SPEED QUALITY SERVICE
FINE JOB WORK AT THE AMERICAN UNION

ENTIRE TOWN CUTS EVERY-THING 40 PER-CENT

Wages, Rents and Food Go Down At Once

Connelsville, Pa., Jun 26.—Several hundred employees of the American Manganse Company of Dunbar, near here, yesterday made a proposition to the company officers whereby they accepted a wage reduction of 40 pr cent. in order that they might continue working.

The officials of the compand previously had ordered that the furnace and other plants operatd by the company, which constitute the only employment offered to a population of several thousand, be closed down July 1.

Employees not wishing to be idle and realizing that it was better to work for less pay than not to rceive any at all, made the request to the company that they adopt the wage cut during the period of business depression, providing that the plant be kept operating. Company officials agreed and the men will continue to work while men employed in other industries remain idle.

The company not only agreed to keep the plant running but met the men half-way by deciding to cut rents of more than 150 houses occupied by employees 40 per cent.

The stores of Dunbar entered into the plan also by agreeing to give reductions on all necessities of life. This makes the move a community affair.

Under the new wage scale common labor will earn 22 cents an hour for a day of 10 or 12 hours on the shifts.

A meeting of all employees of the company was held at the company offices yesterday when representatives of the various departments presented their plan to superintendent Marshall.

OUR DUTY TO THE COMING GENERATION

"To neglect crime at its source is a short-sighted policy, unworthy of a nation of our intelligence".

When Humane Education is made a regular part of the school curriculum, as is reading, writing, and arithmetic, then can we hope to establish in the minds of the coming generation the principles of kindness, justice, and mercy to all living creatures. "Humane Education furnishes the foundation for developing the highest product of civilization—the good citizen".

Hebert Hoover says "If we could grapple with the whole child situation for one generation, our public health our economic efficiency, the character, sanity and stability of our people would advance three generations in one . . . Every child delinquent in body, education or character is a charge upon the cummunity".

Humane Education should be listed among the compulsory subjects in the curriculum of the public schools.

CARUSO FEARS FOR VOICE

Great Tenor Doubts If He Will Sing Again.

That Enrico Caruso, who has delighted Metropolitan Opera audiences for 18 seasons, will not sing again before the American public in his old voice was the news brought from Italy yesterday by Capt. Charles Anthony Fulton of the United States Army Intelligence Service, who arrived from Naples on the liner President Wilson.

Captain Fulton, who is stationed at Sorrento for the summer, said that he saw Caruso in Naples, and that he seemed in very poor health. The tenor expressed his belief to the Army officer that he would never again sing as heretofore, and almost broke down as he said it, Captain Fulton added. Captain Ettore, commander of the President Wilson said that opinions throughout Italy in musical circles were pessimistic about Caruso recovering his voice.—New York Times.

Homers Establish New Record

The homing pigeons, bred and owned by the bureau of Animal Industry, United States Department of Agriculture, at the Government farm, Beltsville, Md., have established a record during the past three years which stands alone and unepualed. Beginning with 1919, the year in which the loft was established, the Beltsville birds won first and second in the 100-mile and the first in the 200-mile young-bird races as well as best average speed in flights of 100 to 300 miles. In 1920 the birds from this loft won first, second, and third in the 200-mile and first, second, and third in the 300-mile race. In 1921 they won first, second, and third in both the 400 and 500 mile old- bird races, and best average speed of the Washington Racing Pigeon Club and the National Concourse Association under whose auspices the races were flown.

In 1919 there were 33 lofts competing, in 1920 35 lofts, and in 1921 over 40 lofts comprising the best birds of the best breeders in all of Washington. This record of first, second, and third in all races from 100 to 500 miles was won separately by individual birds and has never been epualed by homing pigeon breeder in the District of Colnmbia or vicinity, which not only proves the superiority of the Beltsville birds, but is a tribute to the ability and untiried efforts of Mr. A. Jacobson, who has full charge of their breeding and training.

WAR EXPLOSIVES WILL BE GIVEN TO FARMERS

Great Quantities of TNT Are Distributed to Railroads

Washington, June 20.—More than 12,000,000 pounds of picric acid, one of the highest known explosives, accumulated for war purposes and made useless to the War Department by the armistice, will be distributed to farmers for agricultural purposes.

When the war ended the Army hda on hand this immense stock of picric acid and, in addition, more than 26,-000,000 pounds of T N T. The latter was distributed to various governmental agencies for use in railroad construction in Alaska, public roads in the national parks and various projects on Indian reservations. None of the T N T was distributed to individuals and thus far not a single accident has marked the use or transportation of the millions of pounds of the high explosive, according to officials of the Bureau ofMines.

STEFANSSON TO MAKE ANOTHER TRIP NORTH

Incorporates A Company For The Exploration Of Arctic

Vancouver, B.C., June 23.—Another exposition to the Arctic slope, under the direction of Vilhjalmer Stefans son, Canadian explorer of th North lands, was indicated today when incorporation of the Stefansson Arctic Exploration and Devlopment Company was announced under way. The company will have a capital of $100, 000, and it was understood a suitable vessel for the trip has been found and is now located in the North.

Stefansson, who is presidnt of the new company, said one purpose of the expedition would be to investigate and develop practical features of marketing reindeer meat and furs, as well as to thoroughly explore the resources and country lying to the north of Canada.

Vancouver will be the official headpuarters of the expedition, which may be continued for the next two or three yars.

During Vacation Days.

You will doubtless have an opportunity during vacation days to scatter seeds of kindness while on your vacation by showing your intrest in all animal life. Intrest others in this cause of mercy, justice and kindness to every living creature.

Protect dogs and cats from ill-treatment; give them food and water and a comfortable place to sleep. Do not shut out your cat at night. Cats are apt to disturb light sleepers or persons who are ill.

Do not allow your dog to follow a bicycle or car. Many dogs are killed, many lost and others have been made very sick by following bicycles or cars for long distances.

Discourage nest-robbing, boys, among your companions, and encourage in its place an intelligent interest in the living birds.

Whether you own a horse or not, it is your duty to remonstrate with a driver who abuses his horse in any way. Help him by advice or kindly reduces the number of cases of prosecution.

Horses and cows will enjoy better health and do better work if they care groomed every day. All animals need plenty of sunshine, clean water and good food.

It is cruel to carry fowls with their head downward and their feet tied together. In most states this is an offence against the law and punishable by fine. Never carry fowls in bags or leave them in bags.

Fish should be killed as soon as taken out of the water by a sharp blow on the head. Such fish keep better and are better to eat.

Wool Marketing Plans Discussed

Tentative wool grades formulated by the Bureau of Markets, United States Department of Agriculture, together with the policies of the bu-u and the American Farm Bureau Federation in regional and local county wool pools, were discussed at a conference recently held in Washington.

The farm bureau federation favors the plan of regional pools at points of large concentration, and is not convinced, it is said, of the practical value of the tentative wool grades. The conference resulted in a better understanding of the views of the farm bureau federation and of the Bureau of Markets regarding the points under discussion.

The meeting adjourned with the understanding that the Bureau of Markets would arrange for a later conference between representatives wool growers, buyers, mills, and organizations of farmers at a convenient date in order to promote a better understanding of the work of the bureau with respect to pooling, grading, and marketing wool.

OF COURSE NOT

A resident of the rural districts, Louis by name, brought a load of hogs to the local stockyards and they were sold by Ben,another native of the fatherland. Later in the day Louis was digesting the account of the sale, when Ben approached and inquired:

"Louis, did your hogs weigh as much as you thought they would?"

Louis replied: "No, they didn't, but I didn't think they would."—Indianapolis News.

If you expect things to go wrong, you seldom will be disappointed.

JOHN K. LYNCH,
EVERETT H. GALE,
HARRY B. MASON,
Supervisors of Elections for Caroline County.
Test: C. Leslie Walls, Clerk.

There is more Catarrh in this section of the country than all other diseases put together, and for years it was supposed to be incurable. Doctors prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Catarrh is a local disease, greatly influenced by constitutional conditions and therefore requires constitutional treatment. Hall's Catarrh Medicine, manufactured by F. J. Cheney & Co., Toledo, Ohio, is a constitutional remedy, is taken internally and acts thru the Blood on the Mucous Surfaces of the System. One Hundred Dollars reward is offered for any case that Hall's Catarrh Medicine fails to cure. Send for circulars and testimonials.

THE CONSEQUENCES

Of improperly fitted glasses are vastly more serious than the effects of a cold—yet because they do not show themselves as quickly, too few people consider their significance. Do not trifle with your eyes. Do not risk injuring those delicate and necesary organs by unskillful fitting. I am an experienced optician and can give your eyes the best care and attention.
