"Howell's Point" for Sale.

THE western portion of the above named valuable tract of Land will be offered at public sale, at the front door of the Court House in Easton, on

Tuesday, the 26th of July, at 3 o'clock P. M.

It contains 175 ACRES of cleared and 59½ Acres of Wood Land, heavily Timbered.

The improvements are ample—the land unsurpassed in Talbot for fertility, and location one of the most desirable on the Eastern Shore. Extending into the broad waters of the Choptank, the frosts of spring early cease to check vegetation and render the point remarkably valuable for gardening purposes, while steamboats passing to and from Baltimore, afford almost daily conveyance for its products to market. The beautiful town of Cambridge is in sight and is also a fine market place.

Fishing for Shad and all other varieties of fish found in the Choptank may be successfully carried on a stone's throw from shore. In winter Wild Ducks and Geese are abundant and the Point is considered excellent as a gaming place.

THE TERMS are a credit—one fifth to be paid in ninety days from day of sale—balance in two instalments of eighteen and 36 months. Purchaser to have bond prepared at his own expense and to be approved by the Commissioners.

MEDICAL NOTICE.

Dr. Samuel P. Benny,

HAVING determined to commence the practice of medicine in the Chapel District of this county, offers his professional services to the citizens of said district, and hopes by prompt attention to the duties of his profession to receive a share of their patronage. He can be found at the residence lately he pipes impart. Beneath the waves of the British channel it sheathes the uncorroded wire, and brings Paris and London within the limits of a watch-tick. Its tubes remain buried in damp ground, without injury for years. By attaching one end of a tube to a gas-pipe, light may be conveyed by hand to every portion of a building. It has especial qualities for the transmission of sound. It conveys the voice to the ear of the deaf, enables it to speak to the engineer through the rear of a railway train, carries domestic messages to different parts of the house, open the closed ears of the congregation to the words of the minister, and faithfully transmit the slightest whisper to the miner in the lowest depths. For bleaching and chemical purposes its resistance to acids makes it particularly available. For pump barrels, syphons and suction pipes it is growing into extensive use. The recent discoveries of our townsmen now make it an absolute necessity for boots and shoes, clothing, car-springs, belting, carriage-cloths, and a whole army of appliances. A thin coating, spread on the fine silk, forms a fabric light, beautiful and glossy, dark or light, and perfectly water-proof. While it may receive the elasticity of India rubber, it has the advantage of assuming the stiffness and density of bone. In opposition to every known law of physics, it *contracts* with heat. When spread on cloth, a given quantity will cover 20th July.

WANTED.

Proposals to Build a School House.

THE Trustees of Primary School District No. 2, Election District No. 1, of Talbot county, will receive proposals up to the 1st day of July next, for building a new Primary School House in the town of Easton. The contract will be awarded to the bidder offering the most desirable proposals; and the contractor will be required to enter into a contract under a penalty, for the faithful execution of the contract by the 1st day of November next.

The plan of the building determined on by the Trustees is as follows:—a two story frame house, 40 feet long and 28 feet wide—each story to be not less than 10 feet in the clear—the lower room to have a false ceiling of about two feet, to be filled with saw dust, to prevent the noise from above; the frame to be exclusively white oak; the studding to be 4 inches square—the balance of the frame to be of proportionate size; the weatherboarding to be of select cullings one inch white pine, dressed and rabbited; the roof to be of the best quality of cypress shingles; the floors on the first and second stories, to be of the best North Carolina yellow pine plank, tongue and grooved; a rough white pine plank floor in the garret; box window frames, and the sash to be hung with weights—19 windows, 12 lights each—glass 12 by 18; 5 pannel doors;—a six feet passage to be taken off one end of the building, in which is to be a stairway, to form front entrance to second story; two chimneys, one on each side, about midway the house; the building to be underpined flush all around; to be lathed and finished with two coats of plastering; to be painted inside and out with three coats—the doors to be grained oak. The rooms above and below, are to be completely furnished with writing desks for the scholars and suitable desks for the Teachers—each room to be fitted up to seat 75 or 80 scholars—a room on the second story over the passage to be fitted up for a repository of shawls, bonnets, &c. &c.

In short, the contractor will be expected to find all the materials, which are to be of the best quality, including lumber, brick, lime, sand, glass, &c., and to do all the work, and complete the job, including steps to the doors, in a workmanlike manner.

The above plan has been determined on; but if those who make proposals can suggest any other plan for a school house that will possess more architectural beauty, and cost less money and seat the same number of scholars, such suggestion is respectfully solicited to accompany the proposals and will receive due consideration.

Prof. Alex. C. Barry's Tricopherous, or MEDICATED COMPOUND,

FOR Beautifying, Curling, Preserving, Restoring, and Strengthening the Hair, relieving diseases of the Skin, curing rheumatic pains and healing external wounds. Bounded by no geographical lines, the reputation of Barry's Tricopherous pervades the Union. The sales of the article of late years have increased in a ratio that almost exceeds belief. Professor Barry, after a careful examination of his sales book, finds that the number of bottles delivered to order, in quantities of from half a gross upward, during the year 1852, was within a trifle of 950,000.

It is unnecessary to present at length the evidences of the wonderful properties of the Tricopherous when the public have furnished such an endorsement as this. The cheapness of the article, and the explanations given of its chemical action upon the hair, the scalp, and in all cases of superficial irritation, first recommended it to the attention of the people. This was all that the inventor desired. Every bottle advertised itself.—The effects of the fluid exceeded expectation. It acted like a charm. The ladies would not be without it. Country dealers in every section of the United States found they must have it; and thus was built up a wholesale trade of an extent hitherto unheard of as regards articles of this kind. The highest point has not yet been reached, and it is believed that the sales this year will be a million and a half of bottles.

Depot and Manufactory, No. 137 Broadway, New York. Retail price, 25 cents a large bottle.

Liberal discount to purchasers by the quantity. Sold by the principal Merchants and Druggists throughout the United States and Canada, Mexico, West Indies, Great Britain, France, &c., and by Messrs. DAWSON & BRO., Easton.
