POETRY.

The following beautiful lines, from an English publication, cannot be too frequently perused. The language is simple, and the moral highly instructive.

THE DOVE AND THE ANT.

An Ant, with a burden that weighed near a grain,
Walking home by a river with labor extreme,
(The PLEASURE of industry sweetened the PAIN)
Her little foot slipped, and she fell in the stream.

On a tree, near the place, sat a beautiful Dove,
Who saw the misfortune, and mourned for it too;
And urged by the feelings of pity and love,
A bough for the poor little struggler she threw.

Thus kindly supported, thus rescued from death,
In safety she landed—her danger was o'er
For a mild passing zephyr, with prying breath,
Soon wafted her kindly and gently to shore.

The Ant's little bosom with gratitude swelled,
And she said (or perhaps she but *wished* she could say)
"By my minikin form I, alas! am withheld
From being allowed this kind act to repay."

Ah! there is not a creature, however obscure,
That the bounty of heaven has suffered to live,
(Though it cannot perhaps its own safety ensure)
But is able to others assistance to give.

And thus did the Ant, with UNSPEAKABLE joy,
The Dove's kind assistance most aptly repay:
A Fowler her friend was intent to destroy,
She stung him, he screamed, and the Dove flew away.

Despise not the humble—O! treat not with scorn
The poor and the low, when so useful we see:
We all of us equally helpless were born,
And our lot was assigned us by Heaven's decree.

$100 Reward.

I will give the above reward for the apprehension of negro man,

NED RIDEOUT,

who run off, from the farm of Mr. Mathias George, near Wye Mills, on Thursday the 27th Feb. (provided, he is taken out of Queen Anns or Talbot counties) and fifty dollars, if taken in either of said counties; I will in either case, pay all reasonable expenses, for his being confined in any Jail, so that I get him—Ned, is about 36 years of age. He may be *readily* known by a large scar on the forehead, extending through the upper lid of the right eye.

Ned, has been living for some years near the Trappe, and Oxford, and is well known in those neighborhoods. He has for several years, been in the habit of going to Baltimore, and staying one or two months at a time, and I think there is no doubt, but what he will make for that place, so soon as an opportunity offers.—Captains of boats, sailing from the lower part of Talbot, are particularly requested to keep a lookout, that he does not get on board their boats.

SHARPE'S
NEW VARIETY

MULBERRY.

The undersigned, being General Agent for George W. Benson & Co., the present Proprietors of this celebrated species of Mulberry, would respectfully call the attention of his fellow Citizens, interested in the culture of trees and the growing of silk, to the superior excellence of this variety over all others, as proved by experiments actually made by the responsible individuals whose names are attached to the following certificates.

To guard the public against deception, all agents for their sale will have a certificate of agency, signed by one of the proprietors or the subscriber. To those who wish to bring them forward in hot houses this winter, a few choice scions are offered, at five dollars each. The proprietors wish to have a few grown this season in each state in the Union, that the country generally may become acquainted with their superior excellence. Orders, will therefore be received from any section, and as practicable will be supplied on the following terms: viz., where ten or more buds are ordered, the company will engraft and warrant to live, at five dollars each, or they will furnish roots already engrafted, and warranted, at five dollars each.

Any person who may procure and forward orders (and become responsible,) for twelve or more buds or engrafted trees, shall be entitled to ten per cent. Orders from a distance should be forwarded early that the services of experienced nurserymen may be secured to deliver trees or buds and do the engrafting All Editors who may give this with the following certificates, or their substance abridged, one insertion, and send two of the papers containing it, to the subscriber, shall be entitled either to one good scion, or an engrafted tree. All communications, POST PAID, will receive attention.

ELIAS SHARPE.
Windham, Conn.
Jan. 22, 1840.

BELCHERTOWN Oct. 31, 1839.

Whereas considerable interest is manifested by the public, respecting a new and extraordinary kind of Mulberry, called Sharpe's new variety—and we, the subscribers being father and son, having raised the original tree, make the following statement of facts concerning its origin and history. Nine years ago, last spring we sowed some imported mulberry seed, among which this tree came up, and the second year from the seed it grew in one season twelve feet eight inches, and bore a leaf about the size of the morus multicaulis, but much thicker and heavier. After the second season the tree was transplanted, and has never been cultivated; yet at present is a rapid [illegible] of the wood kind we have ever saw, measuring at this time twenty three inches around the trunk, tapering but little till it branches. It has never been sheltered or in the least defended from storms or frost and endures the weather equally as well as apple or forest trees. Last spring it was critically examined, when not the tip of a limb, or bud, could be found in the least injured by the winter. We should think it puts forth leaves from one to two weeks earlier in the spring than the white mulberry The leaves never have been spotted, or any way defective, like other kinds, but remain fresh and perfect until killed by the frost The other trees standing in the nursery with it, grew but 4 or 5 feet in two seasons, and resembled the white mulberry

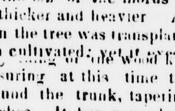

Having fed the leaves, together with other varieties, to worms for some years past, and it being evident, by several experiments, that they preferred this leaf to any other, this fact induced us, last season, to feed a number exclusively on the new variety, and an equal number on the multicaulis. Accordingly, we hatched our worms early in the month of August last, equally divided them kept them in the same room, fed and tended them as nearly alike as possible. Each appeared to be healthy and did well. Those fed on the new variety wound about three days the first. After all had wound, we selected forty of the best cocoons from each parcel, and by weighing each, found that twenty seven cocoons of the new variety were as heavy as forty of the best made from the multicaulis.

In our opinion, the above mentioned tree, in all important qualities, is preferable to any other kind, and must prove a valuable acquisition to the silk-producing interests of our country, and give entire satisfaction to the grower.

It is proper to say, we have now no interest whatever in the tree, and therefore no inducements to make the above statements, but justice to the public and the proprietors

The charge for Tuition will not exceed $6 25 a quarter, or $25 00 a year, and boarding can be had in the village and neighborhood at various prices, never exceeding $2 00 a week. St. Michaels is as healthful as any town in the United States and as beautifully located as any on the Eastern Shore of Maryland—it being on an isthmus of 300 yards in width between the waters of Choptank and Miles Rivers. Besides the advantage of health the village possesses a very great one as a site for a literary institution in the absence of all the demoralizing allurements which render towns generally objectionable in the estimation of parents having children to educate. The notice and patronage of the public is respectfully solicited.
