Community Club Elects Officers

The Community Club met at the home of Mrs. F. A. Gilbert Saturday afternoon of last week. After the usual business, new officers were elected for the coming year: Mrs. H. S. Cooper, president; Mrs. J. H. Harker, vice president; Mrs. Rosa Hignutt, secretary, and Mrs. F. A. Gilbert, treasurer. After the adjournment of the business meeting, refreshments were served. The club meets at the home of Mrs. A. S. Daffin in December.

Mr. and Mrs. O. M. Hignutt visited Mr. Hignutt's sister, Mrs. David Taylor at Centreville last Sunday.

Among those who came from a distance to attend the funeral of Mr. R. C. Rice were his brothers, Charles and George Rice, of Philadelphia, and sister, Mrs. Lemuel Johnson, of Bowers Beach, Del.

Little Ruth Harker has been ill for a few days, but is improving.

Mr. J. E. Hignutt, who had a slight stroke of paralysis last week, is able to be up again.

The Williston friends of Miss Cleone Cooper gave her a little surprise last Saturday evening. Those present were Mr. and Mrs. H. P. Sullivan, Mr. and Mrs. G. O. Hignutt, Mrs. C. E. Rice, Miss Ruth Meredith, Mr. Charles Shawn and Miss Reba Rice.

Hunters say that there are more black and mallard ducks this year than there has been for twenty years.

NOTICE

We, the undersigned, wish to correct a false report of last week concerning the Colored Silver Leaf Band of Denton. The report was to the effect that the said band made an attempt to serenade the newly elected senator, Mr. Towers, and that the said band was assaulted, horns torn up, etc.

We wish the public to know that the report is not true, as a part of the band members attended a dance at Easton on the Tuesday night in question, the others at the Ridgely dance.

Mr. and Mrs. James Scatton attended the birthday dinner of his aunt Mrs. Clement White, Tuesday.

STUDY EFFECT OF VIBRATION ON MOISTURE UNDER ROADS

Does vibration caused by the movement of a vehicle over a road increase the amount of moisture in the earth under the road, and thus weaken its bearing power? This question will be answered when results are secured from an experiment just started by the Bureau of Public Roads, United States Department of Agriculture. Two similar concrete slabs have been constructed side by side, and on one there will be placed a gasoline engine with an unbalanced flywheel which will cause vibration. Soil samples will be taken from under the slabs and the amounts of moisture compared. This experiment is undertaken, not with the idea that road vibration can be prevented, but to determine whether sufficient increase in the moisture of chusetts for some time, are visiting the subgrade is caused by it to weaken the bearing power of the soil, and incidentally, to develop new ways of testing methods of subgrade treatment.

WOMEN MAKING COMFORTS WHEN WOOL IS UNSALABLE

The fact that much wool has proved unsalable except at a loss has caused many farm women to consider the home utilization of some of the wool on hand. A few months ago a home demonstration agent from the U. S. Department of Agriculture and the state agricultural college gave a demonstration on the washing and carding of wool for comforters at a club meeting in Silverdale community, Kitsap county, Washington. As a result, women al lover the county have become interested in making wool comforters, and it seems as if there would be enough made to supply an entire future generation. Flour and sugar sacks have been found excellent for interlining.

EVEN THE KING WHO LIVED IN A PALACE

enjoyed no such comforts as are common to the workingman of today. The invention of sputtering, dripping tallow candles was considered a great step in lighting progress, but today the touch of a button floods the room with clean, steady electric light in any degree of brilliancy.

Think what electricity does for your daily comfort and then consider how cheap it is—only one-third of a cent an hour for a 60-watt Mazda Lamp!
