FARM BUREAU PRESIDENT IS OUT STRONG FOR DISARMAMENT

By Robert Fuller

Chicago, Sept. 13.—The American Farm Bureau Federation has asked President Warren G. Harding to provide proper representation for agriculture in the Disarmament Conference of the nations to be held in Washington, beginning November 11. Farm Bureau leaders declare that it is essential that the farmer viewpoint receive due consideration in this conference.

In an interview for this paper, President J. R. Howard of the American Farm Bureau Federation said to me:

"Our failure to ratify the Versailles peace treaty in some manner in 1919 is largely responsible for the slough of despond through which agriculture is struggling today. If America had in some way or other ended the state of war in 1919, we farmers would be 50 per cent better off than we are today.

"We view with the most hopeful interest the coming conference called by our president to bring about a world disarmament. The need was never greater and no cause more worthy of the most ardent endeavors of the world's greatest statesmanship. The United States, through the sacrifices of the Civil War, struck the shackles from a million slaves. Lincoln became the Great Emancipator.

"Despite the great war the world still remains downcast and distressed, in irons of militarism. May our president in this coming conference have our most earnest and heartfelt prayers for success, that the burdens of humanity may be lightened and the brotherhood of man throughout the whole world become established."

Mr. and Mrs. Melvin Anthony and little daughter Betty of Baltimore will spend next week with Mrs. Ella Anthony.

Handling Your Telephone Call

YOU may use the telephone only occasionally, but when that occasion arises you like to know that your call will be put through without difficulty.

In order that this may be done, there is always at your service a complete telephone system and a corps of trained employees.

The telephone that you see before you is a very small part of the telephone system—one of the finger tips, as it were. More than 60 per cent. of the telephone plant is located outside of the central office and the subscriber's premises.

Millions of dollars in telephone plant are hidden under the city streets and strung out along the country roads. When you talk over a telephone line you have thousands of dollars' worth of equipment at your exclusive service.

It is the unseen telephone plant that enables you to send your voice where you will.
