Quaker Minister Is Grateful to Tanlac

Rev. Parker Moon

Nearly everybody in Southwest Missouri either knows or has heard of the Rev. Parker Moon, who for a full half century has devoted his life and talents to Sunday school and organization work for the Society of Friends or Quakers.

"Uncle Parker," as he is more familiarly known, came from fine old rugged Quaker stock, and there is not a better known or more highly respected citizen in that part of the state. In referring to his remarkable restoration to health by Tanlac, he said:

"About five years ago I suffered a general breakdown. My principal trouble was nervous indigestion. My appetite was very poor and my food seldom agreed with me, and I had to live on a very restricted diet. I suffered a great deal from headaches and dizzy spells; I had severe pains across the small of my back and was badly constipated most of the time. In fact, I was so weak and rundown I was not able to attend to my duties.

"This condition made me very nervous and I could not sleep at night. Frequently I would lie awake most all night and was in that condition more or less for five years. My physician said he could not do anything for me and suggested a change of climate. I then moved to Texas and went back and forth three times, but did not get the relief I had hoped for. Finally, I got so bad off I was not able to get around with any degree of comfort. I was also told I had heart trouble.

"I had read about Tanlac and, as it had been very highly recommended to me, I decided to try it. I got a bottle and had taken only a few doses until I could notice a marked improvement in my condition. I noticed especially that I was not troubled any more with sour stomach after eating, which was a great relief.

"I kept on taking Tanlac until I fully regained my health. My appetite is splendid; I enjoy my meals and I do not find it necessary now to take any laxative medicines of any kind. I can sleep much better and am not nearly so nervous.

"I take great pleasure in recommending Tanlac to anyone who needs a good system builder, or who suffers with stomach trouble. I have recommended Tanlac to a great many of my friends and am pleased to reach others by giving this statement for publication."

Tanlac is sold by leading druggists everywhere.

As It Sounded to Her.

A little girl was asked, upon her return home, how she liked the singing of the congregation in the church.

"I liked it very much, indeed," she said, "although all the people said it was bad."

"'All the people said it was bad.' What do you mean, my dear?"

"Oh, it was so bad that I heard the people praying, 'Lord, have mercy upon us miserable singers.'"

A Flying Furnace.

The average meteor when first seen is about 80 miles above the surface of the earth, and disappears from view at 30 miles. Thus, it travels 50 miles before the atmospheric friction burns it up. This friction, it is reckoned, raises it to a temperature of something like 3,000,000 degrees.

The Nubian tribes of Africa are passionately fond of music.

Turf as Substitute for Cork.

Turf submitted to a patented chemical treatment is the substitute for cork of a German chemical factory. The material is stated to be as firm, light and sound-proof as cork itself, and it has high resistance to dampness, being also of great value as an insulating product. Claimed to be in some respects even superior to cork, it is especially recommended as a substitute material that is likely to prove epecially important for insulation and building purposes.

As we grow more sensible, we refuse drug cathartics and take instead Nature's herb cure, Garfield Tea.—Adv.

Education begins a gentleman, conversation completes him.

It is easier to bear what's amiss than go about to reform it.

Kill That Cold With

HILL'S CASCARA BROMIDE QUININE

FOR Colds, Coughs AND La Grippe

Neglected Colds are Dangerous

Take no chances. Keep this standard remedy handy for the first sneeze.

Breaks up a cold in 24 hours—Relieves Grippe in 3 days—Excellent for Headache

Quinine in this form does not affect the head—Cascara is best Tonic Laxative—No Opiate in Hill's.

Stock Raising in WESTERN CANADA

is as profitable as grain growing. Successes as wonderful as those from growing wheat, oats, barley, and flax have been made in raising Horses, Cattle, Sheep and Hogs. Bright, sunny climate, nutritious grasses, good water, enormous fodder crops—these spell success to the farmer and stock raiser. And remember, you can buy on easy terms

Farm Land at $15 to $30 An Acre

—land equal to that which through many years has yielded from 20 to 45 bushels of wheat to the acre—grazing land convenient to good grain farms at proportionately low prices. These lands have every rural convenience; good schools, churches, roads, telephones, etc., close to live towns and good markets.

If you want to get back to the farm, or to farm on a larger scale than is possible under your present conditions, investigate what Western Canada has to offer you.

For illustrated literature with maps and particulars regarding reduced railway rates, location of land, etc., apply to Department of Immigration, Ottawa, Canada, or

WESTERN CANADA Farm Lands at Low Prices The Wheat Belt of America

U. S. Maintains Air Leadership

Good Performances Offset Decreased Production and Contraction of Industry.

LONG FLIGHTS SUCCESSFUL

Clear Federal Policy to Aid Progress of Commercial Flying Is Still Lacking—Year's Feats Are Recorded.

New York.—America has successfully maintained her leadership in the navigation of the air, so far as heavier than air craft are concerned, despite the lack of aerial laws, landing fields and other such handicaps, according to a review of the year 1920, issued by the Manufacturers' Aircraft association. The review says:

"Decreased production and a general contraction in the aeronautical industry generally is offset by the more encouraging records of performance made in American aviation this year. While the last twelve months have not brought the carefully outlined policy of federal jurisdiction required to assure steady and economical progress in commercial aviation, they have witnessed many remarkable achievements by American pilots in American machines."

Year's Performances.

Then follows a long, detailed list of performances, among them the following:

"Commander A. C. Read, hero of the transatlantic flight in the NC-4, commanded the same flying boat on a noteworthy expedition from Rockaway, L. I., down the Atlantic coast, along the gulf coast and up the Mississippi river to Cairo, Ill. When the NC-4 returned to Rockaway January 27 last it had flown 7,740 nautical miles. Three of the four Packard Liberty engines had operated without trouble during the 118 hours in the air, the fourth more than eighty-two hours. Along the Mississippi the motors were run on commercial gasoline picked up from point to point en route. Read reported that the greatest difficulty encountered was lack of proper maps.

"Compared to long-flight attempts conducted by European governments the American ventures were particularly successful. No less than four expeditions attempted to fly the 5,206 miles from Cairo to Capetown, South Africa. Colonel P. Van Ryndveld and Major C. J. O. Brand finally completed their flight on March 20, 1920, in a DH-9 plane sent up by the government of the Union of South Africa after their Vickers-Vimy machine had crashed. They had set out from Cairo February 10. None of the machines that started reached Capetown.

"Different success attended the Alaskan flying expedition of the United States Army Air service. Four Gallaudet remodelled DH-4-B planes, each powered with a single Liberty motor, and each carrying two persons flew from Mitchel Field, L. I., to Nome, Alaska, and return in 112 hours flying time, a total distance of 9,000 miles, without a motor missing fire or other accident serious enough to delay the party. Rain and fog caused most of the difficulty in flying over country not even charted on the maps.

Operation of Air Mail Service.

"The Air Mail in 1920 operating between New York and Washington, New York, Cleveland, Chicago, Omaha, Salt Lake City and San Francisco, transported approximately one hundred million letters at ordinary postage rates. The system was extended in 1920 from Chicago to San Francisco, from Key West, Fla. to Havana, Cuba, and from Seattle, Wash., to Victoria, B. C. About thirty-five air mail planes are in the air each day flying a total, in round trips, of about 8,000 miles.

"During the year the navy has been making an aerial survey of the Panama Canal zone.

"The geological survey has cooperated with the marine corps in mapping the coastline of Hayti. American seaplanes, Curtiss, Aeromarine and Boeing types, have operated on passenger routes in China.

"Major R. W. Schroeder, flying an American designed and built Packard-Lepero biplane, went up from McCook Field, Dayton, Ohio, on February 26, and reached the world's record altitude of 33,000 feet."

CORONATION DRESS FOR SALE

Gown Worn by Empress Marie Louise to Be Offered at Auction in Paris.

Paris.—The beautiful dress worn by Empress Marie Louise, second wife of Napoleon, on the day of her coronation as empress of the French will be sold at auction shortly.

The dress is made of exquisite lace, made by the French lace workers of Calvados, to whom Napoleon himself sent the design.

It was stolen from the Tuileries during the riots of the revolution of 1848 and found its way to the Galliera museum. The empress was the daughter of Emperor Francis I, of Austria-Hungary.

North Carolina Mule Routed Dairy Invader

A terrific racket in the barn of A. Johnson, a farmer, of near Raleigh, N. C., announced that a milk thief had met his Waterloo at the business end of a farm mule.

Johnson had planted the mule in the stall of a cow which the thief had been milking at night. When the farmer reached the barn, shotgun in hand, he found a battered milk pail, a wrecked milking stool, a hat, a self-satisfied mule, but no thief.

Coal Mining Took Heavy Toll of Life.

Washington.—More than 1,500 men lost their lives in coal mine accidents in the first nine months of 1920, according to a report of the United States bureau of mines.

14-Year Tests of Plant Life

Reveal That Wild Flora Do Not Always Grow in Most Congenial Habitat.

ENVIRONMENT IS CHANGED

Flowers Taken From Mountain Tops Grow Much More Luxuriantly and Produce More Leaves, Flowers and Fruit at Sea Level.

Chicago.—At a lecture given before an assemblage of geographers and biologists representing several societies, Dr. D. T. MacDougal, director of the Botanical research department of the Carnegie institution at Washington, described the results of a series of experiments extending over fourteen years and embracing 139 species of plants, the experiments tending to show that the wild plant is not always found in the environment most suited to it.

"A great many people think this," said Dr. MacDougal, "but it has been found to be absolutely false."

Grow More Luxuriantly.

With stations established at four different altitudes, 8,000 feet, 5,200 feet, 2,300 feet and at sea level, plants have been transferred from one place to another, and the results of the cultural experiments of fourteen years have now been compiled.

In these experiments plants from the mountain tops, some from a height of close to one and one-half miles above sea level, were found to grow much more luxuriantly, producing more leaves, flowers and fruits at sea level than they had in their native habitat. These plants were not cultivated, protected or fostered in any way in their new situations. Once placed, they were to all intents and purposes wild flowers and had to fight their own battles and take chances as before.

One hundred and thirty-nine plants were used in these experiments, embracing forms of such wide divergence as grasses, wild lilies and oak and walnut trees, as well as cacti and other unusual plants.

"While a plant may thrive well in its new situation," said Dr. MacDougal, "it will sometimes display a behavior quite at variance with that by which it is ordinarily known. Thus the common witchhazel, which is known to bloom in the vicinity of New York when the frosts come, when taken to the equitable climate of the Pacific coast reverts to the normal or summer-blooming habit. Other species show flower forms, fruits and leaves notably different from those previously displayed by them.

"Aquatic plants of the cress family were made to grow in soil on the mountain tops, where the roots formed small radishes, like their relatives. The radish is a cress. In other words, these plants came back to the ancestral habit of forming a radish.

Interest to Biologists.

"The manner in which plants travel about the world or are distributed is a problem of great interest to biologists, and in this experimental work particular attention was given to obtaining evidence on some of the problems of dissemination or movement of plants across the face of the country."

It was found that rabbits and rodents which inhabit the oak zone at the top of the mountain range acted very effectively as a barrier to prevent cacti and other plants from moving up or down the mountain slopes. To verify this a barrage zone was established and the plants protected in screened enclosures which kept off the little nibbling animals. The plants thrived and prospered and spread within the enclosed section. Out in the open, to either side of the barrage zone, they rapidly disappeared, being eaten by the rabbits. This explained the mysterious sudden stoppage of some of these plants—not altitude nor heat nor cold, but actual destruction through being eaten. The animals were like a fence.

The coastal laboratory at Carmel-by-the-Sea and the desert laboratory at Tucson, Ariz., are two of the experimental stations which were used in this work.

MERRY SEX WAR ON

Bureau of Engraving and Printing in Throes of Controversy.

Plate Printers' Union Charges That There Are Too Many "Trifling Girls" in the Bureau.

Washington.—A merry sex war is in progress in Uncle Sam's money factory.

The war started when the Plate Printers' union in the bureau of engraving and printing made formal charges that there were too many "trifling girls" in the bureau and that they were retarding the efficiency and the amount of production of paper money. In their charges the plate printers intimated that too much time was spent by girls employed in the bureau in administering "little dabs of paint and powder." In fact it was intimated that the plate printers objected to "flappers" being employed in the bureau.

The plate printers let themselves in for trouble.

Federal Employees' Union No. 105, embracing the women employees of the bureau, at an indignation meeting, condemned the attitude of the plate printers, denied their charges and deplored their giving publicity to what they alleged to be a misstatement of facts.

Miss Gertrude McNally, secretary of the union, declared that the records of the examining division showed that the greatest percentage of spoilage of printers' work is for "slywipes," "lifts" and "breaks," which spoilage could in no way be attributed to the assistants.

"Plate printers are paid by the piece rate and in many instances the presses are speeded up for production at the expense of the quality of the work," Miss McNally stated.

It is predicted that the charges of the Plate Printers' union will result in considerable friction in the future between the printers and their assistants, since if inefficiency does exist the responsibility for the same has been placed by one side on the other.

Three Meals Means Wife Does 2-Mile Walk Daily

Montgomery, Ala.—Preparation of meals for an average family means a two-mile daily kitchen marathon for the housewife, according to statistics compiled for the conference of vocational workers of the south, in session here. A pedometer attached to students in the kitchen of the model home at Livingston school showed this measurement for the stove-sink-and-pantry route covered during the period from bacon and eggs to dinner and dessert.

EXECUTE 4 FOR FLOUR THEFTS

Polish Soldiers Found Guilty of Stealing Nine Sacks From Army Are Shot.

Cracow, Poland. — Four soldiers found guilty of having stolen nine sacks of American flour from army supplies were shot recently.

The executions were carried out under a law passed by the diet last year, making it a capital offense to steal from the army. A fifth soldier, also court-martialed, in connection with the flour theft, was sentenced to prison, as it was shown that he had taken a minor part in the affair.

20 CENTS DAY HAITIAN WAGE

But Many of the Natives Live in Houses Built of Mahogany at That.

Port au Prince.—There is no high labor market in Haiti.

The man working by the day gets one gourde, which is 20 cents, and sometimes a gourde and a half. Cooks are to be had without advertising. Most of them earn $1.50 a week, and in addition get 6 cents a day on which to feed themselves and their flock. You do not have to include carfare in the weekly wage down here.

At some points in the interior wages for cooks are even lower. Many of them live in mahogany houses, at that.

Haiti's population is estimated around 2,500,000. Ninety-seven per cent of these people are classed as illiterate, which may account for the size of the pay envelope.

FINDS GROOM IS BELOW PAR

Swiss Father Sues Detective Bureau for False Recommendation of Daughter's Suitor.

Geneva.—M. Wader, a wealthy resident of Bienne, Switzerland, has just sued a detective agency for wrongly recommending a man as husband for his daughter and has obtained a verdict of 140 pounds, with costs, against the agency.

The prospective father-in-law engaged the agency at a cost of 500 pounds to investigate the reputation and habits of the young man who had asked for the hand of his daughter. The detectives reported that the youth was worthy, reliable and sober.

After six months of wedded life, the bride returned to her father's home with the information that the bridegroom has dissipated her dowry in riotous living and gambling.

Cutting a Watermelon in January.

Peru, Ind.—Mrs. George W. Clevenger of Logansport preserved a watermelon last August by covering the end of the stem with paraffin and on New Year's day she brought it to Peru for dinner at her sister's home. The melon had a good flavor and was solid and sound.

74 Years Old; Kicked Man's Hat Off.

Lancaster, Cal.—T. W. Edwards of Lancaster, Cal., celebrated his seventy-fourth birthday anniversary by kicking a hat from the head of a man six feet two inches tall, without losing his balance. Edwards says he expects to live to be 100 years old.

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it.

A prominent druggist says "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments; corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcels Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.—Adv.

The End.

"I just got fired."

"What for?"

"For good."—Yale Record.

Take care of your health, and wealth will take care of you. Garfield Tea promotes health.—Adv.

A man's proudest and rarest possession is an old photograph in which he looks intelligent.

Why buy many bottles of other Vermifuges, when one bottle of Dr. Peery's "Dead Shot" will act surely and promptly?—Adv.

A white egg often comes from a black hen.—German Proverb.

Sure Relief

6 BELL-ANS Hot water Sure Relief

BELL-ANS FOR INDIGESTION

GOOD AND LOGICAL REASON

Mrs. Jones Knew Exactly What She Was Doing When She Selected Baby's Names.

Mr. and Mrs. Jones had come to that all-important part of naming their new baby.

Mr. Jones, who, by the way, detested work, and liked nothing better than to sit in front of the fire and watch other people do it, wanted the baby named plain "Bill."

Mrs. Jones had different views.

"I shall name the baby William Oliver Robert Kenneth," she asserted.

"But why all those names?" asked her husband.

"Because," replied Mrs. Jones, tartly, "if you look at the initials you will find that they spell 'Work,' so perhaps, when baby grows up, he will take to it better than his father."

Their Opinions.

"Sir," sternly said the horse-faced gent. "I denounce the present fashions in women's garb as immodest, scandalous and unhealthful! I declare that a great deal of the literature of today is harmful to the youth of the land! I reprobate the dance as a device of the devil! I—"

"And in return, sir," snarled J. Fuller Gloom, "I denounce the average flap-mouthed goody-good as utterly useless and unutterably tiresome, and demand that he go to the devil and stay there!"—Kansas City Star.

Nervousness.

"Does tobacco make you nervous?"

"It does," replied Mr. Meekton, "if Henrietta catches me smoking in the house."

Serious.

"Zounds! How can I wait two months for delivery?" "Automobile?" "Coal."—Louisville Courier-Journal.

REALLY NOT SO FLATTERING

Younger Lady's Explanation of Recognition of Old Friend Had a Certain Sting to It.

A cabinet officer said at a dinner, apropos of certain criticisms on his department:

"Politics—all politics. Nothing, not even woman, is as cruel as politics, and yet woman can be very cruel."

The secretary then told a story about the cruelty of woman.

"One Easter morning," he said, "two ladies met on the Atlantic City boardwalk with little outcries of surprise and joy.

"'Why, Mame!' said the older lady. 'How flattering this is!'

"'Flattering?' said the younger lady, with a perplexed air. 'How so?'

"'You haven't seen me,' said the older lady, 'for 17 years—and yet you recognize me, so to speak, right off the bat. That means I haven't changed so dreadfully, doesn't it?'

"'Oh!' she said, 'you see, I recognized your bonnet.'"

Select Associates Carefully.

You can catch the right kind of habits by associating with people who have them. Pick industrious, cheerful people for your friends, people who mean to succeed and know how to do it. You can expose yourself to all their working habits with profit. And if you get infected with them, it will make a big difference in the ease with which you reach the goal you have set for yourself.—John Blake, in Chicago Daily News.

Flying in England.

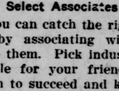

Figures reported for the first year of civil flying in England reveal a total air mileage of 734,200, made in 38,954 flights, carrying 70,000 passengers with but one fatal accident. Machines numbering 519 were registered.
