BAPTIST MISSIONS GREATLY EXTENDED

THE WORK ON FOREIGN FIELDS SHOWS LARGE EXPANSION FROM FORWARD MOVEMENT

NEW COUNTRIES ENTERED

Southern Forces Now Have Missionary Fields on Every Side of Globe With Audience of 900,000,000.

DR. J. F. LOVE,
Sec. Foreign Mission Board

Indicating the extent to which the foreign mission work of the Southern Baptist Convention has been set forward by the larger proceeds that have come to it from the Baptist 75 Million Campaign, Dr. J. F. Love, secretary of the Foreign Mission Board, reports that since 1919, when the Campaign was projected, the following increases in the work of that board have been made: Number of foreign missionaries on the field has increased from 328 to 540, number of native workers from 627 to 2,820, number of churches from 505 to 891, number of church members from 43,659 to 103,328, number of self-supporting churches from 143 to 211, number of baptisms per year from 5,635 to 12,611, number of Sunday schools from 769 to 1,447, number of Sunday school pupils from 36,115 to 67,407, number of day schools from 512 to 796, number of pupils in day schools from 15,722 to 32,789, and contributions per year from $173,372 to $437,568.

Baptisms Gain Rapidly

Nearly as many persons have been baptized by the missionaries on the foreign fields since the Campaign began as had been baptized during all the seventy-five years of missionary operations prior to the inception of this movement, Dr. Love reports. This does not include Russia, where more than one million members have come into the Baptist churches in recent years. Nearly one-fourth as many persons were baptized on the foreign fields last year as there were members, all told, on the foreign fields when the Campaign began.

At the time the Campaign began Southern Baptists were operating only in Mexico, Brazil, Argentina, Chile, Uruguay, China, Japan, Africa and Itlay. As a result of the larger proceeds made avaiable from the Campaign the board has been enabled to enter the new fields of Spain, Jugo-Slavia, Hungary, Roumania, and Russia in Europe, and Palestine and Siberia in Asia. This gives to Southern Baptists a total missionary audience of 900,000,000, or more than one-half the total population of the globe.

Older Fields Re-Enforced

But of more significance than the entry into these new fields is the reinforcement that has come to the work in the older fields, in the estimation of the officials of the Foreign Mission Board. This reinforcement consists not only in sending out many new workers but providing larger equipment in the way of church houses, mission residences, schools, hospitals, orphanges, publishing houses and the like. Summarizing the growth that has come in the forces on the older fields since the Campaign began the following results are pointed out:

Number of churches, 76% increase; number of church members, 108% increase; number of church buildings, 45% increase; number of schools, 55% increase; number of pupils, 108% increase; number of residences for missionaries, 94% increase; number of foreign missionaries, 63% increase; number of native missionaries, 264% increase; number of hospital buildings, 21% increase; number of treatments given, 61% increase; number of hospital beds, 104% increase.

Much Remains To Be Done

With all the increases that have come in the foreign mission work only a portion of the program that was contemplated for foreign missions as a result of the Campaign has been accomplished as yet. It is in the hope of completing this program through more effectively equipping the work and workers on both the older fields and the new ones that the representatives of the Foreign Mission Board are cooperating with those of the 75 Million Campaign in an effort to complete the payments of all subscriptions to this movement at this time.

HERO RETIRES

Sergt. Samuel Woodfill, designated by General Pershing as the outstanding hero of the World war, is soon to retire from the regular army. He will quit with the rank of master sergeant three of his comrades having sacrificed their grades in his favor.

Practice of Cleaning Wheat Is Profitable

Experiments Conducted in Minnesota and Dakotas.

The value of cleaning wheat at threshing time is once more demonstrated in experiments conducted in Minnesota and the Dakotas by the United States Department of Agriculture. Farmers co-operating in the experiments with the most successful recleaner gained an average of 7.3 cents per bushel on each bushel threshed. Various types of cleaning machines were operated in connection with threshers.

The 7.3 cents gain per bushel includes the higher price received for the cleaned wheat, the value of the screenings removed and used for feed, and a small saving in transportation. No charge was made to cover the operation of the recleaner, but it is pointed out that if a charge of as much as 2 cents per bushel had been made, the gain would have averaged 5.3 cents per bushel net.

The simple and efficient disc recleaner designed by department technologists received the hearty endorsement of spring wheat farmers because the new method not only gives them a premium for their wheat but also permits them to make valuable use of their dockage which had previously been a total loss.

Farmers Taking Better Care of All Machinery

"High wages have caused many farmers to change their methods, and they now take better care of their farm machinery," says Henry Keller, Jr., professor of rural economics in the New Jersey State College of Agriculture.

"Heretofore it was the practice of most farmers to leave their machinery out all winter, rusting and unrepaired. Then, when the rush of spring work came, everything was delayed and in confusion.

"Now progressive farmers find that the idle period of fall and winter is a good time to inspect and repair all the tools and machinery used on the farm. Such a simple thing as greasing the plowshare and jointer after the last time the plow is used in the summer or fall has been found to avoid in the spring several hours of the slow, tedious plowing that would be necessary if the plow were rusty. Several farmers claim that it reduces their time of plowing a whole day, thus saving them $5 at least.

"By spending a little time each day tinkering in the woodshed these farmers not only work up a good appetite but are able to make careful repairs that will stand up when the test comes. When necessary to send away for spare parts, a wait of a week or two does not cause the concern that it would in spring.

"To these provident farmers it must be a fine feeling to walk out to the shed when winter ends and know that plows, harrows, harness, axes—all—are ready for business."

SILENCER ON TRANSMISSION

Mixture of Flaxseed Meal and Lubricant Is Recommended as Temporary Expedient.

To silence a noisy transmission try mixing flaxseed meal with the lubricant. This is recommended only as a temporary expedient, as a noisy transmission means generally breakage of the gears or misalignment that calls for a major operation to effect a real cure.

IN GERMAN CABINET

Dr. Jarres is the new vice chancellor and German home secretary, or minister for inner affairs.

ITALIAN TELEPHONE USER NEEDS PATIENCE OF SAINT

Telephones will be the first of the publicly owned utilities in Italy to go back to private enterprise, according to Signor Giovanni Colonna di Cesaro, Minister of Posts and Telegraphs under Mussolini.

"Our telephones are nearly the worst in the world," he said in a recent interview. "Excepting Russia, no civilized country has so little telephonic development. As to quality our telephones are even worse. Telephonig in Italy . . . is a Christian and spiritual exercise in divine patience. More than 8,000 villages are without any telephonic connection. The blame must be laid indirectly on the State."

Definite action by the Italian Cabinet has confirmed the proposed transfer of the telephones to private companies, and bids have been requested.

BEWARE OF WET UMBRELLA.

A wet umbrella carelessly placed where it rests against the cords of your telephone is apt to put your telephone out of business. All covered wires that carry the voice currents must be kept perfectly dry and care must be taken that no dampness shall reach them, else the service may be interrupted while search is made for the cause of trouble and the necessary repairs are made.

TALKS to MOTHERS about THEIR BABIES

By DR. J. H. MASON KNOX, JR.,
Chief, Bureau of Child Hygiene, Maryland State Department of Health.

CHILDBED FEVER OR PUERPERAL INFECTION.

Reprinted by permission of the Baltimore Sun.

THIS is a terrible scourge and dreaded with good reasons by expectant mothers before the days of expert and clean obstetrics. It is fearful to think of the lives that have been lost from this cause, through ignorance. Now, when the mother is in good hands the danger is almost gone.

Infection during the period of confinement is nearly always induced from without, and is due to lack of care on the part of physician, midwife, nurse or the patient herself. The prevention of this infection lies in the scrupulous care that should be taken by everyone who is concerned in any way in the attendance upon the woman at childbirth to allow nothing that is not absolutely clean to touch her.

This is a wholly preventive disease, since its causes and the measures necessary to avoid it are well known, and all women at this time or their families have the right to insist upon its prevention. This is an important reason for advising the mother to secure the services of a physician and nurse whose technique is above reproach.

If the women of Maryland cannot command service of this kind, it is the duty of the community, or the State through public health nurses, the obstetrical service of hospitals, and the medical profession generally, to provide it for its women.

Cost of Marketing Hogs by Co-Operative Scheme

Terminal charges, such as commission, yardage and feed, amount to about one-third of the total cost of marketing hogs by co-operative shipping associations. The United States Department of Agriculture recently made a study of 237 live stock shipping associations in the Middle West, and found that there is considerable variation in the shipping costs between organizations of shippers.

Anyone interested in studying the complete findings of the investigations may obtain them by writing for the report, Costs of Marketing Live Stock in the Corn Belt—1921. Copies are sent free.

Dead Leaves Make Fine Fertilizer for Garden

The dead leaves which seem to be lying everywhere at this time of year can be put to a double use. If raked and stored in a dry place they make excellent scratching material for the hens or bedding for stock, after which they make the best of fertilizer. Or alternate layers of leaves, chicken manure and dirt, in barrels, will make a valuable fertilizer for the garden.

Alsike Clover Hay Very Good Feed for All Cows

Alsike clover hay is a very good feed for dairy cows. It is a little better than red clover hay. Feed cows all the alsike clover they will clean up without very much waste. For a grain ration take 400 pounds ground corn, 200 pounds ground oats and 100 pounds oilmeal. Mix and feed one pound of this mixture for every three to three and one-half pounds of milk produced if your cows are Jerseys or Guernseys and one pound for every three and one-half to four pounds of milk produced if your cows are Holsteins.

Show Up Poor Cows.

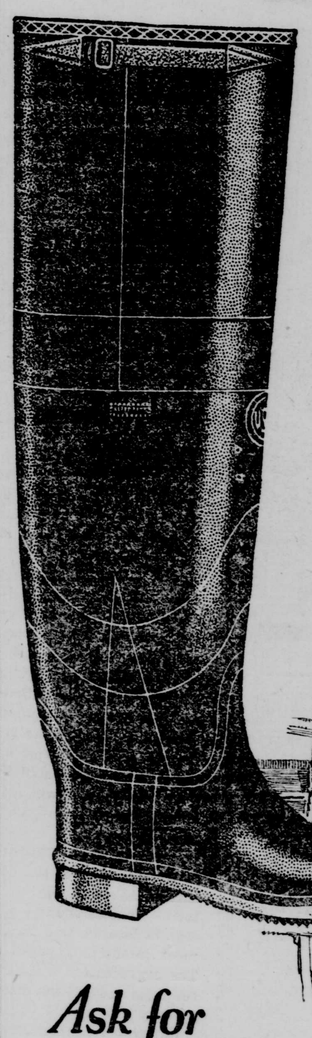

Almost any cow can make a profit on pasture, but the feeding of grain and roughage indoors soon shows up the poor ones in dairy-improvement records.

"I Got Real Mad when I Lost My Setting Hen," writes Mrs. Hanna, N. J.

"When I went into our barn and found my best setter dead I got real mad. One package of Rat-Snap killed six big rats. Poultry raisers should use Rat-Snap." Comes in cakes, no mixing. No smell from dead rats. Three sizes. Prices, 35c, 65c, $1.25. Sold and guaranteed by

That Gray Sole Rugged and Flexible A Real Comfort

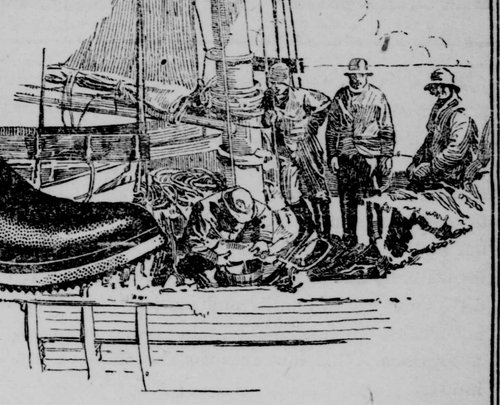

Here is one more reason why "U. S." Gray Sole Boots are popular with fishermen. The gray sole provides all the qualities of a comfort shoe and yet the most rugged weatherproof protection possible. A high grade rubber makes it springy and flexible. The heel is wide and firmly attached to the upper. It is well balanced and uniform.

Ask the men who are wearing them now. They'll tell you how they wear. Be sure you get "U.S." Gray Sole Boots.
