WM. POTTER.

Sept. 22. w

Dr. Hull's Truss.

FOR THE RELIEF AND CURE OF HERNIA OR RUPTURE.

DR. AMOS G. HULL invites the attention of all persons afflicted with RUPTURE, to the following testimonials in favor of his newly invented HINGE TRUSS.

VALENTINE MOTT, M. D. Professor of Surgery, New York, states as follows:—"I have, for several years past, paid much attention to the construction and use of Trusses, and it gives me pleasure to state that the Truss invented by Dr. Amos G. Hull, possesses in my opinion, both in structure and principle, qualities and advantages, which are entirely original, and which render its application in ALL cases an efficacious remedy to prevent a descent of the bowel, and that in MOST cases it may be applied with a reasonable prospect of cure. These advantages and qualities consist in the *concave* form of the rupture pad towards the diseased part;—the limited mobility of the hinge and shoulder joint," &c.

"The great and signal benefits which are produced by this Truss, result from its strict subservience to, and accordance with scientific and surgical principles. Its mechanical adaption to the parts, the simplicity of its construction, the limited motion nicely graduated by experiment to the different attitudes of the body, and to the action of the muscles. The permanency and security of its location on the body, and its pressure in the circumference of the abdominal ring, are qualities the tendency of which is to *strengthen and restore the weakened parts, to contract the aperture and ultimately to accomplish a cure of the disease.* The operation and effect of this Truss are therefore directly the reverse of all Trusses formerly in use, which being *convex tended to enlarge the dimensions of the rupture opening* These defects are well overcome by the principle embraced in Dr. Hull's invention, and experience has confirmed me in the great and superior utility of his instrument, which I have recommended to general use, and adopted in my own practice to the exclusion of all others. I am of opinion, that the union of physical design and mechanical structure in this instrument, render it what has long been the desideratum of practical surgery in Europe and America."

Extract from the second edition of "Thatcher's Modern Practice"—page 678 Boston, 1826.

"Dr. Hull is exclusively entitled to the credit of first adopting the true surgical principle for the cure of Hernia. This great desideratum is admirably accomplished by giving to the pad of his newly invented Hinge Truss a *concave* instead of a convex surface, by which it corresponds to the convexity of the abdomen. By this construction, it is evident that the greatest degree of pressure is applied to the circumference of the aperture, which tends constantly to approximate the Hernial parieties and afford them a mechanical support.—The correctness of the principle upon which it is constructed has been abundantly tested by experience. Numerous instances have occurred, in which Hernia has been cured by it, which had proved intractable to other Trusses."

GYRUS PERKINS, M. D. of New York, states as follows:—"The tendency of all convex pads is to increase the disease by forcing their way like a wedge into the opening, & thereby increasing the size of the breach. The Truss invented by Dr. Hull, and described in his pamphlet entitled 'Observations on Hernia & Trusses' has a plain pad fixed on a concave plate, & makes the strong pressure by its circular margin, and a diminished pressure by its centre. It thereby not only prevents the escape of the bowel, but approximates and often secures in contact the ruptured part, so as eventually to effect a radical cure."

Dr. JOHN GRAY, of New York, says:—"I have witnessed *numerous instances*, in which other Trusses have been laid aside after proving hurtful and inefficient, and exchanged for the Truss of Dr. Hull, which has in ALL these cases effectualty and comfortably secured the rupture; *not unfrequently effecting a perfect cure of the disease.*"

Dr. SAMUEL OSBORNE, of New York, states:—"I have known Dr. Hull's Truss worn with perfect comfort, where other Trusses were very tormenting or totally unbearable, and I have known *several cures* effected by Dr. Hull's Truss, where it would have been impossible to attain the same result from any other known Truss."

"While in the Army of the United States, I procured the discharge of several soldiers, because I was unable, with any known Truss, effectually to secure the rupture; with Dr. Hull's Truss I am satisfied I could have rendered them useful to the Government; comfortable to themselves, and in many cases effected perfect cures."

Dr. Hull's Truss does away the necessity of straps, answers all the good intentions of any hitherto known Truss, and obviates all the objections which obtained against them."

Testimonials of like respectability might be added to any extent. This Truss is now introduced into the Army and Navy, and most of the public Hospitals and Alms Houses in the United States.

N. B. Dr. Hull's Trusses, adapted to the different species of Rupture, may be obtained, and are fitted to patients, at the Office of Dr. KNAPP, No. 37 East Fayette-street, a few rods east of the City Hotel. Persons residing at a distance, can be fitted by sending a measure of the body around the hip, and specifying the kind of Rupture.
