Y. W. C. A.

Over in Siberia a staff of Y. W. C. A. workers are slowly but surely making headway in organizing an association and in interesting girls in the various activities planned for their benefit. Overcoming the mountains of difficulties which arise from the abnormal educational and social situation in Vladivostok has been a problem to be approched slowly and with eyes open.

The workers report finding a few people interested in the things which have to do with girls and with whatever information they have gathered they are carefully developing their activities. There are sewing classes and one of the workers is conducting classes in spelling and letter writing.

Britons Eat Less Meat.

Englishmen used to be considered the greatest meat eaters in the world. Now, declares the Society of Meat Importers (London), the average Englishman eats 33 per cent less meat than he did before the war. Unless he can be induced to eat more of it the country will be faced with such a glut of meat as it has never had before, a London dispatch says.

The annual consumption of meat in the United Kingdom before the war was about 1,800,000 tons, say the importers. It is now only 1,200,000 tons. And this, they contend, is due entirely to the high cost still maintained. Englishmen and Englishwomen, too, are just as fond of meat as ever, but they cannot afford to eat as much of it as they used to.

Reorganizing Chilean Army.

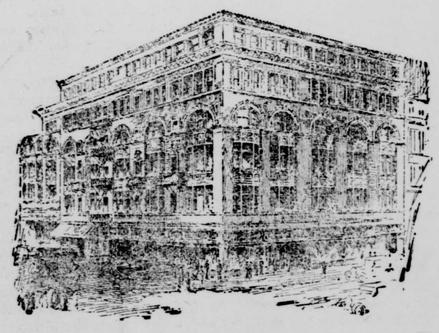

Announcement of plans for a further reorganization of the Chilean army has recently been made by the minister of war. The plans are to operate along three distinct lines. First, an organization of a number of civilian bodies is to be made for the purpose of stimulating interest in and development of military aeronautics. Second, an attempt is to be made to increase the standing army to 28,000. Third, a number of military railways are to be built which are to have strategic character. To aid in bringing about the latter a number of Japanese military railroad authorities have been retained.

Gasoline Locomotives Now.

Gasoline locomotives that are safe to use in coal mines have been invented in England, their ignition taking place inside of tight boxes and their exhaust through water.

IS as unchangeable as the famous laws of the Medes and the Persians.

The individual who spends more than he earns—or, as is far too often the case, spends all before he earns—travels in a hopeless circle. He cannot advance, and "he who does not advance, recedes."

The person who saves BEFORE he spends inevitably registers progress. Why not put the principle to the test?
