Owing to the fact that the court room will be in use all today (June 10th) the meeting of the County Federation of Women's Clubs will be held in the Sunday School room of the Methodist Protestant Church, Denton, Md. Everybody is most cordially invited.

"Wanted salesman, with auto preferred, by large Oil and Paint Co. to crll oe Farmers in local territory. Prefer man with successful selling record in this class of trade. Must furnish good reference. Can make from $75 to $150 aweek. PARKER REFINING COMPANY CLEVLAND, OHIO.

The case of James E. Hignutt against Wm. R. Peters and Miss Elizabeth Peters to set aside a mortgage will be heard in the Court of Appeals in October, the defendants having appealed the case, which was decided in favor of Mr. Hignutt some months ago.

Fire of an unknown origin destroyed a barn on the farm of William Lyons between Federalsburg and Woodland Saturday night last, together with a large quanity of feed farm machinery vehicles etc. The live stock was gotton out with difficulty several of the animals being badly scorched. The loss will be about $2,500, partly insured.

Before and deed for the conveyance of real estate in Caroline county shall be received for record in the office of the Clerk of the Circuit Court the person offering it for record must submit it to the Clerk of the County Commissioners, so that the transfer of assestment may be noted on the books of the County Commissioners office,

Testimony in the divorce case of Mrs. Sadie B. Love against her husband, Walter M. Love, is being taken in court here, Judge Wickes presiding. Mrs. Love is asking a divorce with alimony. She is represented by T. Alan Goldsborough, and and Mr. Love by W. Brewster Deen. Mrs. Love's testimony was first taken, and she was on the witness stand several hours. There were many witnesses to be examined.

Industry's Need Of Oil

"Industry's need of oil" was the subject of an address by George Otis Smith, Director, United States Geological Survey Department of the interior, before the American Iron and Steel Institute on May 28. The following is an abstract of Director Smith's remarks:

The last ten years might be called the petroeum decade. The world war depended upon American oil wells for motive power. Gushers and oil booms increased popular faith in an inexhaustible supply of petrolum. Domestic production doubled and consumption more than doubled so that Mexican oil has become an absolutely necessary part of our supply. These ten years mark a transition from oversupply to overdemand.

The ever increasing demand for gasoline and fuel oil are the outstand ing oil needs so that the question of priority must soon arise. With an estimate of seven billion barrells in the ground and the 1920 consumption closely approachig a half billion barrels this rapid pace can not long be maintained. Benzol and alcohol from the coke ovens promise only ennough motor fuel to meet part of the present increase in demand; oil from oil shales will not be labor cheap like the petrolum now flowing from the wells. Regard for the future forces us both to plan to use less oil and to import more.

Some restricton in gasoline consumption must soon come; fuel oil in locomotives and stationary steam plants musst give way to the demand for this fuel by the Navy and United States merchant marine which alone this year require one third of the output of fuel oil. Oil as a power saver has a unique function and the demand for lubricating oil must continue to increase as the use of machinery increases.

Pioneering for oil in foreign countries by American capital will not only help secure the needed oil but will also furnish markets for American manufactures espically of steel products. Planning for the future needs to include more attention to supplies of raw materials to insure the country's industrial life.

Orphans' Court Proceedings.

In the Orphans' Court Tuesday, Judge West, Harper and Shawn were present.

James B. Todd, administrator of William E. Todd of W., deceased, filed an inventory and appraisement of the personal property, which was approved by the Court.

Harvey L. Cooper, executor of Thomas C. West, deceased, filed releases from Isaac E. Mason, and Margaret E. Todd, distributees.

William L. Jump, administrator of Willian C. Jump deceased filed his first and final account of administration and distriution which was approved by the Court and on petition an order of Court was was granted authorizing the administrator to pay over the distributive share of the minor heirs to their natural guardian.

Florence Todd Lane administrator of Wallace B. Todd deceased filed and inventory and appraisement of the personal property which was approved by the Court.

John H. Mitchell executor of James H. Mitchell deceased filed an account of sales of the personal property which was approved by the Court.

House Burns.

The house of Hanson Milligan who lives near Oak Grove was burned to the ground last Wednesday morning Ambrose Bradly and Earnest Tull had been fishing and as they came to ward the Milligan home they saw sparks flying from the roof. As they drew nearer they saw there was no light inside the house, supposing no one was up they went closer and aroused the family, who did not know of the fire and most likely would have been burned. Had not those boys arrived at the critical moment. There was no insurance on the house and as the Miligans are poor hard working people and the heart of the community goes out to them. It has been said that some one should take collection for these worthy people and no doubt some action will be taken to help them in this time of need.

In Memory.

Mrs. Bickling; died May 21 1920
Age 69 years
We miss dear mother from our home,
We miss her from our place,
A shadow o'er our life is cast.

We miss the sunshine of her face,
We miss her kind and willing hand,
Thy fond and earnest care.

Our home is dark without her,
We miss her every where.
Our dear mother she has left us
God seen fit to call her home,
But we know that we shall meet her
on the resurrection morn.

Louis and Clara Bickling.

NEW LAW NOW EFFECTIVE

There Are Many of Them and Many Are Concerned.

Tuesday of last week Marylanders had about 700 new laws to obey or violate. The people will have to step right up and walk the straight and narrow—or wider —path set for them by the Legislature of 1920. Said the Baltimore News of Monday.

The old roller towel pass out of use. The man who spent years learning how to find the clean spot left will find no place to exerecise his accomplishment.

The blushing 16 year-old bride will have to sit and patiently wait until she is 18 years old. Marriage license will cost $2 and the girl or awkward groom-to-be will have to face the license clerk in person. The old-style applicant who often willfully or thoughtlessly lied about ages will no longer be called on to sin that way.

Poultry soaked in water cannot be sold hereafter. That was an old rick by which a slender chicken would hit the scales with an expensive bang.

Crying in court, as done by the official court criers, will be more profitable in the Orphans' Court, the judges also receiving higher pay.

Children in theatrical companies with permits from other States will be allowed to perform here by showing permits and paying fees.

"Oh, say can you see by the dawn's early light—" and the rest of the "Star Spangled Banner" must be sung in public schools.

The soverign people of Baltimore when 10,000 of them sign up, may abolish or charge the City Council by referendum vote of all the voters

The same people, by referendum, may decide in November whether the next police Commissioner shall be named by the Governor, as now, or by the Mayor. This goes into effect at the expiration of the six year term of General Gaither.

More compensation is allowed and payment starts sooner for workmen and higher insurence is required by employers. Here are some of the other things that will happen:

A boxing commission and a racing commission will handle those two sports.

Lateral roads will be build by the counties and State on a cost sharing plan.

Trust companies will pay only $1 on the $100 tax on shares of stock.

Pay of school teachers, other than those of Baltimore, who have had a raise, will be raised June 1.

Merit system, with some reservations, goes into effect in the State.

The people will vote in the fall on the question of Sunday movies.

Blue laws slightly modifidd to permit legally sale of articles such as are now general sold illegally.

Giving short weight now becomes a misdemeanor and all boxes and crates must have a deffnately indicated capacity. The boxes "about a quart," or "almost a bushel" are forbidden.

Minimun age of operator of motor vehicles reduced from 18 to 16.

All lighing pevices for motorcars must be approvea by State.

Revuiring persons who may have dropped glass on any roadway by accident to remove some.

Making compulsory many driving rule generaly observed by best drivers now.

In all 22 distinct changes in the motor law that every motor driver can learn by applying to Commissioner of Motor Vehicles, or can later on by facing Commissioner on charge of violations Ignornace is guilty and the fines are high.

Many laws to put a stop to buying and selling stolen cars, making it easier to lock by the buyer than ever before.

Important.

The Senior class of Caroline High School, assisted by the other classes, will present a big outdoor pageant, "Pocahontas," on Monday, June 14, at 3 o'clock, in Kerr's Meadow, just a short distance out of town. The class is trying out a novel sort of class day exercise and they hope to make it a great success. The stage setting is most attractive—a large grassy plot surrounded by tall trees and with a stream running through it. The audience will sit in a very comfortable place, high and dry, breezy and shady. Don't be afraid to come out—you'll enjoy it. Only 25 cents admission. In case of rain the pageant will take place the day following.

The Fine Kilties Band

The fine Kilties' band which travels in its own special car made a big hit with its concerts Tudsday afternoon and eveing. The musicians rendered finisnhed compositions adequately interpreting some of the world's musical pieces as well as selections. Their Scoth Highlander costumes aided materially in creating an appropriate atmosphere. This was further enchanted by bag pipe playing Scoth dancing and other features.

Mrs Thurston Back To Caroline

Mrs. Thurston of College Park, Md., who was with us in April and gave such a splendid demonstration on "Shor Cuts in Sewing" at the Women's Institute, is to spend the week of June 14th in Caroline County giving demonrtrations and individual instruction to the women's clubs. There are so many clubs and so few days in the week that it was rather difficult to arrange a schedule of meetings so that Mrs. Thurston might meet every club however we have done the very best we could.

The following is the schednle for the week's:

June 14th —2 P. M.—Greensboro Town & Rural Clubs Uniting.

June 14th—7:30 P. M.—Ridgely Community Club.

June 15th—A. M. Denton —Individual Instruction.
In Mrs Norman's No. 10 Law Building.

June 15th —2P. M. Choptank—20th Century Club.

June 16th— Shiloh Camp Dorchester County

June 17th—2P. M. Andersontown —Andersontown & Hobbs Community Club.

June 17th—7:30 P. M. Tuckahoe —Tuckahoe Neck Community Club.

June 18 —2P. M. American Corner Federal Community Club.

June—7:30 P.M. Denton Community Club.

Every woman in the county ought to see one of Mrs Thurston demonstrations. Choose the meeting nearest you and plan to attend.

Disease Ruins Philippine Corn.

Uncle Sam's little brown nephews on the island of Bohol P. I. are in serious straits for food, the downy mildew having ruined their corn crop. W. H. Weston, Jr. of the Bureau of Plant Industry, United States Department of Agriculture recently returned from a two year trip in the islands where he studied the disease. He reports that the damage done in the southern island of the group is particulary disastrous and that the natives are at times reduced to eating the pith of the burri palm which constitutes an emergency ration when other crops fail.

The islands produce an annual corn crop valued at $8. 820,000. Corn is the second most important crop in point of area planted; it is estimated to be about third in value The islands do not produce enough of their principal foodstuff rice to supply their own uses, and the natives are forced to produce corn and to import rice from California and from oriental countries. When the downy mildew sclerospora philippinensis finds crop conditions favorable, the result is an accute situation in the food problem of the natives

The Brueau of plant Industry has made a through study of the disease and its life history is known. Preventive methods have been developed which have been successfull in controlling the disease even where conditions where worst. There is no reason known why the mildew would not flourish in the southern part of the corn belt in this country if it once obtained a foothold. Every resource of the Department of Agriculture is directed toward the prevention of such an invasion however and the Philippine corn is under a quarintine imposed by the Federal Horticultural Board.

"Ship By Truck Movement."

The Navy Recruting Party which accompanied the "Ship by Truck" nonvoy to the Eastern Shore of Maryland produced most satisfactory results. The immediite results were 6 applicants from the Eastern Shore, with prospect of several more applicants within the near future.

A most enthuniastic reception was given the convoy of trucks at every town on the Eastern Shore.

This movement brought out strongly the fact that co operation between business men and the Government Service can be of benefit to all hands

The Eastern Shore "Shipby Truck" movement was so successful that it is to planned to make similar trip to Western Maryland later on in the summer or fall.

The Navy Recruting Officer of Maryland wishes to thank the citizens of the different Eastern Shore towns for the courtesy extended to the Navy Recruting Party while on this trip.

To Fight Insect With Its Parasite

The agents of the United States Department of Agriculture sent to Cuba for the purpose of gathe ing parasites of the sugar cane moth borer are accomplisihing poor result. The parasites are now being reciied at Brownsville, Tex., for distribution in the cane matures earlier than it does in the Louisiana fields. A little latter consignments of parasites will be sent to the Louisiana fields and to other places where sugar cane is

AMERICA'S PROTECTION IS REPUBLICAN SLOGAN

Specifically Applied to Issue as Presented by Wilson In Veto of Peace Resolution

BY SNELL SMITH

Protection of unfaltering Americanism will be the issue presented by the Republican party at Chicago for decision in the campaign.

The President's reiteration of his many previous statements that he will not accept any sort of peace except that which any sort does not include his own pet league of nations and his fourteen points is contained in the following paragraph of his message vetoing the Knox peace resolution:

"Notwithstanding the fact that upon our entrance into the war professed to be seeking to assist in the maintenance of common interests, nothing is said in this resolution about the freedom of navigation upon the seas, or the reduction of armaments, or the vindication of the rights of Belgium, or the rectification of wrongs done to France, or the release of the Christian populations of the Ottoman empire from the intoleoable subjugation which they have had for so many generations to endure, or the establishment of an independent Polish state, or the continued maintenance of any kind of understanding among the the great powers of the world which would be calculated to prevent in the future such outrages as Germany attempted."

Republican members of Congress are of the opinion that this statement is entirely at variance with the actual facts.

When the United States entered the war there was no profession of of maintenance of common interests, but a declaration on that the rights of the United States had been violated.

When the President arrived in Paris to help negotiate the treaty he made no effort to secure from Great Britain an acknowledgement of the seas. Meanwhile Representative Britten, of Illinois had discovered that as the result of ships now in building the United States in 1822 will have a navy larger than the combined fleets of the British Empire Tnis, Republican members feel, is the best guaranty of freedom of the seas.

Great Britain cleverly incorporated in the wording of the peace treaty league covenant that no reduction in armament should be made unless prerata, which would still leave her in control of the seas of the world.

The rights of Belgium have been vindicated by the armies of the United States which overthrew the German Empire, by the restoration of Belgium sovereignty, and by agreement by Germany to pay damages.

Germany has besn shorn of her empire, her boundaries have dwindled and France now has troops on German soil in order to make sure that the last franc is exacted in reparation.

Europe is now working upon the problem of Turkey.

Poland is already in fact an independent republic.

No Kind of permanently peaceful understanding among the nations of the world can be possible until self-determination, which the President fails to mention, extends to Ireland, India and every other subjugated state, and no preliminary agreement can be entered into by America until its sovereignty and republican ideals are fully protected from the machinations of the diplomacy of empires.

On this line the Republican leaders intend to fight if it takes all summer. The President has laid down his platform for attack it the one paragraph quoted, His opponents in Congress intend to meet the issue on the facts.

LIVE STOCK NOTES

Hogging down corn pays.

• • •

Mud wallows are unsanitary and breed disease.

• • •

There is a tendency to feed too much roughage to horses.

• • •

Oats, especially for little pigs, should be ground and hulls sifted out.

• • •

The early lamb gets a larger supply of milk from the ewe than the late lamb does.

• • •

Water should be kept in the lots all the time. Never force hogs to drink from a stagnant pool.

• • •

Judge a sow by the size and vitality of her litter, as well as by her conformity to the breed type.

• • •

Young pigs cannot learn to eat too soon. They should be encourgned to eat when as young as three weeks of age.

• • •

A variety of crops are available for hog pasture, including the alfalfa, red clover, rape, Canada field peas mixed with oats and barley. Winter or hairy vetch is a valuable crop.

• • •

FARM ANIMALS

POINTERS FOR BEEF GROWERS

One Method of Bringing Down Prices of Meat Is Improvement in Type of Animals.

General improvement in the type and quality of beef animals the country over is one of the means urged by the United States Department of Agriculture for bringing down the high cost of meat to the consumer and, at the same time, increasing the profit of the producer. Some of the most es-

The Demand for Purebred Stock is Steadily Increasing.

sential items in growing beef on the farm, specialists of the department say, are:

Plenty of pasture and feed.

The right kind of cows—those that will produce good calves regularly.

A good, pure bred registered bull—one that will sire good calves persistently.

A large calf crop. This means that all cows shall drop calves, and that the calves shall be properly cared for at birth.

Proper care of the breeding herd and the calves.

Selection of good heifer calves to replace old or inferior cows.

Prevention of disease among the breeding herd and the younger stock

Shelter sufficient to protect the cattle from both severe cold and extremely hot weather.

A practical knowledge of fattening cattle for market.

Marketing to advantage.

There is a farmers' bulletin, No. 1073 on growing beef on the farm that may be had free on application to the Division of Publication, United States Department of Agriculture.

HOGGING DOWN RYE UNWISE

Practice Is Unprofitable, According to Pork Production Tests at the Ohio Station.

Hogging down rye is an unprofitable practice, according to tests made in pork production at the Ohio experiment station. The tests show that it is generally more profitable to harvest the grain and sell it as a cash crop or to feed the grain to hogs after thrashing rather than to allow the hogs to harvest the grain themselves.

Specialists point out that the daily increase per pig when hogging down rye is generally less than half a pound and that the amount of grain required to produce 100 pounds of gain is much higher than where the grain is fed directly to the hogs. As a rule, about 611 pounds of rye, hogged down, were required to produce 100 pounds of gain, whereas hogs fed on corn with tankage and clover pasture required but 331 pounds of concentrates to produce the same amount of gain.

The unprofitableness of hogging down rye is attributed to the fact that hogs are either unable to secure rye in sufficient quantities or are inclined to eat only slightly more than is required for maintenance.

Object Lessons in Fuel Saving.

The moving pictures are to be made use of as a means of educating people in the manner of making the most efficient use of fuel. Several 50-minute films have been made, showing good and bad operation in steam boiler plants, methods of testing boilers, and the like. These pictures will be available to each state in connection with its educational propaganda to conserve the fuel supply. A series of official bulletins on engineering phases of steam and fuel economics also is being prepared. They will include boiler and furnace testing, fuel gas analysis, saving steam in heating systems, boiler-room accounting system, saving steam and fuel in industrial plants, burning fine sizes of anthracite, boiler water treatment, oil burning and stoker operation.

Flood of Paper Money.

The year 1920 faces a world flooded with paper money. The paper currency of thirty principal countries of the world at the beginning of the war aggregated a little over $7,000,000,000; at the end of the war, in 1918, it was $40,000,000,000, and in December, 1919, it totaled $51,000,000,000, these figures being in round terms and exclusive of the currency issue of the bolshevik government, which alone are estimated at $34,000,000,000.—Boston Post.

Reducing the Surplus.

"Equal suffrage is a serious matter in England where the number of women entitled to vote far exceeds that of the men."

"Oh, they have removed that danger."

"How so?"

"No woman can vote who will not acknowledge that she is not under thirty."

Legal and Miscellaneous Notices

A Stengle Marine, Solicitor

—NOTICE OF—

FIRST MEETING OF CREDITORS

In the District Court of the United States for the District of Maryland.

In the matter of Winnie L. Hicks, Bankrupt.

Notice is hereby given that on March 27th, 1920, the said Winnie L, Hicks of Federalsburg, Caroline County, Maryland. was duly adjudged bankrupt, and the first meeting of his creditors will be held at the law office of T. Alan Goldsborough, in Denton Maryland, on the 25th day of June, 1920, at 10:30 o'clock A. M., at which time the creditors of said Bankrupt may attend, prove their claims, appoint a Trustee or Trustees, examine said Bankrupt and transact such other business as may properly come before the said meeting.

ENTRANCE EXAMINATIONS

State Scholarship In Engineering Courses.

INTRANCE EXAMINATIONS for the Department of Ingineering, as weias for the College of Arts and Sciences will be held in the Civil Engineering Buil ing, Homewood, Monday Saturday June 21-26, 1920, beginning at 9 A. M. each day under the auspieces of the College Entranece Examination Board.

APPLICATIONS FOR SCHOLARSHIP IN THE DEPARTMENT OF ENGINEERING established under the provision of the Laws of Maryland, chi apt r 90, 1912, will now be received. If there is more than one applicant for a particular scholarship, acompettive examination must be taken Friday September 17, 1920, beginning at 9 A M. Appointments will be made soon thereafter.

Each Legislative District of Baltimore City and each County of the State, with the exception of Cecil, Harford, Queen Anne's, Talbot and Dorchester Counties will be intitled to one or more schalarships for the year 1920-4921, in addition to those which have already been assigned. In the five counties mentioned above, all the available scholarships have been awarded.

Under the provisions of the Act of Assembly, the County and City Scholarships in the Department of Engineering are awarded only to deserving students whose financial circun stances are such that they are unable to obtain an education in Engineering unless free tution be granted them. The scholarships entitle the holders to free tuition free tuition free use of text books and exemption from all regular fees. One of the City carries also the sum of $200 The expense of attendanoe for those who do not receive scholarships is not greater than at other Maryland institutions.

Scholarships may be awarded to graeuates of Loyloa College, St. Johns College, Washington College, Western Maryland College, Maryland Agricultural College, Mt. St. Mary's College, Rock Hill College.

One scholarship will be awarded "At Large."

Applicants should address The Johns Hopkins University, for blank forms of application and for catalogues giving information as to examinations, award of scholarships, and courses of instruction. The next session begins Tuesday September 28, 1920.
