SHERIFF TEMPLE GETS WET GOODS

Sheriff James Temple, who has been on the job all the time since entering the office the latter part of last year, has made another haul and this time his drag net has roped in a man and woman.

Tuesday the sheriff stopped at a house near Greensboro on the Denton-Greensboro road, and when the door was opened asked for some liquor, which was produced and sold to him, whereupon he immediately produced his badge and arrested George Vincent and wife for the illicit sale of liquor.

The couple was brought to Denton and placed under $500 bail each for appearance at the next term of court.

Sheriff Temple has been getting right after the illegal sale of liquor in this county and it is hoped that he will have such splendid success that the county will soon be cleaned up.

In his efforts he is being aided by the local police officer McMullen, who is cleaning up the drunks in Denton when they appear. One of this officers latest stunts was to place under arrest two drunks, one of whom offered resistanced and was knocked stiff by the officer who took the other drunk to the jail and came back and carried the other one, still stiff, to the jail where he thawed out. While the local bailiff is not large in stature, he is right there with the goods and it will not go well with any one to provoke him.

BAKE

The ladies of Christ Church guild will hold a bake in the store of Denton Drug Co., on Saturday afternoon next, March 8, beginning at two o'clock.

Having sold my interest in the Nuttle Hardware Company to Fred B. Nuttle, I have taken their accounts to collect. I would like to get all accounts closed as soon as possible. Those having accounts with us can see me in the office of the Nuttle Hardware Company.

ad FRANK L. R. NUTTLE

Maryland Tuberculosis Asso. Clinic

There will be a tuberculosis clinic for known tuberculosis cases, contacts and suspects in the Court House at Denton, March 11th, at 2:30 p. m.

Any one having this disease or who thinks they are getting it, are urgel to attend ths clinic at which a consultation will be held and the best course to persue will be suggested.

Ambassador to England Sails

Frank B. Kellogg, the new United States ambassador to the Court of St. James in London, has sailed on the S. S. President Harding. Mr. Kellogg was accompanied by Mrs. Kellogg and Frederick Russell Dolbeare, who will be first secretary of the American embassy.

CHRIS BERGEY, Prop.

M. JACOBSON
Main Street, Cor. 3d Denton, Md.

The store of quality and value, which we take pride in our service of giving values that please. Our motto is—We are Not Pleased Unless You Are Pleased. Our sales are not complete until you are satisfied. We are ready to extend our arms in the future, as in the past. You are invited to come and see our new styles in men's and boy's low cuts, in black, brown calf, and also some patent leather. Our ladies' shoes are of quality and service, shoes that are not freaks, but fashionable, whenever you choose to wear them. Our low cuts for the children are of interest.

A visit will convince you. Come in and look, try them on.

M. JACOBSON,
DENTON, MARYLAND

FEDERALSBURG

A campfire girl's group was organized here on Friday of last week with sixteen members. Miss Myrtle Messick is the guardian.

A baby daughter was born to Mr. and Mrs. Paul Noble on Wednesday, February 27th, at the home of Mrs. Noble's parents, Mr. and Mrs. W. H. Davis, in "Sunnyside."

The Woman's Club enjoyed an unusually artistic prgoram at its last meeting when Ibsen's "Peer Gynt" was interpreted by Mrs. W. H. Carson with Miss Bertha Short as pianist. The music by Grieg was charming and the combined talents of the reader and musician furnished an afternoon of enjoyment to those present.

Rev. F. C. MacSorley, pastor of Union M. E. Church, who has been ill for several weeks, is able to be out again and on Sunday attended both the morning and evening service of his church, where his congregation welcomed him after a prolonged absence.

Mr. and Mrs. Sam Quillen of Berlin have been recent guests of Mr. and Mrs. Harvey Long.

Mrs. Byron Griffith was delightfully surprised on her birthday last Wednesday night when a number of friends arrived and a pleasant party, arranged by her husband, followed. Five hundred and other games furnished enjoyment, refreshments being served afterward. Those present: Mr. and Mrs. Byron Griffith, Mrs. Mary Quidort, Misses Hilda Covey, Miriam Todd, Louise Nuttle, Mr. and Mrs. Claude Howard.

Mr. and Mrs. R. O. Dean entertained some friends on Tuesday evening of last week at five hundred, the occasion proving a delightful one. The guests were Dr. and Mrs. F. T. Brooks Mrs. Cheivor Davis, Misses Hilda Elben and Blanche Jackson and Messrs. Victor Goslin and J. R. Elderdice.

Mrs. Lena Jefferson spent Wednesday of this week at Dover visiting her daughter, Mrs. Roland Handy and wee granddaughter, Jane.

The St. Jonns College Dramatic Club, under the supervision of Prof. S. S. Handy, of the English department of that college, rendered "The Hottentot" at The Temple last Thursday evening, in a most finished manner. The play, which was a decided success and witnessed by a packed house, was rendered under the auspices of the Parent Teacher Association and netted that organization $55, including home made candy receipts.

Mr. Kemp Hackett, of Wilmington, visited his parents, Mr. and Mrs. Charles Hackett, this week.

Mrs. A. C. Brower has been visiting her daughter, Miss Veva Brower, at Palmyra, N. J.

Mr. and Mrs. Russell Clotworthy have returned to their home at Washington, D. C., after spending sometime here with Mrs. Clotworthy's parents, Mr. and Mrs. W. S. Slacum.

Mrs. Joseph Christopher is visiting her sister in Baltimore.

Mrs. Sue Turner Mowbray is spending the week in Philadelphia, purchasing millinery.

Mr. and Mrs. George Walker, of Watertown, N. Y., former residents of Federalsburg, are spending some time here as the guests of Mr. and Mrs. C. M. Walker.

Dr. and Mrs. Alfred Pfitsch, the latter a daughter of Mr. and Mrs. W. S Williams, of this town, have left India where they have been staioned [illegible] years and are now en route to the United States. They expect to sail on the Majestic, scheduled to leave March 19th and to arrive at New York March 25h. Dr. and Mrs. Pfitsch have two children, a son and daughter, both born in India.

Mr. Donald Jefferson was host at a jolly penuchle party on Thursday evening of last week where a group of masculine friends first enjoyed cards and later the appetizing sandwiches, cocoa and coffee served. Those present were Messrs. J. W. Stowell, Frank Bridley, G. H. Jefferson, Homer Turner, F. S. Kemp, Ira and Arthur Johnson, Earl and Clinton Poole, J. R. Edmonson, P. C. Cantner, Robert Jefferson, Hiram Longaker and Dr. F. T. Brooks.

WASHINGTON COLLEGE ENDOWMENT FUND CAMPAIGN

Washington College got under way with its Endowment campaign last week. The preliminary organization, in charge of G. W. William has made a substantial start in carrying out organization plans.

The nine counties on the Eastern Shore will be organized for an intensive campaign. Committees-at-large will include all other territory where the college has Alumni; Delaware, Eastern Virginia, Western Shore, Baltimore, Philadelphia, New York City and other points.

The expenses of the campaign will be taken care of out of a special campaign fund contributed by friends of the college. This will leave very dollar contributed to the Endowment Fund intact.

Kent county is fortunate in having as its chairman of the county organization, Allan A. Harris, of Chestertown. In this county, where the college is located, will be conducted the most intensive type of a campaign. The organization will have a committee from each of the districts and will present the appeal of every citizen.

Campaign headquarters have been opened in the Imperial hotel building, second floor. Telephone 306-M., Chestertown, Md. Friends of the college are invited to come to headquarters. Suggestions will be welcomed and information given.

Some are bent with toil, and some get crooked trying to avoid it.

Williston Club Gets Recognition

Again Williston club gets recognition of setting out trees and building bird houses last year. So said Mr. Arthur Newton Pack, secretary of American Tree association, in his address before the Federation of Women's clubs, at Greensboro on Friday last. He asoii.lubiigsM?.tomatoes last. He also recognized the individual tree planters and mentioned the fact that anyone wishing to become a member of the American Tree Association can only become such member by planting a tree or trees and sending his or her name to the association giving proof of having done the work required. Mr. Pack says, "The basis of all knowledg is nature study." Nature has written most of the history of the world. If this is not a good educational principle, then what is?" He further stated, "If ntaure is treated kindly, she will repay man for his labor many fold, but when she is outraged, as in the case of our forests, she will reap t terrible toll. Look at China with her yearly floods. Look at some of our own river areas. The cry is wood. To get wood we must cut down trees. There is an end to this cutting and the time has come for you to take account and see what 81,000,000 acres of idle land in this country is costing you."

"The cost of every commodity you use in your daily life from cradles to coffins is affected by the cost of wood." That is one of the reasons for this educational campaign of the American Tree association. "It is costing you millions of dollars in freight rates, for one thing, to get forest products for your homes from the Pacific coast states. The idle land must be put to work, and we find the American people must have the importance of these things brought to their attention. That was done by one small child last year can be done in much larger proportion, by the clubs as a whole.

CHRIST CHURCH NEWS

Every Wednesday at 4.30 there will be a special service for children, during lent.

Thursday evening at 7.30 there will be evening prayer with an address on the Lord's prayer.

Tuesday, March 18 the people of the parishes in Caroline County are asked to meet Bishop Tyer of North Dakota at 3 p. m.

Eevery Tuesday evening in Lent there will be illustrated lectures on "The life of our Lord" at the Cathedral in Easton.

ORPHANS COURT

Harman Pennypacker and Edward E. Nuttle, executors of William R. Pennypacker, deceased, filed release from Harry K. Davis, cashier of the Eastern Shore Trust Company's bank at Federalsburg.

Charles H. Whitby, Jr., and Alda P. Whitby, executors of Charles Whitby, deceased, filed first and final account of administration and distribution of the personal estate of deceased.

T. Alan Goldsborough, executor of Caroline S. Messick, deceased, filed releases from Caroline E. Redden and Irene Meyer, distributees.

John F. Stevenson, administrator c. t. a. of George A. Stevenson, deceased, filed first and final account of administration and distribution.

In the matter of the sale of the real estate of George E. Noble, deceased, printer's certificate of Order Nisi, filed and the court finally ratified and confirmed said sale.

Professor—Aren't you Mr. Smith?

Student—No, I'm Mr. Smith's brother.

Pro.—Oh, I see, what name please?

—

Willie—I looked through the keyhole last night, when May's fellow was calling on her—

Dad—What did you find out?

Willie—The electric lamp.

—

Keith—Dad, can you write your name with your eyes shut?

Dad—Yes.

Keith—Well shut them and sign this report card.

—

Mother—And did my little pet learn anything today in school?

Her baby—I learned two boys better'n to call me "Mamma's pet."

—

Teacher—Name a few domestic animals.

Student—Horses, cows, and—well, all animals that are civilized.—Exchange.

—

Quite Fur

"Oh, constable, I feel so funny."

"What's the matter, Madam? Have you vertigo?"

"Oh, yes, constable, about two miles."—Melbourne Punch.

A sock on the foot is woth two in the jaw.

DAIRY

Fit Methods to Follow in Production of Cream

Since at the present time, our farmers who are milking a few good dairy cows, are generally better fixed, financially, than those following almost any other line, it seems that we should pay particular attention to the handling of the product, that it may be put on the market in the best condition possible and thereby bring the biggest returns.

Methods which will aid in producing a good product:

Keep the barn and cows clean. Remove manure from stable twice daily. Wipe udder and flanks with a damp cloth, before milking.

Milk with dry hands, into a small top milk pail.

Separate while warm, to insure less waste in the skimmilk.

Wash separator thoroughly after each separation. Use a brush rather than a rag. First use warm water and washing powder, then scald all parts thoroughly.

Do not separate into vessel containing the cooled cream. Cool freshly separated cream before adding it to previous skimming.

Stir cream thoroughly every time a fresh supply is added, using a stirrer manufactured for the purpose.

A cooling tank should be on every farm. Run the water pumped for live stock through the cream tank and then into the stock tank.

Keep cooled cream in a sanitary place which is cool, sanitary, free from odors and well aired.

Cream should be delivered to market at least three times a week in summer and twice in winter.

Cream should not be allowed to freeze.—L. K. Crowe, assistant professor, animal husbandry, Colorado Agricultural college.

Brass Letters on Cans Will Prevent Much Loss

When the owner's initials or number is painted on his cream cans, they have to be remarked frequently, as the marks become dim, due to washing and shipping. In order to avoid this I solder brass letters to the sloping part of the can, just below the neck, writes W. R. Taylor of Missouri in the Rural New Yorker. Copper or brass letters can usually be purchased at the variety stores, but if

POULTRY

Turkeys Are Particular About Winter Quarters

Turkey raising is a distinct and separate business from that of raising chickens; the nature of the turkey is so different from that of the chicken that it requires different management altogether. The turkey still retains many of its wild haunts. Then, of late years, serious diseases have played sad havoc with the business in many parts of the country. Blackhead, particularly, has carried off many thousands, compelling some of the largest growers to quit the business. The farmer who has never had turkeys on his farm is not likely to suffer, provided he starts with perfectly healthy stock.

When diseases can be avoided, the cost of raising a turkey is less than that of raising a chicken, while the former weighs more and sells for more per pound. The fact that turkeys will, from the time they are eight weeks old until winter sets in, obtain the greater part of their living from the bugs, grasshoppers, waste grain and weed seeds picked up in their wanderings over the farm, insures their maintenance throughout the summer at a low cost to the grower.

Breeding stock should always be selected from the flock in the fall, before any have been marketed, at which time the choicest specimens can be picked out. If this has not been done there should be no further delays. Those selected probably would bring a little more money than some of those marketed, but they are also worth more as breeders than the poor ones. Strong, active, healthy birds—those that have never been afflicted with a serious disease—are wanted if the future turkey crops are to prove profitable. The old turkey raiser should separate his breeders from those that are to be marketed before fattening commences, as breeding stock is easily injured by becoming overfat.

To Secure Maximum Milk Production Give Water

To secure the maximum milk production, cows must have plenty of fresh water and salt, according to A. C. Ragsdale, of the Missouri College of Agriculture. Cows in milk require ten to twelve gallons of water daily, while high producing cows will drink even more. When cows are receiving succulent feeds, they will naturally drink less water than those on dry feed exclusively.

MARYLAND GROWERS INCREASE PROFITS

Material Gains Made By Men Who Entered Canning Compact

Princess Anne, Md., Feb. 29—Cooperative packing of tomatoes in Somerset county during 1923 has given to the grower an advance of 5 cents a basket, and the satisfaction of knowing that the very best results possible were obtained.

At planting time a number of growers of this section agreed with a packer that the crop should be harvested and packed upon a 40-60 basis.

Each party to the agreement was to be allowed the cost of production and when selling of the season's crop was completed the grower was to receive 60 percent of the profit, and the packer the remaining 40 percent.

Reckoning Made

Tomatoes during the harvest reached the price of 22 cents per basket. To those in the compact the packer advanced, with the delivery of the fruit, the estimated cost of production, 17 cents a basket.

After the close of the packing season, meetings were held and the time of sale of the pack was agreed upon. The last of the pack has been disposed of and the final reckoning made.

With the advance made during the season the co-operative venture has given those in the deal 27 cents per basket. The best price paid to the grower of Somerset, not in the co-operative scheme was 22 1-2 cents a basket. This plan has been tried out successfully in two places in Delaware.

Already arrangements are being made for increased acreage of tomatoes in 1924 and the enlarging of the packing part of the program.

Somerset county has never been found profitable in the tomato industry. The prices have generally been much lower than in the neighboring counties.

Dorchester Higher

During the past season with the price in Dorchester at 30 cents a basket, the best obtainable in Somerset was 22 cents.

C. C. Gelder, of Princess Anne, the originator of the idea in Maryland, says that had it not been for the fear of poor storage he is positive that with the holding of the pack longer the grower would have obtained 30 cents for each basket.

W. Melvin Stewart, secretary of the Maryland Farm Bureau Federation, has kept in touch with the experiment and says that it is the solution of the canning problems. He sees eventually the entire product of the Eastern Shore graded, standardized and sold under one label, just as California products are handled.

The official considers this little experiment the greatest step in the canning industry in years. W. McC.

HAUL SEINE FISHING WILL SEE REVIVAL

Sharptown Man Plans to Use Nets For Nanticoke Herring

Sharptown, Md., March 2—William Hutchings has revived the haul seine industry here, the first one to be used here for 42 years. He has leased from Herman Tull a long river frontage, the exact spot where the seines were hauled annually for more than 100 years.

Thousands of fish were then sold here and hauled many miles into the forest.

Similar To Present

The seines were laid aside for the weir, made of pine staves and woven together with white oak splits, and set very much as the present fishing pounds are set with knitted twine fastened by poles driven into the mud.

Hutchings will begin to fish as soon as hte herring make their appearance. They usually come in large schools about the middle of March, move on up the river into creeks and smaller streams and return, and those that escape the catching device pass on out and return no more until spring.

Few Fishing Barges

There will be less than a half dozen barges fishing for shad and this haul seine and five fishing pounds will constitute the preparation for the spring catch.

A great industry a few years ago has been reduced to very small proportions. The seasons became so uncertain, and the price so low that the business of fishing here is almost a thing of the past.

Mrs. Crandall (Iowa) Tells How She Stopped Chicken Losses

"Last spring, rats killed all our baby chicks. Wish I'd known about Rat-Snap before. With just one large package we killed swarms of rats. They won't get this year's hatches, I'll bet." Rat-Snap is guaranteed and sells for 35c, 65c, $1.25.
